# HOMELESS FAMILIES

## 1.0 STRATEGIC FRAMEWORK AND TARGETS

The national strategic framework is provided by Homelessness Act 2002 and More than a Roof whilst Government Targets are contained within:

### Achieving Positive Targets for Homeless people (Homelessness Directorate 2003)

All Local Authorities are expected to meet the Government's target to achieve:

- an end to the use of Bed and Breakfast for homeless families with children, except in emergencies, and even then for no longer than six weeks,
- levels of rough sleeping that are two thirds below the levels recorded in 1998 or lower.

In addition, local authorities are also asked to set targets around:

- reduced levels of repeat homelessness and a greater focus on prevention,
- reduced levels of homelessness against main causes,
- reduced inappropriate use of temporary accommodation and halve the overall use of temporary accommodation by 2010.

The local strategic approach is detailed within **Wigan's Homelessness Strategy**, which includes the following objective:

- To ensure that there is support for people who are or may become homeless, or who need support to prevent them from becoming homeless again.

## 2.0 CURRENT SUPPLY

### 2.1 CURRENT SUPPORTING PEOPLE PROVISION

### 2.2 CURRENT LEVEL OF PROVISION: REGIONAL AND NATIONAL COMPARISON

Figures, supplied by the Office of the Deputy Prime Minister, showing the provision of Supporting People funded services, as at 31<sup>st</sup> March 2003, indicate that the number of units is average when compared to regional figures and below average in comparison with national data. This is in contrast to the level of grant which is average when compared to the national figures and below average when compared with the regional figures.

Number of children entering hostel accommodation where support for children is available (such as play workers)	120 (6% of statutory homeless children)	N/A
Number of people with dependant children entering bed & breakfast accommodation	62 (This does not indicate actual number of children)	0

#### 3.2 SUPPORTING PEOPLE CLIENT RECORD DATA

Every Supporting People funded service (except for sheltered housing) is required to complete a client record form for each new service user. The aggregated data for homeless families is shown in **the tables included in Appendix A**.

The key points from the data are outlined below:

- During the last 3 years between 100 and 211 people on an annual basis have a primary or secondary need identified as “homeless families” (see Table 1)
- There are a range of secondary needs amongst those people with a primary need

identified as a homeless family, however those which have been most often present are women at risk of domestic violence and, although with much smaller numbers, mental health and drug problems(see Table 2) .

**The following data relates only to homeless families as a primary need (between 47 and 173 annually over the last 3 years)**

- 3.5% of homeless families accessing SP services are from BME communities which is greater than the BME population in the community (Table 3)
- The percentage of homeless families accessing floating support services range from 4% to 64% with the remainder accessing accommodation based services (Table 4)
- A consistent pattern has emerged which shows that homeless families are accessing services specifically for homeless families and generic services with a much smaller proportion accessing mental health service (Table 5)
- A wide range of types of accommodation were occupied by Homeless families prior to accessing SP services (Table 6)
- Self referrals and referrals from Housing are the main sources of referrals (Table 7)
- A minimal proportion of people require assistance under any of the following statutory framework with the exception of the homelessness legislation under which approximately 82% of homeless families were entitled to assistance between March April 2003 and March 2006
  - Care management (Table 8)
  - Care Programme Approach (Table 9)
  - Probation Service or Youth Offending Team (Table 10)
  - Drug Intervention Programme (Table 11) – no data available until 06/07
  - Statutorily homeless and owed a main homeless duty (Table 12)
  - Care Programme Approach (enhanced) (Table 13)
  - Multi Agency Protection Panel (Table 14)
- Number of homeless families accessing SP services subject to the requirement of an Anti Social Behaviour Orders (Table 15) *No data available*
- Geographical location of the accommodation occupied by homeless families immediately prior to receiving support (Table 16)

### 3.4 HEALTH AND EDUCATIONAL NEEDS OF HOMELESS FAMILIES (insert date/up to date information)

Wigan Council has a designated Educational Welfare Officer assigned to work with homeless & vulnerable children. Since her employment in September 2003, the EWO has had 94 referrals from hostels & schools about children from homeless families potentially missing out on their education. Housing related support services, therefore, need to be planned in such a way that they facilitate children maintaining their schooling.

### 3.5 CONSULTATION

#### Providers and Stakeholders 2004

Information obtained through interviews with Providers in 2004 and from the group focusing on Homeless families/Domestic Violence and Teenage parents at the Supporting People Consultation Event in November 2004:

- Floating support required for (former) homeless families – either moving on from hostels or moving direct into tenancy from property which is lost (Cons Event)
- Shortage of accommodation for people to move on – “people can be waiting 6 months or 9 months or 12 months” (Provider)
- Should homeless families be supported primarily in independent tenancies with support rather than in hostels/projects? Difficult to move from a family home to a hostel flat and some people don't want to move into hostels (Provider)
- What happens to people who are intentionally homeless – we don't know what happens after someone leaves the hostel? (Provider)
- Given the high number of teenage parents accessing services – the TP Support Task Group wish to expand approach adopted in Bamber to other homeless provision (Teenage Parent Support Task Group)
- Women at risk of domestic violence with highest levels of need referred to homeless families unit (Provider – Domestic Violence)

#### Service Users View 2004

Service users gave the following views when interviewed by Add a Voice at one of the Projects in 2004:

“More support for families”.

“More places, but separate for families, children need to be protected from seeing some behaviours. Parents need to take responsibility for their own children as well”.

“I think with here they should not mix single people and families together. Some people have had to complain about noise levels from younger men in particular”.

“More places like this ...”

## **4.0 CURRENT PROVISION: ARE CURRENT SERVICES MEETING LOCAL NEEDS AND PRIORITIES?**

### **4.1 ASSESSMENT AS AT 31<sup>ST</sup> MARCH 2005**

Increasing levels of homelessness has resulted in the following changes in provision during the last year:

- Use of dispersed tenancies for emergency accommodation
- Plans to develop emergency single homeless persons accommodation with capital funding from the Housing Corporation
- Increasing numbers of single people accessing homeless families accommodation
- Use of bed and breakfast for families during the last year

In addition, the client record data (see 3.2) demonstrates that services categorised as for homeless families are offering accommodation/support to a wide range of client groups. Consultation has shown that this is a cause of concern for service users.

As a result of the above factors, we will undertake a review of the use of emergency accommodation with a view to more effective use of existing provision in relation to

- the management of risk
- offering a range of temporary accommodation in order to minimise the disruption to support networks and schooling.

Consultation with Providers and stakeholders has shown that there is a gap in floating support services for families at risk of homelessness/threatened with homelessness and for (formerly) homeless families (people moving out of hostels **and** people who presented as homeless but did not move into temporary accommodation). Wigan & Leigh Housing currently record applicants support needs and are currently investigating if this can be collated on an ongoing basis which would provide evidence of the proportion of homeless families with support needs.

#### **4.2 ASSESSMENT AS AT JANUARY - MARCH 2007**

Still to be included

### **5.0 GAPS AND PRIORITIES**

#### **5.1 GAPS – MARCH 2005**

The key **gaps** identified in services include

- Short to medium term floating support for families (currently there is only very short term resettlement support)
- Access to affordable housing
- Information about current services
- Temporary accommodation

#### **5.2 PRIORITIES – 2005/6**

***2005/6 services for homeless families have been placed in Priority Band 2***

Priorities are as follows:

- Review use of emergency accommodation.
- Develop floating support if funding available (Priority Band 2) and in line with the recommendations of strategic review of floating support.

#### **5.3 REVIEW OF GAPS: JAN – MARCH 2007**

- Provider Forum – Consultation. Move on seems to be *less* of a problem than was... although less properties becoming available for letting in social rented sector (HS stats), suggests vacancies that do arise are going to people in greatest need. Council's housing allocation policy recently approved but not yet implemented – will assist further. Appears that greatest single factor is availability of RSL properties. WALH have 50% nominations on all RSL vacancies, with exception of Arena at 100%.

- Homelessness Forum Consultation
