Overview

Situated in the West of the Borough, Locality 2 has a general population of 62,630 of which 14,205 (23%) are 18 or younger.

Poolstock has the highest number of Accident and Emergency attendances for under 5s, highest number of non elective admissions with a long term health condition and highest number of non elective admissions for under 5s. In addition Poolstock has the highest number of outpatient appointments for under 5s.

Worsley Hall North has the highest number of CAF assessments opened, the highest number of NEET, the highest rate of children with 15% unauthorised absence and the most lone parent benefit claimants in locality 2.

Norley East has the highest number of gateway referrals, the lowest rate of children showing good levels of development at EYFSP, most free school meals, highest rates of key stage 4 SEN children and the highest number of children living in poverty in the locality.

Marsh Green West has the highest number of confident families in the locality and the highest number of looked after children. Marsh Green East has the highest number of first time entrants to the youth justice system.

To gain a more general overview of each LSOA, consult the matrix on pages 39-41.

NB: A locality rank is given for each element. If a locality is ranked 1st, this would mean that the locality has the highest numbers of that element. A rank of 1st in Looked After Children would mean that that locality has the highest numbers of Looked After Children. Red lines on graphs indicate locality average. As some of the datasets contain low figures, any values under 5 (or under 10 for social care) have been suppressed to avoid identification of individuals.

Population—Actual Figures

Overview

The number of children in locality 2 is similar to the other 4 localities, although there is a slightly lower number of children in the 11-15 category. The graph illustrates an even mix of males and females across all four age bands.

Population—Rates per 1000

Overview

Locality 2 has a slightly highest proportion of 5-10 year olds than the other localities and the lowest proportion of 11-15 year olds although this is comparable to other locality areas.

BME Breakdown

Rate of Non-White British in Population by Locality
