

I am part of a research team working on a project to document school closures in the UK before, during, and after the COVID-19 pandemic. The US National Institutes of Health is funding the project. I am responsible for a team whose task is to compile data on dates of closures of schools individually and council-wide. I have tried, without much success, to collect these data from news article and local council district websites.

I am writing to you in the hope that you have a file you might be able to send me that tabulates the dates that schools in your area closed over the period from the 2019/2020 school year through the current school year (2022/2023). For our purposes, it would be great if those data also include information on school closures that occurred for other reasons (e.g. industrial actions or weather related closures).
