

**Request:**

What are the new yellow cameras that are going up all over wigan, with the camera perched on top, and the 3 or 4 black coloured camera/radar looking things below them? They're all over the Northwest, but we have them in Wigan area, so I'd like to know what they are, who is using them, who will be monitoring the information they gather and how many there are in the wigan Borough, including current and future locations

**Response:**

These cameras are the responsibility of TFGM, and the local authority has no governance over this infrastructure.
