

Request:

To enable the collation of environmental data relating to the CO2 emissions associated with cremations undertaken by Local Authorities, we would request the following information:

1. Volume of Gas used in a 12-month period by the Cremators at your facilities. (If figures for the cremators are not separated out, then the figures for your Bereavement Service operations would be acceptable if size of facilities are provided.)
2. Number of cremations in that 12-month period.

Response:

1. 70969m3 from 1st April 2022 to 31st March 2023
2. 1271 cremations from 1st April 2022 to 31st March 2023
