Request

Could you provide a copy of your street lighting inventory. In particular I am looking for the following fields for each light:-

1)   Location (lat/lon or easting/northing)
2)   Lamp type (e.g. LED, SON)
3)   Lamp power (Wattage or Lumen output)
4)   Lamp height
5)   If the lamp is dimmed or turned off for part of the night.
6)   Any additional fields of data held for each light would be gratefully received, but not required.

CSV or Excel format would be preferred.

Response

Please see attached Excel document showing full Extract from our Mayrise system and also an extract from our CMS system showing dimming values.
