

Request

The former/existing Local Authority flats located on Newton Close, Wigan. WN1 2LH are non traditional build construction. They appear to be a type of Precast concrete build. Please confirm the type of construction used - for example Bison, Reema, Orlit, Unity, etc. Can you also confirm if they are designated as 'defective' construction types, as defined by the relevant Housing Acts?

Response

We can confirm that flats on Newton Close have never been in Council Social Housing Ownership.
