

We are now in the process of updating our Truckers Atlas again and would like to know if you have an updated file with your area's bridge heights please?

Also, it would be useful to have any details of heights that have changed in the last 2 years (between Autumn 2021 & now) that can be highlighted to me for an amendment?

Any information that you could kindly pass to us would be of great benefit to us and our customers.

*One recent Amazon review - Our drivers were impressed with the updated atlas. These atlas's are an important part to our routing on a daily basis as our loads are often at height*

I have used the contacts I dealt with 2 years ago, so there may be some duplication in recipients within the council departments.

We do not have a digital file of bridges with height restrictions but have compiled a list of all bridges over adopted highways with a height restriction (ie less than 5.03m)

There have been no heights changes on the previously supplied information within the in last two years.

**FOI 14700 - Bridge Height Restrictions**
