

Request

We'd like to explore the sector's relationship with data, strategies for data modernisation and how it is collected, stored, and categorised. We will also look into data usage, standardisation, open data, and transparency data.

We would like to make a Freedom of Information (FOI) request and ask you to answer the questions in the attached spreadsheet. There is the option to answer questions in a dedicated column or you may highlight the intended answer.

Service(s) please see attached Excel document for questions and responses.

Response

Please see attached completed Excel document
