

REQUEST		RESPONSE
<p>Please can you advise the figure that is being reported for the cycle lane route on Preston Rd is costing £880,000. If this figure is not correct please advise how much this work that is taking 4 month to do?</p>		<p>The Council has let a single contract for the construction of the Standish Mineral Line Extension, which combines several work packages including all the off-road sections of the route, the Old Pepper Lane crossing and the Preston Road works.</p> <p>The total contract value is £859,759. However, it is not possible to disaggregate the total value into individual works packages, and so no specific value can be provided for the Preston Road element of the scheme.</p>
