

Request

I am hoping somebody can help me please. We have recently purchased a competitors database with a few Wigan sites. Within this portfolio, to ensure that my sales team do not make excessive contact to the council directly ... I wondered whether you had a list of sites that had fall protection and lightning protection assets installed? This way, I can ensure that their time and your staff's time is maximised by not dealing with endless enquiries regarding the inspection services we provide. Would this be something that you can provide to me please?

Response
