

Request

I have just completed the community interpreter course and I'm looking at trustworthy agencies but most importantly I would like to work within my community and the council, my GP practice mentioned they use whoever Wigan council provides so I assume their info is limited too, so could I get some information on who you use or what the procedure are if a client is to be (in) need of an interpreter?

Response

Adult Social Care interpreting services are provided via Manchester Council, the link is provided below and this also allows the requestor to register as a freelancer too.
