

Request

I would like to know how much maintenance work has been undertaken in the last three years by Wigan Council on Pen Leach Brook for the sake of flood prevention. On each occasion, could you detail what work was done and provide an overall cost for the work done. Could I have the data provide in the following format:

Date work was done
what was done
how much it cost the council

Response

Nil. Wigan Council do not have the responsibility to undertake maintenance on Pen Leach Brook.

The Environment Agency as the governing body for main rivers and Forestry England as the landowners are primarily responsible for the maintenance of Pen Leach Brook.

As such, I would advise that you could send your enquiry to those agencies.
