

1. Pedestrian crossing lights on Market Street Hindley were upgraded recently. They have equipment on the top of them.
 - a. Can you state what this extra equipment is, what is or will it be used for, how much it cost for this equipment.
 - b. Has any council/mp received any monies from a company or body in respect of fitting this equipment? If so, who has and how much?

Traffic signals and its associated equipment is managed and maintained by Transport for Greater Manchester (TfGM). As such Wigan Council do not hold this data. Therefore, I would advise that you will need to direct this part of your request directly to TfGM.

[Transport for Greater Manchester | Transport for Greater Manchester \(tfgm.com\)](https://www.tfgm.com)

2. I also believe that all councils are signed up to C40, 15/20 min cities/towns, clean air zones.
 - a. Can you provide me with details of this, any work that is to be carried out and when it is scheduled for.
 - b. Has there been any public consultation on any of this?
 - c. Who is funding any of this?
 - d. Has the council or mp received any monies in respect of any of this for funding etc? If so who has received it and how much

Re C40 cities:

- a) Just under 100 cities globally are members of the C40 cities network. Within the UK, only the city of London is registered as a C40 city member. Neither Greater Manchester Combined Authority, nor Wigan Council is signed up to C40 cities.
- b) Not applicable as Wigan Council is not a member of C40 cities.
- c) Not applicable as Wigan Council is not a member of C40 cities.
- d) Not applicable as Wigan Council is not a member of C40 cities.

Re 15/20 min cities:

Regarding 15/20 min cities, there is a reference to the concept within the Streets for All Strategy produced by TfGM – see [Streets for All | Transport for Greater Manchester \(tfgm.com\)](https://www.tfgm.com). Otherwise, the phrase isn't in use in Wigan. Wigan Council does have a Planning for Health supplementary planning document [Health Supplementary Planning Document \(wigan.gov.uk\)](https://www.wigan.gov.uk) and a Development and Air Quality supplementary planning document [Development and Air Quality SPD \(wigan.gov.uk\)](https://www.wigan.gov.uk)

RE Clean Air Zones

All the background history/reports/funding information and latest position can be found at [Home | Clean Air Greater Manchester \(cleanairgm.com\)](http://Home | Clean Air Greater Manchester (cleanairgm.com))

Wigan Council has received the following monies in relation to the GM Clean Air Plan

- £70,000 for a support officer
- £35,290 for works associated with ANPR lighting columns
- £6,900 for CAZ sign sticker works
- £3,000 towards costs for feeder pillar for an EV charger site
- £1,360 for lining works on the EV charger sites parking bays
- £8,666 towards costs associated with Wigans EV chargers

3. 6G masts are being put up in other areas,

- a. are there any plans to erect any in Wigan? If so what areas?
- b. What tests have been carried out into the health aspect of these?

Wigan Council does not install this type of equipment, it is usually installed by the telecoms utility companies. As such Wigan Council do not hold this data. Therefore, I would advise that you will need to direct this part of your request directly to the appropriate telecoms utility companies. Any planning applications that the Council receives for the installation of this type of equipment, that may be subject to planning regulations, can be viewed directly on the Council's planning webpages, which can be accessed directly via:

4. Large 5G masts are being put up all over Wigan.

- a. Can you tell me what areas are going to have further ones erected in Wigan.
- b. What investigation has been done into health and the 5G towers, please provide that information.
- c. What consultation was done in respect of erecting these?
- d. Who is funding this?
- e. Have the council/mp's received any monies from any 5G/6G companies through donations etc, if so who has and how much.
