

I am studying domestic and industrial pollution. I'd like to know

The number of contacts the council had to make in an effort to abate air pollution from domestic and industrial premises. This may include *(but not exclusively)*:

- Visits by council officers (Could be counted as words of advice)
- Investigations Abatement orders prosecution
- Fines fixed penalty notices.
- *Any other contacts*

I'd like the information year by year (over pass 5 years) to produce progressive bar chart.

Below is a table showing the number of reports sent into our service with regards to air pollution, smoke and burning.

No abatement orders.

No fixed penalty notices.

All smoke and burning complaints are now dealt with initially using a log sheet that is completed by the complainant. 5 log sheets were returned completed in 2022.
