

## **Request**

How much revenue has been collected by the council in the last twelve months to the date of this request (*13/11/23*), following the issuing by the council of permits to work on the public highways in the borough, for late completion of roadworks by any utility or company?

Gas, Telecommunications, Broadband and Electricity providers regularly dig up roads having been given permits to do so by the council. Further permits are issued on occasions when work overruns. Companies can be given financial penalties for overrunning. I wish to know how much has been collected by these penalties, by Wigan Council.

## **Response**

Revenue received between 13/11/2022 and 13/11/2023 for late completion of works is £103,987.
