

## **Request**

RNIB is conducting a FOI request to better understand the provision of vision rehabilitation services across England. Vision rehabilitation provides one-to-one training in daily living skills, mobility, and communications, to maximise people's independence, confidence and quality of life.

Please read the data entry notes below before completing the questionnaire.

We use an excel format to improve data gathering and allow us to monitor returns more efficiently.

### **Data entry notes**

- All questions and answer options are shown in column A, and all answers should be entered into column B.
- Please read each question carefully before answering to ensure you provide answers in the correct format. This will either be an 'x', numerical values or free text.
- Some questions have an extra response option for additional information. Here, free text responses can be entered if there is any contextual information you wish to provide that is relevant to the question and figures in your response.

## **Response**
