

Request

Between 1 September 2013 and 1 September 2023, which public buildings within the local authority has the council previously been made aware may contain reinforced autoclaved aerated concrete (RAAC), and on what date were concerns first raised?

Can you provide a list of these buildings and their current use (ie town hall/primary school/public library), in both a written email and spreadsheet format (ideally .xlsx) where possible.

- A) In which of these buildings have further investigations into RAAC been carried out?
- B) Which of these buildings are still deemed potentially unsafe?

Response

Of the 46 community schools that the council is responsible for, no RAAC has been found, however the council is currently in the process of carrying out further detailed surveys of all public buildings. The data you request will only be available on completion of the survey process.
