

1. Does the council currently have a green fleet strategy for converting to EVs/low carbon vehicles?

The council does not have a written strategy. Fleet Services are currently working on a strategy on how the council will transition to alternative fuel fleet. However, as fleet are replaced all options are considered and assessed in line with service need, performance and cost. As a minimum, any new fleet will be Euro 6.

2. Please state the total number of vehicles registered to your council fleet in the following years, and please state how many of these were electric at the end of:

Total Number on Fleet:  
 2021 – 284  
 2022 – 284  
 2023 – 332

Number of electric cars

Number of electric vans

Total number of vehicles Internal Combustion Engine + electric

| 2021 | 2022 | 2023 YTD   |
|------|------|------------|
| 0    | 0    | 1          |
| 1    | 8    | 8          |
| 0    | 0    | 1 (Rental) |

3. Please state how many electric vehicles the council currently has on order?

1 (Maxus ED9 LCV)

4. Please state the total number of electric vehicles charging points available in your council depots at the end of:

Makerfield Way Depot

- a. 2021
- b. 2022
- c. 2023 YTD

- a) 2021 = 4 (inoperative)
- b) 2022 = 4
- c) 2023 = 4

5. For each of the following calendar years, please state the total expenditure on electric vehicle charging infrastructure at the council's depots:

Makerfield Way Depot

- a. 2021
- b. 2022
- c. 2023 YTD

- a) 2021 = £0
- b) 2022 = £9,993
- c) 2023 = £0
