

Request

I'm currently doing research into which councils in the UK currently have tenders for a waste management or Weighbridge software and I was wondering if your council currently had a tender open?

Even If you don't, would you mind sharing what you currently use for your software?

Response

We do not currently have a tender open.

Most of our sites are operated by a waste contractor who organises the weighbridge software. We do have a John Maguire & Sons software system at one of our sites that we manage.
