

I would like to enquire about the following information relating to street light location data for council assets and any or sub-districts within your area.

Please could you provide me with the street lighting location data for your area, preferably in a shapefile or other well-known formats so that these can be plotted. Please could you also provide:

- The locations of streetlights or other powered infrastructure such as illuminated road signs et al in a commonly used format such as CSV and include the geospatial detail of latitude and longitude or similar.
- An indication if any external 3rd parties are utilising this infrastructure within Elexon guidelines or otherwise.
- How many streetlights have been changed to LEDs.
- The annual cost for running the streetlights.

This information can be accessed via:

[Streetlighting | Streetlighting | Wigan Council Open Data \(arcgis.com\)](#)

None

Around 99% of all street lights (36,500) are LED.

For the financial year 2023-24, the running (energy) cost was @£1.7m
