

REQUEST	15925
<p>I am requesting detailed information about the poor hygiene rating given to the Queen Anne pub/restaurant in Golborne in September. I am also aware that there has been another inspection and the new rating will be published "shortly". I would like to know when "shortly" is and whether the initial cause for the poor rating has been rectified.</p>	
<p>RESPONSE</p> <p>I can confirm that the business received a rating of 1 'improvement required' at their inspection on the 7th November 2023 as detailed below:</p> <p>Intervention rating score Compliance with hygiene requirements 15 (major non-compliance) Compliance with structure requirements 10 (minor non-compliance) Confidence in Management 20 (significantly varying record of compliance)</p> <p>Following a request for reinspection, a further unannounced visit was carried out on the 8/11/23 and the hygiene standard had improved and they were given a rating of 4 and was assessed as 'good' in line with hygiene requirements having addressed the contraventions at the previous inspection.</p> <p>Intervention rating score Compliance with hygiene requirements 10 (minor non-compliance) Compliance with structure requirements 5 (good) Confidence in Management 5 (good)</p>
