

Request

- A. Can you please confirm if any of your council depots have the charges in place at present (from the below)?
- a. Please can you provide the number of each you have access to.
- B. If not, can you confirm if there are plans in place to have any of these fitted?
- a. If so which number(s)?
 - b. If so, do you know when?

Charger List

1. AC Charging up to a 22 KW AC charger with Type 2 connection?
2. DC Charging up to 150 kw using a CCS2 Connector?
3. AC Charging using up to 43 KW with Type 2 connection?
4. DC charging up to 250 KW using CCS2 Connector?
5. AC charging using 22 kw charger with Type 2 connection?
6. 3 phase connection using either 32 amp or 63-amp power supply?
7. AC charging using standard Type 2 connection with a 7.5 kw or 22kw power supply?
8. 13-amp socket via an alternative cable

Response

- A. Wigan Council (Fleet/Makerfield Way Depot) has:

4 x 7kw AC Type 2 Chargers
1 x 13-amp Socket
12 x 3-Phase sockets (all in Vehicle Workshop) – not generally used for vehicle charging

- B. Wigan Council are currently reviewing their future fleet requirements which includes a decarbonisation strategy - this will also include infrastructure – chargers, solar, and other options.

At this point in time, no final plan has been agreed and at present no numbers of installation or timeframe for completion has been agreed.
