

FiLiA is a Women's rights Charity operating across the UK. We are collating information on the services available to Women involved in the sex industry across the country. Please could you let us know for your local area:

1. Do you commission a specific service provision to support Women involved in the sex Industry? **No**
2. If yes, which organisation provides the service/s? **N/A**
3. If not – is that service provided locally by other funding, and who provides it? **As part of our specialist sexual health provision in the borough, we commission an outreach clinical support offer to residents and other agencies in the Borough, targeting vulnerable individuals and groups at higher risk of sexual ill-health.**
This service is provided by Locala CIC.
4. Is the service monitored through your Male Violence Against Women and Girls workstream? **No. A revised local violence reduction plan is currently under development which will provide additional opportunities for collaborative monitoring and partnership.**
5. If not, who has oversight? **Public Health Commissioners**
6. Does the service provide distinct support to Women who want to exit the sex industry? **No**
