

I am requesting a breakdown of the number of reported incidences to your local authority of pothole damage to (1) LCVs and vans between 3,000 and 3,500kg and (2) cars that required repairs in 2024, and a breakdown of the total costs of the repairs by vehicle type in 2024.

In particular, can you provide me with:

1. The total number of reported incidences of pothole damage to LCVs and vans between 3,000 and 3,500kg in 2024, that required vehicle repairs.
2. The total number of reported incidences of pothole damage to cars in 2024, that required vehicle repairs.
3. The total costs of repairs reported as a result of pothole damage to LCVs and vans between 3,000 and 3,500kg in 2024.

Unfortunate we don't retain that level of detail in regard to the vehicles GVW etc , large van, car etc , when a claim is registered on the Insurance database, they are logged as "vehicle damage " so we can differentiate vehicle pot hole claims from personal injury claims.

Information provided relates to all vehicles - 172 incidents reported

4. The total costs of repairs reported as a result of pothole damage to cars in 2024.

Information provided relates to all vehicles
