

REQUEST 18046

I would like to request access to any available data on wildlife stowaways intercepted in the United Kingdom between **1st January 2015 and April 2025**, which would be an ideal period for research. Specifically, I am seeking information (where available) on all amphibians, reptiles and invertebrates (non-agricultural pest invertebrate species such as tarantulas, scorpions and myriapods but excluding agricultural pest such as aphid species etc.) intercepted across all modes of transport (air, sea, road, rail).

I would greatly appreciate data **including but not limited to the following fields**, where recorded:

- Date of interception (if available)
- Year
- Species name
- Sex
- Status (dead or alive)
- Country of origin
- Means of arrival (e.g. within cargo, luggage, containers)
- Location of arrival (e.g. which port, airport, city)
- Mode of transport (e.g. ship, airplane, truck, etc.)
- Who reported the presence (e.g. customs officer, public, etc.)
- Whether the interception was commercial-related

RESPONSE

No available data held.
