### **Request**

I believe that there has been a motion passed to put double yellow lines all the way up Hall Lane both sides to stop people parking - as discussed at the meeting in the stables bar the other evening. Will you please confirm

### **Response**

The Haigh Project Team, Traffic and Parking colleagues have held a series of meetings with Hall Lane residents to explore solutions to the traffic and parking issues that exist which are currently making the lane unsafe, particularly at busy periods. We have been listening to residents' concerns and discussing potential solutions that can be trialled. At this stage we have not finalised a solution but the team are working through the detail following consultation with the residents of Hall Lane. We will feedback to the residents in the near future with plans to improve the situation on Hall Lane which are long standing.
