

REQUEST 18481

1. How many households are currently waiting for wheelchair accessible social housing?
2. How many wheelchair accessible homes are there in the existing social housing stock, occupied or otherwise?

RESPONSE

1,332 applicants have indicated that they require an adapted property. 496 applicants state that they use a wheelchair.

1,095 properties have level access or ramped access. We are unable to say if the property is fully wheelchair accessible as it would depend on the layout of the property and internal features such as door widening, turning circles etc which aren't recorded on the property element.
