

## **REQUEST 19006**

Under the Freedom of Information Act 2000, I request the following information:

A copy of the council's register of adopted or maintained Sustainable Drainage Systems (SuDS) assets. This may also be referred to as a Blue-Green Infrastructure asset register.

I request that this data is provided in a machine-readable format (e.g., CSV, XLSX, or GIS formats like SHP/KML). The data should ideally include, for each asset:

- Unique Asset ID Asset Type (e.g., rain garden, swale, permeable pavement, detention basin)
- Precise Location (WGS84 latitude/longitude is preferred)
- Date of implementation or adoption Design capacity or surface area (if available)

If providing the entire register is not possible, please provide a subset of the available data. If you hold this information in a different format, please provide it in the format you hold it.

## **RESPONSE**

The Council as Lead Local Flood Authority has not adopted any SuDS assets, as the relevant legislation has not yet come into force.
