

Request

I am writing regarding the recent Automatic Traffic Count (ATC) survey recently undertaken on Jean Avenue.

As a local resident, I would like to understand both the basis of the data collected and what actions the council intends to take in response to the findings.

Under the Freedom of Information Act 2000 and/or the Environmental Information Regulations 2004, please provide the following information:

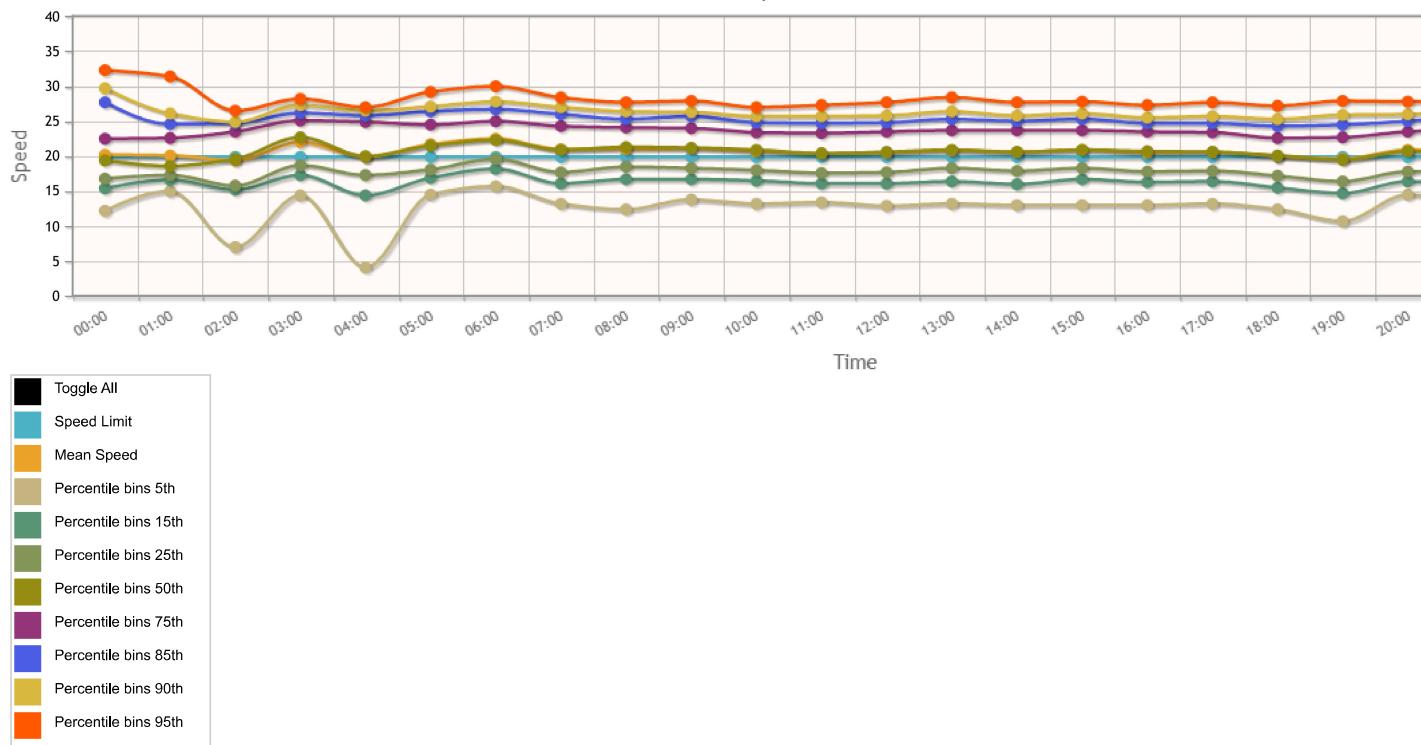

1. The raw ATC data collected for Jean Avenue, including:
 - o vehicle counts and classifications,
 - o speed data (85th percentile, mean, and recorded maximum/minimum), and
 - o the dates and duration of the survey.
2. (I note that street lighting column 002 was used for this survey)
3. Any reports, analyses, or internal correspondence summarising the findings of the ATC survey.
4. Information on what actions or next steps the council is taking (or considering) as a result of the survey's findings — for example, traffic-calming measures, speed enforcement, signage, or monitoring.
5. If no action is currently planned, please outline the reasoning for that decision and the criteria used to determine when intervention would be considered.

Response

- 1) Data provided with the attached information. Survey dates 23/09/2025 – 01/10/2025.
- 2) Exact location unknown.
- 3) None at the present time.
- 4) No further work planned at the present time.
- 5) Information collected is required to add the location to a database to establish the severity of any traffic issues. Traffic speeds are recorded with the most recent 3 year accident record. This enables the Council to identify the worse roads in the borough and should funding become available then further action can be proposed. The location scores as an 'amber' location on a green, amber, red scale. No road accidents recorded.

Speed Statistics Report GM_TEMPORARY_ATC 102500003649 2025-09-23 to 2025-10-01
