Dear all,

Thank you for your time discussing the Chaddock Lane development last week. As discussed please see attached a copy of the presentation that we used in the meeting. This is slightly updated from the one that you may have seen a couple of weeks back, with details of the link to report evidence of any planning breaches in the last slide.

We will await the list of questions that you are collating following our meeting. As we mentioned it would be very helpful if within that list, you could confirm the specific outcome(s) that you want to see – this will help us direct our responses and advice going forward.

Many thanks
David

Astley warehouses

October 2025

2006 Unitary Development Plan

*** EM1A Primary Employment Areas**

Within the Primary Employment Areas, development for, or changes of use to, uses within Classes B1, B2 and B8 or other employment uses will be permitted provided that there will be no unacceptable environmental, amenity, highway, road safety or other adverse impact.

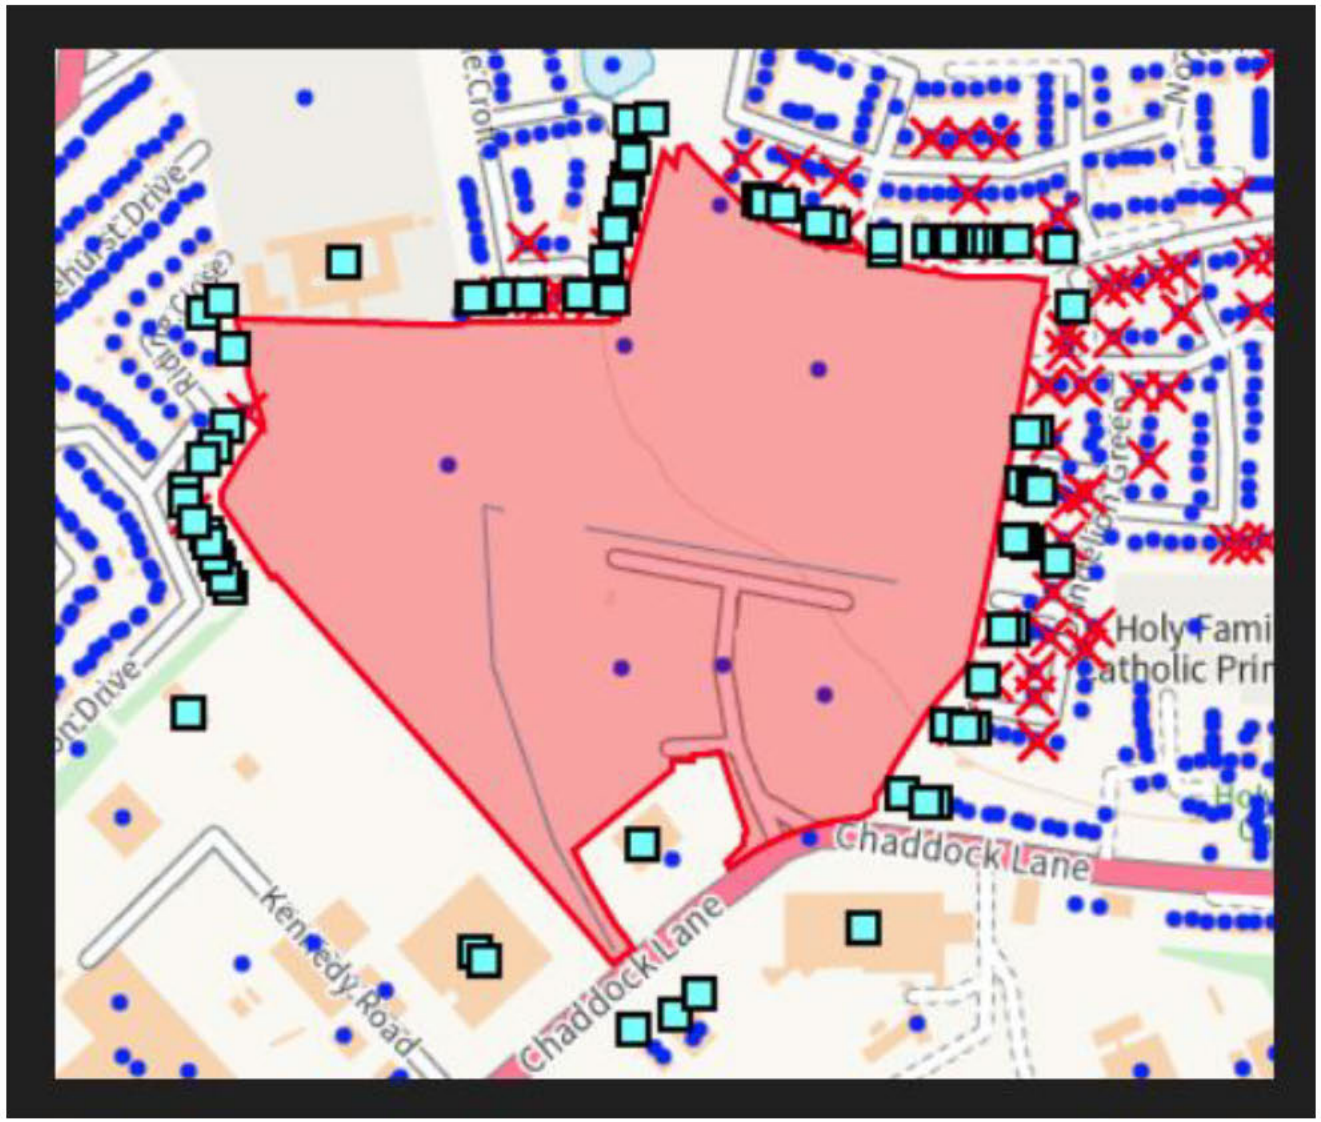
2006 Unitary Development Plan

Uses envisaged:
B1 (offices), B2 (manufacturing), B8 (storage & distribution)

2017 outline planning permission

2017 outline planning permission

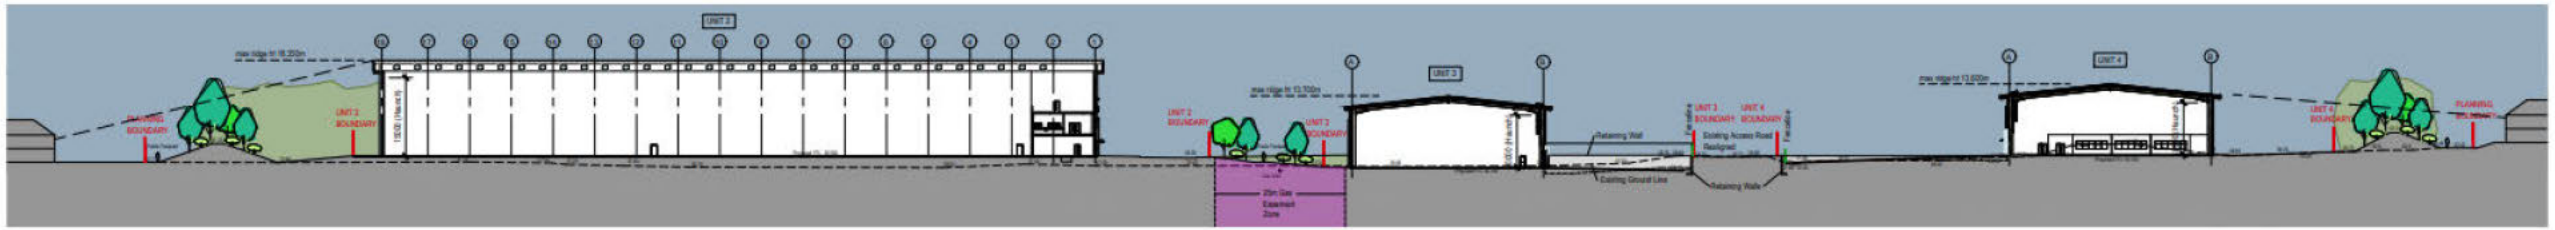
7.0 APPLICATION PROPOSAL



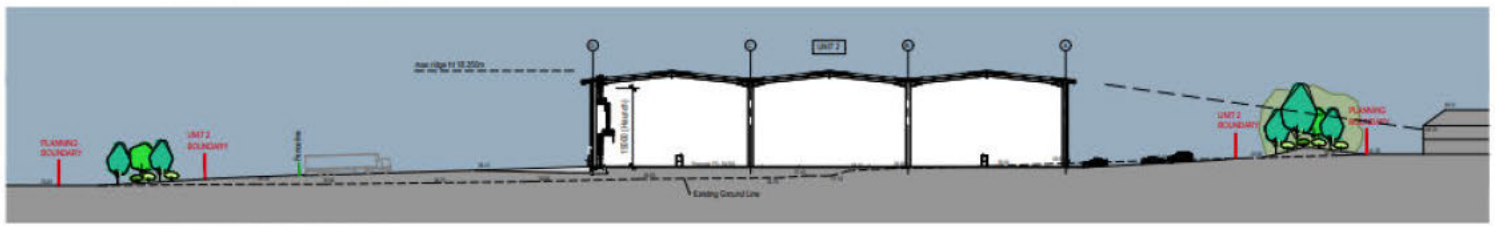
7.1 The Illustrative Masterplan has been prepared for the Site (Figure 4).

7.2 The preparation of this Masterplan has been informed by the assessment process detailed in the previous sections of this DAS. The layout does not preclude alternative layouts coming forward at the detailed design stage. However, future applications will be expected to broadly conform with the parameters plan opposite and broadly reflect the design principles set within this Statement.

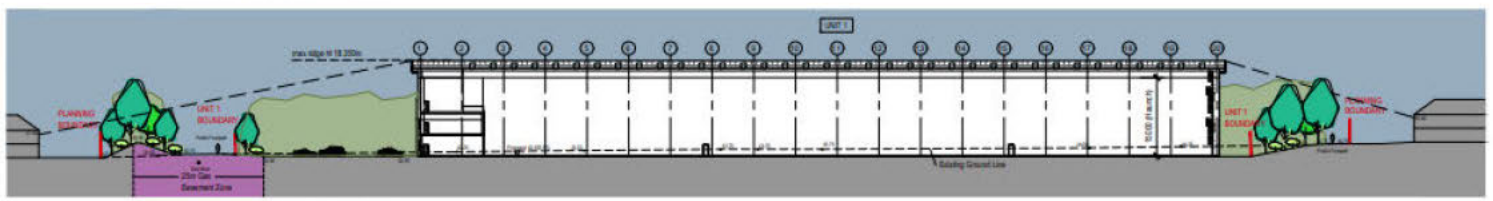
FIGURE 4: ILLUSTRATIVE MASTERPLAN



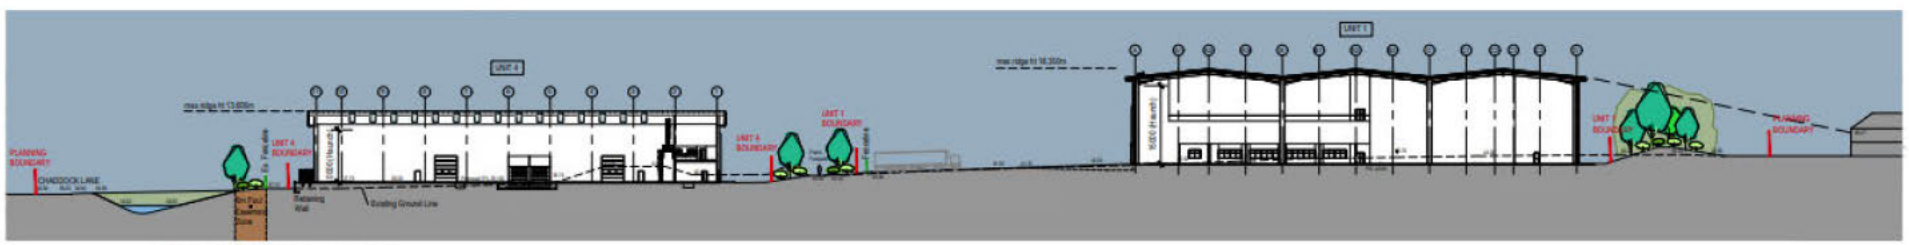
Neighbours consulted / responding on 2023 application



Screen landscaping



Screen landscaping



SECTION A-A 1:500

SECTION B-B 1:500

SECTION C-C 1:500

SECTION D-D 1:500

Planning Committee 11 Jun 2024

- All issues raised in comments reported to Committee
- Resident spoke against ([redacted])
  - Amenity
  - Visual impact
  - Noise
  - “Minimum wage warehouse jobs”
  - Traffic
- Majority of debate was around jobs, the Local Plan allocation / previous permission, measures to protect amenity
- 12 for, 1 against, 1 abstension
- Permission issued 14 August 2024, legal challenge period ran 6 weeks from this date

What we are doing

- Proactive monitoring of development and conditions
- Liaising with developer re timing of screen planting (and spec)
- Consistent messaging in media and other enquiries
  - Planning application went through process including consultation with affected neighbours and Planning Committee decision
  - Planning permission granted so important not to raise expectations unfairly
  - And this was a long-standing employment site designation, the previous outline permission did not fix building sizes
  - We take all resident concerns seriously and have acted to confirm and ensure ongoing compliance
  - Landscaping still to go in will significantly improve the situation
- https://www.wigan.gov.uk/Resident/Planning-and-Building-Control/Planning/Enforcement-and-breaches.aspx

Subject: Astley Warehouses - Peel

Categories: Dealt with, Read/Respond/Action

Hi both

Is it possible to get a time line of activity since this hit the press.

The specifics I'd like to understand in a bit more detail are:

- Our enforcement activity
- Our engagement with Peel
- What have we stepped up or put in please seeking to calm the situation
- What is Peel doing to mitigate the complaints from residents
- Are we exploring any formal changes to the planning application – e.g. bigger trees, changing the hours of use etc?

The noise on this is continuing, and we are thinking that some sort of a meeting will be needed in the coming weeks – Alison and I will be making ourselves available for this.

We'd also like to do a piece of work which walks through the process, from initial and second application, through the determination processes, post decision and since the press has become involved. The aim being to consider against our Missions and 6 ways of working to understand any learning we could take from this.

Thanks

Dear David

We have received the attached request for information. Please complete and return the attached form to foirequest@wigan.gov.uk

We would appreciate it if you could send the information back to us by: 25th September 2025, but if this will not be possible, can you please let us know and we will keep the requestor informed.

As we know you will be busy with the "day job", if we have not heard from you in ten days, we will send you a courtesy reminder and then a more formal reminder if we have not received the response by the above deadline date.

If you have problems meeting this deadline, if you require clarification, or **if the request (or any part of it) should be directed to a different department/service** please let us know IMMEDIATELY. Thank you.

Excel Documents: If your response contains a spreadsheet please ensure that the approving AD / Service Manager is satisfied that there is no personal information held within it.

Subject: Response from Residents' Group Regarding the Astley Warehousing Development

Dear Alison McKenzie Folan OBE

Thank you for your letter regarding the Astley warehousing development. I have read it carefully and to make my response as clear as possible I have addressed the key points you raised. I apologise for the length of this email but every point is relevant to understanding the full context and concerns of residents.

The residents' group wants a fair outcome. These warehouses are far too large and should never have been approved in this location. Their sheer scale and proximity to homes and the school have devastated people's lives. No rational person could consider it acceptable to build such massive industrial buildings so close to family housing. We want clarity on what will replace them. We are not opposed to development of the land but we are opposed to 18.3 metre high 24 hour industrial units being built in our back gardens.

Planning permission was granted on 11 June 2024. We now know there was a six week window for a judicial review. Only 99 consultation letters were issued and several were sent to businesses rather than residents. Many of us myself included were told we had received a letter but never did. The only public notices were a small announcement in the Leigh Journal which many households do not receive and two A4 notices on lampposts. For a development of this scale that cannot be described as meaningful consultation.

In September 2015 Barton Willmore, one of the UK's leading planning and design consultancies, carried out an assessment on behalf of Peel Investments and stated:

"There is no demand for the type of large units originally proposed for the site because of its location away from the key M6 Corridor, the congestion which exists on the A580, and its close relationship with adjacent residential areas."

A decade later congestion on the A580 has worsened, traffic pressures have intensified, and several hundred new houses have been built in the area which were not present in 2015, further increasing congestion. Yet large scale warehouse developments have now been approved on the same site. If Barton Willmore's professional assessment deemed the location unviable and unsuitable in 2015 what has materially changed in the intervening years to justify these proposals?

Many residents on the Rowlands, Redrow, and Eccleston estates bought their homes through the Help to Buy: Equity Loan and Shared Ownership schemes which are UK Government initiatives administered by Homes England. These schemes were intended to help families invest in long term homes within stable residential communities. The construction of 18.3 metre high warehouses directly behind these estates has severely reduced property values leaving some residents at risk of negative equity. Many are now struggling to sell their homes with sales falling through or potential buyers deterred by the prospect of living with large industrial buildings dominating their back gardens. This outcome undermines the purpose of the schemes and raises serious concerns about planning transparency and consideration for existing homeowners.

The construction disruption has been horrendous. Although the contractor claims to be part of the Considerate Constructors Scheme, behaviour on site shows otherwise. Noise levels are extreme, work has taken place outside agreed hours, radios are constantly blaring, and there have even been confrontations with residents. At the start of construction workers drew water from the local mains leaving homes with little or no water pressure.

We keep being told that the Council is "monitoring the site" and is satisfied that work complies with planning permission. With respect that is not what residents see. I have worked in construction for 30 years and raised concerns with the site manager [redacted] in May before the steelwork went up that the bunds were not the correct height. The approved plans show they should be three to four metres high; they are currently just under two. The height directly affects both visual impact and noise mitigation. The Tetra Tech noise assessment specifies this clearly. Planting a few shrubs does not achieve the same result.

I therefore request proof, actual measured data, showing that the bunds meet the approved design. If the Council is satisfied please share the evidence and measurements. Without that we cannot accept that proper monitoring has taken place.

When the site first began operating around January or February one of the first works completed was a new footpath running behind my property. Shortly afterwards there was a break in, someone drove a vehicle down that new path to access the site and steal materials. The following Monday I visited the site office to inform the manager [redacted] and suggested they check for missing tools and strengthen the fencing. During our chat I asked what was being built as I had never received a consultation letter. His reply was "Don't worry, you will only see the roof of these warehouses from your bedroom window."

That was completely untrue. From my garden patio I can see the entire warehouses including the main entrance. Multiple residents have asked [redacted] what will be planted on the bunds; he gives different answers each time, "trees", "wildflowers", and so on. It is clear he has not checked the plans. The soil being used also does not meet the specification of 600 mm subsoil plus 300 mm topsoil. It appears to be dumped material from May. Yet we are told the Council is satisfied with progress which cannot be correct.

You mentioned that residents have been given information on how to report breaches. I have not received any such guidance and have had to chase everything myself. I have contacted Andy Burnham, [redacted] the site manager, local councillors, Michael Wheeler MP, PLP the architects who did not respond, Tetra Tech who carried out the noise assessment, Tanro, your good self, BCA the landscaping contractors responsible for planting on the bunds who could not provide any information about what they were planting, Greater Manchester Fire and Rescue who initially did not even know the site existed when I contacted them in July, Socotec the building inspectors who provided very

little help, Wigan Building Control and the Building Safety Regulator. Despite reaching out to so many parties I have received very little meaningful response or action.

Regarding Garrett Hall Primary School the Council should actively visit and speak with the Headteacher rather than leaving it to her to make contact. The school sits beside the site and the children face the same noise and disturbance as nearby residents. It is inconceivable that she would not wish to discuss the issue unless constrained by her employment with the Council.

Although the Planning Committee decision was made in a public meeting most affected residents did not know it was taking place. The consultation process failed to engage the community. Of the roughly 50 to 55 thousand words submitted in objection residents' views were reduced to a few bullet points. That is not a fair reflection of public sentiment. Consultation may not be a referendum but when the impact is literally in our back gardens proper effort should have been made to inform and involve us.

We are calling for an independent review because residents have no confidence that internal discussions with the same officers who approved the scheme, namely David Proctor and Aidan Thatcher, will produce a fair outcome. An independent review would bring transparency, accountability, and reassurance that the process has been properly scrutinised.

I also invite you personally to visit the site and walk along the residential boundaries on the Rowland, Eccleston, Withington, and Tanhouse estates. Please do not just tour the industrial side. Come and see what residents live with daily.

When Aidan and David met with us they gave us 45 minutes of their time. While we appreciated the meeting one question stood out: why did residents have to form a group and organise a meeting rather than the Council engaging proactively before work began? Had there been an open meeting in a community hall residents could have understood the plans and acted within the six week judicial review period. Instead by the time most of us learned of the plans it was too late.

Our position remains clear: these warehouses are completely out of scale with their surroundings and have had an unacceptable impact on our community. We are asking for the warehouses to be removed and for future projects to not be allowed to operate 24 hours a day seven days a week.

Thank you for taking the time to read this response. The residents' group would welcome a meeting with you directly or your visit to the site to see first hand the scale and impact of this development. We hope the Council will now take meaningful steps to review the situation and work toward a fair and just resolution.

Kind regards
[redacted]
On behalf of the Astley Residents' Action Group

> On 17 Oct 2025, at 15:46, Mckenzie-Folan, Alison <A.Mckenzie-Folan@wigan.gov.uk> wrote:
>
> Dear [redacted]
>
> Thank you for emailing me regarding the warehousing development in Astley. I understand the level of interest that this development has prompted, and I am sorry that

I have not had the opportunity to reply until now. I have read the emails that you sent as well as a number of the enquiries submitted by other people, and I have also spoken with Aidan and David following their meeting with the residents' steering group.

I understand that the group have submitted a list of questions for the Council to answer, and I hope that you will find the answers useful when this has been done. I also pick up some key points from your email below.

Before turning to these points however, I did want to seek clarification as to the outcome that the group is asking for. Planning permission was granted for the development last summer and was not challenged legally at that time, so as far as I am aware the group are not asking for it to be revoked at this stage. If my understanding on this point is correct, then I would be grateful if the group could set out what it wants to achieve, as that will help the Council to respond with appropriate information and advice going forward.

I am sorry to hear about the disruption that residents are experiencing while the development is under construction. Regrettably a degree of disruption can never be completely avoided, however it is important that the developer is held accountable for complying with the conditions on their planning permission. The Council has been proactively monitoring the development and has liaised closely with the site manager to ensure that the conditions are being complied with. The site is still under construction as you know, but I can confirm that at this stage we are satisfied that the development, including the bunds, is being built in accordance with the planning permission. We have provided residents with details of how to report any breaches, and my team have also (via ward Councillors) offered a discussion to the head of Garrett Hall Primary School – this offer has not been taken up to date but remains open.

Turning to the decision to grant planning permission, this was taken by the Council's Planning Committee made up of elected Councillors, in a meeting that was open to (and attended by) the public. The issues that had been raised through consultation on the application were reported to Committee, who had the opportunity to ask questions of officers before debating the proposal and voting on a decision. The Committee operates on a quasi-judicial basis and is tasked to consider whether planning applications conform to the Council's adopted policies; if they do then the default position set out in national policy is that applications should be approved. The role of public consultation in this process is to identify areas where particular attention needs to be paid to whether a proposal complies with policy; it is not a referendum, although the number of comments on a particular topic is relevant and forms part of officers' reports to Committee. I entirely respect the fact that you disagree with the decision and the steps that the Council took in consulting on the application, however in line with my earlier comments I would welcome the group's view on what it would like an independent review to achieve, so that we can determine next steps.

In relation to engagement and communication with the group, I am aware that Aidan and David met them and have committed to responding to a list of questions that the group would collate. This is an important next step and I have asked to be kept informed on progress and the key points that emerge.

Thank you again for taking the time to write to me. I hope you will find this useful in understanding how the Council is responding to the concerns being raised, while also being open and honest about where we are in the process given Committee's decision last summer. Our specific next steps will be informed by the questions that the group wants to ask, as well as the confirmation of the outcomes it is seeking, so I look forward to my team receiving both of those in the near future.

Kind regards

Alison

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Subject: Follow-up: Request for Acknowledgment and Independent Review of Astley Parkway Development

Dear Alison Mackenzie Folen, OBE,

I hope you are well. I am writing again to follow up on my previous emails regarding the B8 warehouses on Astley Parkway. I completely understand that you may not have had the opportunity to respond yet, but I would be very grateful if you could at least confirm that my messages have been received.

As residents of the Astley Action Group, we continue to be deeply concerned about the way this development has been handled. In our recent Teams meeting with Aidan Thatcher, David Proctor, and several councillors, residents were told we had only 45 minutes to discuss this issue of major importance. Although the meeting slightly overran, 25 minutes were taken up by a slideshow one that we had previously requested not to be shown because we knew time would be limited. As a result, we were left with very little opportunity to ask even a fraction of the hundreds of questions gathered from residents.

The lack of meaningful communication and consultation from the council and the planning department has only deepened the community's frustration. For a development of this magnitude classified as a major planning application, it is astonishing that only 99 letters were sent out and a few A4 notices were placed on lampposts. That cannot be considered proper public engagement. Surely a development of this scale should have involved a public

meeting, perhaps in a local community hall or church, where residents could ask questions and express their concerns directly.

When a planning application receives over 90 objections, this should trigger a deeper review, not simply be noted and set aside. What was the purpose of asking for residents' feedback if those objections were effectively ignored? Why was it left to volunteers like us to form an Action Group and act as the go between for the entire community? We are ordinary residents trying to represent our neighbours, yet the responsibility for engagement and transparency should rest squarely with the council.

Adding to this, we are still being asked to direct our concerns to Aidan Thatcher and David Proctor the very individuals most closely involved in the planning process. This cannot produce the independent or transparent answers that residents deserve. It feels as though we are being asked to seek accountability from those who have the most to defend.

For all these reasons, we are calling for a fully independent review of the planning process, the communication with residents, and the decision to allow warehouses of this scale to be built so close to family homes.

Please could you acknowledge receipt of this email and advise whether such an independent review can be commissioned.

With best regards,

[redacted]

Astley Action Group

Dear Allison Mackenzie Folen, OBE,

I am following up on my previous email regarding the B8 warehouses on Astley Parkway. We have not yet received a response, and the community remains deeply concerned about the ongoing impact of this development.

We would greatly appreciate it if you could let us know when we might expect a response. Our goal is simply to work with you and the planning team to find a way forward, as the current development is not acceptable to residents. We hope to come to some arrangement that addresses these serious concerns.

Thank you for your attention, and we look forward to your reply.

With best regards,

[redacted]

Astley Action Group

> On 1 Oct 2025, at 09:48, [redacted] wrote:
>
> Dear Allison Mackenzie Folen, OBE,
>
> The B8 warehouses currently under construction on Astley Parkway have taken residents completely by surprise. While the land was allocated for development, few of us anticipated the scale of what is being built, leaving residents with far more questions than answers.
>
> The rapid construction, combined with weeks of choking dust over the school summer holidays when children should have been able to play safely outdoors, this has caused significant distress. Alongside the loss of natural light, property values have been adversely affected. Despite raising our concerns, residents feel largely ignored.

We are particularly alarmed by the lack of respect shown by the builders. Dust suppression has been ineffective, and heavy machinery has routinely operated far outside the permitted hours of 9:00 a.m. to 3:30 p.m., running from 7:00 a.m. until 6:00 p.m., as our video evidence confirms. Builders have also tapped into the water supply, leaving residents without access in the mornings and preventing children from completing basic routines such as brushing their teeth before school. In some cases, verbal exchanges between builders and residents have increased stress and tension in the community.

The bunding around the warehouses does not align with the original plans. These bunds were intended to reduce noise and mitigate the visual impact on gardens and the estate. Without them, residents face unacceptable noise levels and a lasting negative effect on the character of the neighbourhood.

Safety is a further serious concern. The warehouses are constructed extremely close to residents' homes and just 30 metres from the school playground. In the event of a fire, particularly at night, the lack of adequate space for emergency services could have catastrophic consequences. Construction noise is also negatively affecting children's learning and well-being.

This development has attracted significant public attention, including coverage on television, in newspapers, and on the radio. The Astley Residence Action Group maintains a Facebook page with over 2,000 members, with posts reaching millions online. The whole country is watching, as B8 warehouses have never before been built so close to residential homes.

We also wish to flag serious concerns about the planning process itself. Some plans submitted to councillors appear inconsistent, and Councillor Stuart Gerrard requested a stop notice due to these concerns.

As Chief Executive, you are ultimately responsible for ensuring planning processes are robust, transparent, and enforceable. In light of the issues outlined above, we respectfully request an immediate independent review of the planning process and any enforcement failures. We also ask that the planning team increase support and meaningful communication with the community, rather than relying solely on public statements about landscaping.

This Thursday, the Astley Residence Action Group will be meeting via Zoom with David Proctor to discuss these concerns further. We would greatly value your insight and support and hope to keep you informed of the discussion and any outcomes. Your leadership is crucial to ensuring that the concerns of local residents are taken seriously and acted upon.

With best regards,

[redacted]

Hi Aidan,

David and I have had a chat through this one, and think it would be worth sending an initial response ahead of the interview. Please see suggested attached.

Is that OK?

[redacted]at Radio 4 has been off with the flu so this interview has been postponed for now.

Thanks,

Kasia

Some people who received this message don't often get email from [redacted] Learn why this is important

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi,
Hope this email finds you well.
I'm one of the team that works on BBC Radio 4's You & Yours, a consumer and lifestyle programme. We are working on an item around large warehouses, or mega sheds as they are also known, and plan on that being on air Wednesday 8th of October. The item will feature audio with residents from and around the Henford Estate in Tyldesley, discussing their concerns and issues around the current PLP warehouse development. This will be part of a larger item around warehouse development in the UK.

We would like to invite a spokesperson from Wigan Council on to the programme to discuss the development with us, as well as discussing the concerns of residents.
If there isn't a spokesperson available, could we please get a statement addressing the concerns of residents, as well as addressing the following areas – our deadline is 5pm Tuesday 7th October 2025:

1. When did PLP first submit plans to develop the site and how have they been changed and altered to arrive at the plans that were granted permission by Wigan that are in current development?
2. Overall, how many plans have PLP submitted for permission on the site, been granted by Wigan Council, but lapsed?
3. How were residents informed about all PLP planning applications (regardless of outcome) and methods for them to engage?
4. Was any additional outreach to residents given after the 2015 granted planning permission lapsed, and new plans were submitted?
5. How many complaints were issued against the granted 2015 PLP plans?
6. How many complaints did the current PLP development have?
7. In the process of Wigan Council granting permission for the current plans in development what consideration and process was given to the impact on residents during and after development – mental and physical health, property damage and value, and general disruption to their lives, the environmental impact, impact on education and health of pupils at Garrett Hall Primary School, and loss, and local infrastructure?
8. The residents group Astley Warehouse Action are claiming that the submitted plans by PLP do not show a true representation of the housing in that area – how does Wigan Council respond?
9. Residents have claimed their properties have been damaged by these works - how does Wigan Council respond?
10. Residents are claiming that this has drastically reduced the value of their properties and making them difficult to sell - how does Wigan Council respond?
11. Residents claim that over 100 people complained about the PLP development by Wigan Council have only reported 70 - how does Wigan Council respond?
12. How are Wigan Council currently helping the residents impacted by the PLP development?

I am happy to discuss this over the phone if you wish.

Many thanks,

[redacted]

Dear Mr Proctor.
I am writing to you in relation to a recent invitation I received to attend a Teams meeting on either 22nd or 24th September. Unfortunately both dates are not suitable for some members of the Steering Committee and Michael Wheeler MP, who we would like to attend but is on holiday next week. I have contacted his secretary and requested dates for w/b 29th September. Please note that several members of the Residents Steering Group would like to attend the meeting.

Thanks,

Residents certainly disagree with the decision (taken by Planning Committee), but there are no concerns here whatsoever about due process, and the timeframe for JR elapsed months ago.

The attached set of slides gives a bit more background (the ward members have this already and I've just agreed for them to send it on to residents), perhaps if you have a look at this and then give me a shout if you need a further catch up.

David,

I'm sure you're delighted to see the subject line, but hopefully this is a quick one. The Mayor did his Hot Seat on Radio Manchester this morning and was asked to attend a meeting with residents to discuss the planning application. I haven't listened to the programme, but I understand that his position is that he will meet with residents 'if due process hasn't been followed'.

Could you let me know if there are any concerns around the process (I think I saw something around who had and hadn't been notified, but am aware that this is often raised!) so I can provide a briefing for him.

Happy to discuss in a call if that is easier.

Many thanks,

[redacted]

Dear Cllr Hurst,

I am writing as a resident regarding planning application A/23/96226/MAJOR (Astley Business Park).

As a member of the Planning Committee, you supported the approval of this development. Could you please explain what led you to support it at the time?

Now that construction is well underway and the true scale and impact of the warehouses can be seen in the community, would you still approve the scheme today?

I would appreciate your response. As a resident, I am keen to understand how this decision was reached and whether councillors believe it still represents the right balance for the local area.

Yours sincerely,

A/23/96226/MAJOR

Land at Astley Park Way, Worsley

Proposal: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works

Update following publication of Committee Report

Following the publication of the committee report, Officers wish to draw Members attention to some typos within the design, layout, scale and appearance section and the amenity section (pg 138, 140 and 141). Please note the publicised plans are correct and Officers have assessed the development on the basis of the correct dimensions. See amendments in red below:

*The unit proposed as 'Unit 1' measures **158m x 84m** (the report stated 15.8m x 8.4m) with a total height of 18.3 metres and located close to the northern boundary of the site.*

*Unit 2 as proposed is located to the west of the site and would measure **136m x 90m** (the report stated 13.6m x 9m) with a maximum height of 18.3 metres.*

*Units 3 and 4 as proposed are located to either side of the main accessway. Unit 3 measures **80m x 36m** (the report stated 8m x 3.6m) with a maximum height of 13.7m.*

*Unit 4 is the smallest of the proposed units, measuring **76m x 37m** (the report stated 7.6m x 3.7m) with a maximum height of 13.6 metres.*

*The proposed unit [Unit 1] will be set in approximately **30 metres** (the report stated 5m) from the northern boundary and **25 metres** (the report stated 4m) from the eastern boundary*

The side elevation of Unit 2, which will be blank, will face towards these neighbouring properties and a gap of approximately 30 metres (the report stated 5m) will be remain between the site boundary and the edge of the building.

Public Representations

Planning was undertaken in accordance with the Council's Code of Publicity for planning applications, statutory legislation – press, site and neighbour letters.

Circa 70 representations of objection were received up to 18th January 2024.

Details of the letters of representation are contained within the Committee Report. These include but are not limited to need; neighbouring amenity, impact on highway network and parking, infrastructure and services, wildlife, flooding and drainage, loss of greenspace, health, crime, climate change and land stability

Two additional letters have been received since the publication of the committee report. One reiterates their concerns relating to the above issues and the second asks whether the Officer recommendation will be accepted or if Members of the Planning Committee can take an alternative decision.

Public Representations

Furthermore, James Grundy MP (former) has objected to the development for the following reason:

- The warehousing units should not be built in such close proximity to the residential properties and schools.
- There will be an increase in pollution from ancillary vehicles and an increase in noise and lights 24 hours a day.
- Detrimental health effects on local residents and on local school children could arise.
- This area lacks the infrastructure for such development and it would cause congestion on the roads. The access road to this area is a single track and already very congested at certain times of the day.
- The local wildlife should be considered as this will take away more green space.
- The submitted site plan is not accurate, I have been informed that it does not reflect the residential aspects of the developments.

Assessment – Principle of Development

- **Sustainable Development** – Site lies within East-West core, complies with Policy SD1
- **Primary Employment Land** – Compliant with Saved Policy EM1A, PfE Policies JP-J2 and JP-J4
- **Planning Contributions** –Total contributions of £214,000 to be paid towards a mix of highway improvements and BNG; to be secured through a s106 Agreement.
- **Scheme benefits** – Investment into the borough during both the construction and operational phases, BNG enhancements, highway improvements and promotion of training and employment opportunities for local people.

Assessment

- **Design and layout –** 4 units of significant scale with individual parking and manoeuvring areas. The scale is commensurate with the designation of the land and is accompanied by a detailed landscaping scheme inclusive of boundary bunding.

- **Amenity considerations –** Impact on surrounding residential properties acceptable subject to the mitigation measures which include a landscaping scheme with bund and acoustic fencing.

- **Highways, access and parking provision –** Sustainable location with existing access road. Internal road layout is acceptable. Parking provision is acceptable. Public rights of way diverted but retained with continuation of existing links to adjacent bridle ways.

- **Trees, ecology and Biodiversity Net Gain –** Loss of informal open space (non-designated). Net gain for trees on site and significant landscaping scheme proposed including a buffer zone to adjacent dwellings. No harm to protected species; impact on wildlife dealt with by condition. Net gain for biodiversity delivered off –site.

Assessment – Technical Matters

- **Air Quality –** Dust control measures during construction will be obtained via CEMP, EVC points to be provided along with extensive tree planting. Development impacts not significant.

- **Noise** – Mitigated by design and siting of units, landscape bunds and use of acoustic fencing in certain areas. CEMP includes controls for construction noise.

- **Flooding and Drainage –** Site is within Flood Zone 1. Principle of proposed drainage scheme is acceptable. Further details are required through conditions.

- **Ground conditions –** Site lies within a Development High Risk Area in relation to coal mining. Standard conditions relating to remedial measures are required.

- **Low Carbon Development -** Energy Statement submitted which evidence the means through which the development will utilise low carbon sources.

Observations on representations

Loss of open/amenity space

- The site is not allocated as open space or located within the Green Belt, but within an allocated Primary Employment Area.

Proposal does not match that approved under the Outline scheme in 2017

- The Outline permission granted for this site in 2017 did not include details of the industrial element of the development as the scheme was in outline form only with only details of the access fully approved. The linked residential schemes obtained reserved matters which determined their scale, size and appearance. The industrial element of the outline scheme never received such an approval, hence the need for this application.

No site notice displayed by the applicant

- It is the responsibility of the LPA to display site notices. Two were displayed, one near the existing access and the other within the Thistlecroft estate.

Conclusion and Recommendation

- Proposals assessed on its merits against national and local policy
- No significant or unacceptable issues.
- Developer has agreed financial contributions totalling £214,000.
- Materials considerations indicate the application should be approved as it is line with the development plan when taken as a whole.
- It is recommended that Committee resolve to grant planning permission subject to the conditions contained and reasons detailed within the report and subject to the s106 Agreement to secure the financial contributions as detailed within the report.

Hi [redacted]

My email to you bounced back so just cc'ing you to make sure this is picked up.

One of my colleagues has provided details of the councillors as follows:

Astley

- Cllr Christine Roberts (Labour)
  - Christine.Roberts@wigan.gov.uk
- Cllr Barry John Taylor (Labour)
  - Barry.Taylor@wigan.gov.uk
- Cllr Paula Wakefield (Labour)
  - P.Wakefield@wigan.gov.uk

Tyldesley and Mosley Common

- Cllr Jess Eastoe (Labour)
  - J.Eastoe1@wigan.gov.uk
- Cllr James Fish (Independent)
  - J.Fish2@wigan.gov.uk
- Cllr Joanne Marshall (Labour)

joanne.marshall@wigan.gov.uk

Do you know if these are the right councillors to discuss this matter?

Need to get the invite out quickly, given the meeting on Monday so would appreciate an early reply.

Many thanks,

Response from Wigan is that there are no concerns about the process (below). The decision was made a long time ago. I have attached some slides which have been sent to councillors and residents. These hopefully provide context for the Mayor but get back to me if there are any questions.

Many thanks,

Subject: RE: Industrial units in Astley

Thanks,

Residents certainly disagree with the decision (taken by Planning Committee), but there are no concerns here whatsoever about due process, and the timeframe for JR elapsed months ago.

The attached set of slides gives a bit more background (the ward members have this already and I've just agreed for them to send it on to residents), perhaps if you have a look at this and then give me a shout if you need a further catch up.

To: [redacted] (Planning) [redacted]>; Thatcher, Aidan <Aidan.Thatcher@wigan.gov.uk>
Cc: [redacted]
Subject: RE: URGENT: Withington Drive, Astley- Warehouses

Thanks [redacted] suggested statement:

Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.
"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.
"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."
Ends

The key issue seems to be that residents feel they didn't know about the full application etc so I've focused on that rather than planning being on site during construction.

It would helpful to have the heads up on public meetings etc if they come into your team, as we can then hopefully be a bit more prepared 😊

Thanks,

[redacted]

Subject: RE: URGENT: Withington Drive, Astley- Warehouses

[redacted],

My draft statement below that I've summarised - from the attached correspondence, David to the local MP, Legal and DM Team Leader to the local Cllr – the best I can whilst defending the Council's on this and the Planning Committee's decision.

> *Wigan Council understands that residents have concerns about the size and location of the new warehouses being built at Astley Park Industrial Estate, an allocated primary employment area, especially while construction is ongoing and the buildings are not yet finished.*
>
> *The development was approved through a full planning application, which included detailed plans for the buildings, in accordance with the relevant planning policy and guidance. We understand there may be some confusion due to earlier approved outline plans, which were more general and didn't set the final size or layout of the buildings.*
>
> *Council Officers are monitoring the site to make sure the work matches what was approved. Once construction is complete, landscaping, including tree planting and bunds, will be added to help reduce the visual impact of the buildings.*
> *The Council is committed to working with residents and the developer to make sure the development, which is expected to bring benefits to the area, including new jobs and investment, is delivered properly.*

Hope this is of assistance, regards,

Morning all,

I'm in the process of compiling the information on this to inform a statement for Aidan – it has a complex planning history – but the crux is the development is acceptable, has a lawful

planning permission and has been assessed, and can continue to be assessed, if necessary, by the Council's planning enforcement team.

I'll have this completed and returned to Aidan by 11am – the response below you've drafted [redacted] is only a part of the issue here.

Kind regards,

[redacted]

Subject: FW: URGENT: Withington Drive, Astley- Warehouses
Importance: High

Hello,

To update- they are also planning to run this piece on lunchtime news today, so we need to provide a statement asap.

[redacted] - Do we recognise anything in the allegation that the units have completely changed, or are we content that they are as expected- it sounds like we are from the below, but just checking?

Aidan for info- original enquiry attached and this is the full address given- Astley Park Way, Chaddock Ln, Worsley, Manchester M28 1FJ

I've assumed these are the warehouses that [redacted] helpfully shared a member enquiry response about (below) and drafted up this as a starting point:

Aidan Thatcher, director of place at Wigan Council, said: "We fully appreciate the concerns raised by residents living close to the site, especially during construction when the unfinished development can appear stark and intrusive.
"Out Planning and Enforcement teams have been on site, and have verified that the building is in the right location and being built to the height as approved in the plans. The final plans include landscaping which will help to screen and soften the appear, and mitigate the impact on nearby properties.
"Details re consultation…
"We will continue to monitor the site throughout construction."

Ends

Thanks,

Afternoon [redacted]

If it's the same development I believe it is, Planning and Regeneration have received correspondence from elected Members on the matter.

The below is the body of text taken form one of those responses – given it was personal to a constituent please do not share or pass on the below. If any queries do come up, we'll be happy to engage with a response, but hopefully the below gives you a bit of context at this stage:

> *Thank you for your recent correspondence on behalf of your constituents regarding the development of warehousing units at Astley Park Industrial Estate, under planning permission reference: 'A/23/96226/MAJOR'.*
>
> *I fully appreciate the concerns raised by residents living close to the site, particularly during the construction phase when the unfinished development can appear stark and intrusive. Officers within both the Planning and Enforcement teams are aware of these concerns and are actively monitoring the situation to ensure compliance with the approved plans.*
>
> *Following a recent site inspection by one of our Planning Enforcement Officers, I can confirm that Unit 1 is currently under construction. During the visit, the Officer used a measuring tool to verify the height of the structure, which was recorded at 18.3 metres, a height consistent with the height of the unit on the approved plans. The unit is also correctly positioned in accordance with the approved site layout.*
>
> *In direct response to your request, I have attached the following approved documents for reference:*
>
> - *The site layout plan, showing the location of all approved units.*
> - *The elevational drawing for Unit 1.*
> - *The landscaping scheme for the area surrounding Unit 1, including details of the bund and proposed tree planting.*
>
> *While the bund identified within the drawings has already been formed on site, the necessary landscaping works have not yet commenced due to the ongoing construction. Once implemented, the landscaping will provide additional screening and help soften the visual impact of the development on neighbouring properties.*
>
> *In response to previous enquiries on this development, links to the approved plans and guidance on how to access them have been shared with residents. I acknowledge that the constituents who contacted you may not be aware of this facility. For ease of access, the approved plans can be viewed on the Council's website using the application reference number A/23/96226/MAJOR via the following link:*
>
> *Search and comment on planning applications*
>
> *Monitoring of the site by the Council's Planning Enforcement Officers is ongoing and will continue throughout the construction period. Further visits will be undertaken as necessary to ensure that the development is being carried out in accordance with the approved plans and conditions.*
>
> *I hope this response provides clarity and reassurance to both you and your constituents that the Council remains committed to working constructively with local residents and the developer to ensure the delivery of a high-quality scheme, in full accordance with the approved planning permission.*

Hope this helps, regards,

Subject: Air Quality Concerns

Hi [redacted]

Please find attached formpost regarding air quality concerns. Would this be for EP and possibly other departments in the Council?

Many Thanks

Subject: RE: Astley Warehouses

Categories: Read/Respond/Action

Hi David

[redacted] and I visited the site this morning and met with [redacted], site manager. Here is a summary of our findings:

No particular high risk dust sources of concern at this point in construction. The earth mounds around the boundary are mostly compact and vegetated. One mound that is currently being added to will be compacted with priority after our suggestion (this is the section of the bund in the south east corner of the site which has not yet been complete) . This should minimise wind whipping of loose materials on the mound to the adjacent residential. No visual evidence of any dusts settled in the residential areas beyond the boundary, site was well dampened and trackout minimal. Aggregate piles are mostly stones, so not highly dust generating. I did notice one sand aggregate pile near the office that was in use for concrete mixing. I have advised that all fine particulate aggregates and other similar stocks are covered with sheeting. This was agreed.

The site manager produced evidence of daily visual inspections and PM10 monitoring was shown. This is being done three times a day (morning, midday, and afternoon). The Dust Management Plan was also shown to us. All other logs as per the CEMP are being kept and updated. A copy of the IAQM Risk Assessment recommendations (taken from the applicants AQ assessment submitted as part of the planning application) was discussed and this highlighted that, where practical, the stated measures are being undertaken. We discussed that the site has incorporated measures to control AQ and dust beyond and in addition to those in the CEMP – e.g the PM10 monitoring. On this basis, it was advised that the IAQM RA is reviewed and all measures that are being used on site are inserted into the CEMP as a revision of the live document via condition discharge.

We discussed the recent request for extended hours of operation for the specific purpose of power floating operations. The site manager confirmed that the activities would be internal only, carried out by two operatives using a machine which makes a similar sound to a generator. The wagons bringing the concrete on site would arrive during permitted hours (i.e. before 6pm) but the power floating operation would continue until midnight Monday-Friday for a period of 5 weeks, depending on site conditions. The site manager advised that the operators could park outside of the site so that no vehicles would enter or leave during the extended hours. From what we were told this morning, it sounds like the activities would have very little impact on the amenities of local residents and I was satisfied that the site manager had explored all other alternatives but given the nature of the process, none avoid working beyond the permitted hours. My view on this is to invite this amendment to be included in the application to discharge the CEMP again (as outlined above). Does this sound reasonable?

[redacted] and I were satisfied that there are no further measures required to minimise the stated impacts at this time. Furthermore, it was noted that the majority of higher risk works have been completed, and it is more a case of keeping on top of the measures in place, stepping up

control measures where applicable, when direct/detailed complaints are received, and being vigilant during the remaining earthworks and concreting. The site manager was asked if they had received direct complaints on this subject and they confirmed they had but they weren't specific to location/time etc but more of a general complaint. Also, the site manager confirmed that they had received no direct complaints from the local school.

Apologies for the detailed response but I hope this helps in advance of your meeting on Thursday.

Regards,

Hi all,

See the latest below from the residents' group at Astley. Can we pick up with the contractor / site manager please about measures to control dust / wind-borne material leaving the site? We want to be able to provide assurance that the CEMP is being complied with.

Our meeting is Thursday so before that please, let me know if any issues.

Thanks
David

Good morning Christine.
I just wanted to keep you informed of trends developing via the residents complaints of late.
More and more complaints of rat infestation.
Several parents have notified us of breathing problems developing in children. Parent speaking to [redacted] (MEN) re her daughter's recently diagnosed asthma.
Lagging from the site (dangerous if inhaled or touched) being blown onto pathways and into peoples gardens. (TANRO informed)
Thanks again for all your support. We have a Teams meeting with Proctor / Thatcher scheduled for October 2nd.

Councillor Roberts,
Thank you for this. On your points:
1. The alert can be set up for any boundary that you draw, so you could draw a boundary that covered both wards if you wanted. My colleagues can show you how to do this if you want, but they can't do it for you as you have to be logged in yourself.
4. The member enquiry that you enclosed relates to a different planning application A/23/96290/MAJOR, which is for the site next to the one we have been discussing and was approved under delegated powers (so would have had fewer than 10 objections).
9. We have not had any direct feedback from the school on these concerns, and from other conversations we have had we understood the Head had no issues. If the Head does want to contact us I am happy to speak to them. Alleged damage to properties needs to be taken forward through the residents' buildings insurance, though it is worth noting that there has been no piling at this site.
I trust that helps expand on the points.

David

Councillor Roberts,

Please see the information in red below, relating to each question you asked. I hope this is of assistance.

Regards

David

1 The communication system to councillors is poor and needs to be changed as we have been let down badly in this particular case. The application was listed in November 23 but under Tyldesley and did not include Astley.

The weekly list is circulated to all members on a Monday; all members receive a borough wide list so they are able to see all applications. Councillors are able to review to the list to see if any applications of interest are in surrounding wards. The IT system that we use does not allow a site to be recorded as being in two wards – the "main" ward within which the site falls is used based on the site area. Planning Application information including the weekly list is also available online, and it is possible to set up "alerts" based on a boundary drawn by the user. If the Councillors would like a demonstration of this please let us know and we can arrange.

We do receive the list each week and look under ASTLEY. We would have no reason to look under Tyldesley as it is not our ward. I do not understand how setting up an ALERT would help in this case as it would still not come up for ASTLEY and only alert Tyldesley.

We were not informed about the planning committee on 11 June 24 otherwise we would have put in objections and attended. Under our current processes members are not notified of an application in their ward going to Planning Committee as a matter of course. This is not something that has been asked for before, but we will investigate the possibility of doing this and whether members would find it useful. All residents who had commented were notified and the committee date was indicated on the website.

2 A site visit should have been made to make sure the committee members understood the scale of the development.

Other than for extremely large strategic developments (Wigan Galleries and Mosley Common are examples), site visits are only arranged where a motion to do so is moved, seconded and voted for in the Committee meeting. Members can decide to do this if they feel that the development is difficult to envisage from the information in the planning file and in the officer's presentation. In this instance no site visit was proposed and the Committee proceeded on the basis that it understood the development proposed.

3 Regarding the sect 106 monies for Bedford Colliery,(£200,000), who decides this ? Was it on the original 2017 plan? Why does Astley not benefit from it instead of Bedford?

The Section 106 funding referred to relates to a specific policy requirement, for the development to achieve 10% biodiversity net gain. This is now a mandatory requirement but was not in 2017 when the previous outline application was determined. It is important to note that the recent planning approval is completely separate from the earlier outline permission – the outline permission from 2017 expired without being implemented and so a brand new full application was required. This was then assessed against the policies existing in 2024, including the biodiversity net gain requirement. The national legislation relating to biodiversity net gain is very prescriptive as to the type of works required to improve habitats, and following consultation with the Council's Greenheart team no suitable site in

Astley was identified. It is important to note that the funding secured through a Section 106 agreement for this purpose could not have been used for any other type of project.
4 Prior to the committee on 11 June 24, we were contacted by residents as there was evidence of work going on. How could this be allowed? Councillor Taylor and myself assumed the work was permitted under the 2017 application but evidently this was not the case. I will be able to provide members enquiry numbers to prove this. There are no registered enforcement cases relating to this site dating from 2024. Members Enquiry Ref. MEM021704, from 4th October 2023, related to a resident who had contacted Councillor Taylor to raise objections in relation to the warehouses. This was in advance of the Council receiving the planning application, and was triggered by the fact that the developer had undertaken their own round of consultations. Having searched our records we cannot find any other Members Enquiries that relate to this site and date from any time prior to the committee, but if Councillors have other information we can look into this further.
Please see ref 025509
Your reply is as follows:
Enquiry title: Fwd: Proposed Land development for industrial use.

Case reference: MEM025509

[redacted]**'s communication was relevant to the** [redacted] **empty industrial yard at the side of our property, accessed via Kennedy Road, and a recent letter received from Wigan Planning (24/1/24) in which they notify us of an application for use by a concrete pumping company who propose to construct a new Class B2 building and indicate a Gantry Crane instillation and nine portable cabins at the yard.**

We are concerned where these buildings and equipment are to be sited and used as we would be very worried if is to be next to our fence and rear garden. This new proposed change of use of this industrial yard, will no doubt bring with it noise, fumes and dust pollution. We are already significantly impacted by Swaines Haulage company, in terms of diesel fumes, and significant noise from the ,movement of heavy haulage vehicles, so the type and times of daily activity would be very useful to know. If you have any specific details regarding this we would be grateful for that information.

It appears that the companies occupancy at the location has already taken place as two portable cabins have been installed against a far fence line with some equipment in the centre of the yard and a new large green building, adjacent to an already installed one, on the left of the yard masked by the trees and screening mound overlooking Withington Drive.

I would be the first to hold up my hands to being somewhat ignorant of the detailed way these planning processes take place but the tone of the letter seems to suggest that a planning application is to take place, yet to the uninformed eye it appears permission of some sort has

already been granted given the appearance in the yard of the portable cabins, equipment and new building. Could this be clarified for me please.

You make mention in the earlier email of the perimeter fence being replaced to a more modern design. That I would welcome, given the one next to our garden has spikes and barbed wire on top, which is not exactly aesthetically pleasing, but the shrubs and overgrown hedges you make mention of, where exactly is that in the yard? We have a Horthorne hedge as the bottom of our garden that we trim each year and houses wild nesting birds, I hope that is not to be torn down as it is well established and supports local wildlife.

Resolution Details

Dear Cllr This is a relatively new application received at the end of January, the officer has not had the opportunity to visit the site yet. Any work that has already been carried out at the site has not been approved and has been undertaken at the applicants own risk.
Can you direct the resident to the website where they can view the plans, and confirm that they can submit any representations via the website also. I have also attached a screenshot of the proposed site layout if that helps understand the siting of new structures. I have also attached a copy of the applicants Design and Access Statement which provides a useful overview of their proposals.

https://clicktime.symantec.com/15siVgS8mwNuUVNZVRC7d?h=8B0FJbnvNXjirCCgBD08wdXtStBwhQ-nVupz0ZJT0Ps=&u=https://planning.wigan.gov.uk/online-applications/

Regards [redacted]

Please confirm you are satisfied with the resolution by completing the **closure confirmation form.**If we do not hear from you within 28 working days, we will assume that you are satisfied with the resolution and the enquiry will close automatically.

If you are not satisfied with the resolution, you can contact the service by completing the **unsatisfactory response form**.

Kind regards

Member Enquiries and Corporate Complaints Team

5 May we have a copy of the minutes of the 11 June 2024 committee meeting.
The minutes are available online at: Agenda for Planning Committee on Tuesday, 11th June, 2024, 2.00 pm

6 There have been suggestions of laughing taking place as a result of the MPs objection. Can someone check the video to see if there is evidence?
Planning Committee meetings are not recorded but Officers do not recall anyone laughing during the course of the meeting.

7 Page 143 of the report states that the height is not detrimental to the residential area. How can any professional person think that?
The relevant paragraph of the report acknowledges that this was a finely balanced issue, but concludes that with the conditions proposed (relating to landscaping, noise management and so on), the development would not impact on residents' amenity to an unacceptable degree. This was the officer's professional judgement, and Committee accepted the recommendation having had the opportunity to review the application and the officer's presentation.
8 It was pointed out that even if the bunds are 3m and trees are planted on them, what about the loss of light to the properties and the effect of the tree roots. Also it would take years for the trees to mask the warehousing.
The bunds and landscaping are essential to assist in screening the approved units. Our assessment is that these features are unlikely to cause significant loss of light to local residents, and certainly no more than would occur if trees had simply been planted along the site boundary, which would not have needed any permission at all. The impact on neighbouring residential properties is outlined in the *Design and Layout in relation to amenity* section of the officer's report, and it is concluded that on balance, any impact was acceptable subject to the proposed landscaping.
The approved planting scheme will ensure that the tree roots are suitably protected. It is inevitable that the approved landscaping scheme will take a period of time to fully mature, but a level of softening and screening will be achieved immediately and will be enhanced year on year. Following discussions with the Council the developer has proposed to bring forward the planting of the landscape buffer, and provided stock is available from their nursery, this should now start in November.
9 There is no mention of the noise, dust and potential health risks and danger to children in an operational site working 24/7 – The Officer's report to Members includes a dedicated section on both noise and air quality. No evidence was found that such matters would have a detrimental impact on local residents, including children.
We now have evidence that the noise is affecting the children's learning in the school and also residents are reporting excessive dust. There is also evidence of subsidence to properties which the MP is dealing with.

Subject: Awaiting response to Open Letter

Aidan,
On Wednesday last week, we published an open letter to Wigan Council accompanied by a video highlighting just some of the issues we have faced in the planning and construction at Astley Business Park.
With more than half a million views and thousands of supportive comments / likes, it's very alarming that the one comment or reply we haven't received is from Wigan Council.
Can you please address our letter, which is as follows:
Open Letter to Wigan Council & PLP
Wigan Council and PLP, you have betrayed us.
Our community is being forced to live in the shadow of four giant warehouses, 18 metres high, dumped next to our homes and our schools.
It is destroying people's lives.
Neighbours who never needed medication are now on anti-depressants. People are lying awake at night from stress. Families sit at the kitchen table in tears because their homes cannot be sold.
Children breathing in dust clouds are already suffering with health problems, and they will now grow up under floodlights, with diesel lorries thundering past 24 hours a day, seven days a week.
And you let this happen.
The maps given to the Planning Committee did not even show many of our houses. It was as if we did not exist. Ninety-six objections were submitted, yet the officer's report claimed there were only 70.
A field full of wildlife and mature trees has been ripped apart, and the warehouses are now dangerously close to homes, raising serious fire safety issues.

And the worst thing. At the planning meeting, those who spoke up to object were publicly laughed at by the councillors who are supposed to represent them. One even suggested 'ask them to turn the noise down after 8pm'.
You have left us without any communication or support to deal with the impending 24/7 HGV noise, reversing alarms and pollution. Floodlights blasting into bedrooms. There have been cracks in homes, sales falling through, house values hit, and for what? A Whistl factory powered by automated robots, which will supposedly bring jobs to the area.
To add insult to injury, nearly £200,000 of "biodiversity money" from PLP, has gone to Bedford Colliery, miles away. Not a penny of it in our area. We have lost our fields and wildlife, and are left with grey prison walls and a concrete jungle.
We want answers. We demand accountability from the people who signed this off and not simply the suggestion of planting some saplings that may make a small difference in 30 years' time.
We want to know why our objections disappeared, why our houses were missing from the maps, why the consultation was rushed and handled so badly.
We want proper fire safety and environmental checks.
And finally, we want a real solution going forward.
We are not going away. We are over a thousand strong, and have the nation backing us.
You can bulldoze fields.
You will not bulldoze us.

Hi both,

I think we'll need to hold off responding to this until we know what the external stakeholder support is going to look like, and how messages are going to be landed with the residents going forward. At present the fundamental ask here is for the permission to be revoked and the warehouses taken down.

Happy to discuss.

Subject: Response from Residents' Group Regarding the Astley Warehousing Development

Dear Alison McKenzie Folan OBE

Thank you for your letter regarding the Astley warehousing development. I have read it carefully and to make my response as clear as possible I have addressed the key points you raised. I apologise for the length of this email but every point is relevant to understanding the full context and concerns of residents.

The residents' group wants a fair outcome. These warehouses are far too large and should never have been approved in this location. Their sheer scale and proximity to homes and the school have devastated people's lives. No rational person could consider it acceptable to build such massive industrial buildings so close to family housing. We want clarity on what will replace them. We are not opposed to development of the land but we are opposed to 18.3 metre high 24 hour industrial units being built in our back gardens.

Planning permission was granted on 11 June 2024. We now know there was a six week window for a judicial review. Only 99 consultation letters were issued and several were sent to businesses rather than residents. Many of us myself included were told we had received a letter but never did. The only public notices were a small announcement in the Leigh Journal which many households do not receive and two A4 notices on lampposts. For a development of this scale that cannot be described as meaningful consultation.

In September 2015 Barton Willmore, one of the UK's leading planning and design consultancies, carried out an assessment on behalf of Peel Investments and stated:

"There is no demand for the type of large units originally proposed for the site because of its location away from the key M6 Corridor, the congestion which exists on the A580, and its close relationship with adjacent residential areas."

A decade later congestion on the A580 has worsened, traffic pressures have intensified, and several hundred new houses have been built in the area which were not present in 2015, further increasing congestion. Yet large scale warehouse developments have now been approved on the same site. If Barton Willmore's professional assessment deemed the location unviable and unsuitable in 2015 what has materially changed in the intervening years to justify these proposals?

Many residents on the Rowlands, Redrow, and Eccleston estates bought their homes through the Help to Buy: Equity Loan and Shared Ownership schemes which are UK Government initiatives administered by Homes England. These schemes were intended to help families invest in long term homes within stable residential communities. The construction of 18.3 metre high warehouses directly behind these estates has severely reduced property values leaving some residents at risk of negative equity. Many are now struggling to sell their homes with sales falling through or potential buyers deterred by the prospect of living with large industrial buildings dominating their back gardens. This outcome undermines the purpose of the schemes and raises serious concerns about planning transparency and consideration for existing homeowners.

The construction disruption has been horrendous. Although the contractor claims to be part of the Considerate Constructors Scheme, behaviour on site shows otherwise. Noise levels are extreme, work has taken place outside agreed hours, radios are constantly blaring, and there have even been

confrontations with residents. At the start of construction workers drew water from the local mains leaving homes with little or no water pressure.

We keep being told that the Council is “monitoring the site” and is satisfied that work complies with planning permission. With respect that is not what residents see. I have worked in construction for 30 years and raised concerns with the site manager [redacted] in May before the steelwork went up that the bunds were not the correct height. The approved plans show they should be three to four metres high; they are currently just under two. The height directly affects both visual impact and noise mitigation. The Tetra Tech noise assessment specifies this clearly. Planting a few shrubs does not achieve the same result.

I therefore request proof, actual measured data, showing that the bunds meet the approved design. If the Council is satisfied please share the evidence and measurements. Without that we cannot accept that proper monitoring has taken place.

When the site first began operating around January or February one of the first works completed was a new footpath running behind my property. Shortly afterwards there was a break in, someone drove a vehicle down that new path to access the site and steal materials. The following Monday I visited the site office to inform the manager [redacted] and suggested they check for missing tools and strengthen the fencing. During our chat I asked what was being built as I had never received a consultation letter. His reply was “Don’t worry, you will only see the roof of these warehouses from your bedroom window.”

That was completely untrue. From my garden patio I can see the entire warehouses including the main entrance. Multiple residents have asked [redacted] what will be planted on the bunds; he gives different answers each time, “trees”, “wildflowers”, and so on. It is clear he has not checked the plans. The soil being used also does not meet the specification of 600 mm subsoil plus 300 mm topsoil. It appears to be dumped material from May. Yet we are told the Council is satisfied with progress which cannot be correct.

You mentioned that residents have been given information on how to report breaches. I have not received any such guidance and have had to chase everything myself. I have contacted Andy Burnham, [redacted] the site manager, local councillors, Michael Wheeler MP, PLP the architects who did not respond, Tetra Tech who carried out the noise assessment, Tanro, your good self, BCA the landscaping contractors responsible for planting on the bunds who could not provide any information about what they were planting, Greater Manchester Fire and Rescue who initially did not even know the site existed when I contacted them in July, Socotec the building inspectors who provided very little help, Wigan Building Control and the Building Safety Regulator. Despite reaching out to so many parties I have received very little meaningful response or action.

Regarding Garrett Hall Primary School the Council should actively visit and speak with the Headteacher rather than leaving it to her to make contact. The school sits beside the site and the children face the same noise and disturbance as nearby residents. It is inconceivable that she would not wish to discuss the issue unless constrained by her employment with the Council.

Although the Planning Committee decision was made in a public meeting most affected residents did not know it was taking place. The consultation process failed to engage the community. Of the roughly 50 to 55 thousand words submitted in objection residents’ views were reduced to a few bullet points. That is not a fair reflection of public sentiment. Consultation may not be a referendum but when the impact is literally in our back gardens proper effort should have been made to inform and involve us.

We are calling for an independent review because residents have no confidence that internal discussions with the same officers who approved the scheme, namely David Proctor and Aidan Thatcher, will produce a fair outcome. An independent review would bring transparency, accountability, and reassurance that the process has been properly scrutinised.

I also invite you personally to visit the site and walk along the residential boundaries on the Rowland, Eccleston, Withington, and Tanhouse estates. Please do not just tour the industrial side. Come and see what residents live with daily.

When Aidan and David met with us they gave us 45 minutes of their time. While we appreciated the meeting one question stood out: why did residents have to form a group and organise a meeting rather than the Council engaging proactively before work began? Had there been an open meeting in a community hall residents could have understood the plans and acted within the six week judicial review period. Instead by the time most of us learned of the plans it was too late.

Our position remains clear: these warehouses are completely out of scale with their surroundings and have had an unacceptable impact on our community. We are asking for the warehouses to be removed and for future projects to not be allowed to operate 24 hours a day seven days a week.

Thank you for taking the time to read this response. The residents' group would welcome a meeting with you directly or your visit to the site to see first hand the scale and impact of this development. We hope the Council will now take meaningful steps to review the situation and work toward a fair and just resolution.

Kind regards
[redacted]

>
> Thank you for emailing me regarding the warehousing development in Astley. I understand the level of interest that this development has prompted, and I am sorry that I have not had the opportunity to reply until now. I have read the emails that you sent as well as a number of the enquiries submitted by other people, and I have also spoken with Aidan and David following their meeting with the residents' steering group.
>
> I understand that the group have submitted a list of questions for the Council to answer, and I hope that you will find the answers useful when this has been done. I also pick up some key points from your email below.
>
> Before turning to these points however, I did want to seek clarification as to the outcome that the group is asking for. Planning permission was granted for the development last summer and was not challenged legally at that time, so as far as I am aware the group are not asking for it to be revoked at this stage. If my understanding on this point is correct, then I would be grateful if the group could set out what it wants to achieve, as that will help the Council to respond with appropriate information and advice going forward.

I am sorry to hear about the disruption that residents are experiencing while the development is under construction. Regrettably a degree of disruption can never be completely avoided, however it is important that the developer is held accountable for complying with the conditions on their planning permission. The Council has been proactively monitoring the development and has liaised closely with the site manager to ensure that the conditions are being complied with. The site is still under construction as you know, but I can confirm that at this stage we are satisfied that the development, including the bunds, is being built in accordance with the planning permission. We have provided residents with details of how to report any breaches, and my team have also (via ward Councillors) offered a discussion to the head of Garrett Hall Primary School – this offer has not been taken up to date but remains open.

Turning to the decision to grant planning permission, this was taken by the Council's Planning Committee made up of elected Councillors, in a meeting that was open to (and attended by) the public. The issues that had been raised through consultation on the application were reported to Committee, who had the opportunity to ask questions of officers before debating the proposal and voting on a decision. The Committee operates on a quasi-judicial basis and is tasked to consider whether planning applications conform to the Council's adopted policies; if they do then the default position set out in national policy is that applications should be approved. The role of public consultation in this process is to identify areas where particular attention needs to be paid to whether a proposal complies with policy; it is not a referendum, although the number of comments on a particular topic is relevant and forms part of officers' reports to Committee. I entirely respect the fact that you disagree with the decision and the steps that the Council took in consulting on the application, however in line with my earlier comments I would welcome the group's view on what it would like an independent review to achieve, so that we can determine next steps.

In relation to engagement and communication with the group, I am aware that Aidan and David met them and have committed to responding to a list of questions that the group would collate. This is an important next step and I have asked to be kept informed on progress and the key points that emerge.

Thank you again for taking the time to write to me. I hope you will find this useful in understanding how the Council is responding to the concerns being raised, while also being open and honest about where we are in the process given Committee's decision last summer. Our specific next steps will be informed by the questions that the group wants to ask, as well as the confirmation of the outcomes it is seeking, so I look forward to my team receiving both of those in the near future.

Kind regards

Alison

Subject: Follow-up: Request for Acknowledgment and Independent Review of Astley Parkway Development

Dear Alison Mackenzie Folen, OBE,

I hope you are well. I am writing again to follow up on my previous emails regarding the B8 warehouses on Astley Parkway. I completely understand that you may not have had the opportunity to respond yet, but I would be very grateful if you could at least confirm that my messages have been received.

As residents of the Astley Action Group, we continue to be deeply concerned about the way this development has been handled. In our recent Teams meeting with Aidan Thatcher, David Proctor, and several councillors, residents were told we had only 45 minutes to discuss this issue of major importance. Although the meeting slightly overran, 25 minutes were taken up by a slideshow one that we had previously requested not to be shown because we knew time would be limited. As a result, we were left with very little opportunity to ask even a fraction of the hundreds of questions gathered from residents.

The lack of meaningful communication and consultation from the council and the planning department has only deepened the community's frustration. For a development of this magnitude classified as a major planning application, it is astonishing that only 99 letters were sent out and a few A4 notices were placed on lampposts. That cannot be considered proper public engagement. Surely a development of this scale should have involved a public meeting, perhaps in a local community hall or church, where residents could ask questions and express their concerns directly.

When a planning application receives over 90 objections, this should trigger a deeper review, not simply be noted and set aside. What was the purpose of asking for residents' feedback if those objections were effectively ignored? Why was it left to volunteers like us to form an Action Group and act as the go between for the entire community? We are ordinary residents trying to represent our neighbours, yet the

responsibility for engagement and transparency should rest squarely with the council.

Adding to this, we are still being asked to direct our concerns to Aidan Thatcher and David Proctor the very individuals most closely involved in the planning process. This cannot produce the independent or transparent answers that residents deserve. It feels as though we are being asked to seek accountability from those who have the most to defend.

For all these reasons, we are calling for a fully independent review of the planning process, the communication with residents, and the decision to allow warehouses of this scale to be built so close to family homes.

Please could you acknowledge receipt of this email and advise whether such an independent review can be commissioned.

With best regards,

[redacted]

Astley Action Group

On 1 Oct 2025, at 09:48, [redacted] wrote:

Dear Allison Mackenzie Folen, OBE,

The B8 warehouses currently under construction on Astley Parkway have taken residents completely by surprise. While the land was allocated for development, few of us anticipated the scale of what is being built, leaving residents with far more questions than answers.

The rapid construction, combined with weeks of choking dust over the school summer holidays when children should have been able to play safely outdoors, this has caused significant distress. Alongside the loss of natural light, property values have been adversely affected. Despite raising our concerns, residents feel largely ignored.

We are particularly alarmed by the lack of respect shown by the builders. Dust suppression has been ineffective, and heavy machinery has routinely operated far outside the permitted hours of 9:00 a.m. to 3:30 p.m., running from 7:00 a.m. until 6:00 p.m., as our video evidence confirms. Builders have also

tapped into the water supply, leaving residents without access in the mornings and preventing children from completing basic routines such as brushing their teeth before school. In some cases, verbal exchanges between builders and residents have increased stress and tension in the community.

The bunding around the warehouses does not align with the original plans. These bunds were intended to reduce noise and mitigate the visual impact on gardens and the estate. Without them, residents face unacceptable noise levels and a lasting negative effect on the character of the neighbourhood.

Safety is a further serious concern. The warehouses are constructed extremely close to residents' homes and just 30 metres from the school playground. In the event of a fire, particularly at night, the lack of adequate space for emergency services could have catastrophic consequences. Construction noise is also negatively affecting children's learning and well-being.

This development has attracted significant public attention, including coverage on television, in newspapers, and on the radio. The Astley Residence Action Group maintains a Facebook page with over 2,000 members, with posts reaching millions online. The whole country is watching, as B8 warehouses have never before been built so close to residential homes.

We also wish to flag serious concerns about the planning process itself. Some plans submitted to councillors appear inconsistent, and Councillor Stuart Gerrard requested a stop notice due to these concerns.

As Chief Executive, you are ultimately responsible for ensuring planning processes are robust, transparent, and enforceable. In light of the issues outlined above, we respectfully request an immediate independent review of the planning process and any enforcement failures. We also ask that the planning team increase support and meaningful communication with the community, rather than relying solely on public statements about landscaping.

This Thursday, the Astley Residence Action Group will be meeting via Zoom with David Proctor to discuss these concerns further. We would greatly value your insight and support and hope to keep you informed of the discussion and any outcomes. Your leadership is crucial to ensuring that the concerns of local residents are taken seriously and acted upon.

With best regards,

Dear Mr Proctor.

I am writing with regard to the proposed meeting with yourself and Mr Thatcher regarding the Astley Warehouse site. I have contacted [redacted] (Michael Wheeler's assistant) and she has offered two dates.
The preferred date for this meeting from the Astley Steering group would be Thursday 2nd October pm.
I hope this date is convenient for you.
There are several members of the Steering group who would welcome the opportunity to speak with yourself and Mr Thatcher, albeit via Teams, and so if you send me the Teams link I will share with them.
With regards
[redacted]. Resident and Astley steering group.

Application number A/23/96226/MAJOR

Hello,

My name is [redacted] and I am raising serious questions of concern here about this project.

You have opened the doors to x4 B2/B8 warehouses which a simple Google search shows you that is shouldn't be anywhere near a residential zone.

We bought this house in 2021 and it didn't show up on any searches. My neighbour moved in Christmas 2024 and it didn't show up on her searches.
How have you been able to not give out full disclosure when solicitors applied for searches of the area.?

You are our local authority and you have a duty of care to everyone who sits inside the boundary walls of wigan borough.

I've tried to sell my house twice and failed due to this project. I've had to remortgage my house to pay off a help to buy scheme for a view I never asked for. My mental health has suffered massively because of this and because of this I am on anti depression medication. Yet your planning officers deemed all this to be acceptable and it wouldnt be that bad to local residents.

The brochure showed at the planning meeting showed an out of date o&s mapping as none of the houses are there.

Youve shaved numbers off the true objections to merit an easier push through on the proposed project.

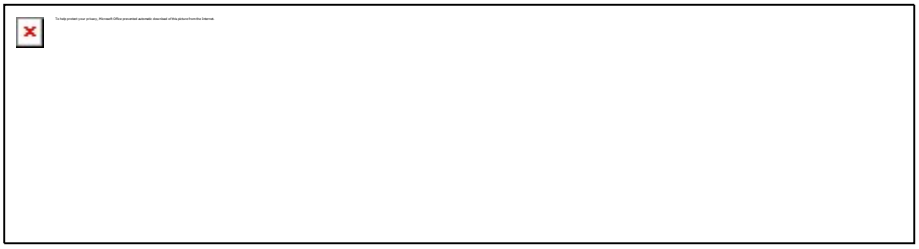
The landscaping doesn't do anything to protect us as the trees that have been picked aren't tall enough and ultimately will be bare for six months out of the year.

I know you dont realise this but you've ruined our lives with this development. When this was being discussed it should have been canvassed by an independent company to go door to door and be honest with residents about the planning application and not print a notice in the leigh journal when

we dont live in leigh. The voice of the residents should have been heard and it should have been a factor.

This should have never been passed, you are meant to protect us. If we have an issue with a development or private works we are meant to come to you and you as the local authority looks into it for us. The council are there to help not cause damage to our lives and strip us of the value of our homes.

Your home is a place of sanctuary its meant to be a happy place. You shouldn't have to not look out of the window and feel palpitations in your chest because you're trapped in your own home and nobody wants to buy it.



I really dont understand why Mr Proctor and Mr Thatcher think this project was a good idea.

I await your response.

Kindest regards

Subject: RE: Astley warehouse - neighbours consulted

Hi David,

An update following my visit to the site this morning, along with [redacted].

The bunds are largely in place with the exception of a small section within the south eastern corner of the site which is going in over the next couple of days.

Having reviewed the approved plans, the height of the bund varies across the site and is higher internally than it is externally, so the height the neighbours see will differ from the height viewed within the site. It's really difficult to measure on site as there's quite a slope in places. We would need some electronic equipment to do so, perhaps Andy might have something but visually, I was happy with what I seen. From within the site, as approved the bunds should range from 2.5. to 4.5m and, comparing it against other sites features, I'm happy it's reaching that. The site manager admitted that it was 30cm higher in one section and whilst he's happy to lower it I've advised to retain it as such for the moment.

The landscaping contractor is on site and is will be starting to peg out the planting areas in the coming weeks. This will involve clearing the naturalised vegetation of the bunds. The site manager has confirmed that planting will begin this November (i.e. the beginning of the planting season). This is earlier that they need to as the approved landscaping scheme requires planting to take place after practical completion; whilst the site won't reach practical completion by November, he's happy that the planting can go ahead safely. He is expecting the construction phase to be completed in Feb 26.

I've reminded him of the importance of carrying out the planting as approved and offered myself and [redacted] assistance if needed at any time. I've also advised that I will be returning to carry out further checks in the future.

The approved PROWs are also taking shape, and they are located where approved.

The site manager refuted all allegations about working outside of the hours approved under the CEMP. He said that some employees may turn up to site earlier than they are permitted to start work and he tried keeping the gate locked but this resulted in a back up on the highway so whilst some may enter the site early, they do not start work until the permitted time, according to the site manager.

I've attached some photos to give you a sense of the bunding when viewed from the site; the first is taken at rear of Unit 1 looking towards Norton Nook/Verdant Green Close and the second is taken look out the rear of Unit 2 which is not yet complete, towards Tanhouse Avenue.

Regards,

Hi Therese,

Thanks again for this. A couple of points from our meeting with the ward Cllrs just now:

- Which ward Cllrs did we write to – the website says just Tyldesley but isn't the site part in Astley as well?
- As part of our site checks on Thursday, can we confirm the dimensions of the bunds constructed please – essential that these are exactly as per the approved plan throughout with no exceptions

Let me know how you get on.

Thanks
David

Hi David,

Apologies for the delay in getting back to you on this but wanted to get the information right as I know you're meeting with Cllrs later today. The principle of the landscaping scheme was established through the full grant of permission, but as you know a condition was attached requiring the specific detail. The details were subsequently approved under application A/25/098808/CON which was led by [redacted] but [redacted] assisted in ensuring the inclusion of the right mix within the bund. Here is his detailed account:

Generally, there is a woodland mix and woodland thicket mix proposed for the bund areas. This is supplemented by individual extra heavy standard trees (sycamore, alder, birch, cherry, rowan, oak and elm) 4-4.5m high, individual feathered trees – with lateral branches from the ground up (birch, alder, field maple and oak) 1.75-3m high and individual coniferous trees (Scots and black pine) 2-2.5m high which I requested were added to get some year-round greenery. The woodland mix contains 90% whips (600 – 800mm high) with 10% feathered trees (1.75-2m high) placed throughout it contains a variety of native tree species such as quicker growing birch and dense shrubs with slower growing oak and cherry.

On average faster growing trees like birch and alder can usually grow 40-60cm a year and reach maximum height after 20 years which can be between 15-25m making them a good choice for screening. Sycamore is also fast growing and can reach 20m high in 20 years before going on to be 25-30m high. Oak and coniferous trees are slower growing but ultimately can reach greater heights.

The overall planting mix therefore contains a mixture of tree species looking to provide some initial screening/softening with the ultimate aim of establishing a woodland belt with shrub understorey in the long term which further filters and softens views although this will probably take around 25 years to achieve there should be increasing screening and softening provided as planting grows.

Planting season is between November and the end of March (depending on the weather conditions), planting outside of this period is not recommended as it puts trees at a higher likelihood of failure, whilst there may be pressure to undertake planting a soon as possible it could ultimately be counterintuitive to do so.

In terms of implementation, it was agreed through the above conditions application that this would take place during the first available planting season after practical completion. I am due to visit the site on Thursday with [redacted] and can ask if there is any possibility if this can relate to each unit rather than the site as a whole.

Regards,

Hiya,

It used to be possible to get a map out of Uniform, showing the addresses that had been consulted on a planning application. Is this doable for the Astley development that we've all been discussing, as visualising it may well help?

Thanks
David

Hi both,

Please see below the media enquiry we've received from Granada Reports re: the Astley warehouse. We've encouraged them to contact TanRo, but have also drafted the below from a council perspective. Would you be happy with this, or do you have any suggested amends?

A Wigan Council spokesperson said: "Local authority officers - including environmental protection air quality specialists - have been on-site and are in close communication with the developer and their construction partners.
"This is to ensure that all conditions of the Construction Environmental Management Plan (CEMP) are being followed and adhered to, both for the development itself and while it is being built.
"We would encourage any residents who are concerned about any aspects of how the site is being delivered to report via our website."

Further information:

- *If residents believe that the required dust control measures are not being followed, they can report this via our website with details of dates and times, and we will investigate where appropriate.*
- *The construction company has responsibilities to monitor conditions on site and will therefore be better placed to comment on day-to-day issues.*

Many thanks,

[redacted]

Hello,
I work for Granada Reports, the ITV regional news programme in the North West and we're returning to the subject of the Asley Warehouses tomorrow,
We have spoken to a number of residents who tell us they are now suffering with breathing difficulties and asthma since the building work began.
You may be aware that this matter is also being investigated by the Environment Agency.
Can you confirm please if the council is aware of these issues? Do you have anyone available for interview? We'll be back in the area tomorrow and perhaps an officer or councillor would be willing to tour the estate with my reporter and camera - that would be great if possible.
Let me know your thoughts,

Hi David

[redacted] and I visited the site this morning and met with [redacted], site manager. Here is a summary of our findings:

No particular high risk dust sources of concern at this point in construction. The earth mounds around the boundary are mostly compact and vegetated. One mound that is currently being added to will be compacted with priority after our suggestion (this is the section of the bund in the south east corner of the site which has not yet been complete) . This should minimise wind whipping of loose materials on the mound to the adjacent residential. No visual evidence of any dusts settled in the residential areas beyond the boundary, site was well dampened and trackout minimal. Aggregate piles are mostly stones, so not highly dust generating. I did notice one sand aggregate pile near the office that was in use for concrete mixing. I have advised that all fine particulate aggregates and other similar stocks are covered with sheeting. This was agreed.

The site manager produced evidence of daily visual inspections and PM10 monitoring was shown. This is being done three times a day (morning, midday, and afternoon). The Dust Management Plan was also shown to us. All other logs as per the CEMP are being kept and updated. A copy of the IAQM Risk Assessment recommendations (taken from the applicants AQ assessment submitted as part of the planning application) was discussed and this highlighted that, where practical, the stated measures are being undertaken. We discussed that the site has incorporated measures to control AQ and dust beyond and in addition to those in the CEMP – e.g the PM10 monitoring. On this basis, it was advised that the IAQM RA is reviewed and all measures that are being used on site are inserted into the CEMP as a revision of the live document via condition discharge.

We discussed the recent request for extended hours of operation for the specific purpose of power floating operations. The site manager confirmed that the activities would be internal only, carried out by two operatives using a machine which makes a similar sound to a generator. The wagons bringing the concrete on site would arrive during permitted hours (i.e. before 6pm) but the power floating operation would continue until midnight Monday-Friday for a period of 5 weeks, depending on site conditions. The site manager advised that the operators could park outside of the site so that no vehicles would enter or leave during the extended hours. From what we were told this morning, it sounds like the activities would have very little impact on the amenities of local residents and I was satisfied that the site manager had explored all other alternatives but given the nature of the process, none avoid working beyond the permitted hours. My view on this is to invite this amendment to be included in the application to discharge the CEMP again (as outlined above). Does this sound reasonable?

[redacted] and I were satisfied that there are no further measures required to minimise the stated impacts at this time. Furthermore, it was noted that the majority of higher risk works have been completed, and it is more a case of keeping on top of the measures in place, stepping up

control measures where applicable, when direct/detailed complaints are received, and being vigilant during the remaining earthworks and concreting. The site manager was asked if they had received direct complaints on this subject and they confirmed they had but they weren't specific to location/time etc but more of a general complaint. Also, the site manager confirmed that they had received no direct complaints from the local school.

Apologies for the detailed response but I hope this helps in advance of your meeting on Thursday.

Regards,

Good morning Christine.
I just wanted to keep you informed of trends developing via the residents complaints of late.
More and more complaints of rat infestation.
Several parents have notified us of breathing problems developing in children. Parent speaking to [redacted] (MEN) re her daughter's recently diagnosed asthma.
Lagging from the site (dangerous if inhaled or touched) being blown onto pathways and into peoples gardens. (TANRO informed)
Thanks again for all your support. We have a Teams meeting with Proctor / Thatcher scheduled for October 2nd.

Dear David and Aidan

Thank you for coming back with information on the enforcement visits. Michael has asked if you can provide further clarification on the following:

- More detailed information on your findings in the most recent enforcement visits and particularly the methods used to assess compliance with the Construction Environmental Management Plan
- Precise information on where the bunding work is complete, including confirmation of the height of the bund which is in place
- Confirmation of where the bunding is not complete, and an agreed date of when it will be completed by
- Precise information on the planting - what kind of planting will take place e.g. will it be a mixture of saplings and mature trees, a mixture of evergreen trees and other kinds of trees, and what height will the trees be
- Following reports of children developing asthma since the site began construction, please can you confirm whether air quality meters can be installed to measure the impact of the build on air quality in the area

Michael would find it very useful to walk the perimeter of the site with you and discuss the issues. Please can you provide some dates of when this can be arranged. Thursdays or Fridays are better for Michael due to the requirement for him to be in Westminster earlier in the week.

Kind regards

[redacted]

Subject: RE: Astley Warehouses - Chaddock Lane
Dear [redacted]
Visits and actions have been undertaken as follows:

- 15/05/2025 – To check compliance with Construction Environmental Management Plan (CEMP) in relation to complaints about dust during period of very dry weather
- 29/05/2025 - Follow up visit to check compliance with CEMP again to ensure the site manager was continuing to adhere to its requirements
- 25/07/2025 – To check height of the frames of the larger units (Units 1 and 2). Laser equipment used to confirm max building height of 18.3m in accordance with planning permission.
- 11/09/2025 – walked around all of site, including site boundaries to check landscaping bund which was largely complete at this point. Checked general siting of the buildings, checked the spread of materials/dust on site, checked complaints log held on site by site manager (CEMP requirement). Discussed the planting of the bund and agreed a start on this in November '25.
- 30/09/2025 (with Environmental Protection air quality specialist present) – to check compliance with the CEMP and get input on whether there were any other measures that the contractor should have in place. Content that they were complying with their CEMP and had extra mitigation measures in place that weren't required by the CEMP. No areas witnessed on site which could lead to the wider dispersal of materials.

I trust this assists. We have received a Freedom of Information request on this topic as well and will be responding with the same information.
Regards
David

Dear Aidan and David
Further to the Teams meeting last week with the Astley Warehouses Action Group, and the response which Michael received from David last week, there are still a couple of outstanding pieces of information which we are waiting for.
In his letter to Councillor Molyneux, Michael asked for proactive enforcement action to be taken to address the concerns being raised by residents about the site. In your presentation to the group last week, you mentioned that you and other members of your team had visited the site on several occasions over the past couple of weeks. Please can we ask for reports on the actions you have taken, the inspections you have carried out and any proactive enforcement taking place.
Michael is happy to share this information with the residents to ensure that they have up to date and accurate information about the development and operation of the site.
Kind regards

Thanks David

Here is the extended response we used towards the end of last week as agreed with [redacted] and Aidan- so far it's gone to GB News and [redacted], the local democracy reporter:

Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.
"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.
"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."

Ends

For context:

- This land has been allocated as employment land since 2006.
- The outline planning application for this site approved the principle of industrial development on this site, which is an extension of Astley Business Park, in 2017.
- The outline planning permission did not set final size or layout of the buildings, but we appreciate this planning process may be the cause of some of the confusion.
- The full planning application went to committee in June 2024, which set out the size, footprint and height of the units and there has been no fundamental change to those since permission was granted.
- Ahead of this letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal. The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.
- The development will create around 500 on-site jobs, and another estimated 460 across Greater Manchester.

Thanks,

Thanks David

Here is the extended response we used towards the end of last week as agreed with [redacted] and Aidan- so far it's gone to GB News and [redacted], the local democracy reporter:

Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.
"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.
"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."

Ends

For context:

- This land has been allocated as employment land since 2006.
- The outline planning application for this site approved the principle of industrial development on this site, which is an extension of Astley Business Park, in 2017.
- The outline planning permission did not set final size or layout of the buildings, but we appreciate this planning process may be the cause of some of the confusion.
- The full planning application went to committee in June 2024, which set out the size, footprint and height of the units and there has been no fundamental change to those since permission was granted.
- Ahead of this letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal. The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.
- The development will create around 500 on-site jobs, and another estimated 460 across Greater Manchester.

Thanks,

[redacted]

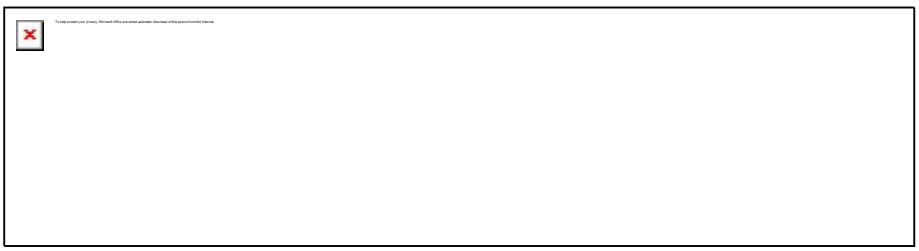
Hi,

I've pulled together the attached to hopefully steer the discussion later – trust there's nothing out of kilter from your point of view?



From our catch up the other day, were we preparing a fuller briefing note as well as the extended press statement?

Thanks
David

Subject: RE: BBC North West- Astley Warehouses

Hi David
No problem – see below in respect of A/23/96226/MAJOR:

- As shown on the attached list, a total of 99 neighbour notification letters were sent out when the application was validated in November 2023.
- On 3rd June 2024, all those who had submitted comments (104 in total) were notified (the majority by email) that the application was to be considered at Planning Committee on 11th June 2024, along with details of arrangements to attend and/or speak at the meeting.

[redacted] - For clarity, and contrary to the BBC report, whilst minor design tweaks were made to the proposed units during consideration of the application, the fundamentals of the scheme remained unchanged, including the size, footprint and height of the units. As set out in my attached email to Cllr Roberts, it appears that the confusion has arisen due to the indicative details submitted with the previous outline application (A/15/81365/OUTMAJ, granted in 2017). However, the 2024 "Full" planning permission stands alone and has no connection to the earlier outline permission (which in any event did not approve building heights or sizes).

Kind regards

Good morning,

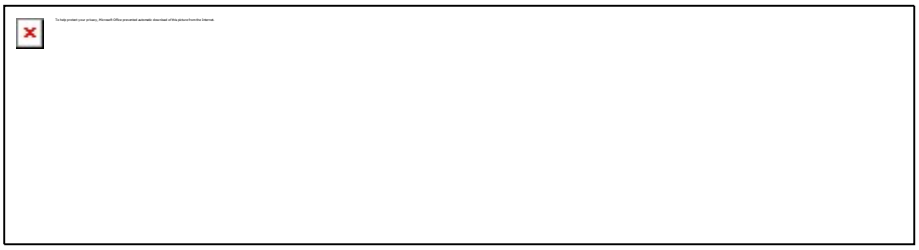
For information, we have had an enquiry from BBC North West regarding the construction of four warehouses in Astley and resident's complaints that they are not reflective of what was agreed in the planning permission:



"Residents say that the plans were changed from low level units to something completely different without them being informed or given an opportunity to oppose them. They're concerned about the impact the size and proximity of the warehouses will have on residents houses, view and livelihoods."

I am agreeing a statement with the Planning team and Aidan, which I will share once finalised but it is a tight deadline as they are planning to cover this on the news this lunchtime and tonight, so I wanted to let you know in advance.

Many thanks,

Subject: RE: BBC North West- Astley Warehouses

This is what I got from [redacted] last week, along with a few example letters etc:

> *Wigan Council understands that residents have concerns about the size and location of the new warehouses being built at Astley Park Industrial Estate, an allocated primary employment area, especially while construction is ongoing and the buildings are not yet finished.*
>
> *The development was approved through a full planning application, which included detailed plans for the buildings, in accordance with the relevant planning policy and guidance. We understand there may be some confusion due to earlier approved outline plans, which were more general and didn't set the final size or layout of the buildings.*
>
> *Council Officers are monitoring the site to make sure the work matches what was approved. Once construction is complete, landscaping, including tree planting and bunds, will be added to help reduce the visual impact of the buildings.*
> *The Council is committed to working with residents and the developer to make sure the development, which is expected to bring benefits to the area, including new jobs and investment, is delivered properly.*

[redacted]

Cc: [redacted]
Subject: RE: BBC North West- Astley Warehouses

My understanding is that it went through reserved matters a few years back which showed buildings but the parameters of them weren't agreed.

It then came back to planning for the full application, and it went through the usual planning process etc and was agreed at committee.

Frustratingly the BBC cut the bit of our comment that said it went through the full planning process etc.

Thanks

Are you ok fronting this David? From the below, there won't be residents on the radio at the same time – as I think that could be a difficult process? If they are using pre-recorded clips of residents, then ideally we'd have sight (hearing) of them prior to ensure David knows what he is walking into.

Subject: FW: BBC Radio 4 You & Yours - Please can you confirm this email has been received

Hello,

Please see below for You and Yours on Radio 4- there is quite a long list of questions we've been asked to address.

[redacted] and David spoke yesterday- and agreed that we would put David up for interview- if you're still happy with that David? They are planning to air Wednesday, so please can you let me know a couple of times Monday/Tuesday that would be good for you?

Ahead of that though, I think there are quite a few of the questions we can push back on now which will hopefully help to clarify some issues ahead of the interview.

One thing I'm a bit confused on- he refers to a 2015 application, is that an error on his part?

Start of a suggested response, based on what we've said before below but theere are a few that are probably new questions to us- if there is anything else we can start to respond to today, or anything that came out of yesterday's meeting that we can include?

Happy to hop on a call if that would be easier.

Here is some background context for this site:

- *This land has been allocated as employment land since 2006.*
- *The outline planning application for this site approved the principle of industrial development on this site, which is an extension of Astley Business Park, in 2017.*
- *The outline planning permission did not set final size or layout of the buildings, but we appreciate this planning process may be the cause of some of the confusion.*
- *The full planning application went to committee in June 2024, which set out the size, footprint and height of the units and there has been no fundamental change to those since permission was granted.*
- *Ahead of this letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal. The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.*
- *We have met with representatives of the residents living nearby, alongside their local councillors and MP, to discuss the development, the point we are now at, and potential options moving forwards.*

ends

Thanks,

[redacted]

Subject: BBC Radio 4 You & Yours - Please can you confirm this email has been received

Some people who received this message don't often get email from dave.james1@bbc.co.uk. Learn why this is important

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi,
Hope this email finds you well.
I'm one of the team that works on BBC Radio 4's You & Yours, a consumer and lifestyle programme. We are working on an item around large warehouses, or mega sheds as they are also known, and plan on that being on air Wednesday 8th of October. The item will feature audio with residents from and around the Henford Estate in Tyldesley, discussing their concerns and issues around the current PLP warehouse development. This will be part of a larger item around warehouse development in the UK.

We would like to invite a spokesperson from Wigan Council on to the programme to discuss the development with us, as well as discussing the concerns of residents.
If there isn't a spokesperson available, could we please get a statement addressing the concerns of residents, as well as addressing the following areas – our deadline is 5pm Tuesday 7th October 2025:

1. When did PLP first submit plans to develop the site and how have they been changed and altered to arrive at the plans that were granted permission by Wigan that are in current development?
2. Overall, how many plans have PLP submitted for permission on the site, been granted by Wigan Council, but lapsed?
3. How were residents informed about all PLP planning applications (regardless of outcome) and methods for them to engage?
4. Was any additional outreach to residents given after the 2015 granted planning permission lapsed, and new plans were submitted?
5. How many complaints were issued against the granted 2015 PLP plans?
6. How many complaints did the current PLP development have?
7. In the process of Wigan Council granting permission for the current plans in development what consideration and process was given to the impact on residents during and after development – mental and physical health, property damage and value, and general disruption to their lives, the environmental impact, impact on education and health of pupils at Garrett Hall Primary School, and loss, and local infrastructure?
8. The residents group Astley Warehouse Action are claiming that the submitted plans by PLP do not show a true representation of the housing in that area – how does Wigan Council respond?
9. Residents have claimed their properties have been damaged by these works - how does Wigan Council respond?
10. Residents are claiming that this has drastically reduced the value of their properties and making them difficult to sell - how does Wigan Council respond?

11. Residents claim that over 100 people complained about the PLP development by Wigan Council have only reported 70 - how does Wigan Council respond?
12. How are Wigan Council currently helping the residents impacted by the PLP development?

I am happy to discuss this over the phone if you wish.

Many thanks,

[redacted]

Subject: FW: C1359 [redacted] - Stage 2 Complaint - Astley Warehouses

Hi David

I have mainly drafted the response to this complaint, which is due to be issued on Thursday but I have a few queries as highlighted below and would appreciate if we can have a quick chat about this case. My manager [redacted] has advised that she has a meeting with you tomorrow, so she said I could join that call as well to have a quick chat if that is ok with yourself.

Some of the queries are as below.

Interface Distances - Are there any rules on interface distance between industrial and residential?

Committee – the complainant asks if a site visit was undertaken by Committee, am I correct in understanding it wasn't at the time. I understand that Committee does not have to visit every site, but they may if they feel that they need further clarification.

Landscaping – concerns raise that landscaping will take time to mature (saying was told 15 years). They ask what happens in the meantime, please can you provide a comment on this. Are there any guidelines/rules on what is required in terms of landscaping?

Height of bunds (2m not 3m) – At stage 1 advised that this would be passed to planning enforcement. Can you please advise of the position on this.

Dust – can you please advise what our position is on this? Are concerns continuing to be raised and are any additional measures in place.

Working hours – At Stage 1 she was advised that this would be passed to planning enforcement. In the Stage 2 complaint she advised that it was still starting before 08:00. Please can you advise of the position on this and if we took any action following the complaint. Are we still getting reports of work undertaken outside of hours.

The complainant has raised concerns regarding 24/7 operation, noise, light and air pollution. Can you please advise what happens going forward when the units are operating. If there are concerns regarding excessive noise, light and air pollution, would they report this to planning, or to environmental health for assessment?

Thanks

Good afternoon,

Just to make you aware, we have received a Stage 2 Complaint from [redacted] relating to the development of warehousing units at Astley Park Industrial Estate.

The background will need to be investigated, and one of my colleagues will be reviewing the complaint and will be in touch shortly.

In the meantime, if you have any further comments that you could please provide on the Stage 2 escalation, that would be great thanks.

For reference the details of the stage 2 are below:

Please provide the reason(s) why you are not satisfied with the way we have dealt with your Stage 1 complaint - I am not satisfied with the answers you have given to the questions I have asked.

How would you like us to resolve your complaint? I would like you to explain some of the statements you have made. There are still a lot of unanswered questions and consequences due to the planning committees decision.

2. 'The councils assessment of the proposal was carried out in full cognisance of the proximity of the housing around the site' So you're saying you were aware of the houses? Did all the councillors who approved these units visit the site? Why are these units so big and so close to the houses? 3/4 of the houses surrounding the site are potentially shared ownership/help to buy properties that are now unsellable. It is causing financial stress and worry for lots of families. No consideration has been taken into account.

3.'The nature of the surrounding area was taken into account' Forgive me for repeating myself 3/4 of the houses surrounding the site are potentially shared ownership/help to buy properties that are now unsellable. It is causing financial stress and worry for lots of families. Properties

are going to be devalued significantly and affect mortgages. How can you say the surrounding area was taken into account?

4. For clarity why weren't residents informed of the new full application. It's not acceptable nor inclusive to stick a poster or two in the hope everyone sees it, some residents may not be able to leave their home. Only 99 residents were contacted via post, these units effect the whole of Astley its not just an eyesore it's going to cause more traffic congestion. Again, no consideration.

5.You state you have made a 'Balanced planning decision' and ' Prioritised public interest'. You haven't taken onboard one objection from the public. Nobody in Astley wanted these monstrosities! Jobs could have been created in smaller units, it's appalling. Would you like these in your back garden while you enjoy the outdoors. We can't even go in our back gardens in the properties we paid a premium price for. There is nothing 'balanced' in the decision making about these units. All the councillors except one that approved these monstrosities live in the area, it doesn't affect them. This is not a balanced view.

8.'Operating hours were fully considered' You have built these units in the middle of a residential area that you created where families with children live. These families deserve a good night's sleep so they can go to work, and children can attend school ready to learn. We're going to be surrounded by flood lights, constant noise including through the night not forgetting the air pollution. My daughter has been diagnosed with asthma since this build started and now requires an inhaler.

9. Forgive me for repeating myself. It's not acceptable nor inclusive to stick a poster or two in the hope everyone sees it, some residents may not be able to leave their home. Only 99 residents were contacted via post, these units effect the whole of Astley it's not just an eyesore it's going to cause more traffic congestion. Again, no consideration.

10.'The views of the neighbouring residents is a very important part of the planning process' This is insulting. The local MP at the time was laughed at when he objected to the plans. There are hundreds of comments and objections from residents going back to when the plans were issued. This is not a balanced judgement as you have stated.

11.'You appreciate the concerns of residents living close by and you're actively monitoring the site'. The bunds that are being used to screen the site have been there months and they're still not at the correct height. This statement can't be true. The site continues to start before 8am including on a Saturday.

12. How long will this take?

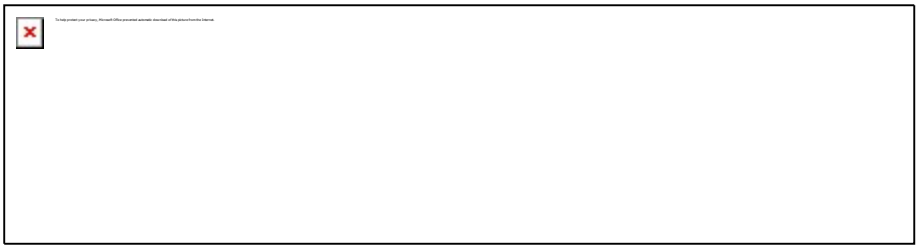
13.The bunds are not big enough.

14.The site is still starting before 8am.

15. It's your opinion that when the approved landscaping is in place the impact of the development will be acceptable to residents. Acceptable isn't good enough. [redacted] said in a previous correspondence that 'the approved landscaping when finalised and matured will provide a significant level of screening' the landscaping projections are over 15 years. I will ask the question again what do we do in the meantime?

16.The lack of consideration for residents is appalling and we're suffering the consequences. The damage has been done, my 9-year-old daughter now has asthma and it is down to the dust that was allowed to fly around for days if not weeks. Several residents house sales have fallen through. One resident house sale has fallen through twice he's had to increase his mortgage because he has help to buy. He's now trapped in an unsellable house that looks

straight at these monstrosities on anti-depressants while he tries to support his wife and two small children. You have not considered residents views or wellbeing at all. It is appalling that families have been put in challenging situations through no fault of their own. Your responses have not justified or given me a clear understanding of why you passed plans to build these monstrosities in the residential area you created.



If a planning representative would like to attend our next meeting and listen to other residents concerns it would be very much appreciated. I can inform you of the time and place in the next couple of days.

Many thanks.

Kind Regards,

Yes that's fine.

Alison is of the view that some sort of third part mediation between us and the residents group is required.

Sonia is looking to see who might be able to perform that function for us.

Thanks,

Just one thing – I know we said we'd take something to Planning Committee this time, but given the profile that this still has and the potential for Cllr G to use it as a platform again in front of the press, I've taken the view that we hold off until we've a clearer strategy. Trust that's OK. Deadline is today; Committee is next week which means I'm not there – [redacted] is happy to cover on the basis that it's business as usual.

From the emails last week it sounds as though we have some external advice being brought in – would be good to understand what that is and what we expect from it.

Thanks
David

Hi Alison
Please could you explain this as I don't recall hearing anything from you despite saying via ward councillors

We have provided residents with details of how to report any breaches, and my team have also (via ward Councillors) offered a discussion to the head of Garrett Hall Primary School – this offer has not been taken up to date but remains open.
Best wishes

Subject: Fw: Contact to the PR team from the Web

Good afternoon,

We have had the below query about Astley warehouses from Good Morning Britain. They haven't asked anything more than what we have previously said, so this is our suggested response:

Here is the suggested response:

A Wigan Council spokesperson said: "This application went through our planning consultation and committee process, which included letters being sent to neighbouring properties.

"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.

"We will continue to monitor the site throughout construction, ensuring this development brings new jobs and investment to the area is delivered properly."

For context and timeline:

- *Any questions around damage caused by the building works are to be discussed by the construction company and the residents/their insurance. It wouldn't be appropriate for the Council to be involved in those conversations.*
- *The Council is only able to take 'material planning considerations' into account when assessing planning applications, in line with national legislation. Potential changes to house prices is not included.*
- *This land was allocated as employment land in 2006, in the Council's 'Unitary Development Plan, and is an extension of Astley Business Park with this development expected to create around 500 on-site jobs, and another estimated 460 across Greater Manchester.*
- *The first 'outline planning application' went to Planning Committee in 2017. Permission was granted to the principle of industrial development on this site, but this did not set the final size or layout of the buildings. We appreciate that this part of the planning process may have caused some misunderstanding of what had been permitted on the site at this point in time.*
- *The full planning application went to Committee in June 2024, at which point the size, footprint and height of the units was set and agreed. There has been no fundamental change to those since permission was granted. Agenda for Planning Committee on Tuesday, 11th June, 2024, 2.00 pm*
- *In line with policy and national legislation, ahead of this Planning Committee meeting, letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was*

published in the Leigh Journal. The application received approximately 100 individual responses from the residents of around 70 addresses in the area. All objections raised were fully considered during the decision-making process.

Good Morning [redacted].
With regard to the Teams meeting with Mr Proctor and Thatcher on October 2nd 12-12.45pm.
Is there an agenda for this meeting or will the format of the meeting be an open question and answer session?Given the limited scheduled time for the meeting please be aware that we have seen and noted the slides used by Mr Proctor when he addressed the local councillors recently and would rather not be subjected to these again given the time limitations.
With Regards
[redacted]. Astley Warehouses Steering Group.

Subject: GB News: Warehouses

Hello,

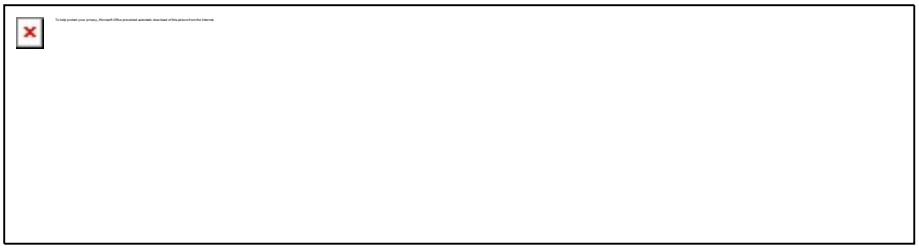
Just sharing the GB News enquiry:
I'm just reaching out as am hoping to obtain a comment regarding the Astley Business Park plans/ building work. I know there's been a lot of speculation and coverage both online and in the news, but was just wondering if it might be possible to interview someone from the council about this? Would be looking to do this on Friday afternoon if so! If not, could you please provide a statement

responding to the following: - why was planning permission given? - what are you doing to support those residents who say their lives have been affected and are concerned about ever selling their homes?

Are you happy if I send the extended version of our response?
[redacted] – just confirming this is accurate? I know the report says 70 representations, but if it was 104 from individual people that's what I've used in the below if that's OK.

Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.
"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.
"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."

For context:



- *This land has been allocated as employment land since 2006*
- *The outline planning application for this site approved the principle of industrial development on this site, which is an extension of Astley Business Park, in 2017.*
- *The outline planning permission did not set final size or layout of the buildings, but we appreciate this planning process may be the cause of some of the confusion.*
- *The full planning application went to committee in June 2024, which set out the size, footprint and height of the units and there has been no fundamental change to those since permission was granted.*
- *Ahead of this letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal. The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.*
- *The development will create around 500 on-site jobs, and another estimated 460 across Greater Manchester.*

Thanks,

Hi Christine, thanks for your help so far.

In September 2023, Wigan Council did a Royal Mail leaflet drop in the Mosley Common and Astley areas regarding the pre- application consultation. Around 200 letters went out.

Leaflet drops are done by postcode. Could you please find out where Royal Mail were instructed to deliver the unaddressed, owner/ occupier type letters to ?
In particular what were the specific postcodes targeted within the M29 and M28 areas?
Regards

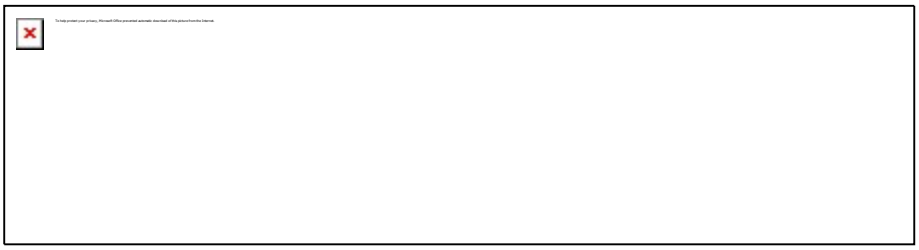
Subject: Planning Committee Formal Complaint

Hi Alison

I write to you to express my concerns regarding the planning committee's conduct and process in relation to a planning application approved in June 2024, which has since attracted local and national media attention.

While I recognise that all legal procedures were followed by the Local Planning Authority and the Planning Officer, I have serious concerns about the functioning of the planning committee itself.

1) Understanding of Application Details During a meeting with the Mayor of Greater Manchester, ward colleagues, and councillors from Astley, it was raised by an Astley councillor that one of the planning committee members did not realise how tall the warehouses were. The councillor suggested that, had they understood the height, they would have objected. My concern is how a committee member could be unaware of the scale of the development when the officer's report and the verbal



presentation clearly set out these dimensions. This raises the question of whether the member read the documents provided, and whether there may be complacency in evaluating material facts. Such complacency is a serious issue given the potential impact of the decision.

2) Conduct and Professionalism During Meetings It has been reported that certain members of the committee are not fully attentive during proceedings; some are described as falling asleep, arriving late, or not listening when the committee is in progress. This behaviour is unprofessional and undermines public confidence in the decision-making process. Given these points, I request that the matter be taken seriously and that an internal review be carried out to assess: The level of preparation and engagement of planning committee members with the documentation provided for the application. The overall conduct of committee meetings, including punctuality, attentiveness, and adherence to appropriate procedural standards. Any need for additional training or guidance to ensure robust, transparent, and accountable decision-making.

I appreciate your attention to these concerns and look forward to a formal response detailing any steps planned or taken in response to this inquiry.

Best regards,
Councilor James Fish
Tyldesley and Mosley Common

Hi Christine.
Yesterday I was copied into an invitation from David Proctor/ Aidan Thatchers office inviting me to a zoom meeting with a group of councillors. There was no mention of an agenda in the email. Am I right in assuming that this would be to answer your 9 point questions you asked David Proctor ??
If so, I am debating if I should attend and basically forfeit our one opportunity to meet these two face to face with the steering group. What are your thoughts?
I have shared your 9 point questions and the reaction was that all are very pertinent and wholly in our interest.
Thank you once again for your continued support.

With regards

[redacted]

From: Proctor, David
Sent: 08 October 2025 11:04
To: Harding, John CLLR; [redacted] (Planning)
Cc: Kenny, Paul, CLLR
Subject: RE: Query about planning approval

Morning,

I understand that several (if not all) members of the Committee have been approached with similar questions. There is a standard form of words for responding to queries on this topic, which the Leader asked for and has OK'd. It is:

Planning Committee considered this application in June 2024 (reference A/23/96226/MAJOR), and the planning permission was issued on 14th August 2024 once the required Section 106 agreement had been signed. There would have been a six-week window from 14th August within which any legal challenge to the planning permission had to be made – no such challenge was received and so the permission stands.

In consulting on the application the Council wrote directly to 99 residential properties in the vicinity of the site and placed site notices in the locality. All comments received were taken into account and the issues raised were reported to Committee.

The permission includes screen landscaping to be planted on bunds between the new buildings and the existing areas of housing. This should start to be planted from November onwards and will begin to soften the appearance of the development as it includes semi-mature trees, though it is recognised that the planting will take a period of time to fully mature.

We do recognise that developments under construction cause disruption for communities, and our teams have been proactively monitoring the site to ensure that the plans and the relevant planning conditions are being complied with. This has included taking measurements of the buildings and the bunds (which are partially constructed at present), and no issues have been found. If residents believe that any requirements are not being complied with, they can report this via our website and our team will investigate.

Officers met with representatives of a residents' group on 2nd October. The meeting covered a wide range of issues, and the group have agreed to submit a list of further questions which will be responded to.

Trust this assists.

David

To: Kenny, Paul, CLLR <P.Kenny@wigan.gov.uk>
Subject: FW: Query about planning approval

Hi Paul.
Hope you had a good holiday. I have just been trawling through the couple of hundred emails I received whilst away. Could you please see the email I received from [redacted] below. My initial reaction is not to respond at all but perhaps that would only fuel resentment from him and potentially others.
Perhaps we could discuss a suitable short reply should similar emails be received: e.g.

"Thank you for your email. The decision made by the Planning Committee was based on the content of the Officers report and presentation, verbal submissions by attendees at the meeting, and

consideration of representations made by members of the public. The matter of whether the application would be approved today is a hypothetical one and, as with all applications, would be considered based on the above criteria".

If we did finalize a form of words, I suggest we run it by [redacted] and perhaps David Proctor for comment/thoughts before responding to the resident(s).

I would welcome your thoughts, Paul.

Thanks.
John

Dear Cllr Harding,

I am writing as a resident regarding planning application A/23/96226/MAJOR (Astley Business Park).

As a member of the Planning Committee, you supported the approval of this development. Could you please explain what led you to support it at the time?

Now that construction is well underway and the true scale and impact of the warehouses can be seen in the community, would you still approve the scheme today?

I would be grateful for your response. As a resident, I am keen to understand how this decision was reached and whether councillors believe it still represents the right balance for the local area.

Yours sincerely,

[redacted]

David,

It's disappointing to hear that while others cc'd into the email did receive it, that both yourself and Aidan did not.

We appreciate that you want to take the time to review the questions, but we hope you will prioritise our concerns given the daily impact the warehouses are having on our community and will respond well in advance of the deadline you have added.

Please let us know suitable dates for a meeting at the construction site.

In addition, we note you have updated the CEMP for the construction site, including 'loud radios not to be played', and yet they are still not following them. Please find attached video which shows radios being played by the builders this afternoon, which breaches the latest measures you have put in place.

Thanks,
Astley Warehouse Action Group

Aidan and David,
Last week (7th October) we sent over the below email with a list of questions, a proposal to meet at the construction site on Wednesday this week and a request that you let us know that you have received the email.
We haven't had a response as yet, so we're checking that the email has been received and is being looked at?
Thanks,
Astley Warehouse Action Group

Subject: Re: Stop Notice, Astley Business Park
David.
Thank you for your reply regarding the concerns raised about the Astley Business Park development. While I note your comments, I must respectfully disagree with the conclusion that there are no grounds to consider serving a stop notice.
Firstly, although you state there is "no evidence whatsoever of a breach," local residents and committee members have raised legitimate concerns that the development is not in keeping with the approved plans, particularly in relation to its scale, massing, and impact on adjacent residential properties. The visual and environmental harm caused by the works as they currently stand is significant, and there remains reasonable doubt as to whether the development is proceeding in accordance with the spirit and detail of the approval. Where doubt exists, the Council does have the power and indeed the duty to intervene in order to prevent potential irreversible harm.
Secondly, you highlight that members were provided with drawings and cross-sections during the presentation, yet it is clear from subsequent feedback that the extent of the impact was not fully

appreciated. The fact that no site visit was requested does not mean members fully understood the implications, but rather that the information presented at committee did not sufficiently illustrate the development's relationship with surrounding housing and the local environment. If members had been misinformed or inadvertently misled—even unintentionally—that constitutes grounds for reconsideration.
Thirdly, the planning system is designed to balance development with the protection of existing communities. Given the strength of local opposition and the concerns regarding potential non-compliance, it would be premature to allow construction to continue unchecked. A stop notice would not be punitive but precautionary, ensuring that the development can be reviewed in detail before further potentially damaging works proceed.
In light of the above, I urge the Council to reconsider its position and issue a stop notice on the Astley Business Park development until the situation is clarified. This would help restore confidence in the planning process and demonstrate that the Council is acting in the best interests of both residents and proper planning procedure.
Regards
Councillor Gerrard

Subject: RE: Stop Notice, Astley Business Park
Councillor Gerrard,
Thank you for your email. As I said in my earlier response, there is no evidence whatsoever of a breach, whether in relation to conformity with the approved plans or otherwise, and so the Council has no basis in the legislation to consider serving a stop notice.
In relation to whether Committee members were misled or did not fully understand what was being proposed, the officer's presentation clearly showed the relationship between the development and adjacent houses, with scaled cross sections being shown relating to Tanhouse Avenue and Norton Nook. Members do of course also have access to the full online planning file including all drawings and assessments. If Members had felt that it was not possible to understand the development from the available information then I would have expected there to be a vote for a site visit – as you know this did not happen.
I hope this is of assistance.

David.
I don't believe the development is being g carried out in accordance with the application, im also angered that a full section of housing wasn't even present on the slides from the meeting.
I don't believe all councillors on the committee had all the full and accurate details on the day as is evident with the missing houses.
The scale is disproportionate to the slides we were presented with and I feel we was misled even though I voted against it.
I understand you are reluctant to issue a stop notice against a company like peel, however no matter what the scale of the application be it a garden fence or a building development, a stop notice should be issued if we believe the application isn't being adhered too.
This would also give an opportunity for the developers to adjust their plans and add features such as a living wall on the side of the warehouses if needed.
I urge you to reconsider and take some positive action for the council rather than being passive and allow this monstrosity to continue in its current form.
Regards
Cllr Gerrard

Subject: RE: Stop Notice, Astley Business Park

Councillor Gerrard,
Thank you for your email.
A stop notice is a tool that the Council has to prevent development from continuing, where there is evidence of a breach of planning control that is causing severe harm. In this instance, while we understand the concerns being expressed, there is no evidence of any breach and so the Council has no basis to serve a stop notice.
Our team have visited the site on numerous occasions to carry out proactive monitoring, and we are content that the bunds (and the rest of the development) are being constructed in line with the planning permission. As you know the development is still under construction, and so there is further work for the developer to do to install fencing and the landscape planting.
I've attached a copy of the Council's planning enforcement policy as background. I trust this assists.

Subject: Stop Notice, Astley Business Park

Good Afternoon
Considering the negative coverage of the building activity at Astley Business Park and as a member of the planning committee, I would like a stop notice to be issued immediately so that all concerns that residents, councillors, MP and Mayor are raising are fully investigated, the main ones being the bunds not being installed as per the planning applications and that I believe that the committee was misled in regards to the size and scale of the development is much larger than what was perceived at the application meeting. This emphasises the importance of site visits on sites such as this given the scale and proximity to residents.
Please take this email a formal request that a stop notice is served immediately under TCPA1990 s.171e and if possible, an enforcement notice be brought back before the committee.
Regards
Councillor Gerrard

Subject: RE: Tyldesley warehouses

Thanks [redacted].

@Proctor, David would you be happy for the below to be sent to the Journal? We'll also remind them of Aidan's previous comment, rather than providing a new one.

- *We are proactively monitoring the development and the conditions on site, and are liaising with the developer about the timing of the screen landscaping measures.*
- *These measures will significantly mitigate the impact on residents. Although the approved landscaping scheme will naturally take years to fully mature, a level of screening will be achieved immediately and will be enhanced year-on-year. The developer has confirmed that planting will commence within the next planting season, which begins in November.*
- *All elected members receive a weekly list of planning applications from across the borough, allowing them to check for applications that may impact their ward – whether from within their own ward itself, or in neighbouring wards. This list is also available online along with other planning application information.*
- *Members are not notified of an application in their ward going to planning committee as a matter of course. However, all residents who had commented were notified and the committee date was indicated on the website.*
- *Letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal.*

- *The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.*
- *The need for a site visit is a matter for the members of the planning committee, who can defer an application if they consider a site visit is necessary.*
- *The Section 106 money was based on the applicant's need to provide a 10% biodiversity net gain (a requirement of Places for Everyone, a part of the Council's Development Plan at the time of determination). This funding is specifically for the improvement of habitats, and was not available to be used for any other purpose. A site in the locality was identified as being suitable for providing the required biodiversity habitat units. No suitable sites within the Astley ward were identified.*
- *All the potential implications and risks of the development were fully considered. The planning officer's report to elected members includes a dedicated section on both noise and air quality. No evidence was found that such matters would have a detrimental impact on local residents, including children.*
- *We take all residents' concerns seriously and have carried out site visits to check compliance, and met with the site manager to discuss concerns.*

Many thanks,

[redacted]

Hi David,

As I believe you're aware, we've received an enquiry from the Leigh Journal following complaints from elected members about the Chaddock Lane warehouse (see email below).

Based on the recent presentation to residents and information already provided to members, I've been drafting some bullet points in response to the questions raised. Please could you take a look at the below and let me know your thoughts? There are also a couple of points for clarification highlighted in red if you're able to assist with those please.

Tree planting plans will not block the warehouses, could damage properties, and will take years to make any difference. The bunds are not reaching the required 3m, and residents themselves are having to measure them.

- We are proactively monitoring the development and the conditions on site, and are liaising with the developer about the timing and efficacy of the screen landscaping measures.
- These measures will significantly mitigate the impact on residents. Although the approved landscaping scheme will naturally take years to fully mature, a level of

screening will be achieved immediately and will be enhanced year-on-year. The developer has confirmed that planting will commence within the next planting season which begins in November.

Councillors were kept in the dark – the application was logged in November 2023 under Tyldesley, not Astley, and we were not informed about the June 2024 planning meeting. Had we known, we'd have attended in person.

- All elected members receive a weekly list of planning applications from across the borough, allowing them to check for applications that may impact their ward – whether from within their own ward itself, or in neighbouring wards. This list is also available online along with other planning application information.
- Members are not notified of an application in their ward going to planning committee as a matter of course. However, all residents who had commented were notified and the committee date was indicated on the website. This information is provided 5 working days in advance of a meeting. (can you confirm this please? Might be good to include!)
- Letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal.
- The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.

Lack of consistency in the planning regulations - residents often get their extension rejected at planning for reasons ignored within this application - air quality, reduction of light, impact on neighbours. The planning committee never visited the area to see the true scale of the development.

- The need for a site visit is a matter for the members of the planning committee, who can defer an application if they consider a site visit is necessary.

Section 106 Money: £200,000 has been allocated to Bedford Colliery, but why is Astley – directly impacted – seeing no benefit?

- The Section 106 money was based on the applicant's need to provide a 10% biodiversity net gain (a requirement of the Places for Everyone, a part of the Council's Development Plan at the time of determination). The costs were calculated by the council's Greenheart team and a site in the locality was identified as being suitable for providing the required Biodiversity Habitat Units. No suitable sites within the Astley ward were identified. (not sure on these acronyms – excuse my ignorance! Can you clarify please?)

The planning report's claim that 60ft units are "not detrimental" to residents is indefensible - and offensive.

Subjective opinion. Suggest we ignore. Agree

Noise, dust, air quality, 24/7 operations and risks to children have not been properly considered - damages to houses are now ignored by the council and PLP, without support to the residents.

- All the potential implications and risks of the development were fully considered. The planning officer's report to elected members includes a dedicated section on both noise and air quality. No evidence was found that such matters would have a detrimental impact on local residents, including children.
- We take all residents' concerns seriously and have acted to confirm and ensure ongoing compliance.

(How have we acted? Can we say anything else about supporting residents? – carried out site visits to check compliance, met with the site manager to discuss concerns,

Many thanks,

[redacted]

Subject: Tyldesley warehouses

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi guys,

I've had an email from Cllr Eastoe regarding the warehouse development in Tyldesley. She said she's attended community meetings with other councillors and is unhappy about aspects of the planning application.

It's quite long so I'll copy over their concerns, to see if the council wanted to address any of these specifically or add any further comments about the development?

At meetings with council officers and through residents' concerns, councillors have challenged the way this application has been handled. Key issues include:

Tree planting plans will not block the warehouses, could damage properties, and will take years to make any difference. The bunds are not reaching the required 3m, and residents themselves are having to measure them.

Councillors were kept in the dark – the application was logged in November 2023 under Tyldesley, not Astley, and we were not informed about the June 2024 planning meeting. Had we known, we'd have attended in person.

Lack of consistency in the planning regulations - residents often get their extension rejected at planning for reasons ignored within this application - air quality, reduction of light, impact on neighbours. The planning committee never visited the area to see the true scale of the development.

Section 106 Money: £200,000 has been allocated to Bedford Colliery, but why is Astley – directly impacted – seeing no benefit?

The planning report's claim that 60ft units are "not detrimental" to residents is indefensible - and offensive.

Noise, dust, air quality, 24/7 operations and risks to children have not been properly considered - damages to houses are now ignored by the council and PLP, without support to the residents.

Subject: Warehouses- Letter

Hello,

[redacted] has just asked me to share the latest of what we've sent to the press, in case it helps with the letter to the steering group:

Response:
Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.
"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.
"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."

Ends

For context:

- This land has been allocated as employment land since 2006.
- The outline planning application for this site approved the principle of industrial development on this site, which is an extension of Astley Business Park, in 2017.
- The outline planning permission did not set final size or layout of the buildings, but we appreciate this planning process may be the cause of some of the confusion.

- The full planning application went to committee in June 2024, which set out the size, footprint and height of the units and there has been no fundamental change to those since permission was granted.
- Ahead of this letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal. The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.
- The development will create around 500 on-site jobs, and another estimated 460 across Greater Manchester.

Would you mind sharing the letter with us please, as we'd expect it to be shared with the media?

Thanks

Our reference: DP/MEM005772-2
Please ask for: David Proctor
Extension: 89126
Direct line: 01942 489126

Date: 7 August 2025

Dear Michael,

Thank you for your recent correspondence on behalf of your constituents regarding the development of warehousing units at Astley Park Industrial Estate, under planning permission reference: 'A/23/96226/MAJOR'.

I fully appreciate the concerns raised by residents living close to the site, particularly during the construction phase when the unfinished development can appear stark and intrusive. Officers within both the Planning and Enforcement teams are aware of these concerns and are actively monitoring the situation to ensure compliance with the approved plans.

Following a recent site inspection by one of our Planning Enforcement Officers, I can confirm that Unit 1 is currently under construction. During the visit, the Officer used a measuring tool to verify the height of the structure, which was recorded at 18.3 metres, a height consistent with the height of the unit on the approved plans. The unit is also correctly positioned in accordance with the approved site layout.

In direct response to your request, I have attached the following approved documents for reference:

- The site layout plan, showing the location of all approved units.
- The elevational drawing for Unit 1.
- The landscaping scheme for the area surrounding Unit 1, including details of the bund and proposed tree planting.

While the bund identified within the drawings has already been formed on site, the necessary landscaping works have not yet commenced due to the ongoing construction. Once implemented, the landscaping will provide additional screening and help soften the visual impact of the development on neighbouring properties.

In response to previous enquiries on this development, links to the approved plans and guidance on how to access them have been shared with residents. I acknowledge that the constituents who contacted you may not be aware of this facility. For ease of access, the

approved plans can be viewed on the Council's website using the application reference number A/23/96226/MAJOR via the following link:

Search and comment on planning applications

Monitoring of the site by the Council's Planning Enforcement Officers is ongoing and will continue throughout the construction period. Further visits will be undertaken as necessary to ensure that the development is being carried out in accordance with the approved plans and conditions.

I hope this response provides clarity and reassurance to both you and your constituents that the Council remains committed to working constructively with local residents and the developer to ensure the delivery of a high-quality scheme, in full accordance with the approved planning permission.

Yours sincerely,

David Proctor
Assistant Director, Planning and Regeneration

To: Roberts, Christine CLLR
Subject: RE: Wigan Local Plan

They all make up the "local plan" – from a decision making point of view they all have the same status as part of the "development plan" as defined in the legislation, and there are relevant policies in each of them.

Subject: RE: Wigan Local Plan

Councillor Roberts,

The Planning Committee report went into a lot of detail on which Local Plan policies were relevant and how the development was assessed in relation to them.

The Committee report is here:
https://democracy.wigan.gov.uk/documents/g5625/Public%20reports%20pack%2011th-Jun-2024%2014.00%20Planning%20Committee.pdf?T=10&a=1

And it references policies from various documents that make up the "development plan" (local plan):

The Core Strategy https://www.wigan.gov.uk/Docs/PDF/Council/Strategies-Plans-and-Policies/Planning/Adopted-Core-Strategy.pdf
The remaining policies from the 2006 Unitary Development Plan
https://www.wigan.gov.uk/Docs/PDF/Council/Strategies-Plans-and-Policies/Planning/Latest-Remaining-Policies-UDP-April-2006.pdf
Places for Everyone https://www.greatermanchester-ca.gov.uk/media/2drduk0t/places-for-everyone-joint-development-plan-dec24.pdf

Trust this assists
David

Hello,

Assuming this is the same site, please find first draft of a statement below:

XXX, said: "We fully appreciate the concerns raised by residents living close to the site, especially during construction when the unfinished development can appear stark and intrusive.
"Out Planning and Enforcement teams have been on site, and have verified that the building is in the right location and being built to the height as approved in the plans. The final plans include landscaping which will help to screen and soften the appear, and mitigate the impact on nearby properties.
"Details re consultation…
"We will continue to monitor the site throughout construction."

Ends

Thanks,

Subject: RE: Withington Drive, Astley- Warehouses

Afternoon [redacted]

If it's the same development I believe it is, Planning and Regeneration have received correspondence from elected Members on the matter.

The below is the body of text taken form one of those responses – given it was personal to a constituent please do not share or pass on the below. If any queries do come up, we'll be happy to engage with a response, but hopefully the below gives you a bit of context at this stage:

> *Thank you for your recent correspondence on behalf of your constituents regarding the development of warehousing units at Astley Park Industrial Estate, under planning permission reference: 'A/23/96226/MAJOR'.*
>
> *I fully appreciate the concerns raised by residents living close to the site, particularly during the construction phase when the unfinished development can appear stark and intrusive. Officers within both the Planning and Enforcement teams are aware of these concerns and are actively monitoring the situation to ensure compliance with the approved plans.*
>
> *Following a recent site inspection by one of our Planning Enforcement Officers, I can confirm that Unit 1 is currently under construction. During the visit, the Officer used a measuring tool to verify the height of the structure, which was recorded at 18.3 metres, a height consistent with the height of the unit on the approved plans. The unit is also correctly positioned in accordance with the approved site layout.*
>
> *In direct response to your request, I have attached the following approved documents for reference:*

- *The site layout plan, showing the location of all approved units.*
- *The elevational drawing for Unit 1.*
- *The landscaping scheme for the area surrounding Unit 1, including details of the bund and proposed tree planting.*

While the bund identified within the drawings has already been formed on site, the necessary landscaping works have not yet commenced due to the ongoing construction. Once implemented, the landscaping will provide additional screening and help soften the visual impact of the development on neighbouring properties.

In response to previous enquiries on this development, links to the approved plans and guidance on how to access them have been shared with residents. I acknowledge that the constituents who contacted you may not be aware of this facility. For ease of access, the approved plans can be viewed on the Council's website using the application reference number A/23/96226/MAJOR via the following link:

Search and comment on planning applications

Monitoring of the site by the Council's Planning Enforcement Officers is ongoing and will continue throughout the construction period. Further visits will be undertaken as necessary to ensure that the development is being carried out in accordance with the approved plans and conditions.

I hope this response provides clarity and reassurance to both you and your constituents that the Council remains committed to working constructively with local residents and the developer to ensure the delivery of a high-quality scheme, in full accordance with the approved planning permission.

Hope this helps, regards,

Hi [redacted]

We've been tagged into a facebook post about warehouses on Withington Drive- it's getting a lot of engagement so I'm expecting an enquiry on it.

The general jist is that people feel they are bigger and closer than on the plans, and they were not consulted.

Is there any background to this one please?

Thanks

Internal Memorandum

To:	**Development Management**	**From:**	Environmental Health
FAO:	[redacted]		
Ref:	**A/23/96226/RM Revised**	**Ref:**	EH/DSM/919762
		Date:	24/06/2024

Development at: Land At Astley Park Way Worsley

Proposal: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works.

Conclusion

No objections subject to the conditions recommended below:

ISSUE	RECOMMENDATION
Land Contamination	**CONF5(Contamination ground investigation and remedial measures) (Variation of)** **No development approved by this planning permission shall commence until a remediation strategy to deal with the risks associated with contamination of the site in respect of the development hereby permitted, has been submitted to, and approved in writing by, the local planning authority. This strategy will include the following components:** **Post demolition but prior to any further development commencing:** **1. An updated ground gas risk assessment (considering on-site pressure grouting works and the subsequent ground gas risk), and a combustion assessment, identifying the risk to all receptors that may be affected, including those off-site.** **2. The results of the updated site investigation and the detailed risk assessment referred to in (1) and, based on these, an options appraisal and an updated remediation strategy giving full details of the remediation measures required, including a Gas Protection Design Report if gas protection measures are required, and how they are to be undertaken.** **3. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (2) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.** **Prior to the occupation of the development:**

4. **Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.**

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

Informative 1:
The use of vibro/stone columns may not be suitable above grouted mine workings as they may provide a seepage pathway for ground gas (see Chapter 4.5.5, NHBC Standards). If the use of vibro/stone columns is proposed above grouted mine workings, this will need to be fully considered and detailed within the assessment and Gas Protection Design Report.
Informative 2:
All site users should be made aware of any remedial measures incorporated within the development in order to break the pathway between any residual contaminants, including any ground gas, and the importance thereof. Remedial measures may include, but not limited to, clean capping layers to gardens, gas protection measures and water supply barrier pipe. As with all remedial measures, the integrity should be maintained and appropriate precautions taken should any future developments be undertaken at the site, i.e. extensions, conservatories, garages, landscaping and utilities etc., including the appropriate handling and disposal of any contaminated arisings generated by excavations. All parties involved with waste and soil movement at the site should be aware that materials illegally deposited or deposited at inappropriate sites may be subject to relevant landfill taxes, payable by all parties. Only robust due diligence is a defence against joint liability. Illegal deposits can include moving waste soil material on sites, or between sites, without the appropriate permits, exemptions or duty of care.
Informative 3:
For gas protection measures, the detailed design and specification of the protection measures should also be recorded in a design report (this can be appended to the remediation strategy), with the gas protection design, product specifications and verification plan being clearly defined and justified, as detailed within BS 8485:2015+A1:2019 and CIRIA C735.
Informative 4:
Wigan Council has adopted the latest version of the Yorkshire and Lincolnshire Pollution Advisory Group (YALPAG) Guidance 'Verification requirements for cover systems' (version 4.1, June 2021), which will need to be considered as part of any remediation strategy.
Informative 5:
It is advised that the environmental consultant and landscape architect work together and adopt a holistic approach to a clean cover system (if required) and landscape design in accordance with the Council's Landscape Design SPD.
Informative 6:
Competent person (to prepare site investigation information): A person with a recognised relevant qualification, sufficient experience in dealing with the type(s) of pollution or land instability, and membership of a relevant professional organisation. (NPPF 2021, s.183-184 and Annex 2).
Informative 7:
A Remediation Strategy needs to consider the impacts of climate change, which has the potential to change the risk profile for Conceptual Site Models (CSM) and associated contaminant linkages. The impact of climate change on a CSM is site-specific. The National Planning Policy Framework (NPPF), Chapter 14, s.158 'Planning for climate change' states "Plans should take a proactive approach to mitigating and adapting to climate change, taking into account the long-term implications for flood risk, coastal change, water supply, biodiversity and landscapes, and the risk of overheating from rising temperatures…" The Environment Agency's Land Contamination Risk Management (LCRM) guidance in the 'Before you start', 'Sustainability' section, supports a sustainable approach to land contamination risk management. It promotes the industry-led Sustainable Remediation Forum UK

	(SuRF-UK), which has produced a framework for assessing the sustainability of soil and groundwater remediation. The framework also helps to factor in climate change impacts, including extreme weather events to ensure site works and any long-term remediation is sustainably robust. Framework Document (claire.co.uk)

	Date:	16th January 2024

Application No: A/23/96226/MAJOR
Proposal: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Location: Land At Astley Park Way Worsley
Grid Reference: E 370899 N 401108

Trip generation and forecasting: The application relates to the proposed development for a B2 / B8 land use development comprising a Gross Floor Area [GFA] of circa 32,825sqm across a number of units, situated at Astley Park Way off Chaddock Lane.

The trip rates have been previously agreed and are acceptable.

It should be noted that growth factors and the following committed developments were used in this TA. The committed developments are:

- A/17/84108/OUTMAJ - Land North Of Garrett Lane, East Of Garrett Hall, West Of Mosley Common Road, And South Of The Guided Busway Tyldesley.
- A/17/83702/OUTMES - Parr Bridge Works, Mosley Common Road, Tyldesley, Manchester M29 8PR.
- A/17/84560/OUTMAJ - Land East Of Leigh Road South/West Of Bee Fold Lane.
- A/20/88849/MAJOR - North Leigh Park Nel Pan Lane Leigh.

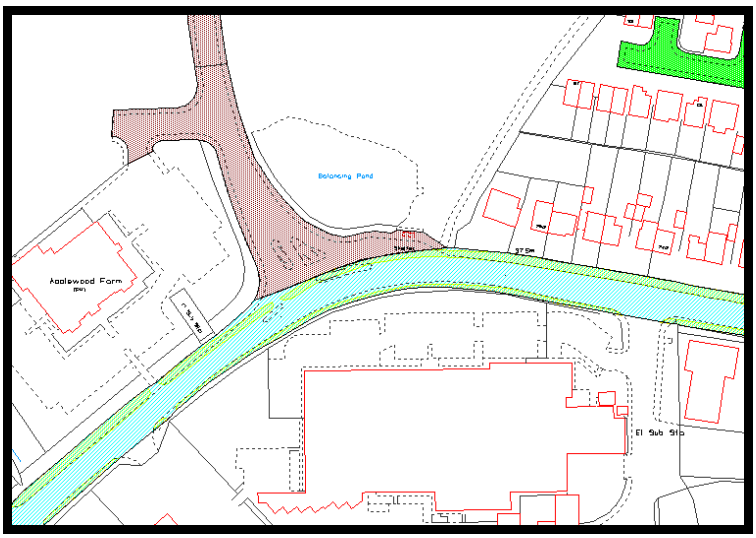
Local junctions / network impact: The following modelling concerns have been identified:

- In terms of trip distribution, it is not clear how each MSOA area has been allocated to a particular route.
- The study area needs to be extended to all junctions on the network experiencing an increase of 30vph or more. All junctions experiencing an increase of 30vph should be modelled.
- The lane widths used in the modelling for both junctions are too high. The modelling should be corrected and resubmitted.

Public transport and sustainable travel: The proposed development site is in a reasonably accessible location and is well located to make use of the existing public transport links and pedestrian / cycle routes.

Road safety: The causes of road traffic accidents are random and multifunctional, with each accident having several different reasons and trying to spot one overall contributing factor may not be possible. It is for this reason that Greater Manchester Police (GMP) will normally attend and record accidents that occur on the borough's highway network, where the accident results in an injury to persons. As a part of this process, they will record the details of the accident; and undertake an accident investigation to try and determine the contributory factors that may have caused the accident. The Council will analyse this data over a 5 year period to see if any trends can be identified. It should be noted that 'damage' only incidents will not appear on the accident database.

Details of damage only accidents are held by insurance companies and because of data protection, the Council cannot access this information. Without a detailed accident investigation being undertaken, any information given to the Council cannot be verified and must be regarded as hearsay.



The Police database was checked for the A572 Chaddock Lane, which included its junctions with Coach Road and the A580 East Lancashire Road. During the last five-year period for which data was available, fourteen accidents were recorded. All accidents were attributed to road user behaviour and two accidents involved vulnerable road users.

The following conclusions can be made regarding the accident data:

- An average of 2.8 accident a year have been made per year in the study area.
- No accidents have occurred at the site access.
- No accident cluster have been identified.
- No accident trends have been identified.

Public rights of way: The PRoW Officer should be consulted.

Adoption record: The drawing below shows the extent of the adopted highway, which is depicted in blue/green:

It should be noted that the existing access is still subject to the certification process for adoption.

Visibility: The proposal uses an existing access and the visibility splays comply with Manual for Streets.

Servicing: Based on Drawing No: 21714-HYD-XX-XX-DR-TP-1003, a large articulated vehicle can enter and leave the site in forward gear.

Layout: The site highways layout is acceptable.

Parking: The basic car park layouts will allow for the free flow of traffic and a vehicle can enter and leave a bay in one manoeuvre. However, there are no pedestrian facilities and there should be a footpath at the rear of the parking bays that connects into building entrances.

Cycle parking facilities will require a roof.

The applicant as offered no evidence that the proposed level of parking provision is suitable for the development site. The site should be self-sufficient in parking terms and not lead to inappropriate parking on the proposed highway network. This would raise concerns for highway safety and congestion.

Proposed mitigation measures: It is recommended that a contribution towards the upgrade and revalidation of MOVA at the junction of A580/Chaddock Lane is requested. TfGM anticipate that this would cost in the region of £15k. This would help to futureproof the development by mitigating any increased delay because of the increased traffic flows and changes in traffic patterns. Also, this would ensure that the network operates as efficiently as possible to ensure that congestion is minimised.

Conclusion on highways matters: No objections in principle, but the modelling concerns are addressed.

19 February 2024

Dear [redacted]

Astley Business Park

I have been asked by our client, PLP, to provide some market advice regarding eaves heights for new build industrial units.

By way of background I am a Partner in Gerald Eve's Manchester Office where I head up the Industrial Agency Dept. I have worked in the Industrial agency sector throughout the North West for over 25 years during which time I have advised clients on numerous market facing industrial development schemes from 2 to 200 acres.

I have been assisting PLP with their development plans for Astley Business Park for a number of years and have been asked to provide some market evidence of occupational eaves heights requirements and expectations in new build developments in order to attract occupiers to similar industrial developments. Such marketing evidence ultimately underpins the proposed building heights for which planning consent is sought.

For marketing purposes, a critical factor for occupiers is the internal useable height of the unit (eaves height to underside of haunch), I appreciate the ridge height is a factor for planning purposes but in order to compare like with like I have focussed on the eaves height to underside of haunch. I assume the external ridge heights for the units shown will be comparable to the ridge heights of the proposed units at Astley Business Park.

Set out below are the eaves height (to underside of haunch) for the proposed units at Astley Business Park:

Astley Business Park	Size of unit (sq ft)	Eaves height to underside of haunch
Unit 1	145,548	15m
Unit 2	140,513	15m
Unit 3	35,092	10m
Unit 4	34,979	10m

In order to compare the proposed units at Astley Business Park to the current market and occupational requirements I have set out below eaves heights for a number of new build schemes that are either on site or have recently completed:

Available Speculatively Developed Units 100,000 to 200,000 sq ft:

Address	Size of unit (sq ft)	Eaves height (to underside of haunch)
Viking Park, Widnes, WA8 0PB	200,000	15m
Aviator 200, West Road, Ellesmere Port, CH65 1BL	198,868	15m
T150, Ashburton Point, Trafford Park, M17 1SN	148,240	15m
Skylink, Stanley Green Business Par, Cheadle, SK8 6PT	147,367	15m
Atlantic Park, Dunnings Bridge Road, Liverpool, L33 7RN	134,375	15m
Link 114, Link Logistics Park, North Road, Ellesmere Port, CH64 1BA	114,692	15m

I have also considered the proposed smaller units, tabled below are a number of recently developed speculative schemes with similar size units and their eaves heights to underside of haunch:

Available Speculatively Developed Units 30,000 to 50,000 sq ft:

Address	Size of unit (sq ft)	Eaves height to underside of haunch
1A, 401 Avro Way World Freight Terminal, Manchester, M90 5XR	36,167	10m
ARK 39, Trafford Park Road, Trafford Park, M17 1HJ	39,275	10m
Unit 2, Cobalt 2, Foxdenton Lane, Oldham Broadway, M24 1NN	43,395	10m
Imperial 47, Kingsway BP, Rochdale, OL16 4NZ	47,025	10m
Bolton 45, Panattoni Park, Great Bank Road, Bolton, BL5 3XN	46,940	12m
Q37, George Richards Way, Altrincham, WA14 5GL	37,119	10m

The above demonstrates that the following eaves heights to underside of haunch are required to meet occupational requirements and attract occupiers to and associated employment to new units:

- 15m internal eaves height to underside of haunch for units of 100,000 to 200,000 sq ft
- 10m internal eaves height to underside of haunch for units of 30,000 to 50,000 sq ft

If units are not built to these eaves heights they run the risk of being discounted by some occupiers due to lack of height, which in turn will lead to the loss of additional employment and inward investment in the borough.

The proposed eaves heights for the units are in line with the current market and will be extremely attractive to occupiers. Indeed, we understand from PLP that interest has already been expressed from a number of local employers, which is testament to the suitability and attractiveness of the proposed development.

I hope the above is of interest and please feel free to contact me should you require any additional information.

Yours sincerely

[redacted]

knightwebb

Proposed Construction Works, Astley Business Park – Site Rules

A Vehicular access to the site to be from Astley Park Way, off Chaddock Lane. Suitable directional signs to used to direct vehicles to the site entrance.

B Heras fencing with netting or timber hoarding to be utilised at the site entrance to form a secure and presentable site entrance and prevent unauthorised access onto the site.

C Temporary site fencing to be utilised to maintain public rights of way and prevent unauthorised access.

D Contractor to engage with local councillors before works commence and carry out a letter drop to all affected residents confirming contact details in the case of complaint. The contractor is to nominate a site manager with contact details for residents to contact should issues arise.

E Wheel washing facilities to be utilised during earthworks operations to minimise mud on road from vehicles exiting the site.

F A road sweeper is to be utilised on Astley Park Way and Chaddock Lane during the earthworks operation.

G The contractors site compound is to be situated at the southern end of the site immediately off Astley Park Way. Security lights to be positioned to avoid light spill to adjacent residential properties.

H The site will be registered with the Considerate Constructors Scheme and commit to achieving a rating of 'Excellent'.

I Vehicles entering the site to be managed to avoid vehicles blocking Astley Park Way.

J The contractor is to take all reasonable and practicable measures to prevent nuisance to the adjacent residential properties and school. Measures to include:-

- Use of a bowser to damp down earthworks in dry conditions to minimise dust
- Use of noise insulation to site vehicles where possible
- Limiting noisy site works to 8am to 6pm where practicable.
- Any site lighting or task lighting is to positioned to avoid light spill on to residential areas and only be used during working hours.

K Access to Applewood Farm public house to be maintained 24/7 unless by prior agreement.

Importance: High

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thanks again for your and [redacted] time yesterday.

I write to respond to the GMEU comments, as follows in red:

- The details of the urban tree planting schedule is provided to ensure that 150 trees are proposed – The submitted landscape plans propose that 319 standard trees are planted across the site. This is over double the 150no. stated in the GMEU response and is hopefully satisfactory to the LPA on this point.

- That at least 56 have the potential to exceed 30cm dbh after 30 years - Please find revised landscape plans 2266-22-05+06 Rev P04 attached. The revised drawings include 56no. Semi mature trees proposed within areas of grassland (individual trees) as opposed to the 26no. semi mature trees previously proposed on Rev P03. The following 'upgrades' in size have been made on Rev P04:
  - 26no. EHS (14-16cm girth) have been upgraded to be of Semi mature standard (20-25cm)
  - 4no. EHS (extra heavy standard) 18-20cm girth have been upgraded to be of Semi mature standard (20-25cm)
  - For the avoidance of doubt these are not additional trees but instead an upgrade to 30no. trees from extra heavy standard to semi mature. As such, the ecologist has confirmed this has no impact on the currently submitted BNG Metric/spreadsheet and/or habitat loss calculations.

- Details on the other neutral grassland proposed to achieve good condition are provided. The other neutral grassland on site is already in 'good' condition. It will be translocated on site. However, in order to maintain it as such the following should be undertaken:
  - The grassland should continue to be consistent with the UK Habs description of other neutral grassland
  - Sward height is varied (at least 20% of the sward is less than 7 cm and at least 20% is more than 7 cm) creating microclimates which provide opportunities for insects, birds and small mammals to live and breed.
  - Cover of bare ground is between 1% and 5%, including localised areas, for example, rabbit warrens
  - Cover of bracken Pteridium aquilinum is less than 20% and cover of scrub (including bramble Rubus fruticosus agg.) is less than 5%.
  - Combined cover of species indicative of suboptimal condition and physical damage (such as excessive poaching, damage from machinery use or storage, damaging levels of access, or any other damaging management activities) accounts for less than 5% of total area.
  - Ensure Schedule 9 invasive species remain absent from the habitat.
  - There are 10 or more vascular plant species per m2 present, including forbs that are characteristic of the habitat type

- I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided. This is a matter to be progressed / agreed with WMBC as part of S106 drafting – as a starting point, we will consider with our ecologist what we believe to be an accurate price per unit but we request that WMBC does the same via its own advisors / habitat values charged for other schemes in the Borough.

Please can you confirm receipt and re-consult GMEU as necessary and request their urgent review/response/confirmation that the queries have now been satisfactorily resolved.

Kind regards

wsp

Subject: FW: Consultee Comments for Planning Application A/23/96226/MAJOR

Hi [redacted]

You may already have seen the comments below as they are online but I just wanted to bring them to your attention.

As you will see further information is required re BNG.

There is now a need for a re-consultation with GMEU, Highways, Transport Policy Team and Salford City Council. In order to manage your client's expectations, its important to point out that all of the above will require a 14 day re-consultation period once the required information is received and as reports for March committee need to be completed by 19th Feb, there is a possibility that this application will not be ready to be presented at that time.

Given the level of objection in the surrounding area, it will be imperative that all outstanding issues are resolved before Officers can bring this before committee.

I am of course not ruling out making the March agenda, but I think its important to be realistic as we go forward.

Regards

[redacted]

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 07/02/2024 12:49 PM from Mr [redacted] Greater Manchester Ecology Unit (Not Available) on behalf of Greater Manchester Ecology Unit.

Application Summary

Reference:	A/23/96226/MAJOR
Address:	Land At Astley Park Way Worsley
Proposal:	Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Case Officer:	[redacted]

Comments Details

Comments:

Hi [redacted]

Thank you for consulting on the additional information.

1. Great Crested Newts
An unredacted version of the license has been provided. This confirms that Natural England are satisfied that the development is eligible of for district licensing.

Technically no condition is now required as the process is now in the hands of Natural England and their agent for delivery of the new ponds unless the LPA would want mitigation beyond the requirements of DLL. However the developer may decide to change their approach and not enter in to DLL at which point further survey may be required. I therefore recommend a condition along the following lines is applied to any permission.

"The development has the potential to cause harm to great crested newts and entered in to District Level Licensing.

Prior to development confirmation that:

• no changes to this mitigation approach have occurred or;
• if changes have occurred further information on the new mitigation approach to gcn.

should be provided to and agreed in writing by the LPA"

2. Contributing to and Enhancing the Natural Environment & Biodiversity Net Gain
Section 180 of the NPPF 2023 states that the planning policies and decisions should contribute to and enhance the natural and local environment. The defra metric has been provided in excel format as requested.

The baseline value of the site appears fair, I am therefore willing to accept 62.84 biodiversity units (BU) as the baseline.

The post-development value has been calculated at 51.89 BU a loss of 10.95 BU and a shortfall of 17.24 BU to achieve 10% BNG. This includes a significant number of units generated through urban tree planting, 150 trees achieving moderate condition, of which 56 are forecast to achieve medium size after 27 years. It also includes 0.6819 ha of other neutral grassland forecast to achieve good condition. Both are relatively high risk proposals, with a lack of detail (that I could find) on the tree planting schedule or grassland proposals. There is therefore a risk of the loss being higher.

I therefore recommend that prior to determination:

- the details of the urban tree planting schedule is provided to ensure that 150 trees are proposed ;
- that at least 56 have the potential to exceed 30cm dbh after 30 years and;
- details on the other neutral grassland proposed to achieve good condition are provided.

I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided.

[redacted]
Ecologist

[redacted]

Further to the meeting yesterday, please find attached a document that has been prepared setting out a series of commitments and rules/procedures that any appointed building contractor and sub-contractors would need to sign up to as part of the proposed development.

This document should be treated as an addendum to the Initial CEMP submitted at the outset and hopefully provides greater clarity on how the construction phase would be suitably managed to mitigate impacts on residential amenity as far as feasibly possible, however we would be grateful for your review and advice as to whether there are any additional details / details that need embellishing within the document to address resident concerns?

Kind regards

wsp

[redacted]

Further to our meeting last week, please find attached 4no. indicative visualisations of the proposed development to assist with the Council's consideration of the scheme from a landscape/visual impact and amenity perspective. The attached Site Viewpoint Locations Plan indicates the locations of the 4no. viewpoints, for reference. I also provide below the following commentary which should be read alongside the visualisations (please also refer the more extensive details provided in the submitted Design & Access Statement and Landscape Design Statement).

Furthermore, as discussed at our meeting and in the event it is required / useful to support the overall planning case, I attach a letter from PLP's commercial agent providing market evidence that supports the proposed building heights sought in this development and confirms that they're entirely consistent with numerous employment schemes of an equivalent floorspace across the North West.

Please can you confirm receipt of the below/attached and let me know if you have any queries.

Commentary to accompany visualisations

A detailed commentary on the design principles adopted for this scheme are demonstrated in the submitted architectural and landscaping drawing pack, Design & Access Statement and Landscape Design Statement.

In summary, the approach to scheme design and landscaping is underpinned by a strong focus on developing a scheme that respects the character of the adjoining local landscape, enhances the ecology of the site and provides a stimulating, coherent and well-structured landscape and resulting in a positive setting for the development. To achieve this the following measures will be adopted:

- A significant proportion of the planting will be native, including the tree, thicket, hedgerow and wildflower/species rich grassland to extend and integrate the surrounding landscape character and species distribution into the site. 319no. new trees are proposed alongside significant landscaped bunding, planting and vegetation.
- Where a higher level of amenity is required, ornamental species are proposed around the building envelope, along key access routes and within prominent locations adjacent to pedestrian paths.
- The area to the north of the site has been proposed to improve screening of Units 1 & 2 from the adjacent housing while also offering ornamental/aesthetic value to pedestrians and workers in the proposed offices.
- The existing vegetation to the east/south east is to be bolstered by native planting atop earth mounding to aid screening of the development. Void spaces are to be filled with trees, thicket structural planting and ecologically rich grass seed to help improve the ecological value the existing on site water bodies & open grassland.
- Existing vegetation G34, T33 & G32 to the south of the site is to be protected and maintained to create a mature frontage for the proposed site, forming a strong landscape frontage to aid screening of views north. Existing trees T28 and T27 are to be removed to create an entry point. Additional tree species & grassland is proposed around the existing water body to enhance and integrate the area with its surroundings.
- The plant mixes proposed have been selected for robustness, to maximise ecological potential and to be commensurate with existing planting. Generally native species will be used in the landscape proposals along with species of benefit to wildlife selected to provide seasonal variation of flower, colour and form. This along with the introduction of hibernacula and nest boxes in the existing trees, in accordance with the ecologist's recommendations, will increase the overall habitat bio-diversity across the site.
- A combination of plant stock and sizes will be used in the proposals to maximise the effectiveness of the new planting within a minimum period. Smaller plants are quicker to establish and more able to cope with new growing conditions. It is therefore intended for the best medium to long term gain to plant the taller growing native trees and under-storey shrubs as bare-rooted (600-800 mm high) transplants with occasional groups of extra heavy standard and feathered trees to provide some immediate impact. The woodland tree / thicket species mixes would be planted on 1 to 1.5 metre grids with the tree species at 3m centres to avoid unnecessary competition during the early establishment period.
- In addition to the significant landscape proposals, to provide visual mitigation of the buildings, each building will be treated with a profiled horizontal cladding panel with a gradated colour scheme becoming gradually lighter towards the parapet of the building. This principle is used to help the warehouse merge into the skyline while breaking up the height horizontally into coloured bands.

Visualisations
To help illustrate the effectiveness of the scheme design and mitigation measures proposed, indicative visualisations of the proposed buildings have been prepared for the 4no. closest / most sensitive viewpoints from the surrounding area. The assessment of effects is based on the mitigation measures being fully implemented and the structure planting achieving typical growth rates as shown on the submitted landscape plans.

It should be noted that existing vegetation to the site boundaries will be retained to the extent shown upon the submitted landscape plans. Existing vegetation beyond the site boundaries outside the applicant's control will remain as featured in the landscape and that their growth and development will be as anticipated in the visualisations. This includes large stature individual trees, belts and blocks of woodland and other vegetation.

Viewpoint 1 – Garrett Hall Road

This view is taken from the point where bridleway ref: 014/153A/20 and 014/144/10 converge and join into Garrett Hall Road to the north-east of the site.

Visual receptors: Users of public bridleway and residents to the north east of the site.

Existing view – To the left of the view the housing estate adjacent to the site currently under construction can be seen whilst in the distance the building and chimney stack of the Aggregate Industries facility can be seen to project just above the sky-line. From this location the overgrown hedge line that runs parallel to the footpath offers a degree of screening of the right hand side of the site whilst the extent of weed growth and un-managed scrub serves to detract from the wider panorama.

Proposed view – Due to the proximity of the view to the development site the presence of the larger Unit 1 will restrict views across the site with the building projecting into the skyline. The retained hedge that runs parallel to the footpath will serve to soften views of the northern elevation of the unit whilst the proposed mounding and mixed species native planting included along the north and eastern boundaries of the site will over time serve to filter views of the lower portion of the building elevation. As this vegetation establishes and the large trees mature the extent of built form visible will reduce. The use of graduated cladding, with darker tones at the base and progressive lighter colours as you move up along the façade will serve to reduce the perceived massing.

Viewpoint 2 – Verdant Green Close

.
This view is taken from Verdant Green Close on the edge of a private parking area.

Visual receptors: Residents

Existing view - This view is typical of the residential area that runs parallel to the northern boundary of the application site. Newly built houses can be seen to the left and right of the image whilst parking associated with the estate dominates the foreground. The existing hedgerow running along the northern boundary adjacent to the PROW can also be seen.

Proposed view – From this viewpoint the proposed rear elevation of Unit 1 will be seen to project into the sky. The use of the graduated facade treatment combined with the proposed mounding and mixed species woodland planting along this elevation will help to reduce the massing of the unit. The inclusion of an avenue of extra heavy standard trees along the crest of the bund will also offer some early visual mitigation. As the planting and trees establish this will mature to further soften the visible portions of the elevation.

Viewpoint 3 – Garrett Lane / Bridleway

This view is taken from bridleway 014/146/10 where it heads north away from the application site towards Garrett Lane.

Visual receptors: Users of public bridleway and residents of Mosley Common.

Existing view – The view is looking in a south-easterly direction along the northern boundary of the application site. The recently completed houses can be seen to the left of the image whilst the hedge lines either side of the bridleway restrict views across the site. A gap in the hedge line does allow informal access to the site which seemed to be used by recreational dog walkers whilst the grassland and un-managed scrub dominate the view.

Proposed view – Due to the orientation of Unit 1 running parallel to the northern boundary the western gable and northern portion of the elevation will be seen above the retained hedge line, projecting into the sky. The use of graduated cladding, with darker tones at the base and progressive lighter colours as you move up along the building façade will serve to reduce the perceived massing, especially since views are in a slight upward orientation. The proposed mounding and mixed species native planting included along the north and western boundaries of the site will over time serve to soften the lower portion of the building elevation. As this vegetation establishes and the large trees mature the extent of built form visible will reduce. The inclusion of an avenue of extra heavy standard trees along the crest of the bund will also offer some early visual mitigation.

Viewpoint 4 – Tanhouse Avenue adjacent to PROW 161

The view is taken from the end of the Tanhouse Avenue where PROW 161 meets PROW 159.

Visual receptors: Residents of Tanhouse Avenue and users of the public footpath network west of the site.

Existing view – From this viewpoint, close to the western boundary of the application site the residential properties that back onto the site off Thistle Croft can just be seen the left of the image. Within the foreground the larger stature trees that sit upon the edge of Garrett Hall Primary School can be seen whilst the upper roof line of the recently completed houses that run parallel to the eastern boundary are visible on the horizon.

Proposed view – Due to the close proximity to the application site the western elevation of Unit 2 will be seen and will replace open sky with built form. The use of graduated cladding, with darker tones at the base and progressive lighter colours as you move up along the façade will serve to reduce the perceived massing. The proposed mounding and mixed species native planting included along the western boundary of the site will over time serve to soften the lower portion of the building elevation. As this vegetation establishes and the large trees mature the extent of built form visible will reduce. The inclusion of groups of extra heavy standard trees along the crest of the bund will also offer some early visual mitigation.

Conclusions

Within the wider landscape to the north, east and south views back towards the development site are largely obscured due to a combination of existing vegetation and topography.

The greatest visual effects will be seen from the various footpaths and residential receptors that sit within close proximity to the application site. However, the proposed extensive mitigation measures, both in terms of cladding choice and extent of landscape/bunding will offer a significant amount of visual mitigation at day one, increasing in effectiveness as the landscape establishes over time to the point where only the upper portions of the building will remain visible but due to the careful choice of cladding and graduated colour scheme will effectively merge into the skyline.

In conclusion, we consider that the proposed development with the adoption of the mitigation measures proposed is acceptable in terms of landscape and visual impact, especially when balanced with the requirement to achieve the proposed building heights in order for this longstanding employment allocation to be delivered in the short term, and therefore is in accordance with relevant Local Plan policies and NPPF.

Kind regards

[redacted]

Further to your email below and the Transport Planning Team Manager's comments attached, I write to set out our position on the various points raised.

As a starting point, whilst I appreciate that you are seeking to manage expectations, we are nevertheless very concerned by the suggestion that we may miss the March Committee date due to outstanding matters and extremely frustrated with the Transport Planning Team Manager's comments (set out further below).

GMEU

Starting with the GMEU comments, I am entirely confident that the GMEU queries can be dealt with either by condition (such as a condition for a detailed landscaping/planting schedule prior to commencement) and legal agreement (i.e. the biodiversity offsetting mechanism, which we await your solicitor's input to) – whilst the ecology consultant is reviewing the queries, I do not see why they need all of the points summarised at the foot of their response clarifying prior to determination and it risk leading to an unnecessary delay to determination. We also disagree with their suggestion of needing to demonstrate full details/scheme of mitigation to achieve a 10% net gain – you and [redacted] are already well aware of our position on this, noting the Core Strategy policy and the fact PfE is not yet adopted (not to mention that our understanding is that the mandatory requirement only comes into effect for major development submitted after 12 February 2024).

Highways

Turning to the highways comments, as mentioned we are extremely frustrated and confused with the content of the Transport Planning Team Manager's response as it seems to conflict with the transport modelling approach and methodology long agreed with Kenny as part of the paid (and prolonged) pre-application advice process (as demonstrated further in the Hydrock responses below). We are also extremely frustrated that despite having signed up to a PPA and paid the additional cost (in addition to a significant application fee), it is one of Wigan Council's own officers (the Transport Planning Team Manager) that has provided a consultation response so very late in the process (not to mention the conflicting view with your own Highways Officer), and it is now being suggested that highways issues could be a contributing factor to potentially missing the March Committee. This is an unacceptable position for the applicant that needs urgently resolving.

A Technical Note is nevertheless being prepared to address the comments raised by [redacted] and SCC, some of which will also address the Transport Planning Team Manager's comments below, however we request that the Transport Planning Team Manager is furnished with the responses below as it will clarify the long agreed methodology for the TA and should therefore address the majority of comments, with the remaining comments (i.e. those raised by [redacted] and SCC) to be addressed in the aforementioned Technical Note, which will be submitted imminently. The parking provision query will be addressed in the Technical Note and we are comfortable that the provision provided is wholly acceptable for the quantum of floorspace and use classes for which permission is sought.

Mindful of the above and the critical point we are at in the determination period / Committee lead-in, I would reiterate my request for an urgent meeting with you and the highway officers to allow us to resolve matters ASAP. We cannot afford to wait until our scheduled meeting on Thursday as we simply cannot afford to miss the March Committee, not least due to a difference of opinion with your highway officers so late in the process and despite the extensive pre-app discussions – this certainly would not align with the collaborative approach to date and that sought in the PPA.

Please can you therefore advise of your availability to meet tomorrow to resolve matters. [redacted] – we will require you in attendance also given the critical nature of this matter.

WMBC Comments on Transport Planning Team Manager Response (Hydrock summary response in red text):

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032). Noted. However, our proposed methodology, including Year of opening and future year assessment was agreed with WC highways officers [redacted] as part of scoping discussions in May 2022.
- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network. The list of committed developments that should be included within our assessment was provided by WC highways officers [redacted] as part of scoping discussions in May 2022.
- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580. Noted. However, evidence within the 2022 observed baseline traffic flow survey indicated that a similar amount of HGVs came from the west of the site access (as per the east), from a combination of Higher Green Lane / A572, and Higher Green Lane / A580 junctions. This is further confirmed by the image shown below at Figure 1.
- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011. Noted. However, the proposed methodology, including proposed distribution was agreed with WC highways officers [redacted]) as part of scoping discussions in May 2022. Additionally, as described above, the HGV distribution is actually based on observed baseline traffic flow surveys.
- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue). The numbers are not incorrect. The assessment criteria from WC requested Hydrock to assess any junction which had a total development 'vehicle' impact of greater than 30 2-way trips. Not PCU. Figure 7 within the traffic flow figures presented within the TA illustrates the correct 'vehicle' development traffic.

  Additionally, Salford Council's other query regarding the traffic flow figures presented was around Figures 7, 8 and 9, and the total numbers provided within our assessments. This is due to the lights, and HGVs being converted to PCUs (by a factor of 2.9 for HGVs) as per the industry standard assessment criteria.
- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions. The list of junctions that should be included within our assessment was agreed with WC highways officers [redacted]) as part of scoping discussions in May 2022, based on a total 2-way 30+ vehicle development impact upon surrounding junctions.
- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs. Parking justification to be provided in the aforementioned Technical Note to evidence the appropriateness of a comparable ratio of parking provision for numerous B2/B8 schemes across the North West.

Figure 1 – HGV Image Example from Google Maps in September 2021 from junction of Higher Green Lane / A580

Kind regards

Subject: FW: Consultee Comments for Planning Application A/23/96226/MAJOR

Hi [redacted]

You may already have seen the comments below as they are online but I just wanted to bring them to your attention.

As you will see further information is required re BNG.

There is now a need for a re-consultation with GMEU, Highways, Transport Policy Team and Salford City Council. In order to manage your client's expectations, its important to point out that all of the above will require a 14 day re-consultation period once the required information is received and as reports for March committee need to be completed by 19th Feb, there is a possibility that this application will not be ready to be presented at that time.

Given the level of objection in the surrounding area, it will be imperative that all outstanding issues are resolved before Officers can bring this before committee.

I am of course not ruling out making the March agenda, but I think its important to be realistic as we go forward.

Regards

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 07/02/2024 12:49 PM from [redacted] Greater Manchester Ecology Unit (Not Available) on behalf of Greater Manchester Ecology Unit.

Application Summary

Reference:	A/23/96226/MAJOR
Address:	Land At Astley Park Way Worsley
Proposal:	Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Case Officer:	[redacted]

Comments Details

Comments:	Hi [redacted] Thank you for consulting on the additional information. 1. Great Crested Newts An unredacted version of the license has been provided. This confirms that Natural England are satisfied that the development is eligible of for district licensing. Technically no condition is now required as the process is now in the hands of Natural England and their agent for delivery of the new ponds unless the LPA would want mitigation beyond the requirements of DLL. However the developer may decide to change their approach and not enter in to DLL at which point further survey may be required. I therefore recommend a condition along the following lines is applied to any permission. "The development has the potential to cause harm to great crested newts and entered in to District Level Licensing. Prior to development confirmation that: • no changes to this mitigation approach have occurred or; • if changes have occurred further information on the new mitigation approach to gcn. should be provided to and agreed in writing by the LPA" 2. Contributing to and Enhancing the Natural Environment & Biodiversity Net Gain Section 180 of the NPPF 2023 states that the planning policies and decisions should contribute to and enhance the natural and local environment. The defra metric has been provided in excel format as requested. The baseline value of the site appears fair, I am therefore willing to accept 62.84 biodiversity units (BU) as the baseline. The post-development value has been calculated at 51.89 BU a loss of 10.95 BU and a shortfall of 17.24 BU to achieve 10% BNG. This includes a significant number of units generated through urban tree planting, 150 trees achieving moderate condition, of which 56 are forecast to achieve medium size after 27 years. It also includes 0.6819 ha of other neutral grassland forecast to achieve good condition. Both are relatively high risk proposals, with a lack of detail (that I could find) on the tree planting schedule or grassland proposals. There is therefore a risk of the loss being higher. I therefore recommend that prior to determination: - the details of the urban tree planting schedule is provided to ensure that 150 trees are proposed ; - that at least 56 have the potential to exceed 30cm dbh after 30 years and; - details on the other neutral grassland proposed to achieve good condition are provided. I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided. [redacted] Ecologist GMEU I

Kind regards

Hi [redacted]

Thanks for confirming receipt / the re-consultation is underway and we trust that the various highways party's will be prioritising their review of the technical notes so that we can resolve matters as soon as feasibly possible. Please can you ensure everyone cc'd to this email is copied in to any highways comments you receive/forward so that we can action accordingly.

On behalf of the Applicant, I agree to the proposed extension of time to 12th April 2024 to enable the application to be taken to the 9th April Planning Committee.

Kind regards

wsp

Hi [redacted]

Thank you for your email.

The re-consultations will be carried out by the end of the day.

As this application will not go before Members in March, please can you agree to an extension of time until April 12th (which is the Friday following April's planning committee).

Regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thank you for your email. Whilst clearly disappointing to have reached this position so very late in the process, we are where we are and are eager to resolve matters as soon as possible. As such, for completeness, the transport consultant has provided technical notes in response to each party's highway comments, as follows:

- 2nd Response to Wigan Council (WC) comments (i.e. [redacted] comments dated 16 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1003.P02
- 3rd Response to WC comments (i.e. [redacted] comments dated 11 Feb 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1004.P02
- SCC Response (i.e. SCC's comments dated 19 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1005.P01

We have submitted the responses as 3 x separate technical notes as we feel it would be easier for the different parties to review/address, given the number of appendices also included within the individual documents.

In terms of addressing the Mosley Common junction point, Hydrock have included the following paragraph in the '3rd WC response' document which should provide sufficient justification / comfort as to why the junction has not been assessed:

Para 2.3.4 - Notwithstanding the above, Hydrock have reviewed their Traffic Flow Figures (which were previously provided along with the previously submitted TA as part of the application), and identified that the only junction within close proximity of the Mosley common site impacted by the proposed development flows is the A580 / A577 junction. However, as shown in our Traffic Flows figures, the total 2-way vehicle trips (associated with the proposed development) travelling along the A580 to/from the A580 / A577 junction only equates to 19 in the AM peak, and 23 in the PM peak, which is less than the 30+vehicle 2-way trips assessment criteria suggested by WCC. Therefore, this junction was not requested to be assessed. Furthermore, it should also be noted that this junction was also recently upgraded in 2023.

We would hope it isn't necessary given the clarity provided in the various notes/responses but if a meeting is required to resolve any residual matters following review of the above, please can you coordinate as soon as feasibly possible.

Please can you confirm receipt and please can you re-consult the three parties and request their urgent review of the above/attached and confirmation that highways matters are indeed now resolved so that we can move forward to Committee.

Kind regards

[redacted]

From: [redacted]
Sent: Friday, February 23, 2024 3:07 PM
To: [redacted]
Subject: A/23/96226/MAJOR Astley Business Park, Wigan

Good afternoon [redacted]

Apologies for the delay in providing an update for you but I can confirm that my highway colleagues have held further discussions earlier this week as planned, and the outcomes of those discussions have been shared with [redacted] and myself.

Taking all matters into account, I remain of the view that the points raised below must be addressed in full before Officers can make a positive recommendation to Members; the only exception to this is the reference made to the Mosley Common application. I accept that this was not a committed development when the application was submitted (nor did the Mosley Common application take this application into account in their transport studies). However, I would advise that providing some commentary on the combined impacts (now that it is a committed development) may provide some additional comfort to Members.

I appreciate that some of the points below were addressed in the Technical Note received early last week but it would be appreciated if this could be combined with a full response on all other points for publication and re-consultation.

The information is necessary to ensure that Officers can confirm that the proposed development is acceptable in highway terms and confidently relay this to Members. It is important to note that this application has attracted 100+ objections from local residents, a call in from local Councillors and an objection from James Grundy MP. One of the common themes running through all of these is the impact on the local highway network and as such, taking the application before Members at the present time and in advance of all matters raised by [redacted] and Salford Council being addressed, raises a significant possibility that Members could overturn or defer the application.

I appreciate that issues have been raised that were not done so at the pre-application stage and whilst that is regrettable, it is not a reason to move past them without addressing them in full to ensure that when this application is reported to Members, Officers can be confident of our positive recommendation being accepted.

On other matters, I can confirm receipt of the CGIs earlier this week. In addition, I have requested some further guidance from our ecology advisors on a potential financial contribution to achieve net gain off site but would welcome your position on this matter also as previously discussed.

Regards

- *Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).*
- *Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.*
- *Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.*
- *Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.*
- *Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)*
- *Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.*
- *Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.*

Hi [redacted]

You'll see from my email chasers to [redacted] (today and yesterday) that unfortunately we have not yet received an update from [redacted] following his meeting with [redacted] on Monday, despite what we had agreed at last week's meeting, which is clearly disappointing as we are no clearer as to what the Council's collective highways position is. Please can you chase internally and provide an urgent update?

It is worth noting the attached email trail between the transport consultants, Hydrock, and [redacted] (which [redacted] was cc'd to – I assume it is the same [redacted] that has now raised issues). The attached email trail clearly shows that [redacted] and others were provided with the draft TA and Framework Travel Plan prior to submission, comments which were picked up in the submission versions. It is therefore all the more confusing that despite having had sight of a draft TA that new issues have been raised.

I trust you can provide us with an urgent update so that we are clear where we stand.

Kind regards

[redacted]

[redacted]

On a separate matter, I write to set out our position in respect of the BNG offsetting and specifically a reasonable value to be ascribed to the biodiversity units to be offset to reach the 'no net loss' position. I note that Wigan Council with input from GMEU will also be providing its own view on this matter.

Having reviewed recent planning permissions in Wigan for comparable examples of offsetting requirements for a logistics scheme, we refer you to the Meridian 6 scheme by Glenbrook (Application Ref: A/21/92036/OUTMAJ) which was allowed on appeal in May 2023 following the refusal of consent.

The appeal decision and Committee report prior to the application being refused both refer to a £125,000 BNG contribution in order to reach a 'net gain' position (but not 10%, just a 'no net loss' – the same approach we are taking with the Astley scheme).

Looking at applicant's Planning Statement (see attached at page 62), it refers to a significant habitat loss of 24.99 units (59% net loss) and a 100% loss of hedgerow units. Dividing the £125k contribution by the habitat loss of 24.99 units it is essentially £5,000 a habitat unit.

Given the similarities of this scheme insofar as the type of development/use classes proposed on a greenfield site, we consider the habitat value of £5,000 per habitat unit to be a useful precedent and one that we feel should be applied to the PLP Astley scheme.

We welcome your view and how we progress matters pertaining to BNG offsetting / the S106 mechanism.

Kind regards

Hi [redacted]

Thanks for your email. I've passed on the comments to the acoustic consultant however their note did conclude that the required acoustic mitigation would still be achieved in light of the alterations to the acoustic fencing extents. I'll nevertheless get them to provide a response to address the matter.

Regarding the PPA invoice, I've asked my client for an update and will confirm back to you when I hear back. Incidentally, my client has requested another short Teams meeting with you and [redacted] / David to touch base on the application and for him to provide an update on programme/the commercial aspects. Please could you advise of availability for a 30 minute meeting as soon as conveniently possible for you and [redacted]/David.

In the meantime, we would welcome an update on the Council's position on the BNG contribution and given that [redacted] is now satisfied from a highways perspective we would welcome progress in regards the highway contribution to form part of the S106.

Kind regards

wsp

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks
[redacted]

Hi [redacted]

No problem – will do.

I've been advised that the PPA invoice is scheduled to be paid **today** (**3rd May**). Please can you ask your accounts team to check early next week to confirm payment has been received?

In terms of the meeting, my client [redacted] is on leave next week but suggested the afternoon of the 14th or morning of the 17th May, if either of those work for you and [redacted] for the meeting?

Kind regards

wsp

Sorry, just to add, I've been compiling the draft conditions based on conditions we know of at this stage (i.e. those requested by consultees) and I will send a schedule over at some point this week with some comments against so that this side of things can be progressed also.

Kind regards

Hi [redacted]

Thanks for your email. I've passed on the comments to the acoustic consultant however their note did conclude that the required acoustic mitigation would still be achieved in light of the alterations to the acoustic fencing extents. I'll nevertheless get them to provide a response to address the matter.

Regarding the PPA invoice, I've asked my client for an update and will confirm back to you when I hear back. Incidentally, my client has requested another short Teams meeting with you and [redacted] / David to touch base on the application and for him to provide an update on programme/the commercial aspects. Please could you advise of availability for a 30 minute meeting as soon as conveniently possible for you and [redacted] /David.

In the meantime, we would welcome an update on the Council's position on the BNG contribution and given that [redacted] is now satisfied from a highways perspective we would welcome progress in regards the highway contribution to form part of the S106.

Kind regards

wsp

1 INTRODUCTION

1.1 BACKGROUND

1.1.1 This report provides the results of bat activity surveys and endoscope surveys undertaken 2022, as well as the updated endoscope surveys carried out in 2024.

1.1.2 The surveys are in response to an initial Ground Level Tree Survey (GLTA) carried out by The Environment Partnership on 29th June 2021 (TEP 2021)[1]. The GLTA was then verified through two separate aerial surveys in the 2022 bat active season. Works have now been postponed beyond the 2023 active season and the data is no longer valid (Colins 2016[2]). Based on this a third aerial survey was carried out on 26th February 2024, to ensure that all the conditions on site remained the same.

1.2 SITE DESCRIPTION

Location

1.2.1 The Site (12.6 ha) is at the address Astley Park Way, Parr Bridge, Wigan, Greater Manchester, England, M28 1FJ, with a central grid reference SD 70827 01215. The wider area comprises of urban development with Bolton to the north, Wigan to the west, agricultural land to the south and Manchester to the east. The Site is bounded to the south by Chaddock Lane and Applewood Farm, a school to the north and residential properties from the east and west (see Figure 1).

Proposals

1.2.2 The proposals are for the development of up to 32,825 sqm (353,343 sq ft) B2/B8 floorspace (including ancillary integral office space (Use Class E(g)) with associated car parking and service yard; new internal access road;

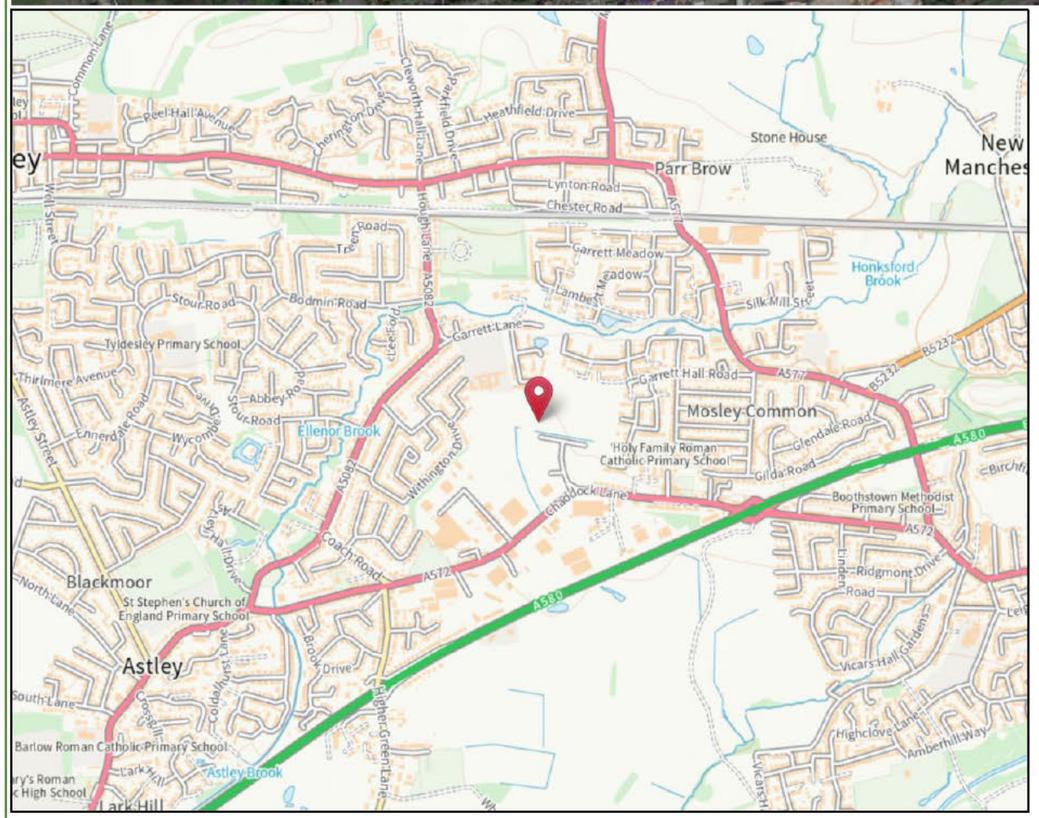
diversion of existing Public Rights of Way; and associated engineering, infrastructure and landscaping. A proposals layout is shown in Figure 2.

1.3 LEGISLATION



Bat legislation

1.3.1 All species of bat, and their roosts (whether occupied or not), are fully protected in the UK by the Conservation of Habitats and Species Regulations 2017 (as amended), and the Wildlife and Countryside Act 1981 (as amended). Legislation states that you are committing an offence if you:

- Intentionally or recklessly kill, injure, or take a bat.
- Damage or destroy a bat roost.
- Obstruct access to any place of shelter, breeding, or place of rest.
- Disturb a bat occupying a structure or place.
- Possess or control (live or dead bats, or any of their parts); and

Sell, barter, or exchange these species, or parts of

2 METHODOLOGY

Transect Surveys

2.1.1 The activity survey methodology was designed in accordance with current bat survey guidelines for 'Low suitability', as a reasonable effort to determine bat activity based on habitat suitability as shown in Table 8.3 in Colins (2016[2]). This required one transect survey visit per season, Spring, Summer, and Autumn. Together with a data logger collecting data for five consecutive nights each of the three seasons.

Ground Level Tree Assessment

2.1.2 A Ground Level Tree Survey (GLTA) was carried out in 2021 and reported in TEP 2021[1]. The survey followed the GLTA survey guidelines provided by Colins (2016[2]).

Endoscope survey

2.1.3 Following the GLTA, the trees were surveyed following endoscope survey guidelines set out by Andrews (2018[3]). The trees were climbed using appropriate methods to access and inspect PRFs using a torch and endoscope, as follows:

1. A Natural England Level 2 licenced surveyor climbed the bat trees to view the PRFs.
2. All visits were separated by at least two weeks apart with surveys conducted during the optimal bat activity period of May to August.
3. PRFs that were not initially visible in the GLTA, were identified and inspected during this aerial survey.
4. The endoscope utilised had motion camera and capture capabilities to record evidence of bats.
5. Each tree was surveyed according to GLTA grade. i.e.

    a) High roost potential was subject to three individual roped access surveys

[3] **Andrews, H. 2018.** Bat Roosts in Trees: A guide to identification and assessment for tree-care and ecology Professionals, 1st Edition. Pelagic Publishing.

b) Moderate roost potential was subject to two individual roped access surveys
c) Low roost potential did not require an endoscope survey and was only required to be soft felled in accordance with Collins (2016[2]).

2.1.4 The aerial technique above is a non-standard method. The method is pragmatic and brings several strengths to the data that nocturnal surveys are limited to, particularly in sites with a deep canopy that would limit visibility:

1. Nocturnal surveys specified by Collins (2016[2]) are weak in identifying field signs within the features as they cannot be identified during a nocturnal survey.
2. Often nocturnal surveys of trees are limited because of tree canopy and clutter leading to low incidence of recording bats and / or specific roost site location during low light conditions.
3. The nocturnal survey method is limited to identification of the species exiting the roost, since if there are other bats flying or a bat leaves/returns to the feature without calling it is likely that it will not be identified.
4. The survey method of nocturnal surveys is also labour intensive in terms of survey particularly with the number of trees on large sites.
5. Other strengths of this type of survey include confidence in a negative result for the series of visits to that tree thereby demonstrating where the colony “is not” as well as where “it is”.
6. This method also identifies presence of competitors as well as unsuitable features that can be downgraded due to the close inspection.

2.1.5 If aerial surveys were not possible due to limited access to the feature or health and safety issues with climbing the tree, a nocturnal survey was undertaken using the methods as identified by Collins (2016[2]).

2.2 SURVEY CONSTRAINTS

2.2.1 It was agreed with the GMEU that there would be no requirement for an autumn transect when submitting for planning, given the low number of bats during the spring and summer transect (see Section 5.1).

2.2.2 Furthermore, other surveyors within the planning team had equipment stolen from the Site and were confronted by members of the public displaying intimidating behaviour. Therefore, the bat static detector was not set out for the second transect survey and the surveyors were accompanied by security to conduct the transects at night.

2.3 PERSONNEL

Table 1: Personnel

Name	Contribution	Qualifications
[redacted]	Phase I survey	BSc., MCIEEM
	Bat activity	
[redacted]	Report writing	BSc (Hons), MSc
	Bat activity	
[redacted]	Bat endoscope	NE Class 2 Bat licence 2016 – 23830. NPTC Tree Climbing and aerial rescue certificate

3 RESULTS

3.1 BAT ACTIVITY SURVEY

3.1.1 In accordance with Collins (2016[2]) the habitat has been graded as low, given the urbanised environment and the low connectivity to the wider area. This is consistent with TEP 2021[1].

3.1.2 Two bat activity surveys were undertaken in the form of walked transects and static detector surveys. The transect surveys were completed on 25th May 2022 and 19th September 2022 by two experienced surveyors in suitable conditions. It was agreed with the local planning authority that the autumn survey was not required due to the low number of bats recorded during the first two surveys (see Section 5.1).

3.1.3 A static detector was left in situ for 7 days from 25th May 2022, located in an area estimated to be the most suitable for bat activity (see Figure 4). Following this survey there were reports of other planning team surveyors having equipment stolen from the Site, therefore the static detector was not set out for the remaining surveys and the surveyors were accompanied by security to conduct the transects at night.

Transect Surveys

3.1.4 The survey parameters are detailed in Table 2. The surveys found low evidence of bats within the Site boundary with most bats recorded in the western portion of the Site, associated with Hedgerows 3a and 4. Activity levels and the overall number of bat calls recorded (either commuting or foraging) were similar for both surveys.

3.1.5 Only common pipistrelle and soprano pipistrelle were recorded commuting across the site during the transects with common pipistrelle being the most frequently recorded. Bat activity was closely associated with hedgerows (predominantly H3a and H4) and associated trees. No recordings of bats were obtained within the eastern portion of the Site during either transects. The transects route and bat activity are shown in more detail in Figure 4 and Figure 5.

Table 2: Transect survey parameters

Parameter	Survey #1	Survey #2
Date	25/05/22	19/07/22
Weather	Overcast, dry	Clear, dry
Wind (Beaufort)	B1	B1
Temp. at start (°C)	14	28
Temp. at end (°C)	13	26
Sunset	21:19	21:28
Survey start	21:19	21:28
Survey end	22:55	23:00

Static Detector

3.1.6 The static data logger recorded 256 passes, the species recorded again only included common and soprano pipistrelle. Common pipistrelle was recorded the most frequently making up 92.5% of the passes and soprano pipistrelle made up the remaining 7.5%. A breakdown of the calls each night is shown Table 3.

Table 3: Static bat detector and analysis

Dates	Species		Total number of passes
	CPIP	SPIP	
25/05/23	27	0	27
26/05/23	57	7	64
27/05/23	54	0	54
28/05/23	9	2	11
29/05/23	23	2	25
30/05/23	32	8	41
31/05/23	28	0	28
01/06/23	7	0	7
Total	**238 (92.5%)**	**19 (7.5%)**	**256**

3.2 GROUND LEVEL TREE ASSESSMENT

3.2.1 A GLTA was carried out in 2021 reported in TEP 2021[1] and the results are shown in Figure 3 and Table 4.

Table 4: 2021 GLTA results

Tree ID	Species	Feature	BCT Category
T1	Ash	Young to semi-mature, multi-stemmed ash with occasional ivy cover on edge of a ditch. No obvious potential roost features and ivy is unlikely to be a feature.	Negligible
T2	Oak	Semi-mature oak on edge of dry ditch. A north-facing crevice is present at 5m height between two branches while a large cavity is present on a south-facing branch at 4m height.	Moderate
T3	Sycamore	Semi-mature sycamore with cracked bark, which is lifted in places. A cavity is present on the south-facing branch at 3m height.	Moderate
T4	Ash	Young, multi-stemmed ash located to north of hedgerow with branches overhanging into the site. No obvious potential roost features.	Negligible
T5	Ash	Semi-mature multi-stemmed ash present at the end of a hedgerow. A dead branch is present at 1.5 m height facing west, with a cavity at the end but cracks at the top suggest this is exposed and allows rainwater in.	Negligible
T6	Sycamore	Sycamore tree in hedgerow. A crack is present on the north-west facing branch, which is obscured by foliage.	Low
T7	Sycamore	Semi-mature sycamore in	High

Tree ID	Species	Feature	BCT Category
		hedgerow with south-facing cavity at 3 m height. A large cavity, where a branch has snapped, is present on the south side, whilst on the west side several small cavities are present along a branch.	
T8	Oak	Mature tree on edge of area of dense scrub in the south-west of the site. A close inspection of this tree was not possible, but it is of an age and size that could support potential roost features.	Moderate (precautionary)

3.3 BAT ENDOSCOPE SURVEY

Further to the GLTA (3.2.1), all trees classified as having High – Moderate potential to support bats, were subject to climbing. During the aerial survey each feature was visually inspected, using an endoscope where possible/necessary.

3.3.1 Each tree was assessed twice during the 2022 bat active season and then checked a third time in 2024.

Endoscope survey

3.3.2 Table 4 shows the results of all three surveys, no bat roosts or evidence of bats were found within any of the trees. During the first visit, T7 was downgraded from 'High' to 'Low' upon a closer inspection with the surveyor noting:

"[The] Cavity on [the] South side is 15cm deep with an entrance of 8cm diameter. Downgraded to low. All other features downgraded to negligible after close inspection."

3.3.3 A new feature was identified in T3 during the 2024 survey, this did not result in a change to the grading of the tree and no evidence of bats were found.

3.3.4 The grading for all other trees remained as per the GLTA carried out in 2021.

Table 5: Endoscope Survey results

Tree ID	Species	Original Ground based assessment	Original BCT category	1st aerial check 6/5/2022	2nd aerial check 7/6/2022	3rd aerial check 26/2/2024
2	Ash (not oak)	Semi-mature oak on edge of dry ditch. A north-facing crevice is present at 5 m height between two branches while a large cavity is present on a south-facing branch at 4 m height.	Moderate Remains moderate	North facing crevice negligible. South facing cavity has rams horns which have moderate potential for low numbers of individual small bats.	No change to feature. No evidence of bats	No change to feature. No evidence of bats
3	Sycamore	Semi-mature sycamore with cracked bark, which is lifted in places. A cavity is present on the south-facing branch at 3 m height.	Moderate Remains moderate	Bark features negligible. Cavity on South facing branch has an entrance of 4cm diameter and extends 15cm into branch. Moderate potential for individual bats.	No change to feature. No evidence of bats	No change to feature. No evidence of bats. **New feature;** broken branch stub in top of crown: no evidence of bats.
7	Sycamore	Semi-mature sycamore in hedgerow with south-facing cavity at 3 m height. A large cavity, where a branch has snapped, is present on the south side, whilst on the west side several	High Downgraded to low	Cavity on South side is 15cm deep with an entrance of 8cm diameter. Downgraded to low. All other features downgraded to negligible after close inspection.	N/A	N/A

Tree ID	Species	Original Ground based assessment	Original BCT category	1st aerial check 6/5/2022	2nd aerial check 7/6/2022	3rd aerial check 26/2/2024
		small cavities are present along a branch				
8	Oak	Mature tree on edge of area of dense scrub in the south-west of the site. A close inspection of this tree was not possible, but it is of an age and size that could support potential roost features.	Moderate (precautionary) Remains moderate	Hazard beam on lowest branch on South side of tree. Moderate potential for individual small bats. Hollow dead branch at a height of 3m on west side of tree. Cavity 3cm x 20cm moderate potential for small bats.	No change to features. No evidence of bats	No change to features, no evidence of bats

4 CONCLUSIONS

4.1 STATUS

4.1.1 There are no roosts present on Site, or structures that could provide roosting opportunities for bats.

4.1.2 Three trees have 'Moderate' potential for bats to roost (trees T2, T3 & T8) and two further trees have 'Low' potential (T6 & T7). During the update endoscope surveys, it was shown that there is currently no evidence of bat use in these trees.

4.1.3 The bat foraging and commuting habitat has been graded as 'Low', and the subsequent transect surveys showed that the bat assemblage is unremarkable, dominated by a small number of pipistrelle species.

4.2 RECOMMENDATIONS

4.2.1 The trees that have 'Moderate' potential (T2, T3 & T8) should be removed with a licensed bat person present who may elect to undertake another endoscope assessment prior to felling, and these trees should be soft-felled as follows:

i) The felling work will be undertaken during weather conditions suitable for bats to be active, avoiding the main hibernation period, to minimise the risk of significant disturbance;
ii) A supervising ecologist with appropriate experience (licensed bat ecologist for High to Moderate trees) will be present on site to advise on felling methods and what to do in the event bats are encountered;
iii) Sections of the tree containing features suitable for roosting bats, will be softly lowered to the ground, following which these will be subject to a more detailed inspection by the supervising ecologist to confirm absence of bats;
iv) After felling, the potential roost feature will be retained in a suitable location overnight allowing bats to disperse, in the unlikely event that any are present but undetectable

4.2.2 Trees that are graded 'Low' potential (T6 & T7) should be soft-felled with an ECW present.

4.2.3 Post-construction, at least one bat box / feature lost should be provided, of woodcrete-type construction and maintenance-free as defined by Mitchell-Jones 2004[4]:

- There should be a minimum of five boxes to mitigate the five features removed i.e., T2, T3, T6, T7 & T8.
- The boxes should be provided in advance of tree removal.
- Boxes must not be illuminated by the lighting scheme.
- Box provision should be detailed in a Biodiversity Enhancement Plan for the proposals.

4.2.4 The landscape scheme should provide linear features at least the length that is being lost. Native species should be used. These features should be interconnected wherever possible and connect to the wider landscape beyond the Site boundaries. The lighting scheme should leave these features in as dark a place as possible, avoiding direct illumination where health and safety allows.

Hi [redacted]

I agree at this late stage, and given that you have spring and summer data a transect survey now is unlikely to significantly change the results you already have. Do you have the name and address of the site so I can put this on our files?

Kind regards

[redacted]

Subject: RE: Autumn Bat Transect

Hi [redacted]

Thanks for your response. To be clear, I am referring to bat habitat/transect surveys and not

emergence surveys. Under the BCT guidelines 'low' suitability habitat requires a spring, summer and autumn transect survey to assess the use of habitat by commuting and foraging bats. Under autumn, the final month is considered as October. See Table 8.3 for further detail.

Our spring and summer transect surveys have identified small numbers of common bats using the site. Since, the developer has put a hold to the project and I was considered that GMEU may wish to see data from an autumn transect also. My personal opinion is that we have sufficient data and that an autumn/October survey will not change the results in any significant way, however, I am concerned that GMEU may wish to see this data and could potentially object without it.

All of our bat roost assessment surveys were completed during the appropriate times of year, with no constraints.

Please do call me if you wish to discuss further.

Best wishes,

[redacted]

Hi [redacted]

I can confirm that the hours of operation required for each of the units would be 24/7 365 days a year. This is a critical aspect of the overall commercial viability of the scheme. There would obviously be management plans and controls in place, that could be secured by condition, to ensure any night time / out of hours working does not cause any impacts on amenity of nearby residents.

Kind regards

Hi [redacted]

Thank you again for your and [redacted] time earlier.

As agreed at the meeting, I can confirm (on behalf of PLP) their agreement to meet the costs as outlined in the attached document in order to achieve a 10% Biodiversity Net Gain.

Please can you instruct your legal team to amend the existing draft to include these costs and issue a copy of the draft S106 for our review, once available.

Kind regards

Subject: RE: A/23/96226/MAJOR - BNG

Hi [redacted]

My colleagues have now complete a breakdown of the costs of a scheme which could be delivered on Council land and will allow your client to achieve 10% net gain (17.2 habitat units – as outlined in the information submitted) to offset the identified losses on site and to achieve compliance with the adopted local plan.

To put the costs into some context for you, the Council has been charging in the region of [redacted] per unit for some time now, which is comparable to costings across Greater Manchester.

By having the details of the scheme broken down in this way, the cost per unit is less that the aforementioned figure.

As advised previously, I would appreciate confirmation of your agreement to meet the costs as outlined in the attached document and I can instruct our legal team to amend the existing draft to include these. If your client is unable to meet the required costs, please can you provide the reasons why.

Regards

Hi [redacted]

Sorry for the delay – I will provide a more fulsome response to your recent emails soon, however in the meantime please could we agree the afternoon of 17th May for the next meeting and I'll hopefully confirm that works for my client Matt on Monday (he's on leave this week).

Do you have a preferred time to meet on the 17th afternoon?

Subject: FW: A/23/96226/MAJOR - BNG

Hi [redacted]

Further to my email below, I have asked my colleagues in our Greenheart Projects Team to provide details of a scheme which could be delivered on Council owned land and which would provide net gain (10%) to off set the losses identified by the proposed development. Instead of working on a price per unit basis, I am asking for the total costs of such a scheme (with a breakdown of how this will be spent) so that your client can consider how to move forward. Once I have these figures, I will forward those to you. I appreciate further dialogue around the need to provide 10% net gain may be needed but to speed things up, if this is your client's intention, and as previously advised, I will need a statement from you to show why compliance with the Places for Everyone adopted plan cannot be achieved. For the purposes of presenting this to Members, I would advise that this is based on more than just the timing of your submission.

You are welcome to have your advisors do that same for comparison purposes. I can confirm that we cannot accept your proposed financial contribution for BNG based purely on a previously approved application as each case must be based on its own merits and the general landscape around BNG has changed considerably since the Council's assessment of that particular application.

I propose to continue to prepare this application for the June planning committee. I will however need to present an agreed approach to BNG to Members within my report and we have a couple of weeks to achieve that. The legal agreement to obtain the agreed funds can follow the committee if necessary.

I haven't heard back from you regarding the meeting request and our diaries are filling up; the afternoon of Friday 17th May is still available and so is the afternoon of Friday 24th May.

Regards

[redacted]

Subject: FW: A/23/96226/MAJOR - BNG

Hi [redacted]

[redacted] has been reviewing the BNG requirements for this site and has asked for some further commentary on compliance with our current development plan? This now includes Places for Everyone which set a 10% net gain requirement for new developments.

I appreciate your position has been that this isn't required due to the timing of the submission of the application, but I'm instructed by [redacted] to request a more robust reason for non-compliance with the PfE if 10% net gain cannot be achieved.

Please can you revisit the information submitted to date and advise if whether your client would be willing to meet the current requirements in this regard. If so, I can then ask my colleagues to work out a cost per unit to achieve this level of net gain on Council land, bearing in mind the scheme provided on site. I can advise that this will differ to the example that you provided previously; I'm advised that the landscape around BNG has changed since that time and each case is based on its own merits in any case.

I appreciate that we are hoping to meet next week but I would appreciate a response on this issue beforehand, just to help us progress this prior to that meeting.

I can reconfirm that the Council is committed to working with your client to ensure that this application can be recommended favourably by Officers to the Planning Committee next month.

Regards

Subject: RE: A/23/96226/MAJOR - Noise

Hi [redacted]

Thanks for your email. I'll check in with our accounts department early next week.

I can advise that I'm not available on afternoon of 14th May 2024 and [redacted] has no availability on the morning of 17th May. We both have availability on the afternoon of 17th May if that works for you and your client?

In terms of BNG contribution, I do apologise for the delay in getting back to you on this. The issue I'm having is that the proposals you have put forward (of circa [redacted] per unit) are well below what we have been accepting recently, which is closer to circa [redacted] per unit.

I've had to ask various colleagues to consider your proposals, the case you presented as part of your proposals and the reasoning behind other recent applications brought before Members where the cost per unit was much higher. This is taking some time and ultimately, I will have to take direction from [redacted] when he returns from leave on how to move forward on this point. I will come back to you as soon as I can.

Hi [redacted]

Thanks for your email. I've passed on the comments to the acoustic consultant however their note did conclude that the required acoustic mitigation would still be achieved in light of the alterations to the acoustic fencing extents. I'll nevertheless get them to provide a response to address the matter.

Regarding the PPA invoice, I've asked my client for an update and will confirm back to you when I hear back. Incidentally, my client has requested another short Teams meeting with you and [redacted] / David to touch base on the application and for him to provide an update on programme/the commercial aspects. Please could you advise of availability for a 30 minute meeting as soon as conveniently possible for you and [redacted] /David.

In the meantime, we would welcome an update on the Council's position on the BNG contribution and given that [redacted] is now satisfied from a highways perspective we would welcome progress in regards the highway contribution to form part of the S106.

Kind regards

[redacted]

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

[redacted]

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

PLP Astley - Draft Conditions - JW 24.05.24.docx

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours [redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

wsp

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

[redacted]

Hi [redacted]

The extension of time to 14th June 2024 is agreed.

Good news on the EP position on the revised acoustic fencing, thanks for confirming.

I'll come back to you tomorrow on draft planning conditions (thank you) and also your queries in relation to constriction/operational benefits/figures and query from last Friday about night-time working/activities.

Kind regards

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

PLP Astley - Draft Conditions - JW 24.05.24.docx

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [A1] [D] [A1]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [A1] [D] [A1]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; [A1] • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* [A1] • sufficiently strong [A1] [B] [A1] to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); [A1] • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* [A1] If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. [A1]

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential

properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Bottom of Bund Longitudinal Fall.pdf

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Please see below a short statement provided by the engineers in relation to your drainage query, with a supporting sketch attached:

"It is anticipated that the planting and vegetation on the embankment will absorb majority of the rainwater, therefore surface water runoff will be minimal. In the event of excess surface water runoff, it is highly unlikely that any residual/excess runoff will reach neighbouring gardens as there is a longitudinal fall along the bottom of the embankment which will direct the runoff to flow along the red line boundary naturally."

Regarding the boundary fences, you're interpretation is correct – i.e. all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways.

Kind regards

WSP

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Following today's briefing, please could you get your drainage consultant to prepare a short statement and/or plan to cover the following point:

Potential run-off from water from the bunds into neighbouring garden land – a short statement to highlight mitigation measures to off-set that concern. Members will be reminded that the development will be bound by a condition requiring full details of a sustainable drainage system.

The Chair has also raised a query regarding fencing and whether any will be located between the proposed bund and the neighbouring residents properties. Having reviewed the plans, I think I'm right in saying that all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways. Can you please confirm that this is correct?

If you could get back to me tomorrow, that would be appreciated.

Hi [redacted]

Do you happen to have any site plans where the interface distances with neighbouring residential properties are plotted on the plans, especially those from Units 1 and 2? If so could you send them over?

The impact on local residents will likely come up tomorrow and it would be useful to have a plan to walk the Chair and Vice Chair through.

Apologies for the late request.

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; ⟨A1⟩ • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* ⟨A1⟩ • sufficiently strong [A1] [B)] ⟨A1⟩ to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); ⟨A1⟩ • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* ⟨A1⟩ If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. ⟨A1⟩

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

wsp

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours [redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

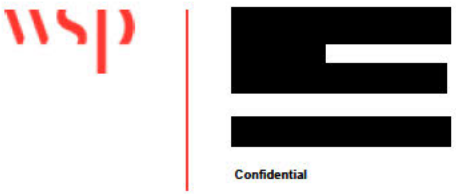
Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).



Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Hi [redacted]

The extension of time to 14th June 2024 is agreed.

Good news on the EP position on the revised acoustic fencing, thanks for confirming.

I'll come back to you tomorrow on draft planning conditions (thank you) and also your queries in relation to constriction/operational benefits/figures and query from last Friday about night-time working/activities.

Kind regards

wsp

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Good Morning [redacted]

First and foremost, thank you for your Committee presentation on Tuesday, which we felt was excellent and clearly dealt with Members' queries and lead to the overwhelming support for the scheme. We were also really pleased with [redacted] and the Environmental Protection Officer's fielding of questions from the Committee. It was an excellent Committee experience overall, so we wanted to thank you and fellow officers for that in particular, as well as the support throughout the pre-application and application determination stages to get us to this point.

We are now naturally keen to get the S106 finalised and the decision notice released. PLP's solicitors should be in touch imminently (if not already) with the Council's solicitors to finalise the numbers and obligations for the highways and BNG contributions.

Whilst that is progressing in the background, there are two pressing matters that we would be grateful for your assistance with:

Issue 1 - Footpath diversion/closure orders

As you know, we are concurrently progressing (via the Government Officer North East) applications for the various footpath diversions and closure orders required as part of the development. We have an outstanding single objection that is causing issues in terms of progressing the orders, which I think I have mentioned previously.

The Government Office case worker suggests that until evidence of a permission is provided this single objection cannot be overruled.

Whilst I appreciate, we only have a resolution to grant at this stage, we were going to send any documentation we could provide to the Government Office that confirmed the Committee's resolution in writing. To my mind, only the minutes of the Committee will provide such formal documentation of the Committee resolution. Assuming this is the case, please can you advise when the minutes of the Committee are typically published?

Issue 2 - Condition 5

As per the email trail below, I have raised concerns that the team has regarding condition 5 and specifically the requirement for additional gas monitoring requirement and the trigger point for undertaking such works (essentially parts 1 and 2 of condition 5). I appreciate your and the EP Officer's position but perhaps I haven't made the timing issue fully clear and so I set this out below so that we can discuss the matter further and establish what options are available to us post-Committee to resolve the trigger point issue.

5. No development approved by this planning permission shall commence until a remediation strategy to deal with the risks associated with contamination of the site in respect of the development hereby permitted, has been submitted to, and approved in writing by, the local planning authority. This strategy will include the following components:

Post any demolition necessary but prior to any further development commencing:

1. An updated site investigation scheme following on-site pressure grouting, including the results of subsequent additional gas monitoring, an updated ground gas risk assessment, and a combustion assessment, identifying the risk to all receptors that may be affected, including those off-site.
2. The results of the updated site investigation and the detailed risk assessment referred to in (1) and, based on these, an options appraisal and an updated remediation strategy giving full details of the remediation measures required, including a Gas Protection Design Report if gas protection measures are required, and how

they are to be undertaken.
3. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (2) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Prior to the occupation of the development:

4. Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

As mentioned in my emails previously, the trigger point will affect construction programme – I understand this impact would potentially be severe if not resolved.

The condition, as drafted, would allow the on-site pressure grouting to take place, which is fine. The subsequent requirement to provide an updated site investigation scheme following the on-site pressure grouting is also fine. **However,** the updated site investigation scheme has to include results of subsequent additional gas monitoring – only once such gas monitoring is complete could the updated site investigation scheme be submitted for approval and then subsequent discharge. The issue is that gas monitoring is likely to be a 3-month period (this is a requirement of guidance/legislation I understand and cannot be undertaken for a shorter period). There will also then be additional time required to prepare the report with the results/evidence and submit the report to discharge the condition and await formal approval – potentially a further 2 months. This would lead to a potentially 4-6 month period where the contractors can't progress anything on site if the gas monitoring elements of condition 5 parts 1 and 2 remain as a 'Pre-commencement' condition.

In summary, if the condition remains as pre-commencement then basically the earthworks has to pause after the grouting until the condition is satisfied via the submission and approval of the gas monitoring results/report, which could mean a minimum 6 month period from commencement of on-site pressure grouting and a commencement of the development, which will have a significant impact on build programme overall.

Hopefully, the illustration below will assist with this issue we have currently:

1. Pre-commencement (as per current trigger point)

Grouting works undertaken and completed -> Gas monitoring following grouting (c.3 months) -> Gas monitoring report prepared and submitted to discharge condition (c.2-4 weeks following end of gas monitoring) -> discharge condition (potentially up to 2 months) -> Start of construction (c. 6 months from grouting works being completed)

2. Pre-occupation (if trigger point amended)

Grouting works undertaken and completed -> Gas monitoring (c.3 months) concurrent with start of construction -> Gas monitoring report prepared and submitted to discharge condition -> discharge condition -> Occupation of development

The amended trigger point for submission and approval of the gas monitoring results prior to occupation (as per option 2 above) would enable construction to commence and not impede build programme. **Crucially**, it would still ensure that prior to **any** occupation of the development, the results of the additional ground gas monitoring would have been submitted, reviewed and signed-off by the Environmental Protection Officer before any building is occupied, thereby ensuring the buildings future users would not be at risk (which ultimately is the purpose of the condition and further monitoring).

I'm not sure what bandwidth you have following the Committee resolution to grant in terms of adjusting trigger points, however if we can agree (whether through an amendment now prior to the decision notice issued or via a subsequent amendment application) that the relevant parts of condition 5 are linked to occupation (or at the very least prior to commencement of / installation of floor slab) then we can at least commence the earthworks during the c.3 month gas monitoring period.

Please could we arrange a meeting with you, potentially [redacted] and the Environmental Protection Officer ASAP that to discuss this further and ascertain what options we have to amend the trigger point for the condition to ensure that the build programme is not unduly impeded and the scheme can be implemented as soon as feasibly possible. We are happy to meet in person or via Teams – whichever is quicker and more feasible for all parties – in order to resolve this matter.

Thanks again for your help and hopefully we can get this issue resolved soon.

Kind regards

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was

appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; ⟨A1⟩ • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* ⟨A1⟩ • sufficiently strong [A1] [B)] ⟨A1⟩ to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); ⟨A1⟩ • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* ⟨A1⟩ If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. ⟨A1⟩

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

[redacted]

Hi [redacted]

Thanks for your prompt response – noted regarding the Committee minutes, thank you.

Thanks also for coordinating with [redacted] – I'll await your suggested availability and we can hopefully get something diarised soon regarding condition 5.

Kind regards

[redacted]

Good afternoon [redacted]

Thanks for your email and your positive comments on the process so far; that it appreciated.

With regards to the committee minutes, these should be published before the end of the week. I will send a link once they are available.

With regards to Condition 5, our hands are somewhat tied on this matter now as the condition, as agreed with you on 3rd June, formed part of the permission that Members resolved to approve. Therefore, we couldn't agree to any material changes to the condition without returning the item to Members for consideration.

I'm happy to arrange a meeting with our EP officer and your consultant (and you and I) to discuss the wording of the condition and the process of discharging your requirements on a partial basis if that would help. I'll check Declan's availability for next week and get back to you.

Regards

[redacted]

Good Morning T[redacted]

First and foremost, thank you for your Committee presentation on Tuesday, which we felt was excellent and clearly dealt with Members' queries and lead to the overwhelming support for the scheme. We were also really pleased with [redacted] and the Environmental Protection Officer's fielding of questions from the Committee. It was an excellent Committee experience overall, so we wanted to thank you and fellow officers for that in particular, as well as the support throughout the pre-application and application determination stages to get us to this point.

We are now naturally keen to get the S106 finalised and the decision notice released. PLP's solicitors should be in touch imminently (if not already) with the Council's solicitors to finalise the numbers and obligations for the highways and BNG contributions.

Whilst that is progressing in the background, there are two pressing matters that we would be grateful for your assistance with:

Issue 1 - Footpath diversion/closure orders

As you know, we are concurrently progressing (via the Government Officer North East) applications for the various footpath diversions and closure orders required as part of the development. We have an outstanding single objection that is causing issues in terms of progressing the orders, which I think I have mentioned previously.

The Government Office case worker suggests that until evidence of a permission is provided this single objection cannot be overruled.

Whilst I appreciate, we only have a resolution to grant at this stage, we were going to send any documentation we could provide to the Government Office that confirmed the Committee's resolution in writing. To my mind, only the minutes of the Committee will provide such formal documentation of the Committee resolution. Assuming this is the case, please can you advise when the minutes of the Committee are typically published?

Issue 2 - Condition 5

As per the email trail below, I have raised concerns that the team has regarding condition 5 and specifically the requirement for additional gas monitoring requirement and the trigger point for undertaking such works (essentially parts 1 and 2 of condition 5). I appreciate your and the EP Officer's position but perhaps I haven't made the timing issue fully clear and so I set this out below so that we can discuss the matter further and establish what options are available to us post-Committee to resolve the trigger point issue.

5. No development approved by this planning permission shall commence until a remediation strategy to deal with the risks associated with contamination of the site in respect of the development hereby permitted, has been submitted to, and approved in writing by, the local planning authority. This strategy will include the following components:

Post any demolition necessary but prior to any further development commencing:

1. An updated site investigation scheme following on-site pressure grouting, including the results of subsequent additional gas monitoring, an updated ground gas risk assessment, and a combustion assessment, identifying the risk to all receptors that may be affected, including those off-site.
2. The results of the updated site investigation and the detailed risk assessment referred to in (1) and, based

on these, an options appraisal and an updated remediation strategy giving full details of the remediation measures required, including a Gas Protection Design Report if gas protection measures are required, and how they are to be undertaken.
3. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (2) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Prior to the occupation of the development:

4. Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

As mentioned in my emails previously, the trigger point will affect construction programme – I understand this impact would potentially be severe if not resolved.

The condition, as drafted, would allow the on-site pressure grouting to take place, which is fine. The subsequent requirement to provide an updated site investigation scheme following the on-site pressure grouting is also fine. **However,** the updated site investigation scheme has to include results of subsequent additional gas monitoring – only once such gas monitoring is complete could the updated site investigation scheme be submitted for approval and then subsequent discharge. The issue is that gas monitoring is likely to be a 3-month period (this is a requirement of guidance/legislation I understand and cannot be undertaken for a shorter period). There will also then be additional time required to prepare the report with the results/evidence and submit the report to discharge the condition and await formal approval – potentially a further 2 months. This would lead to a potentially 4-6 month period where the contractors can't progress anything on site if the gas monitoring elements of condition 5 parts 1 and 2 remain as a 'Pre-commencement' condition.

In summary, if the condition remains as pre-commencement then basically the earthworks has to pause after the grouting until the condition is satisfied via the submission and approval of the gas monitoring results/report, which could mean a minimum 6 month period from commencement of on-site pressure grouting and a commencement of the development, which will have a significant impact on build programme overall.

Hopefully, the illustration below will assist with this issue we have currently:

1. Pre-commencement (as per current trigger point)

Grouting works undertaken and completed -> Gas monitoring following grouting (c.3 months) -> Gas monitoring report prepared and submitted to discharge condition (c.2-4 weeks following end of gas monitoring) -> discharge condition (potentially up to 2 months) -> Start of construction (c. 6 months from grouting works being completed)

2. Pre-occupation (if trigger point amended)

Grouting works undertaken and completed -> Gas monitoring (c.3 months) concurrent with start of construction -> Gas monitoring report prepared and submitted to discharge condition -> discharge condition -> Occupation of development

The amended trigger point for submission and approval of the gas monitoring results prior to occupation (as per option 2 above) would enable construction to commence and not impede build programme. **Crucially**, it would still ensure that prior to **any** occupation of the development, the results of the additional ground gas monitoring would have been submitted, reviewed and signed-off by the Environmental Protection Officer before any building is occupied, thereby ensuring the buildings future users would not be at risk (which ultimately is the purpose of the condition and further monitoring).

I'm not sure what bandwidth you have following the Committee resolution to grant in terms of adjusting trigger points, however if we can agree (whether through an amendment now prior to the decision notice issued or via a subsequent amendment application) that the relevant parts of condition 5 are linked to occupation (or at the very least prior to commencement of / installation of floor slab) then we can at least commence the earthworks during the c.3 month gas monitoring period.

Please could we arrange a meeting with you, potentially [redacted] and the Environmental Protection Officer ASAP that to discuss this further and ascertain what options we have to amend the trigger point for the condition to ensure that the build programme is not unduly impeded and the scheme can be implemented as soon as feasibly

possible. We are happy to meet in person or via Teams – whichever is quicker and more feasible for all parties – in order to resolve this matter.

Thanks again for your help and hopefully we can get this issue resolved soon.

Kind regards

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

Good Morning [redacted]

I hope you're well.

Further to my emails below to Therese last week, in her absence I was wondering if you could please provide a response with regards are suggested amendments to some of the planning conditions?

I attach again the schedule for ease – to be read alongside the emails below.

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; ⟨A1⟩ • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* ⟨A1⟩ • sufficiently strong [A1] [B)] ⟨A1⟩ to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); ⟨A1⟩ • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* ⟨A1⟩ If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. ⟨A1⟩

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

wsp

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours [redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

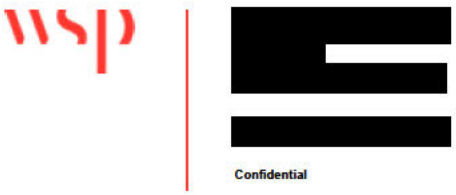
Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).



Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure Gareth is cc'd to any further emails I issue whilst you're away next week.

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Hi [redacted]

Further to my email below, I trust that gave you the additional clarifications you needed ahead of Committee.

I was also wondering whether there were any particular areas / common themes raised in the Member briefing that you think it would be worthwhile me addressing in the Committee speech tomorrow? Just want to ensure that I have prepared as tailored a Committee speech as possible to the key areas of interest in the scheme.

Kind regards

Hi [redacted]

Please see below a short statement provided by the engineers in relation to your drainage query, with a supporting sketch attached:

"It is anticipated that the planting and vegetation on the embankment will absorb majority of the rainwater, therefore surface water runoff will be minimal. In the event of excess surface water runoff, it is highly unlikely that any residual/excess runoff will reach neighbouring gardens as there is a longitudinal fall along the bottom of the embankment which will direct the runoff to flow along the red line boundary naturally."

Regarding the boundary fences, you're interpretation is correct – i.e. all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways.

Kind regards

[redacted]

To: [redacted]
Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Following today's briefing, please could you get your drainage consultant to prepare a short statement and/or plan to cover the following point:

Potential run-off from water from the bunds into neighbouring garden land – a short statement to highlight mitigation measures to off-set that concern. Members will be reminded that the development will be bound by a condition requiring full details of a sustainable drainage system.

The Chair has also raised a query regarding fencing and whether any will be located between the proposed bund and the neighbouring residents properties. Having reviewed the plans, I think I'm right in saying that all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways. Can you please confirm that this is correct?

If you could get back to me tomorrow, that would be appreciated.

Hi [redacted]

Do you happen to have any site plans where the interface distances with neighbouring residential properties are plotted on the plans, especially those from Units 1 and 2? If so could you send them over?

The impact on local residents will likely come up tomorrow and it would be useful to have a plan to walk the Chair and Vice Chair through.

Apologies for the late request.

Regards

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

wsp

Good Morning [redacted]

I hope you're well.

Further to my emails below to [redacted] last week, in her absence I was wondering if you could please provide a response with regards are suggested amendments to some of the planning conditions?

I attach again the schedule for ease – to be read alongside the emails below.

Kind regards

wsp

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; ⟨A1⟩ • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* ⟨A1⟩ • sufficiently strong [A1] [B)] ⟨A1⟩ to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); ⟨A1⟩ • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* ⟨A1⟩ If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. ⟨A1⟩

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours [redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

H[redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Hi [redacted]

I have attached a breakdown of costs for the provision of 10% Biodiversity Net Gain (17.2 Habitat Units) off site at Bedford Colliery calculated on a full cost recovery basis over 30 years.

Please note that this does not include the full scope of legal and governance costs required for mandatory BNG.

I hope this is of assistance .

Kind Regards

Hi [redacted]

Thanks for clarifying.

Just to confirm, we're not trying to get the costs down, we just know that the applicant will not accept us putting a set price per unit with no evidence as why each unit will cost that much. This is why [redacted] has suggested that, as the application as submitted pre-mandatory, instead of fixing a price per unit (which may look like we're pulling a figure out a hat to the applicant), we focus instead on how much a scheme would cost, in totality, that will provide net gain (and net gain + 10% as I'm going to try and secure this but expect a strong challenge on that).

All I can do is put that evidenced case to the applicant, tell them how much the total cost is and see what they say!

Thanks

Hi [redacted]

I've had some further discussions on this one with [redacted] this afternoon (and sought some further guidance on the calcs from GMEU below).

[redacted] wants us to forget about a set price per unit and instead would like to understand what a scheme on the Bedford Colliery site would cost in total to provide (i) net gain so 11BHU and (ii) 10% net gain so 17.2 BHU.

Would you be able to provide those costings? I need to provide a break down to the applicant as to the total cost we are seeking; they have offered in the region of £5k per unit but have not provided any evidence to support that and I'll be asking them to do the same thing.

They are likely to go to David Proctor on this which is why [redacted] has asked for, I suppose, a pragmatic approach to sorting this last remaining issue out.

Thanks

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

I was simply quoting off the defra metric forwarded on the 31st January. The headline results page shows both the net loss which was 10.95 BU and at the bottom it calculates the deficit to achieve 10% which is quoted at 17.24 BU

The 10% is calculated off the baseline, which is 62.84. So you add 6.284 to give you a target of 69.124

The on-site value post developmentwas calculated at 51.89 so the shortfall is 69.124 – 51.89 = 17.234.

So a slight discrepancy between the metric and the maths, but that is possibly due to metric hiding decimal points beyond 2 so in reality the baseline and post development figures are slightly different.

I am unsure whether we have received any updated metrics beyond the one I commented on.

Hi [redacted]

Sorry to bother you again with this one, but we're really struggling to finalise the financial contribution for the identified loss.

We're going to seek a 10% again (but expect the applicant to challenge this as it was submitted pre-mandatory) and I'm trying to work out what that translates to as a financial sum on the basis that we will charge c.20K per unit.

Please see email trail below, I can't get my head around how to apply the 10% gain. Please can you help? I have a meeting later today with [redacted] and would like to have some answers for him if possible!

Thanks

Hi [redacted]

I'm with you on the maths. I didn't understand GMEU calculation of 51.89 BU a loss of 10.95 BU and a shortfall of 17.24 BU to achieve 10% BNG.

I'm at the dentist at 9 and have a BNG Finance meeting from 10 -12. I can have a look this afternoon but can't promise anything today.

Thanks

Hi [redacted],

I'm going to sound really stupid here so my apologies in advance…would 10% on top of the 10.95 unit not result in needed to provide 1.09 units? I'm sorry, I appreciate I'm being really simplistic there and you have way more experience in working such matters out.

Yes to the other part of your question; we need to evidence the scheme that the (finally) agreed sum of money will go to that will offset the loss + 10% on Council land.

Thanks

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Sorry to bother you again with this but [redacted] has asked for your help please.

We have previously identified that the proposed development will result in the loss of 10.95 units which needs to be off site by way of financial contributions. You have helpfully advised that the money could be spent at Bedford Colliery and Silk Street (see attached email). I'm pretty sure this is on top of what is being provided on site given what GMEU has advised.

I previously advised you that the applicant would have to provide net gain only, but [redacted] has confirmed that they should seek to provide a 10% net gain given the adoption of the PfE. The applicant is challenging this but in the interim [redacted] has asked:

If we're collecting money on the basis of spending it on Council land (on the basis the application came in before mandatory BNG and the land doesn't need to be formally registered – because no Council land is in respect of the latter), then between [redacted] and GMEU, we need to agree an ecological scheme that (with whatever they're putting on site) achieves 10% gain (that the applicant is in agreement with), then ask for a financial amount through a UU to implement such a scheme on Council land (no need to work out credits or units, just a scheme to get 10% and what that'll cost). This will need coordinating with [redacted] GMEU and the applicant – [redacted] in his emails, has identified Council sites, in my mind what can he do on that land to achieve 10% and how much will it cost?

I spoke to [redacted] earlier and she helpfully provided the email below whereby you have confirmed that each replacement unit should cost 20k and what the money will be spent on.

I need something similar for this application please which I use to defend our position to the applicant. I am meeting [redacted] tomorrow afternoon on this point and would welcome your advice beforehand if at all possible.

Thank you.

Subject: BNG - Bedford Colliery

Hi [redacted]

As discussed, I spoke with [redacted] this morning to confirm the policy position and his view is 10% net gain in line with PfE. If there is any scope they can include some on-site provision, this could lessen their off-site contribution but I appreciate time is tight for you.

In terms of off-site contributions to Bedford Collery, in respect of my site, [redacted] had advised the following:

I note that this request came in before statutory requirements but yes, considering the £20-25k estimates floating around for mandatory, I would suggest £20k per unit related to the actual work needed for off-site mitigation and the management and ongoing monitoring/ maintenance of the interventions.

This was to be directed to Bedford Colliery, and with further breakdown of what specifically it was for full cost recovery, inclusive of management plan, legal and surveying fees, project management, fencing, grassland set up/planting, hay cutting, monitoring grassland quality, and inflation over 30 years.

Hope that helps.

Hi [redacted]

I hope you enjoyed your recent leave. I've been informed by [redacted] that the application is now valid.

I still have some queries (as per my email below) relating to the PPA that I need clarity on before we progress with PLP. Are you free for a quick call today/tomorrow to discuss? I can speak by mobile or Teams, whichever is your preference.

I also had a productive meeting with Councillors Roberts and Taylor (Astley Ward) yesterday which I can bring you up to speed on.

Kind regards

Hi [redacted]

Further to our recent dialogue and your feedback in respect of the PPA cost. Are you free for a quick call (5-10 mins max) this afternoon or tomorrow so I can raise a few follow up queries with you on the PPA? It'll help my client then decide whether it is worth pursuing or not.

Kind regards

[redacted]

Subject: RE: A/22/93349/PREAPP - Land at Astley Park Way

Hi [redacted]

Thanks for letting me know. I will make a note to speak to the validation team next week.

[redacted] has confirmed that the cost of a PPA would be 20% of the application fee. There are of course no set rules with what would be contained within it. You're welcome to outline what you would expect to achieve/the terms etc and then my manager can consider resource etc.

Regards

Hi [redacted]

I hope you're well.

Further to our meeting last week, I'm just letting you know that we are submitting the application today, however I suspect payment of the fee might slip into next week and therefore it won't be transferred to the Council immediately. I doubt it would be validated within a week anyway but mindful of our consultation letter drop inviting comments up to 9th October, please can you ensure your validation team don't validate the application before that date.

Separately, did you manage to speak to [redacted] regarding a cost for the potential PPA? My client is keen to understand the costings of this and whether it is worth pursuing.

Kind regards

[redacted]

Good afternoon [redacted]

The following bullet points reflect the views of the Transport Planning Team Manager. This needs to be considered in line with the previously provided comments by the Highways team and those from Salford Council.

Regards

[redacted]

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).
- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.
- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.
- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.
- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)
- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.
- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.

Hi [redacted]

Further to our meeting last week, I'm just wondering if you've had any feedback yet from Wigan's Transport Policy Manager?

Separately, in addition to the BNG spreadsheet provided under separate cover, I attach the unredacted signed (and counter-signed) GCN License agreed with Natural England and as requested by GMEU in their consultation response (attached). Please can you pass this on? We've also commissioned the requested additional bat endoscope survey (requested pre-determination) and should have a supplementary letter/survey to submit to this effect in the next week or so.

Kind regards

Hi [redacted]

We have had reports (see comment below) of a manhole cover missing on land which I think may be within your client's control. Can you please raise this with them and get back to me with their response as soon as possible please? This has a come from a local Councillor so a speedy solution would be appreciated.

Thanks

The road that runs off Applewood farm in Astley Astley. (apparently has concrete blocks) has a manhole cover missing making this extremely hazardous for walkers etc.
can we get this made safe and if on unadopted land inform the landowners.

Subject: A/23/96226/MAJOR - Land at Astley Park Way
Importance: High

Hi [redacted]

Further to our recent meeting, please find attached/via the link provided the following:

- **Planning Statement Addendum** (attached)
    - Prepared to address the recent update to NPPF (December 2023) and the latest draft Places for Everyone Plan. For the reasons set out within, we maintain our conclusions from the originally submitted Planning Statement and the Addendum should therefore be read alongside it.

- **Revised architectural plans/drawings** (link: PLP Astley - Updated Architectural Drawing Pack (02.02.24)):
    - As discussed, some (very) minor design tweaks have been made to the proposed units since the application was submitted in September 2023 (summary of changes set out below) however the fundamentals of the scheme remain unchanged, including the siting/footprint of the units/buildings, building heights, the quantum of B2/B8 floorspace proposed, proposed footpath diversions/alterations, boundary treatments or landscaping areas.
    - These very minor design tweaks have necessitated slight revisions to all submitted architectural plans/drawings with the exception of the Application Red Line Plan which remains unchanged (Rev P4) and are summarised as follows:
        - Unit 1-4 Roof Plans –
            - Updated to show roof access hatches to enable roof inspection access and a Fall Restraint System to be installed around the perimeter of the unit roof – alterations required for health and safety reasons;
            - Also updated to show areas of potential PV provision indicated on roof plans for units 1-4;

- Unit 3 & 4 Elevations –
  - Updated to show the omission of dock levellers and inclusion of 2no. level access doors. Roof hatch positions shown to accord with updated Roof Plans.
  - Updated to show increased glazing to the relevant facades to compliment the increased office area – in our view this design tweak will have a positive impact on the elevations.
- Unit 3 & 4 GA Plans – Office –
  - Updated to show increased first floor office compartment / area and roof access point (for roof inspections).
- Unit 3 & 4 GA Plans – Ground Floor Plan –
  - Updated to show increased first floor office compartment / area above ground floor.
- Unit 3 & 4 GA Section Plan –
  - Updated to show roof access hatch.
- Other plans -
  - Site Plan – Updated to include acoustic fencing (in accordance with the submitted Noise Assessment Addendum), as well as footpath, fencing and external plant area annotations/key added.
  - Site Finishes – Updated to include the acoustic fencing specification.
  - Site Sections – Key Plan updated.
  - Plot Demise Plan – Updated to include acoustic fencing (in accordance with the submitted Noise Assessment Addendum), as well as footpath, fencing and external plant area annotations/key added.

- To assist with your upload of the revised plans/drawings, I attach a table listing out the new plan/drawing references as a result of the above design tweaks.

Please can you confirm receipt and upload the documents to the planning register, superseding any earlier versions of plans referenced above. I trust you agree that the minor tweaks made to the plans are limited and do not change any of the scheme fundamentals, such that any re-consultation needed would be limited in scope and timeframe.

Kind regards

Hi [redacted]

Thank you for confirming receipt of my email.

Just to clarify, I haven't requested that Thursday's meeting be cancelled – I suggested that we can't afford to wait until then to meet to discuss/resolve these issues. However, on the basis you're on leave today, unless a meeting can be coordinated for tomorrow (Wednesday) – which we hope it can be – the Thursday slot would surely be the next available option and therefore needs to stay in the diary as a fall-back.

I'll await yours/[redacted] further contact regarding the potential for a meeting on Wednesday, otherwise – whilst less than ideal as it delays matters a further day - perhaps the highways officers can be brought along to the scheduled Thursday meeting.

Kind regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

[redacted]

Further to your email below and the Transport Planning Team Manager's comments attached, I write to set out our position on the various points raised.

As a starting point, whilst I appreciate that you are seeking to manage expectations, we are nevertheless very concerned by the suggestion that we may miss the March Committee date due to outstanding matters and extremely frustrated with the Transport Planning Team Manager's comments (set out further below).

GMEU

Starting with the GMEU comments, I am entirely confident that the GMEU queries can be dealt with either by condition (such as a condition for a detailed landscaping/planting schedule prior to commencement) and legal agreement (i.e. the biodiversity offsetting mechanism, which we await your solicitor's input to) – whilst the ecology consultant is reviewing the queries, I do not see why they need all of the points summarised at the foot of their response clarifying prior to determination and it risk leading to an unnecessary delay to determination. We also disagree with their suggestion of needing to demonstrate full details/scheme of mitgation to achieve a 10% net gain – you and [redacted] are already well aware of our position on this, noting the Core Strategy policy and the fact PfE is not yet adopted (not to mention that our understanding is that the mandatory requirement only comes into effect for major development submitted after 12 February 2024).

Highways

Turning to the highways comments, as mentioned we are extremely frustrated and confused with the content of the Transport Planning Team Manager's response as it seems to conflict with the transport modelling approach and methodology long agreed with [redacted] as part of the paid (and prolonged) pre-application advice process (as demonstrated further in the Hydrock responses below). We are also extremely frustrated that despite having signed up to a PPA and paid the additional cost (in addition to a significant application fee), it is one of Wigan Council's own officers (the Transport Planning Team Manager) that has provided a consultation response so very late in the process (not to mention the conflicting view with your own Highways Officer), and it is now being suggested that highways issues could be a contributing factor to potentially missing the March Committee. This is an unacceptable position for the applicant that needs urgently resolving.

A Technical Note is nevertheless being prepared to address the comments raised by [redacted] and SCC, some of which will also address the Transport Planning Team Manager's comments below, however we request that the Transport Planning

Team Manager is furnished with the responses below as it will clarify the long agreed methodology for the TA and should therefore address the majority of comments, with the remaining comments (i.e. those raised by [redacted] and SCC) to be addressed in the aforementioned Technical Note, which will be submitted imminently. The parking provision query will be addressed in the Technical Note and we are comfortable that the provision provided is wholly acceptable for the quantum of floorspace and use classes for which permission is sought.

Mindful of the above and the critical point we are at in the determination period / Committee lead-in, I would reiterate my request for an urgent meeting with you and the highway officers to allow us to resolve matters ASAP. We cannot afford to wait until our scheduled meeting on Thursday as we simply cannot afford to miss the March Committee, not least due to a difference of opinion with your highway officers so late in the process and despite the extensive pre-app discussions – this certainly would not align with the collaborative approach to date and that sought in the PPA.

Please can you therefore advise of your availability to meet tomorrow to resolve matters. [redacted] – we will require you in attendance also given the critical nature of this matter.

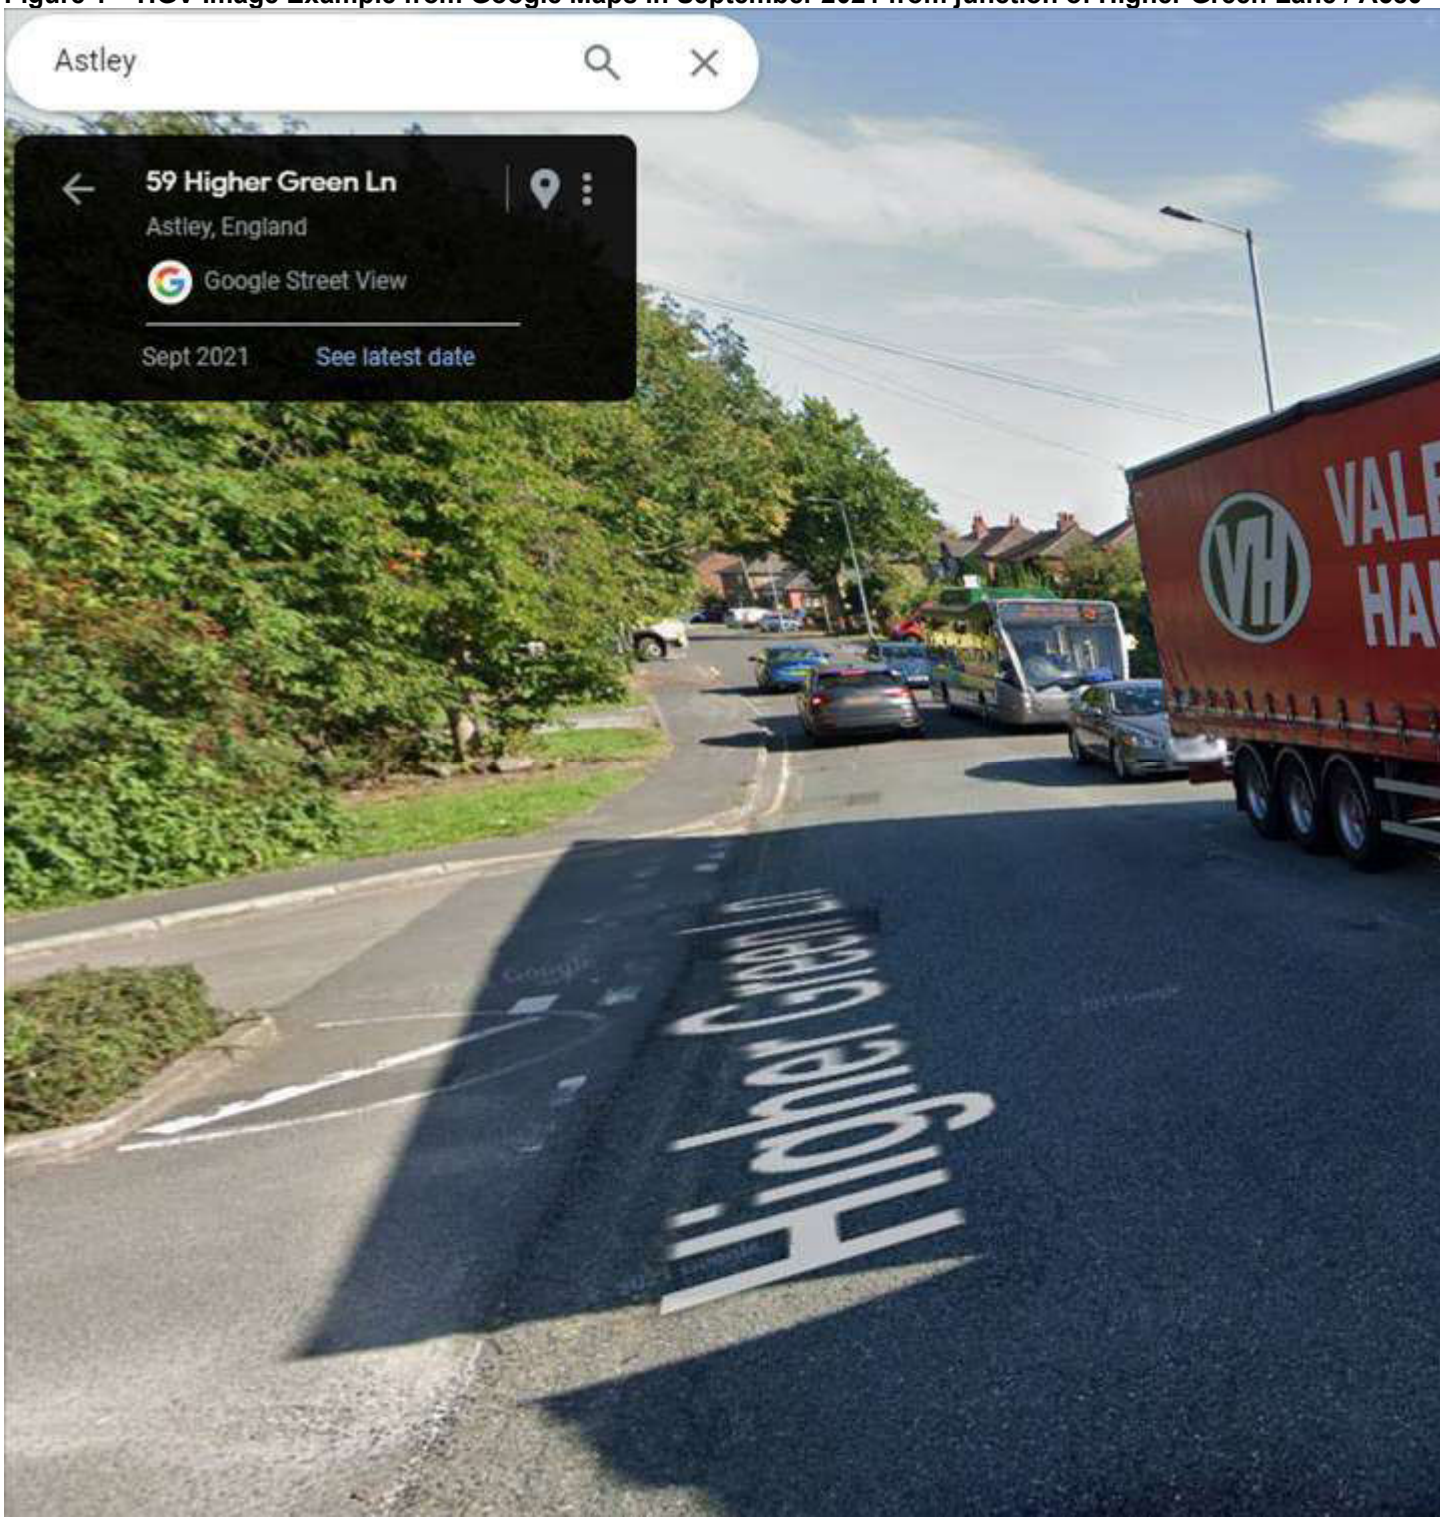
WMBC Comments on Transport Planning Team Manager Response (Hydrock summary response in red text):

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032). Noted. However, our proposed methodology, including Year of opening and future year assessment was agreed with WC highways officers ([redacted]) as part of scoping discussions in May 2022.

- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network. The list of committed developments that should be included within our assessment was provided by WC highways officers ([redacted]) as part of scoping discussions in May 2022.

- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580. Noted. However, evidence within the 2022 observed baseline traffic flow survey indicated that a similar amount of HGVs came from the west of the site access (as per the east), from a combination of Higher Green Lane / A572, and Higher Green Lane / A580 junctions. This is further confirmed by the image shown below at Figure 1.

- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011. Noted. However, the proposed methodology, including proposed distribution was agreed with WC highways officers ([redacted]) as part of scoping discussions in May 2022. Additionally, as described above, the HGV distribution is actually based on observed baseline traffic flow surveys.



- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue). The numbers are not incorrect. The assessment criteria from WC requested Hydrock to assess any junction which had a total development 'vehicle' impact of greater than 30 2-way trips. Not PCU. Figure 7 within the traffic flow figures presented within the TA illustrates the correct 'vehicle' development traffic.

  Additionally, Salford Council's other query regarding the traffic flow figures presented was around Figures 7, 8 and 9, and the total numbers provided within our assessments. This is due to the lights, and HGVs being converted to PCUs (by a factor of 2.9 for HGVs) as per the industry standard assessment criteria.

- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions. The list of junctions that should be included within our assessment was agreed with WC highways officers ([redacted]) as part of scoping discussions in May 2022, based on a total 2-way 30+ vehicle development impact upon surrounding junctions.

- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs. Parking justification to be provided in the aforementioned Technical Note to evidence the appropriateness of a comparable ratio of parking provision for numerous B2/B8 schemes across the North West.

Figure 1 – HGV Image Example from Google Maps in September 2021 from junction of Higher Green Lane / A580

From: [redacted]
Sent: Thursday, February 8, 2024 5:11 PM
To: [redacted]
Subject: FW: Consultee Comments for Planning Application A/23/96226/MAJOR

Hi [redacted],

You may already have seen the comments below as they are online but I just wanted to bring them to your attention.

As you will see further information is required re BNG.

There is now a need for a re-consultation with GMEU, Highways, Transport Policy Team and Salford City Council. In order to manage your client's expectations, its important to point out that all of the above will require a 14 day re-consultation period once the required information is received and as reports for March committee need to be completed by 19th Feb, there is a possibility that this application will not be ready to be presented at that time.

Given the level of objection in the surrounding area, it will be imperative that all outstanding issues are resolved before Officers can bring this before committee.

I am of course not ruling out making the March agenda, but I think its important to be realistic as we go forward.

Regards

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 07/02/2024 12:49 PM from [redacted] Greater Manchester Ecology Unit (Not Available) on behalf of Greater Manchester Ecology Unit.

Application Summary

Reference:	A/23/96226/MAJOR
Address:	Land At Astley Park Way Worsley
Proposal:	Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Case Officer:	[redacted]

Click for further information

Comments Details

Comments:

Hi [redacted]

Thank you for consulting on the additional information.

1. Great Crested Newts
An unredacted version of the license has been provided. This confirms that Natural England are satisfied that the development is eligible of for district licensing.

Technically no condition is now required as the process is now in the hands of Natural England and their agent for delivery of the new ponds unless the LPA would want mitigation beyond the requirements of DLL. However the developer may decide to change their approach and not enter in to DLL at which point further survey may be required. I therefore recommend a condition along the following lines is applied to any permission.

"The development has the potential to cause harm to great crested newts and entered in to District Level Licensing.

Prior to development confirmation that:

• no changes to this mitigation approach have occurred or;
• if changes have occurred further information on the new mitigation approach to gcn.

should be provided to and agreed in writing by the LPA"

2. Contributing to and Enhancing the Natural Environment & Biodiversity Net Gain
Section 180 of the NPPF 2023 states that the planning policies and decisions should contribute to and enhance the natural and local environment. The defra metric has been provided in excel format as requested.

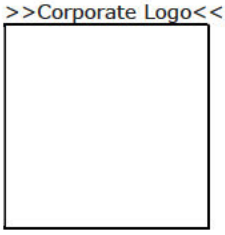
The baseline value of the site appears fair, I am therefore willing to accept 62.84 biodiversity units (BU) as the baseline.

The post-development value has been calculated at 51.89 BU a loss of 10.95 BU and a shortfall of 17.24 BU to achieve 10% BNG. This includes a significant

number of units generated through urban tree planting, 150 trees achieving moderate condition, of which 56 are forecast to achieve medium size after 27 years. It also includes 0.6819 ha of other neutral grassland forecast to achieve good condition. Both are relatively high risk proposals, with a lack of detail (that I could find) on the tree planting schedule or grassland proposals. There is therefore a risk of the loss being higher.

I therefore recommend that prior to determination:

- the details of the urban tree planting schedule is provided to ensure that 150 trees are proposed ;
- that at least 56 have the potential to exceed 30cm dbh after 30 years and;
- details on the other neutral grassland proposed to achieve good condition are provided.



I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided.

[redacted]
Ecologist
GMEU

Good Morning [redacted]

Thank you for the plan, which is more informative. However, as mentioned earlier it would be helpful if details of surface type and barriers; as appropriate, could be given.

Regards

Hi [redacted]

Thank you for your email.

The re-consultations will be carried out by the end of the day.

As this application will not go before Members in March, please can you agree to an extension of time until April 12th (which is the Friday following April's planning committee).

Regards

Hi [redacted]

Thank you for your email. Whilst clearly disappointing to have reached this position so very late in the process, we are where we are and are eager to resolve matters as soon as possible. As such, for completeness, the transport consultant has provided technical notes in response to each party's highway comments, as follows:

- 2nd Response to Wigan Council (WC) comments (i.e. [redacted] comments dated 16 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1003.P02
- 3rd Response to WC comments (i.e. [redacted] comments dated 11 Feb 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1004.P02
- SCC Response (i.e. SCC's comments dated 19 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1005.P01

We have submitted the responses as 3 x separate technical notes as we feel it would be easier for the different parties to review/address, given the number of appendices also included within the individual documents.

In terms of addressing the Mosley Common junction point, Hydrock have included the following paragraph in the '3rd WC response' document which should provide sufficient justification / comfort as to why the junction has not been assessed:

Para 2.3.4 - Notwithstanding the above, Hydrock have reviewed their Traffic Flow Figures (which were previously provided along with the previously submitted TA as part of the application), and identified that the only junction within close proximity of the Mosley common site impacted by the proposed development flows is the A580 / A577 junction. However, as shown in our Traffic Flows figures, the total 2-way vehicle trips (associated with the proposed development) travelling along the A580 to/from the A580 / A577 junction only equates to 19 in the AM peak, and 23 in the PM peak, which is less than the 30+vehicle 2-way trips assessment criteria suggested by WCC. Therefore, this junction was not requested to be assessed. Furthermore, it should also be noted that this junction was also recently upgraded in 2023.

We would hope it isn't necessary given the clarity provided in the various notes/responses but if a meeting is required to resolve any residual matters following review of the above, please can you coordinate as soon as feasibly possible.

Please can you confirm receipt and please can you re-consult the three parties and request their urgent review of the above/attached and confirmation that highways matters are indeed now resolved so that we can move forward to Committee.

Kind regards

wsp

To: [redacted]
Subject: A/23/96226/MAJOR Astley Business Park, Wigan

Good afternoon [redacted]

Apologies for the delay in providing an update for you but I can confirm that my highway colleagues have held further discussions earlier this week as planned, and the outcomes of those discussions have been shared with [redacted] and myself.

Taking all matters into account, I remain of the view that the points raised below must be addressed in full before Officers can make a positive recommendation to Members; the only exception to this is the reference made to the Mosley Common application. I accept that this was not a committed development when the application was submitted (nor did the Mosley Common application take this application into account in their transport studies). However, I would advise that providing some commentary on the combined impacts (now that it is a committed development) may provide some additional comfort to Members.

I appreciate that some of the points below were addressed in the Technical Note received early last week but it would be appreciated if this could be combined with a full response on all other points for publication and re-consultation.

The information is necessary to ensure that Officers can confirm that the proposed development is acceptable in highway terms and confidently relay this to Members. It is important to note that this application has attracted 100+ objections from local residents, a call in from local Councillors and an objection from James Grundy MP. One of the common themes running through all of these is the impact on the local highway network and as such, taking the application before Members at the present time and in advance of all matters raised by [redacted] and Salford Council being addressed, raises a significant possibility that Members could overturn or defer the application.

I appreciate that issues have been raised that were not done so at the pre-application stage and whilst that is regrettable, it is not a reason to move past them without addressing them in full to ensure that when this application is reported to Members, Officers can be confident of our positive recommendation being accepted.

On other matters, I can confirm receipt of the CGIs earlier this week. In addition, I have requested some further guidance from our ecology advisors on a potential financial contribution to achieve net gain off site but would welcome your position on this matter also as previously discussed.

Regards

- *Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).*
- *Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.*
- *Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.*
- *Strongly suggest trip distribution is based on turning count data, rather than JTW*

information from 2011.

- *Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)*
- *Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.*
- *Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.*

Hi [redacted]

You'll see from my email chasers to [redacted] (today and yesterday) that unfortunately we have not yet received an update from [redacted] following his meeting with [redacted] on Monday, despite what we had agreed at last week's meeting, which is clearly disappointing as we are no clearer as to what the Council's collective highways position is. Please can you chase internally and provide an urgent update?

It is worth noting the attached email trail between the transport consultants, Hydrock, and [redacted] (which [redacted] was cc'd to – I assume it is the same [redacted] that has now raised issues). The attached email trail clearly shows that [redacted] and others were provided with the draft TA and Framework Travel Plan prior to submission, comments which were picked up in the submission versions. It is therefore all the more confusing that despite having had sight of a draft TA that new issues have been raised.

I trust you can provide us with an urgent update so that we are clear where we stand.

Kind regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

I write further to your email below containing the Transport Policy Team's latest comments. We have reviewed the latest comments and given the technical responses we have provided it is extremely frustrating that we appear to be no closer to resolving highways matters.

As for the suggestion that the responses provided were 'a reiteration of the initial TA', it has come to light that [redacted] (and others at the Council) were copied into the attached email exchange with [redacted] at pre-app stage in which a draft TA and FTP were both submitted, reviewed and commented on by [redacted] – comments which were factored into the submission version TA and FTP. I could have potentially understood there being a difference of opinion between [redacted] and the other highway officers/team had they not been party to the pre-application discussions with [redacted], but the attached email trail quite clearly shows that they were. So, yes, in places we are reiterating points made in the initial TA because those same points were agreed with [redacted] and other highways officers were party to the same initial TA and associated email exchange, yet raised no issues/concerns at the time in terms of assessment years, HGV trip distribution, distribution methodology, traffic flow figures, junction assessments and proposed car parking provision. Had issues been raised at pre-app stage then they could have been resolved well in advance of submission of the application.

I also recall from the last meeting on 15/02/24, in which [redacted] attended, he had suggested that further assessment work for this scheme would be somewhat of an academic exercise given the already substantial committed highway mitigation schemes on the surrounding highway network. We are therefore not clear why the Transport Team are insisting on this further work being undertaken if it

is likely to reach the same conclusion as the current TA?

Given the Applicant has entered into a costly PPA, part of which is designed to resolve such issues in a timely manner, we therefore request an **urgent meeting** with you, [redacted] / the Transport Team to discuss the latest response and get to the bottom of why exactly this additional assessment work is being requested given the history of highways discussions on this project.

We are also disappointed that the Transport Policy Team is dismissive of the parking justification based on market evidence – the meeting requested above could be used to discuss this matter further and identify potential solutions.

I look forward to hearing of your earliest availability to meet.

Kind regards

wsp

To: [redacted]
Subject: FW: A/23/96226/MAJOR Astley Business Park, Wigan

Hi [redacted]

The additional information has been assessed by our Transport Policy Team and their comments are below. Unfortunately, it has been identified that the recent submission did not provide the information needed but was more of a reiteration of the initial TA. The following information is required :

1. *Assessment Years – consultant is arguing that a year of app and 5+ year assessment is ok as end user is unknown and this is a consistent approach taken at other local authorities in the NW. The fact that the end user is unknown only strengthens my point. Its going to be a minimum of 3 years before the development is operational. We need to understand the impact growth in traffic will have on the adjacent transport network.*

2. *Committed Developments – fine to exclude Mosley Common, as noted in your email Therese.*

3. *HGV Trip Distribution – Observed count data from June 2022 was used to identify HGV movements. This needs to be explained in greater detail (where in the TA, the split between east and west movements, the locations). The further evidence of HGV movements travelling westbound is a Google image taken from September 2021. This cannot be considered conclusive evidence.*

4. *Distribution Methodology – JTW information taken from 2011 should be used to support a planning application submitted in 2023. Turning count data or another form of relevant information must be used instead.*

5. *Traffic Flow Figures – Response noted, conversion of HGVs to PCUs not accounted for within assessment. As a PCU is equivalent to one standard LGV trip junctions experiencing 30 or more PCU movements should be assessed to accord with the initial response from Network Management.*

6. *Junction Assessments – Must be updated to account for assessment years and potentially updated HGV distribution.*

7. *Proposed Car Parking Provision – with no end supplier identified it is difficult to determine the appropriate level of parking provision. A list of recently consented developments taken from various locations across the north west is not adequate justification. Once operational these sites could have issues with on-street parking for example. There will also be a number of speculatively developed sites with more parking.*

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks

Hi [redacted]

Thanks for your email. I've passed on the comments to the acoustic consultant however their note did conclude that the required acoustic mitigation would still be achieved in light of the alterations to the acoustic fencing extents. I'll nevertheless get them to provide a response to address the matter.

Regarding the PPA invoice, I've asked my client for an update and will confirm back to you when I hear back. Incidentally, my client has requested another short Teams meeting with you and [redacted] / David to touch base on the application and for him to provide an update on programme/the commercial aspects. Please could you advise of availability for a 30 minute meeting as soon as conveniently possible for you and [redacted] /David.

In the meantime, we would welcome an update on the Council's position on the BNG contribution and given that [redacted] is now satisfied from a highways perspective we would welcome progress in regards the highway contribution to form part of the S106.

Kind regards

wsp

Hi [redacted]

[redacted] has been reviewing the BNG requirements for this site and has asked for some further commentary on compliance with our current development plan? This now includes Places for Everyone which set a 10% net gain requirement for new developments.

I appreciate your position has been that this isn't required due to the timing of the submission of the application, but I'm instructed by [redacted] to request a more robust reason for non-compliance with the PfE if 10% net gain cannot be achieved.

Please can you revisit the information submitted to date and advise if whether your client would be willing to meet the current requirements in this regard. If so, I can then ask my colleagues to work out a cost per unit to achieve this level of net gain on Council land, bearing in mind the scheme provided on site. I can advise that this will differ to the example that you provided previously; I'm advised that the landscape around BNG has changed since that time and each case is based on its own merits in any case.

I appreciate that we are hoping to meet next week but I would appreciate a response on this issue beforehand, just to help us progress this prior to that meeting.

I can reconfirm that the Council is committed to working with your client to ensure that this application can be recommended favourably by Officers to the Planning Committee next month.

Regards

[redacted]

Subject: RE: A/23/96226/MAJOR - Noise

Hi [redacted]

Thanks for your email. I'll check in with our accounts department early next week.

I can advise that I'm not available on afternoon of 14th May 2024 and [redacted] has no availability on the morning of 17th May. We both have availability on the afternoon of 17th May if that works for you and your client?

In terms of BNG contribution, I do apologise for the delay in getting back to you on this. The issue I'm having is that the proposals you have put forward (of circa £5k per unit) are well below what we have been accepting recently, which is closer to circa £20k per unit.

I've had to ask various colleagues to consider your proposals, the case you presented as part of your proposals and the reasoning behind other recent applications brought before Members where the cost per unit was much higher. This is taking some time and ultimately, I will have to take direction from [redacted] when he returns from leave on how

to move forward on this point. I will come back to you as soon as I can.

Hi [redacted]

No problem – will do.

I've been advised that the PPA invoice is scheduled to be paid **today** (**3rd May**). Please can you ask your accounts team to check early next week to confirm payment has been received?

In terms of the meeting, my client [redacted] is on leave next week but suggested the afternoon of the 14th or morning of the 17th May, if either of those work for you and [redacted] for the meeting?

Kind regards

wsp

Hi [redacted]

Thanks for your email. I've passed on the comments to the acoustic consultant however their note did conclude that the required acoustic mitigation would still be achieved in light of the alterations to the acoustic fencing extents. I'll nevertheless get them to provide a response to address the matter.

Regarding the PPA invoice, I've asked my client for an update and will confirm back to you when I hear back. Incidentally, my client has requested another short Teams meeting with you and [redacted] / David to touch base on the application and for him to provide an update on programme/the commercial aspects. Please could you advise of availability for a 30 minute meeting as soon as conveniently possible for you and [redacted] /David.

In the meantime, we would welcome an update on the Council's position on the BNG contribution and given that [redacted] is now satisfied from a highways perspective we would welcome progress in regards the highway contribution to form part of the S106.

Kind regards

wsp

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks

Date: 10 May 2024 11:12:00
Attachments: image001.png

Hi [redacted]

Further to my email below, I have asked my colleagues in our Greenheart Projects Team to provide details of a scheme which could be delivered on Council owned land and which would provide net gain (10%) to off set the losses identified by the proposed development. Instead of working on a price per unit basis, I am asking for the total costs of such a scheme (with a breakdown of how this will be spent) so that your client can consider how to move forward. Once I have these figures, I will forward those to you. I appreciate further dialogue around the need to provide 10% net gain may be needed but to speed things up, if this is your client's intention, and as previously advised, I will need a statement from you to show why compliance with the Places for Everyone adopted plan cannot be achieved. For the purposes of presenting this to Members, I would advise that this is based on more than just the timing of your submission.

You are welcome to have your advisors do that same for comparison purposes. I can confirm that we cannot accept your proposed financial contribution for BNG based purely on a previously approved application as each case must be based on its own merits and the general landscape around BNG has changed considerably since the Council's assessment of that particular application.

I propose to continue to prepare this application for the June planning committee. I will however need to present an agreed approach to BNG to Members within my report and we have a couple of weeks to achieve that. The legal agreement to obtain the agreed funds can follow the committee if necessary.

I haven't heard back from you regarding the meeting request and our diaries are filling up; the afternoon of Friday 17th May is still available and so is the afternoon of Friday 24th May.

Regards

Hi [redacted].

My colleagues have now complete a breakdown of the costs of a scheme which could be delivered on Council land and will allow your client to achieve 10% net gain (17.2 habitat units – as outlined in the information submitted) to offset the identified losses on site and to achieve compliance with the adopted local plan.

To put the costs into some context for you, the Council has been charging in the region of £20,000 per unit for some time now, which is comparable to costings across Greater Manchester.

By having the details of the scheme broken down in this way, the cost per unit is less that the aforementioned figure.

As advised previously, I would appreciate confirmation of your agreement to meet the costs as outlined in the attached document and I can instruct our legal team to amend the existing draft to include these. If your client is unable to meet the required costs, please can you provide the reasons why.

Hi James

Thanks for your email.

[redacted] is on leave until 8th May and I'm involved in helping at the local elections this week, so I'll come back to you next week regarding another short meeting and on other points mentioned below. Please could you let me know about the status of the PPA invoice in advance of the requested meeting.

Regards

[redacted]

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thanks for your email. I've passed on the comments to the acoustic consultant however their note did conclude that the required acoustic mitigation would still be achieved in light of the alterations to the acoustic fencing extents. I'll nevertheless get them to provide a response to address the matter.

Regarding the PPA invoice, I've asked my client for an update and will confirm back to you when I hear back. Incidentally, my client has requested another short Teams meeting with you and [redacted] / David to touch base on the application and for him to provide an update on programme/the commercial aspects. Please could you advise of availability for a 30 minute meeting as soon as conveniently possible for you and [redacted] /David.

In the meantime, we would welcome an update on the Council's position on the BNG contribution and given that [redacted] is now satisfied from a highways perspective we would welcome progress in regards the highway contribution to form part of the S106.

Kind regards

wsp

Subject: A/23/96226/MAJOR - Noise

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks
[redacted]

Hi [redacted]

Further to our discussion earlier, I wondered if it would be possible to provide a brief statement from your client on the typical differences between day time and night time use on a site of this nature.

I appreciate that it is not possible to be exact and I'm not seeking to impose any such restrictions but in the event that I'm asked a question around that at planning committee, it would be useful to have some sort of comparable information to hand.

Thanks

Subject: RE: A/23/96226/MAJOR - Hours of operation

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

I can confirm that the hours of operation required for each of the units would be 24/7 365 days a year. This is a critical aspect of the overall commercial viability of the scheme. There would obviously be management plans and controls in place, that could be secured by condition, to ensure any night time / out of hours working does not cause any impacts on amenity of nearby residents.

Kind regards

From: [redacted]>
Sent: Tuesday, May 21, 2024 2:34 PM
To: [redacted]>
Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Hi [redacted]

Thank you for your email.

I have spoken again to my colleague in EP and we remain of the view that the purpose of Condition 5 is best captured with the existing wording. My colleagues remain of the view that insufficient information has been submitted to remove parts 1 and 2 entirely (and part 2 ties in with part 3 so this remains necessary). We can discuss some tweaks to part 1 but I'm struggling to understand why that would make any difference to what you will be required to do post decision in any event (especially as there are other pre-commencement conditions to deal with).

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas

monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; ⟨A1⟩ • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* ⟨A1⟩ • sufficiently strong [A1] [B)] ⟨A1⟩ to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); ⟨A1⟩ • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* ⟨A1⟩ If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. ⟨A1⟩

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

wsp

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours/[redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Hi [redacted]

Some comments from EP to explain my earlier email.

[redacted]

Points 1 and 2 of the condition cannot be removed with the information submitted. The current approach in the condition is for further monitoring post earthworks, risk assess, and revise the remediation strategy to include the specific required gas protection measures.

The other approach given in my previous email, would be to submit a detailed ground gas risk assessment with evidenced justification of the predicted gas risk post earthworks. If this risk is suitably justified and agreed, then monitoring could be avoided depending on the outcome, and a precautionary gas protection measure could be installed. The remediation strategy would need to be revised to incorporate this proposal.

Depending on which approach is taken, points 1 and 2 of the condition remain valid as an updated ground gas risk assessment is required.
Also, both options require a revised remediation strategy & verification plan prior to commencement of the build phase (Point 2 & 3 of condition).

Therefore, the current condition remains appropriate.

If approved, then a condition discharge consultation will be required in future to resolve this condition with either of the above approaches taken and the reports submitted for approval prior to commencement of the build phase.

The details relating to cover systems, ground gas design reports, and other technical guidance within my previous email should be fully considered and included.

Hi [redacted]

Further to my email earlier today, please see comments attached. Given that the agenda needs to be published at around 2pm today, I would be grateful if you could review and provide confirmation of your agreement to the proposed pre-commencement conditions as soon as possible.

Regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Good Morning [redacted]

I hope you're well.

Further to my emails below to [redacted] last week, in her absence I was wondering if you could please provide a response with regards are suggested amendments to some of the planning conditions?

I attach again the schedule for ease – to be read alongside the emails below.

Kind regards

[redacted]

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious 〈A1〉, both in the sheet material A) and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; 〈A1〉 • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • 〈A1〉 *Text deleted* 〈A1〉 • sufficiently strong 〈A1〉 B) 〈A1〉 to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); 〈A1〉 and to withstand in-service stresses (e.g. settlement if placed below a floor slab); 〈A1〉 • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. 〈A1〉 *Text deleted* 〈A1〉 If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

A) 〈A1〉 A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

B) For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. 〈A1〉

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours/[redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

wsp

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Hi [redacted]

Following today's briefing, please could you get your drainage consultant to prepare a short statement and/or plan to cover the following point:

Potential run-off from water from the bunds into neighbouring garden land – a short statement to highlight mitigation measures to off-set that concern. Members will be reminded that the development will be bound by a condition requiring full details of a sustainable drainage system.

The Chair has also raised a query regarding fencing and whether any will be located between the proposed bund and the neighbouring residents properties. Having reviewed the plans, I think I'm right in saying that all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways. Can you please confirm that this is correct?

If you could get back to me tomorrow, that would be appreciated.

Regards

Hi [redacted]

Do you happen to have any site plans where the interface distances with neighbouring residential properties are plotted on the plans, especially those from Units 1 and 2? If so could you send them over?

The impact on local residents will likely come up tomorrow and it would be useful to have a plan to walk the Chair and Vice Chair through.

Apologies for the late request.

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas

monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [A1] [D] [A1]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [A1] [D] [A1]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious 〈A1〉, both in the sheet material A) and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; 〈A1〉 • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • 〈A1〉 *Text deleted* 〈A1〉 • sufficiently strong 〈A1〉 B) 〈A1〉 to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); 〈A1〉 and to withstand in-service stresses (e.g. settlement if placed below a floor slab); 〈A1〉 • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. 〈A1〉 *Text deleted* 〈A1〉 If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

A) 〈A1〉 A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

B) For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. 〈A1〉

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Hi [redacted]

Thanks for your email. There was nothing over and above that which we discussed last week i.e the impact of run-off water from the bunds.

As previously discussed, I suspect the main points of discussions tomorrow will centre on impact on the highway network and neighbouring amenity.

Regards

Hi [redacted]

Further to my email below, I trust that gave you the additional clarifications you needed ahead of Committee.

I was also wondering whether there were any particular areas / common themes raised in the Member briefing that you think it would be worthwhile me addressing in the Committee speech tomorrow? Just want to ensure that I have prepared as tailored a Committee speech as possible to the key areas of interest in the scheme.

Kind regards

[redacted]

Hi [redacted]

Please see below a short statement provided by the engineers in relation to your drainage query, with a supporting sketch attached:

"It is anticipated that the planting and vegetation on the embankment will absorb majority of the rainwater, therefore surface water runoff will be minimal. In the event of excess surface water runoff, it is highly unlikely that any residual/excess runoff will reach neighbouring gardens as there is a longitudinal fall along the bottom of the embankment which will direct the runoff to flow along the red line boundary naturally."

Regarding the boundary fences, you're interpretation is correct – i.e. all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways.

Kind regards

[redacted]

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Following today's briefing, please could you get your drainage consultant to prepare a short statement and/or plan to cover the following point:

Potential run-off from water from the bunds into neighbouring garden land – a short statement to highlight mitigation measures to off-set that concern. Members will be reminded that the

development will be bound by a condition requiring full details of a sustainable drainage system.

The Chair has also raised a query regarding fencing and whether any will be located between the proposed bund and the neighbouring residents properties. Having reviewed the plans, I think I'm right in saying that all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways. Can you please confirm that this is correct?

If you could get back to me tomorrow, that would be appreciated.

Hi [redacted]

Do you happen to have any site plans where the interface distances with neighbouring residential properties are plotted on the plans, especially those from Units 1 and 2? If so could you send them over?

The impact on local residents will likely come up tomorrow and it would be useful to have a plan to walk the Chair and Vice Chair through.

Apologies for the late request.

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as

such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] A1 [D] A1	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] A1 [D] A1	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious [A1], both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; ⟨A1⟩ • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • [A1] *Text deleted* ⟨A1⟩ • sufficiently strong [A1] [B)] ⟨A1⟩ to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); [A1] and to withstand in-service stresses (e.g. settlement if placed below a floor slab); ⟨A1⟩ • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. [A1] *Text deleted* ⟨A1⟩ If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] [A1] A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. ⟨A1⟩

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

wsp

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours [redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

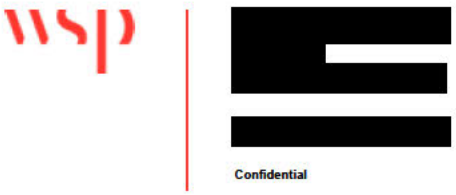
Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).



Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure Gareth is cc'd to any further emails I issue whilst you're away next week.

Good afternoon [redacted]

Thanks for your email and your positive comments on the process so far; that it appreciated.

With regards to the committee minutes, these should be published before the end of the week. I will send a link once they are available.

With regards to Condition 5, our hands are somewhat tied on this matter now as the condition, as agreed with you on 3rd June, formed part of the permission that Members resolved to approve. Therefore, we couldn't agree to any material changes to the condition without returning the item to Members for consideration.

I'm happy to arrange a meeting with our EP officer and your consultant (and you and I) to discuss the wording of the condition and the process of discharging your requirements on a partial basis if that would help. I'll check Declan's availability for next week and get back to you.

Regards

Importance: High

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Good Morning [redacted]

First and foremost, thank you for your Committee presentation on Tuesday, which we felt was excellent and clearly dealt with Members' queries and lead to the overwhelming support for the scheme. We were also really pleased with [redacted] and the Environmental Protection Officer's fielding of questions from the Committee. It was an excellent Committee experience overall, so we wanted to thank you and fellow officers for that in particular, as well as the support throughout the pre-application and application determination stages to get us to this point.

We are now naturally keen to get the S106 finalised and the decision notice released. PLP's solicitors should be in touch imminently (if not already) with the Council's solicitors to finalise the numbers and obligations for the highways and BNG contributions.

Whilst that is progressing in the background, there are two pressing matters that we would be grateful for your assistance with:

Issue 1 - Footpath diversion/closure orders

As you know, we are concurrently progressing (via the Government Officer North East) applications for the various footpath diversions and closure orders required as part of the development. We have an outstanding single objection that is causing issues in terms of progressing the orders, which I think I have mentioned previously.

The Government Office case worker suggests that until evidence of a permission is provided this single objection cannot be overruled.

Whilst I appreciate, we only have a resolution to grant at this stage, we were going to send any documentation we could provide to the Government Office that confirmed the Committee's resolution in writing. To my mind, only the minutes of the Committee will provide such formal documentation of the Committee resolution. Assuming this is the case, please can you advise when the minutes of the Committee are typically published?

Issue 2 - Condition 5

As per the email trail below, I have raised concerns that the team has regarding condition 5 and specifically the requirement for additional gas monitoring requirement and the trigger point for undertaking such works (essentially parts 1 and 2 of condition 5). I appreciate your and the EP Officer's position but perhaps I haven't made the timing issue fully clear and so I set this out below so that we can discuss the matter further and establish what options are available to us post-Committee to resolve the trigger point issue.

5. No development approved by this planning permission shall commence until a remediation strategy to deal with the risks associated with contamination of the site in respect of the development hereby permitted, has been submitted to, and approved in writing by, the local planning authority. This strategy will include the following components:

Post any demolition necessary but prior to any further development commencing:

1. An updated site investigation scheme following on-site pressure grouting, including the results of subsequent additional gas monitoring, an updated ground gas risk assessment, and a combustion assessment, identifying the risk to all receptors that may be affected, including those off-site.
2. The results of the updated site investigation and the detailed risk assessment referred to in (1) and, based on these, an options appraisal and an updated remediation strategy giving full details of the remediation measures required, including a Gas Protection Design Report if gas protection measures are required, and how they are to be undertaken.
3. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (2) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Prior to the occupation of the development:

4. Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

As mentioned in my emails previously, the trigger point will affect construction programme – I understand this impact would potentially be severe if not resolved.

The condition, as drafted, would allow the on-site pressure grouting to take place, which is fine. The subsequent requirement to provide an updated site investigation scheme following the on-site pressure grouting is also fine. **However,** the updated site investigation scheme has to include results of subsequent additional gas monitoring – only once such gas monitoring is complete could the updated site investigation scheme be submitted for approval and then subsequent discharge. The issue is that gas monitoring is likely to be a 3-month period (this is a requirement of guidance/legislation I understand and cannot be undertaken for a shorter period). There will also then be additional time required to prepare the report with the results/evidence and submit the report to discharge the condition and await formal approval – potentially a further 2 months. This would lead to a potentially 4-6 month period where the contractors can't progress anything on site if the gas monitoring elements of condition 5 parts 1 and 2 remain as a 'Pre-commencement' condition.

In summary, if the condition remains as pre-commencement then basically the earthworks has to pause after the grouting until the condition is satisfied via the submission and approval of the gas monitoring results/report, which could mean a minimum 6 month period from commencement of on-site pressure grouting and a commencement of the development, which will have a significant impact on build programme overall.

Hopefully, the illustration below will assist with this issue we have currently:

1. Pre-commencement (as per current trigger point)

Grouting works undertaken and completed -> Gas monitoring following grouting (c.3 months) -> Gas monitoring report prepared and submitted to discharge condition (c.2-4 weeks following end of gas monitoring) -> discharge condition (potentially up to 2 months) -> Start of construction (c. 6 months from grouting works being completed)

2. Pre-occupation (if trigger point amended)

Grouting works undertaken and completed -> Gas monitoring (c.3 months) concurrent with start of construction -> Gas monitoring report prepared and submitted to discharge condition -> discharge condition -> Occupation of development

The amended trigger point for submission and approval of the gas monitoring results prior to occupation (as per option 2 above) would enable construction to commence and not impede build programme. **Crucially**, it would still ensure that prior to **any** occupation of the development, the results of the additional ground gas monitoring would have been submitted, reviewed and signed-off by the Environmental Protection Officer before any building is occupied, thereby ensuring the buildings future users would not be at risk (which ultimately is the purpose of the condition and further monitoring).

I'm not sure what bandwidth you have following the Committee resolution to grant in terms of adjusting trigger points, however if we can agree (whether through an amendment now prior to the decision notice issued or via a subsequent amendment application) that the relevant parts of condition 5 are linked to occupation (or at the very least prior to commencement of / installation of floor slab) then we can at least commence the earthworks during the c.3 month gas monitoring period.

Please could we arrange a meeting with you, potentially [redacted] and the Environmental Protection Officer ASAP that to discuss this further and ascertain what options we have to amend the trigger point for the condition to ensure that the build programme is not unduly impeded and the scheme can be implemented as soon as feasibly possible. We are happy to meet in person or via Teams – whichever is quicker and more feasible for all parties – in order to resolve this matter.

Thanks again for your help and hopefully we can get this issue resolved soon.

Kind regards

[redacted]

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

Good Morning [redacted]

I hope you're well.

Further to my emails below to [redacted] last week, in her absence I was wondering if you could please provide a response with regards are suggested amendments to some of the planning conditions?

I attach again the schedule for ease – to be read alongside the emails below.

Kind regards

[redacted]

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious 〈A1〉 , both in the sheet material A) and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; 〈A1〉 • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • 〈A1〉 *Text deleted* 〈A1〉 • sufficiently strong 〈A1〉 B) 〈A1〉 to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); 〈A1〉 and to withstand in-service stresses (e.g. settlement if placed below a floor slab); 〈A1〉 • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. 〈A1〉 *Text deleted* 〈A1〉 If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

A) 〈A1〉 A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

B) For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. 〈A1〉

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

wsp

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours/[redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

wsp

To: [redacted]
Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

From: [redacted]
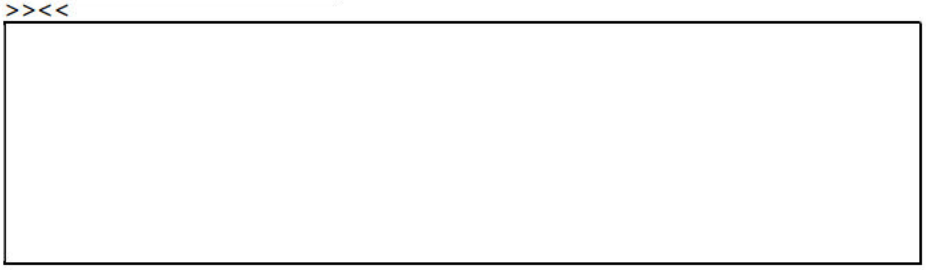
Sent: Tuesday, May 21, 2024 2:34 PM
To: [redacted]
Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by Gareth Jones and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).



Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Subject: Astley Business Park

Hello all,

In view of the number of questions still being asked about this, Aidan and I could do with increasing the level of detail that we know about it – evolution through pre-app, consultation on the application etc.

Would it be possible please to a set up a full morning or afternoon, for us to sit in a room and have you talk us through the background with images / files up on screen as we need?

[redacted] can help arrange this – we'll need all those included in this email, in a room with a decent screen that you can actually see – so maybe Room C in WLCS.

Ideally if we can try for the end of the first week back after half term or the start of w/c 10th Nov, so that colleagues have time to prepare but we keep moving with it. We'll all need to prioritise this so please help [redacted] as far as possible in moving other things around.

Thanks
David

Application number A/23/96226/MAJOR

Hello,

My name is [redacted] and I am raising serious questions of concern here about this project.

You have opened the doors to x4 B2/B8 warehouses which a simple Google search shows you that is shouldn't be anywhere near a residential zone.

We bought this house in 2021 and it didn't show up on any searches. My neighbour moved in Christmas 2024 and it didn't show up on her searches.
How have you been able to not give out full disclosure when solicitors applied for searches of the area.?

You are our local authority and you have a duty of care to everyone who sits inside the boundary walls of wigan borough.

I've tried to sell my house twice and failed due to this project. I've had to remortgage my house to pay off a help to buy scheme for a view I never asked for. My mental health has suffered massively because of this and because of this I am on anti depression medication. Yet your planning officers deemed all this to be acceptable and it wouldnt be that bad to local residents.

The brochure showed at the planning meeting showed an out of date o&s mapping as none of the houses are there.

Youve shaved numbers off the true objections to merit an easier push through on the proposed project.

The landscaping doesn't do anything to protect us as the trees that have been picked aren't tall enough and ultimately will be bare for six months out of the year.

I know you dont realise this but you've ruined our lives with this development. When this was being discussed it should have been canvassed by an independent company to go door to door and be honest with residents about the planning application and not print a notice in the leigh journal when we dont live in leigh. The voice of the residents should have been heard and it should have been a factor.

This should have never been passed, you are meant to protect us. If we have an issue with a development or private works we are meant to come to you and you as the local authority looks into it for us. The council are there to help not cause damage to our lives and strip us of the value of our homes.

Your home is a place of sanctuary its meant to be a happy place. You shouldn't have to not look out of the window and feel palpitations in your chest because you're trapped in your own home and nobody wants to buy it.

I really dont understand why Mr Proctor and Mr Thatcher think this project was a good idea.

I await your response.

Kindest regards

Councillor Roberts,

Please see the information in red below, relating to each question you asked. I hope this is of assistance.

Regards
David

1 The communication system to councillors is poor and needs to be changed as we have been let down badly in this particular case. The application was listed in November 23 but under Tyldesley and did not include Astley.
The weekly list is circulated to all members on a Monday; all members receive a borough wide list so they are able to see all applications. Councillors are able to review to the list to see if any applications of

interest are in surrounding wards. The IT system that we use does not allow a site to be recorded as being in two wards – the "main" ward within which the site falls is used based on the site area. Planning Application information including the weekly list is also available online, and it is possible to set up "alerts" based on a boundary drawn by the user. If the Councillors would like a demonstration of this please let us know and we can arrange.

We were not informed about the planning committee on 11 June 24 otherwise we would have put in objections and attended. Under our current processes members are not notified of an application in their ward going to Planning Committee as a matter of course. This is not something that has been asked for before, but we will investigate the possibility of doing this and whether members would find it useful. All residents who had commented were notified and the committee date was indicated on the website.

2 A site visit should have been made to make sure the committee members understood the scale of the development.
Other than for extremely large strategic developments (Wigan Galleries and Mosley Common are examples), site visits are only arranged where a motion to do so is moved, seconded and voted for in the Committee meeting. Members can decide to do this if they feel that the development is difficult to envisage from the information in the planning file and in the officer's presentation. In this instance no site visit was proposed and the Committee proceeded on the basis that it understood the development proposed.

3 Regarding the sect 106 monies for Bedford Colliery,(£200,000), who decides this ? Was it on the original 2017 plan? Why does Astley not benefit from it instead of Bedford?
The Section 106 funding referred to relates to a specific policy requirement, for the development to achieve 10% biodiversity net gain. This is now a mandatory requirement but was not in 2017 when the previous outline application was determined. It is important to note that the recent planning approval is completely separate from the earlier outline permission – the outline permission from 2017 expired without being implemented and so a brand new full application was required. This was then assessed against the policies existing in 2024, including the biodiversity net gain requirement. The national legislation relating to biodiversity net gain is very prescriptive as to the type of works required to improve habitats, and following consultation with the Council's Greenheart team no suitable site in Astley was identified. It is important to note that the funding secured through a Section 106 agreement for this purpose could not have been used for any other type of project.

4 Prior to the committee on 11 June 24, we were contacted by residents as there was evidence of work going on. How could this be allowed? Councillor Taylor and myself assumed the work was permitted under the 2017 application but evidently this was not the case. I will be able to provide members enquiry numbers to prove this. There are no registered enforcement cases relating to this site dating from 2024. Members Enquiry Ref. MEM021704, from 4th October 2023, related to a resident who had contacted Councillor Taylor to raise objections in relation to the warehouses. This was in advance of the Council receiving the planning application, and was triggered by the fact that the developer had undertaken their own round of consultations. Having searched our records we cannot find any other Members Enquiries that relate to this site and date from any time prior to the committee, but if Councillors have other information we can look into this further.

5 May we have a copy of the minutes of the 11 June 2024 committee meeting.
The minutes are available online at: Agenda for Planning Committee on Tuesday, 11th June, 2024, 2.00 pm

6 There have been suggestions of laughing taking place as a result of the MPs objection. Can someone check the video to see if there is evidence?
Planning Committee meetings are not recorded but Officers do not recall anyone laughing during the course of the meeting.

7 Page 143 of the report states that the height is not detrimental to the residential area. How can any professional person think that?
The relevant paragraph of the report acknowledges that this was a finely balanced issue, but concludes that with the conditions proposed (relating to landscaping, noise management and so on), the development would not impact on residents' amenity to an unacceptable degree. This was the officer's professional judgement, and Committee accepted the recommendation having had the opportunity to review the application and the officer's presentation.

8 It was pointed out that even if the bunds are 3m and trees are planted on them, what about the loss of light to the properties and the effect of the tree roots. Also it would take years for the trees to mask the warehousing.
The bunds and landscaping are essential to assist in screening the approved units. Our assessment is that these features are unlikely to cause significant loss of light to local residents, and certainly no more than would occur if trees had simply been planted along the site boundary, which would not have needed any permission at all. The impact on neighbouring residential properties is outlined in the *Design and Layout in relation to amenity* section of the officer's report, and it is concluded that on balance, any impact was acceptable subject to the proposed landscaping.

The approved planting scheme will ensure that the tree roots are suitably protected. It is inevitable that the approved landscaping scheme will take a period of time to fully mature, but a level of softening and screening will be achieved immediately and will be enhanced year on year. Following discussions with the Council the developer has proposed to bring forward the planting of the landscape buffer, and provided stock is available from their nursery, this should now start in November.

9 There is no mention of the noise, dust and potential health risks and danger to children in an operational site working 24/7 – The Officer's report to Members includes a dedicated section on both noise and air quality. No evidence was found that such matters would have a detrimental impact on local residents, including children.

Application number A/23/96226/MAJOR

Hello,

My name is [redacted] and I am raising serious questions of concern here about this project.

You have opened the doors to x4 B2/B8 warehouses which a simple Google search shows you that is shouldn't be anywhere near a residential zone.

We bought this house in 2021 and it didn't show up on any searches. My neighbour moved in Christmas 2024 and it didn't show up on her searches.

How have you been able to not give out full disclosure when solicitors applied for searches of the area.?

You are our local authority and you have a duty of care to everyone who sits inside the boundary walls of wigan borough.

I've tried to sell my house twice and failed due to this project. I've had to remortgage my house to pay off a help to buy scheme for a view I never asked for. My mental health has suffered massively because of this and because of this I am on anti depression medication. Yet your planning officers deemed all this to be acceptable and it wouldnt be that bad to local residents.

The brochure showed at the planning meeting showed an out of date o&s mapping as none of the houses are there.

Youve shaved numbers off the true objections to merit an easier push through on the proposed project.

The landscaping doesn't do anything to protect us as the trees that have been picked aren't tall enough and ultimately will be bare for six months out of the year.

I know you dont realise this but you've ruined our lives with this development. When this was being discussed it should have been canvassed by an independent company to go door to door and be honest with residents about the planning application and not print a notice in the leigh journal when we dont live in leigh. The voice of the residents should have been heard and it should have been a factor.

This should have never been passed, you are meant to protect us. If we have an issue with a development or private works we are meant to come to you and you as the local authority looks into it for us. The council are there to help not cause damage to our lives and strip us of the value of our homes.

Your home is a place of sanctuary its meant to be a happy place. You shouldn't have to not look out of the window and feel palpitations in your chest because you're trapped in your own home and nobody wants to buy it.

I really dont understand why Mr Proctor and Mr Thatcher think this project was a good idea.

I await your response.

Kindest regards

**Full Disclosure of LVIA, EIA Screening and Related Correspondence for Application A/23/96226/MAJOR (Astley Park Way, Worsley)

Dear Sir/Madam,

I am submitting this request under the Environmental Information Regulations 2004 (EIR), which impose a statutory duty on public authorities to make environmental information available to the public in a timely and transparent manner.

This request relates to planning application A/23/96226/MAJOR, submitted by Astley Unit Trust for the "Development of warehousing units (Use Classes B2/B8) and associated works" at Land at Astley Park Way, Worsley.

After reviewing the published Committee Report, it is apparent that no Landscape and Visual Impact Assessment (LVIA) or Environmental Impact Assessment (EIA) screening was undertaken or published. Given the scale (approx. 12.5 ha), height (up to 18.3 m), and proximity to sensitive receptors (residential areas and Garrett Hall Primary School), this omission raises concerns about the Council's compliance with statutory planning and environmental assessment duties.

Accordingly, I request all recorded information held by Wigan Council relating to the following points:

Landscape and Visual Impact Assessment (LVIA) Requirements

Please provide:
• Any LVIA, visual appraisal, photomontage, or related visual analysis prepared or received by Wigan Council for this application.
• Any internal or external correspondence (emails, reports, meeting minutes, or officer notes) discussing whether an LVIA was required, not required, or substituted by a "Landscape Statement."
• Any written comments or advice from the following officers or consultees:
• Urban/Landscape Design Officer (as referenced in the Committee Report, p. 53);
• Planning Case Officer and Principal Planning Officer responsible for A/23/96226/MAJOR;
• Any external landscape consultants or Greater Manchester Ecology Unit (GMEU) who provided landscape-related input;
• Any correspondence with the Head of Planning and Regeneration or Assistant Director of Growth and Housing referring to the visual impact, design mitigation, or landscape character assessment.
• Any internal draft or review notes discussing landscape sensitivity, visual receptors, or cumulative impact.

Environmental Impact Assessment (EIA) Screening

Please provide:
• The EIA Screening Opinion (if one exists) or any informal internal record evidencing that a screening determination was made under the Town and Country Planning (Environmental Impact Assessment) Regulations 2017.
• Any correspondence, minutes, or emails between:

• Planning officers, including the Development Manager and Environmental Protection Officer, discussing whether EIA screening was required;
• Any consultation responses from Statutory Consultees (e.g., Environment Agency, Natural England, Lead Local Flood Authority) relating to EIA considerations;
• The applicant or their agents (Astley Unit Trust, Hydrock Consultants, or any other named planning or design consultants) about the need for an EIA.
• Any references to Schedule 2, Category 10(a) ("industrial estate development projects exceeding 5 hectares") within the Council's internal screening deliberations.

Comparative and Policy Context

Please also provide:
• Any internal guidance, checklists, or policy notes used by Wigan Council to determine when an LVIA or EIA screening is required for major developments.
• Any comparative records or officer communications referencing other applications that were required to provide an LVIA or undergo EIA screening for example:
• A/20/88849/MAJOR – North Leigh Park
• A/17/83910/RMMAJ – Garrett Hall Residential Phase
• A/19/87155/RMMAJ – Chaddock Lane Employment Area
• Any officer or legal advice referring to consistency of decision-making or precedent regarding landscape and environmental assessment requirements in the borough.

Decision-Making and Oversight

Please include:
• Any internal meeting notes, draft reports, or emails between planning officers, senior management, and the Chair or Members of the Planning Committee relating to the omission of an LVIA or EIA screening.
• Any records referring to public concerns, objections, or representations that specifically questioned the absence of an LVIA or EIA.
• Any correspondence between Wigan Council and the Local Government Association (LGA), Planning Advisory Service (PAS), or Greater Manchester Combined Authority (GMCA) regarding the handling of environmental assessments for this site or similar developments.

Under Regulations 5(1) and 12 of the EIR 2004, Wigan Council is legally required to disclose environmental information unless an exception applies, and any exceptions must be narrowly interpreted and subject to the public interest test.

If any information is withheld, please identify:
• The specific exception being relied upon;
• The reasoning for its application; and
• The public interest factors considered in deciding to withhold it.

If parts of the information are readily available on the planning portal, please still confirm their location and provide the remainder in full.

Please treat this as a formal request for environmental information, to be responded to within 20 working days in accordance with Regulation 5(2) of the EIR 2004.

Kind regards

Subject: Re: Stop Notice, Astley Business Park

David.

Thank you for your reply regarding the concerns raised about the Astley Business Park development. While I note your comments, I must respectfully disagree with the conclusion that there are no grounds to consider serving a stop notice.

Firstly, although you state there is “no evidence whatsoever of a breach,” local residents and committee members have raised legitimate concerns that the development is not in keeping with the approved plans, particularly in relation to its scale, massing, and impact on adjacent residential properties. The visual and environmental harm caused by the works as they currently stand is significant, and there remains reasonable doubt as to whether the development is proceeding in accordance with the spirit and detail of the approval. Where doubt exists, the Council does have the power and indeed the duty to intervene in order to prevent potential irreversible harm.

Secondly, you highlight that members were provided with drawings and cross-sections during the presentation, yet it is clear from subsequent feedback that the extent of the impact was not fully appreciated. The fact that no site visit was requested does not mean members fully understood the implications, but rather that the information presented at committee did not sufficiently illustrate the development’s relationship with surrounding housing and the local environment. If members had been misinformed or inadvertently misled—even unintentionally—that constitutes grounds for reconsideration.

Thirdly, the planning system is designed to balance development with the protection of existing communities. Given the strength of local opposition and the concerns regarding potential non-compliance, it would be premature to allow construction to continue unchecked. A stop notice would not be punitive but precautionary, ensuring that the development can be reviewed in detail before further potentially damaging works proceed.

In light of the above, I urge the Council to reconsider its position and issue a stop notice on the Astley Business Park development until the situation is clarified. This would help restore confidence in the

planning process and demonstrate that the Council is acting in the best interests of both residents and proper planning procedure.

Subject: RE: Stop Notice, Astley Business Park

Councillor Gerrard,
Thank you for your email. As I said in my earlier response, there is no evidence whatsoever of a breach, whether in relation to conformity with the approved plans or otherwise, and so the Council has no basis in the legislation to consider serving a stop notice.
In relation to whether Committee members were misled or did not fully understand what was being proposed, the officer's presentation clearly showed the relationship between the development and adjacent houses, with scaled cross sections being shown relating to Tanhouse Avenue and Norton Nook. Members do of course also have access to the full online planning file including all drawings and assessments. If Members had felt that it was not possible to understand the development from the available information then I would have expected there to be a vote for a site visit – as you know this did not happen.
I hope this is of assistance.

David

Subject: Re: Stop Notice, Astley Business Park

David.
I don't believe the development is being g carried out in accordance with the application, im also angered that a full section of housing wasn't even present on the slides from the meeting.

I don't believe all councillors on the committee had all the full and accurate details on the day as is evident with the missing houses.
The scale is disproportionate to the slides we were presented with and I feel we was misled even though I voted against it.
I understand you are reluctant to issue a stop notice against a company like peel, however no matter what the scale of the application be it a garden fence or a building development, a stop notice should be issued if we believe the application isn't being adhered too.
This would also give an opportunity for the developers to adjust their plans and add features such as a living wall on the side of the warehouses if needed.
I urge you to reconsider and take some positive action for the council rather than being passive and allow this monstrosity to continue in its current form.
Regards
Cllr Gerrard

Subject: RE: Stop Notice, Astley Business Park
Councillor Gerrard,
Thank you for your email.
A stop notice is a tool that the Council has to prevent development from continuing, where there is evidence of a breach of planning control that is causing severe harm. In this instance, while we understand the concerns being expressed, there is no evidence of any breach and so the Council has no basis to serve a stop notice.
Our team have visited the site on numerous occasions to carry out proactive monitoring, and we are content that the bunds (and the rest of the development) are being constructed in line with the planning permission. As you know the development is still under construction, and so there is further work for the developer to do to install fencing and the landscape planting.
I've attached a copy of the Council's planning enforcement policy as background. I trust this assists.

Subject: Stop Notice, Astley Business Park

Good Afternoon
Considering the negative coverage of the building activity at Astley Business Park and as a member of the planning committee, I would like a stop notice to be issued immediately so that all concerns that residents, councillors, MP and Mayor are raising are fully investigated, the main ones being the bunds not being installed as per the planning applications and that I believe that the committee was misled in regards to the size and scale of the development is much larger than what was perceived at the application meeting. This emphasises the importance of site visits on sites such as this given the scale and proximity to residents.
Please take this email a formal request that a stop notice is served immediately under TCPA1990 s.171e and if possible, an enforcement notice be brought back before the committee.
Regards
Councillor Gerrard

Good afternoon,

I've been trying to search the wigan planning online portal for the document for the Fire service consultation for the above project. I have contacted Socotec who are the building control company however they have confirmed that I need to speak to yourselves to request these documents. Is this possible please?

Many thanks

Hi [redacted]
Thanks for your email.
The siting has changed completely (to the other side of the access road) so it will require a new application I'm afraid.

Kind regards

[redacted]

Hi [redacted]

Thanks for your response on the NMA application relating to the Astley Park Way site. On a separate matter, we have an advertisement consent application in that [redacted] is currently dealing with. There has been a slight alteration to the proposed siting of the single signage totem that we seek consent for but no change to the design of the sign itself (as indicated in my colleague's email attached).

Unfortunately, [redacted] has advised that a new application is required, despite this current application not yet being determined. We would ordinarily expect it to be common practice for a revised plan to be submitted during the application determination period, therefore I would be grateful for your confirmation that the revised plan can be accepted in place of the originally submitted version and the advertisement consent application progressed accordingly?

Kind regards

Hi [redacted]

I hope you're well. I just wanted to follow up on the email below to see if you're able to supersede the previously submitted signage plan on application A/25/099628/ADV with the attached updated plan. The design of the totem has remained the same as the previous plan, but the proposed location will now be slightly further east, across from entrance road.

I would be grateful if you could confirm receipt of this email and let me know if this is acceptable.

Kind Regards,

[redacted]

Subject: A/25/099628/ADV - Amended Signage Plan

Hi [redacted]

I hope you're well. Just to introduce myself, I'm an [redacted] at WSP working with [redacted] on the applications on Land at Astley Park. I'm just getting in touch regarding the advertisement consent application (Ref: A/25/099628/ADV) as there has been a slight amendment to the location of the proposed totem sign. The design of the totem has remained the same as the previous plan, but the proposed location will now be slightly further east, across from entrance road. As a result, please could you supersede the existing site signage plan (Ref: WIG-PHP-00-00-DR-A-4557-022-P3) with the attached updated plan.

I would be grateful if you could confirm receipt of this email and let me know if this is acceptable. Do let me know if you have any queries.

Kind regards,

Subject: RE: Astley warehouse - neighbours consulted

Hi David,

An update following my visit to the site this morning, along with [redacted]

The bunds are largely in place with the exception of a small section within the south eastern corner of the site which is going in over the next couple of days.

Having reviewed the approved plans, the height of the bund varies across the site and is higher internally than it is externally, so the height the neighbours see will differ from the height viewed within the site. It's really difficult to measure on site as there's quite a slope in places. We would need some electronic equipment to do so, perhaps [redacted] might have something but visually, I was happy with what I seen. From within the site, as approved the bunds should range from 2.5. to 4.5m and, comparing it against other sites features, I'm happy it's reaching that. The site manager admitted that it was 30cm higher in one section and whilst he's happy to lower it I've advised to retain it as such for the moment.

The landscaping contractor is on site and is will be starting to peg out the planting areas in the coming weeks. This will involve clearing the naturalised vegetation of the bunds. The site manager has confirmed that planting will begin this November (i.e. the beginning of the planting season). This is earlier that they need to as the approved landscaping scheme requires planting to take place after practical completion; whilst the site won't reach practical completion by November, he's happy that the planting can go ahead safely. He is expecting the construction phase to be completed in Feb 26.

I've reminded him of the importance of carrying out the planting as approved and offered myself and [redacted] assistance if needed at any time. I've also advised that I will be returning to carry out further checks in the future.

The approved PROWs are also taking shape, and they are located where approved.

The site manager refuted all allegations about working outside of the hours approved under the CEMP. He said that some employees may turn up to site earlier than they are permitted to start work and he tried keeping the gate locked but this resulted in a back up on the highway so whilst some may enter the site early, they do not start work until the permitted time, according to the site manager.

I've attached some photos to give you a sense of the bunding when viewed from the site; the first is taken at rear of Unit 1 looking towards Norton Nook/Verdant Green Close and the second is taken look out the rear of Unit 2 which is not yet complete, towards Tanhouse Avenue.

Regards,

Hi [redacted]

Thanks again for this. A couple of points from our meeting with the ward Cllrs just now:

- Which ward Cllrs did we write to – the website says just Tyldesley but isn't the site part in Astley as well?
- As part of our site checks on Thursday, can we confirm the dimensions of the bunds constructed please – essential that these are exactly as per the approved plan throughout with no exceptions

Let me know how you get on.

Thanks
David

Hi David,

Apologies for the delay in getting back to you on this but wanted to get the information right as I know you're meeting with Cllrs later today. The principle of the landscaping scheme was established through the full grant of permission, but as you know a condition was attached requiring the specific detail. The details were subsequently approved under application A/25/098808/CON which was led by [redacted] but [redacted] assisted in ensuring the inclusion of the right mix within the bund. Here is his detailed account:

Generally, there is a woodland mix and woodland thicket mix proposed for the bund areas. This is supplemented by individual extra heavy standard trees (sycamore, alder, birch, cherry, rowan, oak and elm) 4-4.5m high, individual feathered trees – with lateral branches from the ground up (birch, alder, field maple and oak) 1.75-3m high and individual coniferous trees (Scots and black pine) 2-2.5m high which I requested were added to get some year-round greenery. The woodland mix contains 90% whips (600 – 800mm high) with 10% feathered trees (1.75-2m high) placed throughout it contains a variety of native tree species such as quicker growing birch and dense shrubs with slower growing oak and cherry.

On average faster growing trees like birch and alder can usually grow 40-60cm a year and reach maximum height after 20 years which can be between 15-25m making them a good choice for screening. Sycamore is also fast growing and can reach 20m high in 20 years before going on to be 25-30m high. Oak and coniferous trees are slower growing but ultimately can reach greater heights.

The overall planting mix therefore contains a mixture of tree species looking to provide some initial screening/softening with the ultimate aim of establishing a woodland belt with shrub understorey in the long term which further filters and softens views although this will probably take around 25 years to achieve there should be increasing screening and softening provided as planting grows.

Planting season is between November and the end of March (depending on the weather conditions), planting outside of this period is not recommended as it puts trees at a higher likelihood of failure, whilst there may be pressure to undertake planting a soon as possible it could ultimately be counterintuitive to do so.

In terms of implementation, it was agreed through the above conditions application that this would take place during the first available planting season after practical completion. I am due to visit the site on Thursday with [redacted] and can ask if there is any possibility if this can relate to each unit rather than the site as a whole.

Regards,

Application number A/23/96226/MAJOR

Hello,

My name is [redacted] and I am raising serious questions of concern here about this project.

You have opened the doors to x4 B2/B8 warehouses which a simple Google search shows you that is shouldn't be anywhere near a residential zone.

We bought this house in 2021 and it didn't show up on any searches. My neighbour moved in Christmas 2024 and it didn't show up on her searches.
How have you been able to not give out full disclosure when solicitors applied for searches of the area.?

You are our local authority and you have a duty of care to everyone who sits inside the boundary walls of wigan borough.

I've tried to sell my house twice and failed due to this project. I've had to remortgage my house to pay off a help to buy scheme for a view I never asked for. My mental health has suffered massively because of this and because of this I am on anti depression medication. Yet your planning officers deemed all this to be acceptable and it wouldnt be that bad to local residents.

The brochure showed at the planning meeting showed an out of date o&s mapping as none of the houses are there.

Youve shaved numbers off the true objections to merit an easier push through on the proposed project.

The landscaping doesn't do anything to protect us as the trees that have been picked aren't tall enough and ultimately will be bare for six months out of the year.

I know you dont realise this but you've ruined our lives with this development. When this was being discussed it should have been canvassed by an independent company to go door to door and be honest with residents about the planning application and not print a notice in the leigh journal when we dont live in leigh. The voice of the residents should have been heard and it should have been a factor.

This should have never been passed, you are meant to protect us. If we have an issue with a development or private works we are meant to come to you and you as the local authority looks into it for us. The council are there to help not cause damage to our lives and strip us of the value of our homes.

Your home is a place of sanctuary its meant to be a happy place. You shouldn't have to not look out of the window and feel palpitations in your chest because you're trapped in your own home and nobody wants to buy it.

I really dont understand why Mr Proctor and Mr Thatcher think this project was a good idea.

I await your response.

Kindest regards

[redacted]

Hi Christine,
Thanks for the email reply. Unfortunately it did not answer my question.

What I am asking is -
What did Wigan Council do in terms of consultation for the 2022 Mosley Common housing development :
How many letters to neighbouring residents?
What criteria was used to identify those neighbours who needed to be sent a letter?
How many lamppost notices? Where?
In which newspaper(s) was the notice placed?
Thanks

Importance: High

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

[redacted]) – please could you advise of a suitable time for me to call you to discuss how we urgently resolve the below?

So that you are aware, we are having a noise assessment addendum produced which the noise consultant has already confirmed will demonstrate that the louvres have no impact / change to the noise impacts and mitigation requirements previously deemed to be acceptable in the 2024 Noise Assessment – indeed, this has already been confirmed once already in my email dated 7th October 2025 (see below). As there will be no impact / change to the previously acceptable conclusions, this surely supports the fact that the introduction of louvres to the building elevations is non-material and therefore we hope the additional information will facilitate the positive determination of A/25/099520/NMAS. To refuse the application before this information can be provided, especially given the dialogue below which gave no indication that an NMA was not an appropriate route for seeking approval for the louvres, having gone way beyond the statutory determination deadline and given there is no impact, is unreasonable and we trust that the application can be kept 'live' until the additional information is submitted, at which point the EP team can review and respond accordingly.

As I have flagged below, we also have the approval of the revised lighting scheme forming part of this same NMA application – the updated lighting scheme which significantly reduces the extent of lighting columns required at the site and therefore reduces glare/spillage to surrounding area etc. The contractor needs to order the lighting columns to maintain programme and ensure the development is sufficiently lit in time for first occupation of the development – the approval of this NMA is required before the lighting can be ordered with any certainty.

PLP have asked me to discuss this matter with you further in order to resolve and ensure the Council has all the information it needs to determine the application, rather than prematurely refuse the application.

Please can you advise of a suitable time to discuss further?

Kind regards

Hi [redacted]

This is disappointing, particularly given how long we have waited for an update. [redacted], is it being suggested that we need to submit a S73 with a Noise Assessment for the louvres?

Unfortunately, it isn't as simple as just withdrawing the current NMA application as we also have Condition 22 (Lighting) forming part of the same NMA and which we still await a clear position from the Council on and which to my mind should be considered acceptable and entirely within the remit of an NMA application. [redacted] could we agree to withdraw the louvres element to allow the updated lighting scheme to be approved as part of this NMA?

Kind regards

[redacted]

Subject: RE: PLP Astley - Lighting (Condition 22) - A/25/099520/NMAS

Hi [redacted]

Thank you for your patience on this.

Our EP team have concluded that consideration of the impact of the louvres would require the submission of an updated noise assessment. On this basis I have concluded that the proposed NMA cannot be accepted as the proposed amendments fall outside of the remit of an NMA.

I will be issuing a refusal of the application on this basis but unfortunately, I do not have the capacity to do so today and I'm on leave next week. I can action this on my return, but I wanted to let you know in the first instance as I appreciate you may wish to now withdraw this application.

I have copied in my team leader who may be able to assist in my absence.

Hi [redacted]

I've spoken with Tanro and they've provided me with the attached technical specification data of the louvres and the following commentary:

> *The VAM800 at high speed is 36dba, the velocity at the WL is approximately 1.6m/s which is less than would be selected at an indoor diffuser which is normally 2.5m/s.*
>
> *The combined extract on the first floor if they are all running at the same time is 0.21m3/s at approx 2m/s face velocity at the WL, again this is very low, the largest fan is located 10.8m down the duct strean so there will be no real breakout noise.*
> *The two combined extracts on the GF are 100dia and 125dia inline fans that can be used for domestic properties this would be at approximatly 1.5m/s velocity if both are running at the same time.*

The silencers are duct sized accordingly and 600mm long.

There would be no material change to the outcome of the Tetra Tech Noise Assessment dated May 2024.

Please can you confirm this gives the Council sufficient comfort to now proceed with the application?

Kind regards

To: [redacted]
Subject: RE: PLP Astley - Lighting (Condition 22)

Hi [redacted]

Having reviewed the proposed NMA further, I am concerned that the provision of louvres could have an impact on the noise assessment which was submitted, assessed and agreed through the assessment of the parent permission.

Do you have any information/evidence to assist in the Council's consideration of this matter further? As you'll know, if there is any conflict with the details of the assessment undertaken for the parent permission or it would require consideration by consultees (i.e. EP), this would take that particular matter outside of the remit of a non-material amendment but this is a decision we can make once you have had the opportunity to respond.

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Just following up on the email below and whether your line manager has now had chance to review the NMA application / if it can be processed for approval (even if the decision notice will follow next week)?

Kind regards

[redacted]

WSP UK Limited, a limited company registered in England & Wales with registered number 01383511.

Subject: RE: PLP Astley - Lighting (Condition 22)

Hi [redacted]

Thanks for letting me know – hopefully you can confirm back re determination before the end of the week.

Sorry, yes, to clarify, the NMA application also seeks the inclusion of louvres on the 4 units, which are indicated by the bubbles on the plans.

Kind regards

[redacted]

Subject: FW: PLP Astley - Lighting (Condition 22)

Hi [redacted]

Thanks for your emails and my apologies for the delay in getting back to you. I'm just waiting for the okay from my line manager to determine this application; she is in an informal hearing for the next couple of days but hopefully I'll be able to get back to you before the end of the week.

Can I just check that the first part of the description of the application remains applicable as you've only mentioned the lighting scheme in your previous emails (see below):

Non-Material Amendment application for previously approved application A/23/96226/MAJOR - The applicant is seeking to update the approved building elevation plans for all four units on the site to reflect the proposed inclusion of Louvres on each unit. Additionally, this NMA is seeking to supersede the approved lighting strategy produced by WSP (Ref: ABP-WSP-00-XX-RP-E-630001) with the External Lighting with Lux Levels plan produced by Arc Mechanical and Electrical Ltd (Ref: 1150-E-10 Rev A). As a result, condition 22 should only refer to the External Lighting with Lux Levels plan produced by Arc Mechanical and Electrical Ltd (Ref: 1150-E-10 Rev A).

If so, please can you confirm that the affected areas are highlighted ('bubbled') on the submitted plans?

Regards

Thanks [redacted] – appreciated.

As mentioned at the subsequent meeting last week, the revised lighting scheme will provide a significant reduction in the amount of lighting originally approved which will reduce the potential for light spillage to surrounding areas whilst still achieving acceptable levels of illumination across the site so I'm hopeful you are in agreement with the revised scheme. Also, as advised, the contractor has advised there is a long lead-in time for the ordering of lighting columns and so they're keen to get the order placed as soon as possible to maintain the

quick build programme – therefore any feedback you might be able to provide later this week would be greatly appreciated.

Kind regards

Subject: RE: PLP Astley - Lighting (Condition 22)

Hi [redacted]

Thanks for your patience on this.

Having revisited the approved NMA, I can confirm that changes to approved lighting scheme were not considered beyond that contained within the new yard area. Reference to the lighting scheme was not mentioned in the description of development either.

I agree its ambiguous at best and you've done the right thing by seeking confirmation through a new application. I will speak to my line manager when she returns from leave next week about dealing with such changes under an NMA or whether an application to vary condition 22 would be required. I appreciate you'll consider the former is sufficient, but I will need to double check.

Finally, I think it's important to manage your expectations in terms of dealing with the new application; my workload is very high at present and I have a number of applications which have been in the system for a significant period of time to deal with before I can review any new submissions.

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

I hope you had an enjoyable summer break. I'm just following up on my email below from last week – the NMA application I refer to has now been validated (A/25/099520/NMAS) which you've probably picked up.

I'm keen to seek your early view on the lighting query, which I repeat below for ease:

I'm just touching base as we have a query regarding the approved lighting scheme, the most recent version being that approved by virtue of the Non-Material Amendments approved in May (ref: A/25/098865/NMAS – attached) in which the attached plan was submitted and approved thereby superseding the earlier referenced version under condition 22 of the original decision notice.

One of the team has been reviewing various documents and noted the following section on the NMA decision notice:

> The approved development included an external lighting scheme, compli
> with which is controlled by virtue of condition 22 of the planning permission.
> proposed extended yard would include a minor alteration to this scheme w
> is described above. Officers are satisfied that such changes would not mater
> affect the approved scheme and are acceptable under this submission.

We wanted to query this with the Council and ensure that in approving the NMA and the amended lighting scheme (attached) in May 2025 that the Council was content that the lighting scheme referenced under condition 22 at full planning approval stage is now considered fully superseded? The construction team pointed out that the wording in the NMA decision notice above could potentially be read as only the lighting alterations associated with the extended/altered Unit 2 yard area being accepted and the remaining elements of the previous lighting scheme are still 'approved' (albeit this would cause confusion as they are two different lighting schemes). Alternatively, the text in the decision notice could also be read as the Council accepting that changes to the lighting scheme would not affect the approved scheme (as in the development as a whole) and therefore the revised lighting scheme in its entirety is acceptable and approved under the NMA (this is my interpretation). Either way, for belt and braces and the avoidance of doubt, the construction team would prefer confirmation from the Council that the attached lighting plan was indeed considered acceptable and the site-wide approved lighting scheme as part of the NMA and does not need be read alongside the earlier approved lighting scheme.

I'd be grateful if you could please confirm this point to provide us with comfort/clarity?

Incidentally, we have submitted a further NMA application for louvres to be installed to the buildings – application is pending validation. In light of the above lighting query, we have included reference to condition 22 / an amendment to the approved lighting scheme in this latest NMA submission as a means of gaining formal clarification on this point – i.e. the decision notice to be issued with this latest NMA submission could make clear that the attached plan is now the approved site-wide lighting scheme. Clearly, if this is not necessary and you are happy to clarify our lighting query in response to this email then we can obviously remove reference to condition 22/lighting from this latest NMA, however we thought it would be prudent to have that option open, if required.

I look forward to hearing from you.

Kind regards

Subject: Re: Stop Notice, Astley Business Park

David.

Thank you for your reply regarding the concerns raised about the Astley Business Park development. While I note your comments, I must respectfully disagree with the conclusion that there are no grounds to consider serving a stop notice.

Firstly, although you state there is “no evidence whatsoever of a breach,” local residents and committee members have raised legitimate concerns that the development is not in keeping with the approved plans, particularly in relation to its scale, massing, and impact on adjacent residential properties. The visual and environmental harm caused by the works as they currently stand is significant, and there remains reasonable doubt as to whether the development is proceeding in accordance with the spirit and detail of the approval. Where doubt exists, the Council does have the power and indeed the duty to intervene in order to prevent potential irreversible harm.

Secondly, you highlight that members were provided with drawings and cross-sections during the presentation, yet it is clear from subsequent feedback that the extent of the impact was not fully appreciated. The fact that no site visit was requested does not mean members fully understood the implications, but rather that the information presented at committee did not sufficiently illustrate the development’s relationship with surrounding housing and the local environment. If members had been misinformed or inadvertently misled—even unintentionally—that constitutes grounds for reconsideration.

Thirdly, the planning system is designed to balance development with the protection of existing communities. Given the strength of local opposition and the concerns regarding potential non-compliance, it would be premature to allow construction to continue unchecked. A stop notice would not be punitive but precautionary, ensuring that the development can be reviewed in detail before further potentially damaging works proceed.

In light of the above, I urge the Council to reconsider its position and issue a stop notice on the Astley Business Park development until the situation is clarified. This would help restore confidence in the planning process and demonstrate that the Council is acting in the best interests of both residents and proper planning procedure.

Regards
Councillor Gerrard

Subject: RE: Stop Notice, Astley Business Park

Councillor Gerrard,

Thank you for your email. As I said in my earlier response, there is no evidence whatsoever of a breach, whether in relation to conformity with the approved plans or otherwise, and so the Council has no basis in the legislation to consider serving a stop notice.

In relation to whether Committee members were misled or did not fully understand what was being proposed, the officer's presentation clearly showed the relationship between the development and adjacent houses, with scaled cross sections being shown relating to Tanhouse Avenue and Norton Nook. Members do of course also have access to the full online planning file including all drawings and assessments. If Members had felt that it was not possible to understand the development from the available information then I would have expected there to be a vote for a site visit – as you know this did not happen.

I hope this is of assistance.

Subject: Re: Stop Notice, Astley Business Park

David.

I don't believe the development is being g carried out in accordance with the application, im also angered that a full section of housing wasn't even present on the slides from the meeting.

I don't believe all councillors on the committee had all the full and accurate details on the day as is evident with the missing houses.

The scale is disproportionate to the slides we were presented with and I feel we was misled even though I voted against it.

I understand you are reluctant to issue a stop notice against a company like peel, however no matter what the scale of the application be it a garden fence or a building development, a stop notice should be issued if we believe the application isn't being adhered too.

This would also give an opportunity for the developers to adjust their plans and add features such as a living wall on the side of the warehouses if needed.
I urge you to reconsider and take some positive action for the council rather than being passive and allow this monstrosity to continue in its current form.
Regards
Cllr Gerrard

Subject: RE: Stop Notice, Astley Business Park
Councillor Gerrard,
Thank you for your email.
A stop notice is a tool that the Council has to prevent development from continuing, where there is evidence of a breach of planning control that is causing severe harm. In this instance, while we understand the concerns being expressed, there is no evidence of any breach and so the Council has no basis to serve a stop notice.
Our team have visited the site on numerous occasions to carry out proactive monitoring, and we are content that the bunds (and the rest of the development) are being constructed in line with the planning permission. As you know the development is still under construction, and so there is further work for the developer to do to install fencing and the landscape planting.
I've attached a copy of the Council's planning enforcement policy as background. I trust this assists.

Subject: Stop Notice, Astley Business Park
Good Afternoon
Considering the negative coverage of the building activity at Astley Business Park and as a member of the planning committee, I would like a stop notice to be issued immediately so that all concerns that residents, councillors, MP and Mayor are raising are fully investigated, the main ones being the bunds not being installed as per the planning applications and that I believe that the committee was misled in regards to the size and scale of the development is much larger than what was perceived at the application meeting. This emphasises the importance of site visits on sites such as this given the scale and proximity to residents.
Please take this email a formal request that a stop notice is served immediately under TCPA1990 s.171e and if possible, an enforcement notice be brought back before the committee.
Regards
Councillor Gerrard

Subject: Astley Warehouses - Open FOIs meet
Attachments: Astley Warehouses (Open FOI's 06.11.2025).docx

Evening David,

As requested, to inform tomorrow's meeting, please find the attached document with a list of all the open FOI's regarding the Astley warehouse development and their content.

Kind regards,

[redacted]

Place Directorate

Office base: Wigan Life Centre (South Site) – Second Floor
[redacted]

Astley Warehouses
Planning permission reference A/23/96226/MAJOR

Open FOI's and content (as of 6 November 2025)

FOI 18671 (Overdue)

I am writing under the Environmental Information Regulations 2004 (EIR) to request environmental information held by Wigan Council relating to Planning Application A/23/96226/MAJOR, the proposed development of four warehouses in Astley by PLP Logistics and Peel L&P (Peel Holdings). As a local resident directly affected by this proposal, and given the significant public interest in the environmental and amenity impacts of the scheme, please disclose the information below. For the avoidance of doubt, I consider all requested material to be "environmental information" within the meaning of regulation 2(1) (including measures such as policies, plans, activities and decisions affecting elements of the environment such as land, air, noise, light, and factors like traffic). For the avoidance of doubt, 'correspondence' refers to any written or recorded message exchanged for business purposes, and includes but is not limited to: email, memos, notes, meeting minutes, instant messenger (WhatsApp, etc), in-app messages (CRM comment threads; vendor portal messages), presentations, discussions, letters, faxes, newsletters, formal notices, PR releases, SMS/text messages, social media, voicemail transcripts, call summaries, meeting chat (Zoom, Teams, etc), automated system notifications, AI-generated messages, document attachments and edits to shared documents including comments.

1) Correspondence with the applicant/developers
All recorded correspondence between any officer, councillor or representative of Wigan Council and any representative of:
- PLP Logistics
- Peel L&P (Peel Holdings)
- Any agents acting on their behalf (including but not limited to planning consultants, legal representatives, PR firms).

2) Internal Council communications
All recorded internal correspondence between council officers and/or councillors concerning this application, including discussions about:
- Pre-application advice
- Site viability
- Impact to local residents

- Officer assessments and recommendations
- Consideration of Noise, Traffic and Environmental Impact Assessments.

3) Meetings: notes, minutes and materials
All minutes, notes, agendas and presentation materials from any meetings about this development that are not already published, including:
- Pre-application meetings
- Internal officer meetings
- Meetings between council representatives and the applicant or their agents
- Any informal/un-minuted meetings for which handwritten or electronic notes exist.

4) Planning and assessment reports (drafts and internal work)
Any internal or draft reports, correspondence, assessments or professional opinions commissioned or produced by the Council regarding this development that were not published on the planning portal, including (but not limited to):
- Draft officer reports
- Viability assessments
- Independent analyses of the applicant's Noise, Traffic and Environmental Impact Assessments.

5) Public consultation and resident engagement
All correspondence and recorded information relating to public consultation on this development, including:
- Evidence of attempts to contact impacted residents
- Records identifying which homes/residents were included in consultation exercises
- Internal and external records about public responses
- Details of mitigating conditions proposed/applied in response to consultation feedback.

6) Amendments and justification for B8 use next to homes
All correspondence, documents and records detailing:
- All changes to the proposal since initial submission/approval and the reasons for those changes
- The reasoning and justifications for permitting **B8** in close proximity to a primarily residential area.

7) Local Plan Core Strategy policies
Please provide all correspondence, reports, notes and assessments disclosing how the application was considered and determined against the Wigan Local Plan Core Strategy (including, but not limited to: Wildlife (WHS1), Energy (E1), Open Space (CP2), Design (CP10), Environmental Protection (CP17)).
Please include internal correspondence, deliberations and professional opinions on compliance/contravention and any justification for approval in light of those policies.
8) Consideration of the Sept 2015 Planning Statement (Land at Chaddock Lane, Astley)

The 2015 Planning Statement (Barton Willmore LLP on behalf of Peel Investments) assessed the site's unsuitability for large-scale B8 logistics (e.g., distance from motorway links; A580 congestion and junctions; proximity to homes limiting 24/7 operations; ranking 29/35 sites for employment). Please provide:

- All correspondence and records showing whether and how this evidence was considered in determining A/23/96226/MAJOR
- If not considered, all correspondence and records explaining why it was disregarded
- Any internal/external professional advice and correspondence on the site's suitability for B8/HGV traffic, and how this compared to the 2015 findings.

9) Consideration of Report to Planning Committee findings (11 June 2024)

The Committee Report and consultee comments (Transport for Greater Manchester, Salford City Council) noted capacity/suitability concerns (e.g., over-capacity A580/A577 junction; issues with the applicant's modelling; unsuitable local roads; adjacency to housing and a primary school; reliance on mitigation such as acoustic bunds/fencing; numerous objections) and stated that "the proposed development will significantly alter the character and appearance of the existing site". Please therefore disclose:

- Internal officer correspondence/discussions/notes/emails showing how these concerns were assessed and reconciled with recommendation/decision to approve
- Any correspondence /advice/reports (internal or external) on whether the network can accommodate 24-hour HGV traffic
- Correspondence/records explaining why flawed/incomplete traffic modelling was accepted
- Evidence of consideration of conflict between 24/7 B8 operations and adjacent residential/school uses, and why mitigation alone was deemed sufficient
- Any internal justification or legal advice on risk of challenge (highways unsuitability/residential amenity).

10) BRE 209 daylight/sunlight (25-degree guidance and full assessment)

Please disclose:

- All correspondence, evidence and calculations showing that the BRE 209 ("*Site Layout Planning for Daylight and Sunlight*") 25-degree guidance was applied to the proposed development in relation to neighbouring dwellings and their main habitable-room windows, including the date of testing, properties/windows assessed and the outcomes.
- Where any 25-degree check indicated potential failure or material impact, the full BRE-compliant daylight and sunlight assessment (as submitted to or relied on by the Council), including methodology, assumptions, plans/sections identifying assessed windows and amenity spaces, results and any mitigation considered or secured.
- If no BRE 209 testing/assessment was undertaken, all correspondence and records explaining why not and what alternative approach (if any) the Council relied upon when assessing daylight/sunlight and overshadowing impacts.

11) Vibration monitoring, reporting and compliance

Given the scale and proximity to homes, please disclose all records showing how the developer has been required to comply with relevant standards/regulation for

construction vibration, including (but not limited to) **BS 7385-2:1993**, **BS 6472-1:2008**, the **Control of Pollution Act 1974**, and any planning conditions, namely:

1. All correspondence/internal communications/meeting notes/officer reports/external professional advice on vibration monitoring and reporting obligations
2. Any planning conditions requiring vibration monitoring/reporting, and the Council's monitoring of compliance
3. All vibration monitoring/reporting documents supplied by the developer to date (baseline surveys, ongoing data, exceedance logs, remedial actions)
4. Any correspondence and records explaining why continuous or real-time vibration monitoring was/was not required.

12) Consideration of National Planning Policy Framework (December 2024)

Please disclose all correspondence, internal discussions, notes, emails and other communications showing how relevant **NPPF** policies (noise, amenity, light, highway safety/severe residual impacts, appropriate siting of B8/B2 uses, high quality design) were assessed and reconciled with the recommendation/decision to approve.

13) Artificial Lighting / Light Pollution

Wigan Core Strategy – CP17 "Environmental protection" (March 2024) explicitly recognises light spillage as impacting people and wildlife and the night sky; developments must safeguard amenity/quality of life. Please disclose all correspondence and environmental information you hold on external lighting for this development, particularly effects on nearby residential properties, including:

1. **Assessments & policy tests:** Any Lighting Impact Assessments, spill/contour plots, glare evaluations, environmental zone classification (ILP GN01/21), and documents evidencing consideration of NPPF/PPG (Light) and local policy.
2. **Design & specs:** Luminaire schedules, mounting heights, aiming/tilts, shielding/louvres, Upward Light Ratio calculations, and **predicted vertical illuminance (Ev) at dwelling windows** (pre- and post-curfew), plus any revisions and related correspondence.
3. **Decisions & controls:** Officer notes/emails, consultee responses, and the **final planning conditions/obligations** governing lighting (curfews, dimming/PIR controls, hours), and any condition discharge/NMA that altered lighting.
4. **Operation, verification & complaints:** Any Lighting Management/Commissioning/ Verification reports (post-installation readings at residential receptors), monitoring/enforcement records, complaints received, and the Council's responses.
5. **Construction lighting:** Documents controlling temporary/construction lighting (hours, aiming, shielding) and any related complaints/actions.

14)Environmental Impact Assessment (EIA) or Landscape and Visual Impact Assessment(LVIA)

For a development of this scale, it would typically be expected that either an Environmental Impact Assessment (EIA) or a Landscape and Visual Impact Assessment (LVIA) would be undertaken. It is noted that an LVIA was required for a significantly smaller Wigan planning application A/22/94882/MAJOR. I therefore request the following information:

- A copy of the EIA Screening Opinion issued by the local planning authority in respect of application A/23/96226/MAJOR.

- Copies of all correspondence, reports, notes or internal communications held by the authority relating to the consideration of whether an EIA or LVIA was required for this application, and the reasoning behind the decision taken.

15)Omissions of Western Boundary Screening

The submitted landscaping diagrams clearly show 3-4 metre high bunds to the east, north and west to mitigate the visual impact of the development, plus trees and foliage bordering all residential edges of the scheme; however, no such/minimal screening has been or is being constructed on the western side. Please disclose all information held about the omission of landscape screening (bunds, tree belts and other planting) on the western boundary.

Decisions & approvals

- Any decision, sign-off, approval, instruction or agreement (internal or with the applicant/agents) that authorised omitting or minimising the western boundary bunds/tree belts/planting.
- Officer reports/notes, Delegated or Committee decisions, condition wording/variations, Section 106/Deed of Variation correspondence (if relevant) addressing this change.

Design & technical records

- All versions of landscape drawings, cross-sections, planting schedules, maintenance/management plans, and drawing issue registers/change logs identifying when western screening was added, altered or removed (include CAD/PDF mark-ups and revision clouds).
- Any acoustic, visual, air-quality or lighting assessments and sensitivity/amenity analyses used to justify removing western screening, including advice from Environmental Health, Urban Design, Landscape, Highways, and any independent reviewers.
- Construction/phasing plans or CEMP/CTMP documents that reference, defer or drop the western bunds/planting.

Form, scope and handling

- **Form & format (reg. 6(1)(b))**: Please provide electronic copies (PDF or similar).
- **Information held on your behalf (reg. 3(2))**: If any information is held by contractors/consultants on the Council's behalf, please obtain and disclose it.
- **Existing publication**: If any items are already publicly available (e.g., on the planning portal), please still identify them and supply copies/links; where only part is public, please supply the non-public remainder.
- **Advice & assistance (reg. 9)**: If any part of this request is unclear or would be considered manifestly unreasonable, please advise how I may refine it (e.g., by date ranges or document categories).
- **Charges (reg. 8)**: If charges apply, please provide a full breakdown before proceeding.
- **Refusals/exceptions (regs. 12–13, 14)**: If you rely on any exception, please identify the specific regulation(s), explain the adverse effect envisaged, set out the **public-interest test** balancing (reg. 12(1)(b)) and disclose all non-excepted material.
- **Timescale (reg. 5 & 7)**: I look forward to your response within **20 working days**. If you consider an extension to **40 working days** due to complexity/volume, please notify me and explain why.

FOI 18690 (Overdue)

I would like to request the following information:

1. The dates that David Proctors' Team or other representatives of the Planning Committee have attended Astley Business Park to carry out site inspections.

2. The names and qualifications/job title of the people who have attended.

3. Copies of any internal reports, site notes, emails, or correspondence relating to the visits and any reports, notes and emails on the findings of the meetings.

Note to service: Please can you advise if you would hold information about Planning Committee members attending the site.

FOI 18755 (Due 7 November 2025)

This request relates to planning application A/23/96226/MAJOR, submitted by Astley Unit Trust for the "Development of warehousing units (Use Classes B2/B8) and associated works" at Land at Astley Park Way, Worsley.

After reviewing the published Committee Report, it is apparent that no Landscape and Visual Impact Assessment (LVIA) or Environmental Impact Assessment (EIA) screening was undertaken or published. Given the scale (approx. 12.5 ha), height (up to 18.3 m), and proximity to sensitive receptors (residential areas and Garrett Hall Primary School), this omission raises concerns about the Council's compliance with statutory planning and environmental assessment duties.

Accordingly, I request all recorded information held by Wigan Council relating to the following points:

Landscape and Visual Impact Assessment (LVIA) Requirements

Please provide:

- Any LVIA, visual appraisal, photomontage, or related visual analysis prepared or received by Wigan Council for this application.
- Any internal or external correspondence (emails, reports, meeting minutes, or officer notes) discussing whether an LVIA was required, not required, or substituted by a "Landscape Statement."

- Any written comments or advice from the following officers or consultees:
  - Urban/Landscape Design Officer (as referenced in the Committee Report, p. 53);
  - Planning Case Officer and Principal Planning Officer responsible for A/23/96226/MAJOR;

- Any external landscape consultants or Greater Manchester Ecology Unit (GMEU) who provided landscape-related input;
- Any correspondence with the Head of Planning and Regeneration or Assistant Director of Growth and Housing referring to the visual impact, design mitigation, or landscape character assessment.
- Any internal and external draft or review notes discussing landscape sensitivity, visual receptors, or cumulative impact.

Environmental Impact Assessment (EIA) Screening

Please provide:

- The EIA Screening Opinion (if one exists) or any informal internal record evidencing that a screening determination was made under the Town and Country Planning (Environmental Impact Assessment) Regulations 2017.
- Any correspondence, minutes, or emails between: Planning officers, including the Development Manager and Environmental Protection Officer, discussing whether EIA screening was required;

- Any consultation responses from Statutory Consultees (e.g., Environment Agency, Natural England, Lead Local Flood Authority) relating to EIA considerations;
- The applicant or their agents (Astley Unit Trust, Hydrock Consultants, or any other named planning or design consultants) about the need for an EIA.
- Any references to Schedule 2, Category 10(a) ("industrial estate development projects exceeding 5 hectares") within the Council's internal screening deliberations.

Comparative and Policy Context

Please also provide:
- Any internal and external guidance, checklists, or policy notes used by Wigan Council to determine when an LVIA or EIA screening is required for major developments.

- Any comparative records or officer communications referencing other applications that were required to provide an LVIA or undergo EIA screening for example:
  - A/20/88849/MAJOR – North Leigh Park
  - A/17/83910/RMMAJ – Garrett Hall Residential Phase
  - A/19/87155/RMMAJ – Chaddock Lane Employment Area

- Any officer or legal advice referring to consistency of decision-making or precedent regarding landscape and environmental assessment requirements in the borough.

Decision-Making and Oversight

Please include:
- Any internal meeting notes, draft reports, or emails between planning officers, senior management, and the Chair or Members of the Planning Committee relating to the omission of an LVIA or EIA screening.
- Any records referring to public concerns, objections, or representations that specifically questioned the absence of an LVIA or EIA.
- Any correspondence between Wigan Council and the Local Government Association (LGA), Planning Advisory Service (PAS), or Greater Manchester Combined Authority (GMCA) regarding the handling of environmental assessments for this site or similar developments.

FOI 18758 (Due 10 November 2025)

ANY communications between Wigan authorities and Garrett hall school staff/governors in Tyldesley that relate to the construction and ongoing disruption at Astley business park. Including alleged issues that affect the learning environment at the school.

FOI 18762 (Due 10 November 2025)

Note to service: This request came in as a Subject Access Request but we are treating it as an FOI request so please search for all information relating to the below.

Please provide all personal data held by Wigan Council which relates to, references, or discusses any of the following:

1. The Instagram account @astleywarehouseaction;

2. The campaign or community group known as Astley Warehouse Action;

3. The campaign or community group known as Astley Action Group;

4. Any individuals publicly or privately associated with either group or account.

This includes, but is not limited to:

- Emails, text and WhatsApp messages, meeting notes, reports, and attachments referring to “Astley Warehouse Action”, “Astley Action Group”, or @astleywarehouseaction;

- Communications between council officers, councillors, external developers, contractors, or PR representatives where these groups or the Instagram account were mentioned;

- Any screenshots, social media monitoring, or online references gathered or shared internally;

- Any planning or enforcement records containing references to these names;

- Notes, comments, or correspondence relating to public engagement, media handling, or reputational discussions about the campaign.

Please include all such data held in emails, handwritten notes, Microsoft Teams/Outlook messages, meeting minutes, spreadsheets, or internal systems.

FOI 18842 (Due 24 November 2025)

I am writing under the Freedom of Information Act 2000 to request disclosure of correspondence and records relating to the Astley Business Park development (Planning Reference A/23/96226/MAJOR).

Please provide copies of all correspondence -including emails, letters, meeting notes, Microsoft Teams chat logs, call notes, and file attachments, between any of the following Wigan Council officers:

- Therese Maguire (Case Officer)
- David Proctor (Head of Planning and Transport Strategy)
- Aidan Thatcher (Director of Place)
- Alison McKenzie-Folan OBE (CEO)
- Any other member of the planning or environmental health teams involved in the assessment of this application and representatives of any of the following organisations:
- PLP Holdings Ltd (and any subsidiary or agent acting for them)
- Peel Land and Property (Investments) PLC
- Peel
- Tetra Tech Ltd
- WSP UK Ltd
- MP James Grundy
- Ward Councillors

The correspondence requested should cover the period 1 June 2022 to 26 October 2025, and relate specifically to:

1. The decision and rationale for not requiring an Environmental Impact Assessment (EIA) or Landscape and Visual Impact Assessment (LVIA);
2. Discussion or decisions regarding bund design, bund height, ground level measurement, or noise mitigation;
3. Site levels, landscaping, drainage, or ecological mitigation;
4. The public consultation process, including who should receive notifications or letters;
5. Any drafts or internal comments on the officer's report or committee briefing slides.
6. Any negotiations or conversations that took place relating to the Astley Business Park development site.

Please also include any internal summaries or memos produced by council officers that record or describe the above correspondence.

Subject: Astley Warehouses - Peel

Hi both

Is it possible to get a time line of activity since this hit the press.

The specifics I'd like to understand in a bit more detail are:

- Our enforcement activity
- Our engagement with Peel
- What have we stepped up or put in please seeking to calm the situation
- What is Peel doing to mitigate the complaints from residents
- Are we exploring any formal changes to the planning application – e.g. bigger trees, changing the hours of use etc?

The noise on this is continuing, and we are thinking that some sort of a meeting will be needed in the coming weeks – Alison and I will be making ourselves available for this.

We'd also like to do a piece of work which walks through the process, from initial and second application, through the determination processes, post decision and since the press has become involved. The aim being to consider against our Missions and 6 ways of working to understand any learning we could take from this.

Thanks

Aidan Thatcher

Hi,

I know you said we were on with the various FOIs relating to the Astley business park, but are we also on with draft replies to the queries in the attached? Or did they get closed out while I was on leave?

My meeting with Janet re the FOIs is tomorrow at 9, so I do need that list that we discussed yesterday please.

Thanks
David

Hi both

Further to my email below on behalf of Michael, please can I add an extra question following enquiries from residents at a community meeting this week:

- There is some concern that Whistl, which has taken on a lease for one of the buildings, will have on site fuel storage to service it's vehicles. Residents are concerned about the safety impacts of this, if true, on neighbouring properties. Please can you let me know if you are aware if there are any plans for this. Could you also please comment on whether there are any additional planning requirements for storing fuel on a site, or if the planning already granted would allow this.

Many thanks

Dear David and Aidan

Thank you for coming back with information on the enforcement visits. Michael has asked if you can provide further clarification on the following:

- More detailed information on your findings in the most recent enforcement visits and particularly the methods used to assess compliance with the Construction Environmental Management Plan
- Precise information on where the bunding work is complete, including confirmation of the height of the bund which is in place
- Confirmation of where the bunding is not complete, and an agreed date of when it will be completed by
- Precise information on the planting - what kind of planting will take place e.g. will it be a mixture of saplings and mature trees, a mixture of evergreen trees and other kinds of trees, and what height will the trees be
- Following reports of children developing asthma since the site began construction, please can you confirm whether air quality meters can be installed to measure the impact of the build on air quality in the area

Michael would find it very useful to walk the perimeter of the site with you and discuss the issues. Please can you provide some dates of when this can be arranged. Thursdays or Fridays are better for Michael due to the requirement for him to be in Westminster earlier in the week.

Kind regards

Jennifer

Subject: RE: Astley Warehouses - Chaddock Lane

Dear [redacted]

Visits and actions have been undertaken as follows:

- 15/05/2025 – To check compliance with Construction Environmental Management Plan (CEMP) in relation to complaints about dust during period of very dry weather
- 29/05/2025 - Follow up visit to check compliance with CEMP again to ensure the site manager was continuing to adhere to its requirements
- 25/07/2025 – To check height of the frames of the larger units (Units 1 and 2). Laser equipment used to confirm max building height of 18.3m in accordance with planning permission.
- 11/09/2025 – walked around all of site, including site boundaries to check landscaping bund which was largely complete at this point. Checked general siting of the buildings, checked the spread of materials/dust on site, checked complaints log held on site by site manager (CEMP requirement). Discussed the planting of the bund and agreed a start on this in November ’25.
- 30/09/2025 (with Environmental Protection air quality specialist present) – to check compliance with the CEMP and get input on whether there were any other measures that the contractor should have in place. Content that they were complying with their CEMP and had extra mitigation measures in place that weren’t required by the CEMP. No areas witnessed on site which could lead to the wider dispersal of materials.

I trust this assists. We have received a Freedom of Information request on this topic as well and will be responding with the same information.
Regards
David

Dear Aidan and David
Further to the Teams meeting last week with the Astley Warehouses Action Group, and the response which Michael received from David last week, there are still a couple of outstanding pieces of information which we are waiting for.
In his letter to Councillor Molyneux, Michael asked for proactive enforcement action to be taken to address the concerns being raised by residents about the site. In your presentation to the group last week, you mentioned that you and other members of your team had visited the site on several occasions over the past couple of weeks. Please can we ask for reports on the actions you have taken, the inspections you have carried out and any proactive enforcement taking place.
Michael is happy to share this information with the residents to ensure that they have up to date and accurate information about the development and operation of the site.
Kind regards
Jennifer

Dear Mr Molyneux

I write with regard to the construction of the mega warehouses at Tyldesley. I don't know these people and I don't know the area... but I felt compelled to add my voice ...as it's just not right!

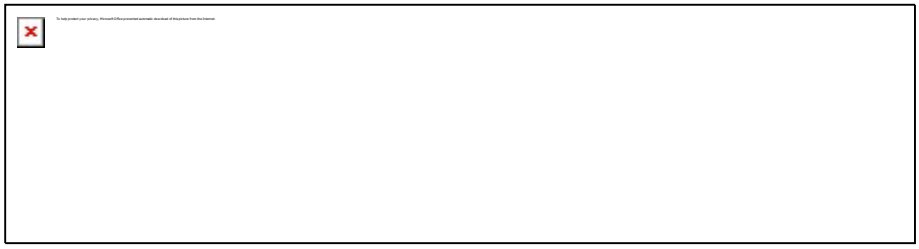
How can those poor residents be expected to put up with the daily noise, the bright lights during the night, the dust, the toxic fibres being blown around in the air, the awful view right outside their windows, the constant lorries passing nearby, the high-pitched security notifications. That's not to mention the elephant in the room which is obviously the sheer height of those eyesores.

Notwithstanding the shouting from the construction workers and their music whilst those monstrosities are going up!

How on earth did this get approval - this should never have been given the go ahead.

You have effectively made their properties worthless, imagine paying a hefty mortgage each month to live there now. Who on this earth would say, oh look, there's a lovely house for sale right next to the mega warehouses, lets buy it!!! Those properties look lovely and I cant imagine they were cheap. This has completely ruined their homes! And no doubt their lives, (including their mental health)!

And what about the human rights of those residents?



And it seems to me that you're not even listening to the residents, let alone addressing their concerns.

You are supposed to be working for the people you represent in that area, stand up and fight for those residents.

Kind regards, [redacted]

Councillor Roberts,

Thank you for this. On your points:

1. The alert can be set up for any boundary that you draw, so you could draw a boundary that covered both wards if you wanted. My colleagues can show you how to do this if you want, but they can't do it for you as you have to be logged in yourself.

4. The member enquiry that you enclosed relates to a different planning application A/23/96290/MAJOR, which is for the site next to the one we have been discussing and was approved under delegated powers (so would have had fewer than 10 objections).

9. We have not had any direct feedback from the school on these concerns, and from other conversations we have had we understood the Head had no issues. If the Head does want to contact us I am happy to speak to them. Alleged damage to properties needs to be taken forward through the residents' buildings insurance, though it is worth noting that there has been no piling at this site.

I trust that helps expand on the points.

Regards
David

Councillor Roberts,

Please see the information in red below, relating to each question you asked. I hope this is of assistance.

Regards
David

1 The communication system to councillors is poor and needs to be changed as we have been let down badly in this particular case. The application was listed in November 23 but under Tyldesley and did not include Astley.

The weekly list is circulated to all members on a Monday; all members receive a borough wide list so they are able to see all applications. Councillors are able to review to the list to see if any applications of interest are in surrounding wards. The IT system that we use does not allow a site to be recorded as being in two wards – the "main" ward within which the site falls is used based on the site area. Planning Application information including the weekly list is also available online, and it is possible to set up "alerts" based on a boundary drawn by the user. If the Councillors would like a demonstration of this please let us know and we can arrange.
We do receive the list each week and look under ASTLEY. We would have no reason to look under Tyldesley as it is not our ward. I do not understand how setting up an ALERT would help in this case as it would still not come up for ASTLEY and only alert Tyldesley.

We were not informed about the planning committee on 11 June 24 otherwise we would have put in objections and attended. Under our current processes members are not notified of an application in their ward going to Planning Committee as a matter of course. This is not something that has been asked for before, but we will investigate the possibility of doing this and whether members would find it useful. All residents who had commented were notified and the committee date was indicated on the website.

2 A site visit should have been made to make sure the committee members understood the scale of the development.
Other than for extremely large strategic developments (Wigan Galleries and Mosley Common are examples), site visits are only arranged where a motion to do so is moved, seconded and voted for in the Committee meeting. Members can decide to do this if they feel that the development is difficult to envisage from the information in the planning file and in the officer's presentation. In this instance no site visit was proposed and the Committee proceeded on the basis that it understood the development proposed.

3 Regarding the sect 106 monies for Bedford Colliery,(£200,000), who decides this ? Was it on the original 2017 plan? Why does Astley not benefit from it instead of Bedford?
The Section 106 funding referred to relates to a specific policy requirement, for the development to achieve 10% biodiversity net gain. This is now a mandatory requirement but was not in 2017 when the previous outline application was determined. It is important to note that the recent planning approval is completely separate from the earlier outline permission – the outline permission from 2017 expired without being implemented and so a brand new full application was required. This was then assessed against the policies existing in 2024, including the biodiversity net gain requirement. The national legislation relating to biodiversity net gain is very prescriptive as to the type of works required to improve habitats, and following consultation with the Council's Greenheart team no suitable site in Astley was identified. It is important to note that the funding secured through a Section 106 agreement for this purpose could not have been used for any other type of project.

4 Prior to the committee on 11 June 24, we were contacted by residents as there was evidence of work going on. How could this be allowed? Councillor Taylor and myself assumed the work was permitted under the 2017 application but evidently this was not the case. I will be able to provide members enquiry numbers to prove this. There are no registered enforcement cases relating to this site dating from 2024. Members Enquiry Ref. MEM021704, from 4th October 2023, related to a resident who had contacted Councillor Taylor to raise objections in relation to the warehouses. This was in advance of the Council

receiving the planning application, and was triggered by the fact that the developer had undertaken their own round of consultations. Having searched our records we cannot find any other Members Enquiries that relate to this site and date from any time prior to the committee, but if Councillors have other information we can look into this further.

Please see ref 025509
Your reply is as follows:
Enquiry title: Fwd: Proposed Land development for industrial use.

Case reference: MEM025509

[redacted]**communication was relevant to the Murphy's empty industrial yard at the side of our property, accessed via Kennedy Road, and a recent letter received from Wigan Planning (24/1/24) in which they notify us of an application for use by a concrete pumping company who propose to construct a new Class B2 building and indicate a Gantry Crane instillation and nine portable cabins at the yard.**

We are concerned where these buildings and equipment are to be sited and used as we would be very worried if is to be next to our fence and rear garden. This new proposed change of use of this industrial yard, will no doubt bring with it noise, fumes and dust pollution. We are already significantly impacted by Swaines Haulage company, in terms of diesel fumes, and significant noise from the ,movement of heavy haulage vehicles, so the type and times of daily activity would be very useful to know. If you have any specific details regarding this we would be grateful for that information.

It appears that the companies occupancy at the location has already taken place as two portable cabins have been installed against a far fence line with some equipment in the centre of the yard and a new large green building, adjacent to an already installed one, on the left of the yard masked by the trees and screening mound overlooking Withington Drive.

I would be the first to hold up my hands to being somewhat ignorant of the detailed way these planning processes take place but the tone of the letter seems to suggest that a planning application is to take place, yet to the uninformed eye it appears permission of some sort has already been granted given the appearance in the yard of the portable cabins, equipment and new building. Could this be clarified for me please.

You make mention in the earlier email of the perimeter fence being replaced to a more modern design. That I would welcome, given the one next to our garden has spikes and barbed wire on top, which is not exactly aesthetically pleasing, but the shrubs and overgrown hedges you make mention of, where exactly is that in the yard? We have a Horthorne hedge as the bottom of our garden that we trim each year and houses wild nesting birds, I hope that is not to be torn down as it is well established and supports local wildlife.

Resolution Details

Dear Cllr This is a relatively new application received at the end of January, the officer has not had the opportunity to visit the site yet. Any work that has already been carried out at the site has not been approved and has been undertaken at the applicants own risk.
Can you direct the resident to the website where they can view the plans, and confirm that they can submit any representations via the website also. I have also attached a screenshot of the proposed site layout if that helps understand the siting of new structures. I have also attached a copy of the applicants Design and Access Statement which provides a useful overview of their proposals.
https://clicktime.symantec.com/15siVgS8mwNuUVNZVRC7d?h=8B0FJbnvNXjirCCgBD08wdXtStBwhQ-nVupz0ZJT0Ps=&u=https://planning.wigan.gov.uk/online-applications/
Regards [redacted]

Please confirm you are satisfied with the resolution by completing the **closure confirmation form.**If we do not hear from you within 28 working days, we will assume that you are satisfied with the resolution and the enquiry will close automatically.

If you are not satisfied with the resolution, you can contact the service by completing the **unsatisfactory response form**.

Kind regards
Member Enquiries and Corporate Complaints Team

5 May we have a copy of the minutes of the 11 June 2024 committee meeting.
The minutes are available online at: Agenda for Planning Committee on Tuesday, 11th June, 2024, 2.00 pm

6 There have been suggestions of laughing taking place as a result of the MPs objection. Can someone check the video to see if there is evidence?
Planning Committee meetings are not recorded but Officers do not recall anyone laughing during the course of the meeting.

7 Page 143 of the report states that the height is not detrimental to the residential area. How can any professional person think that?
The relevant paragraph of the report acknowledges that this was a finely balanced issue, but concludes that with the conditions proposed (relating to landscaping, noise management and so on), the development would not impact on residents' amenity to an unacceptable degree. This was the officer's professional judgement, and Committee accepted the recommendation having had the opportunity to review the application and the officer's presentation.

8 It was pointed out that even if the bunds are 3m and trees are planted on them, what about the loss of light to the properties and the effect of the tree roots. Also it would take years for the trees to mask the warehousing.
The bunds and landscaping are essential to assist in screening the approved units. Our assessment is that these features are unlikely to cause significant loss of light to local residents, and certainly no more than would occur if trees had simply been planted along the site boundary, which would not have needed any permission at all. The impact on neighbouring residential properties is outlined in the *Design and Layout in relation to amenity* section of the officer's report, and it is concluded that on balance, any impact was acceptable subject to the proposed landscaping.

The approved planting scheme will ensure that the tree roots are suitably protected. It is inevitable that the approved landscaping scheme will take a period of time to fully mature, but a level of softening and screening will be achieved immediately and will be enhanced year on year. Following discussions with the Council the developer has proposed to bring forward the planting of the landscape buffer, and provided stock is available from their nursery, this should now start in November.

9 There is no mention of the noise, dust and potential health risks and danger to children in an operational site working 24/7 – The Officer's report to Members includes a dedicated section on both noise and air quality. No evidence was found that such matters would have a detrimental impact on local residents, including children.
We now have evidence that the noise is affecting the children's learning in the school and also residents are reporting excessive dust. There is also evidence of subsidence to properties which the MP is dealing with.

Good Morning [redacted],

We did do a search for this property but they were only asking the questions for roadways and for CPOs affecting the property, so any information they would have got might have been online or via an FOI request maybe.

They will have done a register search as well which would have shown planning apps approved with conditions post April 1974

If you need anything else let me know,

Thank you

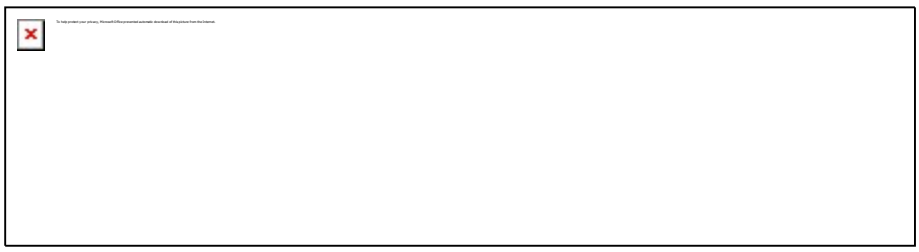
Subject: Property search - Astley warehouses

Hi, I think I mentioned the other day that one of the property owners next to the warehouses at Astley was saying the Local Plan designation / previous applications didn't come up on his property search. We've got his full address now, so is it possible to dig out what was done / responded to by us on this please – I don't know if we did the full search or if it was a private search company.

The address is:



[redacted]

ASSISTANT DIRECTOR – LEGAL GOVERNANCE AND ELECTIONS
RESOURCES DIRECTORATE
On behalf of **WIGAN BOROUGH COUNCIL**

Standard Enquiries of Local Authority

ROADS AND PUBLIC RIGHTS OF WAY

Roadways, footways and footpaths

2.1 Which of the roads, footways and footpaths named in the application for this search (via boxes B and C) are:

(a) highways maintainable at public expense

None

(b) subject to adoption and, supported by a bond or bond waiver

None

Informative

If a road, footpath or footway is not a highway, there may be no right to use it. The Council cannot express an opinion, without seeing the title plan of the property and carrying out an inspection, whether or not any existing or proposed highway directly abuts the boundary of the property.

An affirmative answer does not imply that the public highway directly abuts the boundary of the property. If a road, footpath or footway is not a highway, there may be no right to use it.

OTHER MATTERS

Note: Matters entered onto the Local Land Charges Register, or visible by property/site inspection, will not be referred to (where relevant) in answer to the enquiries 3.1. to 3.15. below.

3.12 Compulsory purchase

Has any enforceable order or decision been made to compulsorily purchase or acquire the property?

No

These replies have been given in accordance with the notes appended to CON29 form.

References to the provisions of particular Acts of Parliament or Regulations include any provisions which they have replaced and also include existing or future amendments or re-enactments.

The replies will be given in the belief that they are in accordance with information presently available to the officers of the replying local authority, but none of the local authorities or their officers accepts legal responsibility for an incorrect reply, except for negligence. Any legal responsibility for negligence will be owed to the person who raised the enquiries and the person on whose behalf they were raised. It will also be owed to any other person who has knowledge (personally or though an agent) of the replies before the time when he purchases, takes a tenancy of, or lends money on the security of the property or (if earlier) the time when he becomes contractually bound to do so.

This Form should be read in conjunction with the guidance notes available separately.

Area means any area in which the property is located.

References to the Local Authority include any predecessor Local Authority and also any Local Authority committee, sub-committee or other body or person exercising powers delegated by the Local Authority and their approval includes their decision to proceed. The replies given to certain enquiries cover knowledge and actions of both the District Local Authority and County Local Authority.

Where relevant, the source department for copy documents should be provided.

Sent: 30 September 2025 14:47
To: [redacted]
Subject: Astley Park Way

Hi [redacted]

You didn't miss much in those final minutes, but thought I'd sent a quick summary of my notes:

To note on the site walkaround, no particular high risk dust sources of concern at this point in construction. The earth mounds around the boundary are mostly compact and vegetated. One mound that is currently being added to will be compacted with priority after our suggestion. This should minimise wind whipping of loose materials on the mound to the adjacent residential. No visual evidence of any dusts settled in the residential areas beyond the boundary, site was well dampened and trackout minimal. Aggregate piles are mostly stones, so not highly dust generating. I did notice one sand aggregate pile near the office that was in use for concrete mixing. I have advised that all fine particulate aggregates and other similar stocks are covered with sheeting. This was agreed.

In the site office, evidence of daily visual inspections and PM10 monitoring was shown. Done three times a day, morning, midday, and afternoon. The Dust Management Plan was shown to us. All other logs as per the CEMP are being kept and updated. I gave over a copy of the IAQM Risk Assessment recommendations (taken from the applicants AQ assessment), and highlighted that most measures are being undertaken on site where practical. We discussed that the site have incorporated measures to control AQ and dust beyond and addition to those in the CEMP – e.g the PM10 monitoring. Advised that the IAQM RA is reviewed and all measures that are being used on site are inserted into the CEMP as a revision of the live document via condition discharge. This will evidence what measures are in place and be more transparent. Discussion of hours of work beyond the recommended in the CEMP, details given, but a decision for yourselves at planning.

Otherwise, there are no further measures I can advise at this time, as the measures given in the IAQM RA is being adhered to. I would say that the majority of higher risk works have been complete now that the development is majority complete. It is more a case of keeping on top of the measures in place, stepping up control measures where applicable, when direct/detailed complaints are received, and being vigilant during the remaining earthworks and concreting.

If you need any other guidance, please let me know.

Many Thanks

C051
CONSTRUCTION ENVIRONMENTAL MANAGEMENT PLAN

Astley
Wigan

Accepted by HSEQ Representative:

Name: [redacted]

Date: 04/10/24

Revision No.	Details of Revision	Date
0	Original submission to Client	04/10/24
1	Amendments to suit comments	14/11/24
2	Minor amendments	30/09/25

1. INTRODUCTION

1.1 General

TanRo have been instructed on behalf of Knight Webb to prepare a Construction Environmental Management Plan (CEMP) in relation to the enabling works at Astley Business Park, Wigan near Greater Manchester ('the site'). The CEMP is accompanied by a comprehensive suite of specialist supporting documents.

1.2 Purpose

The purpose of the CEMP is to.

- Identify the stakeholder's requirements
- Ensure that the development is compliant with current environmental legislation
- Effectively minimize any potential adverse environmental effects during construction.
- Describe procedures and controls required

2. SCOPE OF WORK

2.1 Location

The site is located within an urban development with Bolton to the North, Wigan to the West, agricultural land to the South and Manchester to the East. The site boundary to the South by Chaddock Lane and Applewood Farm, a school to the North and residential property from East to West.

Planning Application under Wigan Council, with permission Ref: A/23/96226/MAJOR on 1st November 2023, for warehousing (Use Class B2/B8), including carpark and service yards, internal access roads diversion of footpaths ref: 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and engineering, infrastructure and landscape works.

2.2 Description of the Works

The Enabling Works will consist of

- Site Establishment & Fencing
- Footpath Closures
- Tree Removal
- Grouting
- Topsoil Strip
- Cut and Fill
- Stabilisation and Aggregate Deposition
- Creation of a temporary site access
- Provision of appropriate welfare facilities for the duration of the works.

2.3 Construction Program

It is expected that the enabling works will be commencing January 2025, earthworks commencing in February 2025 and planned completion February 2026

2.4 Equipment and Plant

It is expected that the following plant and equipment will be used

- Grouting Drill & Rig
- Telehandler
- Excavators
- Dozers
- Rollers
- Dump Trucks
- Sweepers
- 18t Tipper lorries
- Stabilization Machinery

3. ENVIRONMENTAL MANAGEMENT FRAMEWORK

3.1 Environmental Policy

The enabling works will be carried out in accordance with:

- The environmental recommendations of the Ground Investigation Reports & Restrictions
- The Designer's Environmental Policies and Procedures
- During the pre-construction and construction phases, management of the project will also apply with the TanRo Environmental & Sustainably policy

3.2 Environmental Aspects and Impacts

Objects and Targets

Environmental objectives for the Enabling Phase will be developed to meet legal compliance and environmental good practice.

These will include

- Zero pollution incident
- Minimise waste sent to landfill
- Minimise disruption to residents, local authority, stakeholders etc.

Prevention of dust (Refer to section 6.14)

During dry weather, where the ground is dry, a damping down regime will be in place.

Site stockpiles to be left with overgrowth for as long as possible, beds to be prepared for planting just in time.

Cleanliness of Roads

The tyres and underbodies of lorries will be checked and cleaned using the jet wash at the entrance and as necessary before leaving site. A road sweeper will be on site as necessary to maintain and clean the roads.

Reduction of Noise (Refer to section 6.6 & 6.7)

All machines used will be modern where the reduction of noise has been an element of their design. Operatives will be instructed to keep noise down to a minimum the playing of radios will not be allowed.

4. STRUCTURE & RESPONSIBILITIES

4.1 Roles and Responsibilities

Role	Responsibilities
Contracts/Construction Manager	Responsible for planning and the management of the Enabling & Construction Phases. Has overall responsibility for the environmental performance of the project. Compliance with environment legislation, consents, objectives, targets and other environment commitments.
Site Manager	Responsible for implementing the Site Waste Management during the Construction Phase to ensure waste is disposed of legally, economically, and safely
Site Staff	To receive general environmental awareness training and undertake work in accordance with Method Statement Briefings and Toolbox Talks. Trained personnel to manage tasks such as refueling plant, managing the stores, and managing the segregation and collecting of waste.
Client's Clerk of Works	To ensure that the Contractor complies with all the relevant legal requirements, commitments and targets agreed for the scheme.
Designers	To provide information relevant to construction and that may assist the Contractor to manage environmental aspect of the scheme.

4.2 Training Awareness and Competence

The site staff will be competent to perform tasks that have the potential to cause a significant environmental impact. Competence is defined in terms of appropriate education, training, and experience.
Project specific training will be provided.

Environmental awareness and training will consist of:

- Site induction, including relevant environmental issues.
- Environmental posters and site notices
- Method statement and risk assessment briefings
- Toolbox talks, including instruction on incident response procedures
- Key project specific environments issues briefings.

All Managers and Supervisors to be briefed on the CEMP

4.3 Communications

The CEMP will be shared with the Local Authority and the Environment Agency prior to commencement of the enabling works informing them of the contact details and procedures relating to the environmental issues.

In addition to this, the CEMP will be distributed to the project team, including sub-contractors, to ensure the environmental requirements are communicated effectively.

During all Phases, internal communications will include regular progress meetings, which shall include:

- Training undertaken
- Progress reports
- Inspections, audits, and non-conformance
- Complaints received
- Visit by external bodies and the outcome or feedback from such bodies
- Objective / target achievement, including reporting on environmental performance.

4.4 Complaints, Compliments, and Inquiries

The Client's Project Manager will be made aware of complaints or information requests and will be logged properly. The community liaison officer will investigate and feedback on all complaints.

Working hours, plant types, construction methods and noise mitigation measures will be planned and arranged to limit the possibilities of such complaints.

4.5 Checking

Environmental monitoring will be undertaken to ensure continuing good performance is achieved. Feedback to be fed into the CEMP to evaluate the environmental effects of the enabling works phase. All inspections and investigations to be recorded and documented in the CEMP.

4.6 Evaluation of Competence

Divining procedures for regular site surveillance to evaluate performance against legal requirements and the requirements of the CEMP will be carried out by the Safety, Health and Environmental Officer on a regular basis.

4.7 Non-conformance and Corrective / Preventative Action

Procedures for addressing non-conformance and corrective actions shall include.

- A Non-Conformance Report to be raised to record any environmental incident
- A Corrective Action Report where deficiencies are identified.
- Any actions required to be taken, including a specific time scale for it to be closed out.

4.8 Control of Records

Environmental records, including waste management records, will be maintained in electronic format. Produced in such a way that they are readily identified and retrievable.

4.9 Management Review

The outputs from the 'Checking' procedure will be reviewed on an on-going basis at progress meetings to ensure continual improvement.

Review of the CEMP will be carried out at each project phase and where changes are made that affect the scope of the works to ensure its continuing relevance and accuracy.

5. LEGAL AND OTHER REQUIREMENTS

5.1 Legislation

The appropriate legislation and good practice will be adhered to.

5.2 Consents & Licenses

The following environment consents to be obtained to enable the works to be carried out

Legislation	License / Permission Requirements
Planning Act 2008	Consent for the scheme Any requirements attached to the consent will be adhered to.
Control of Pollution Act 1974	Prior consent required from the Local Authority to allow the works to be carried out.

6. OPERATIONAL CONTROL PROCEDURES

See attached

- *Wordsworth RAMS and Environmental Mitigation Measures*

The following arrangements will be put in place and developed, as necessary.

6.1 Site Establishment

The site needs to be established by introducing temporary access points which have been designed to take articulated vehicles in and out of the site, using access road from Chaddock Lane.

6.2 Site Working Hours

Monday – Friday 08.00 – 18.00
Saturday 08.00 – 13.00
No working on Sundays or Bank Holidays

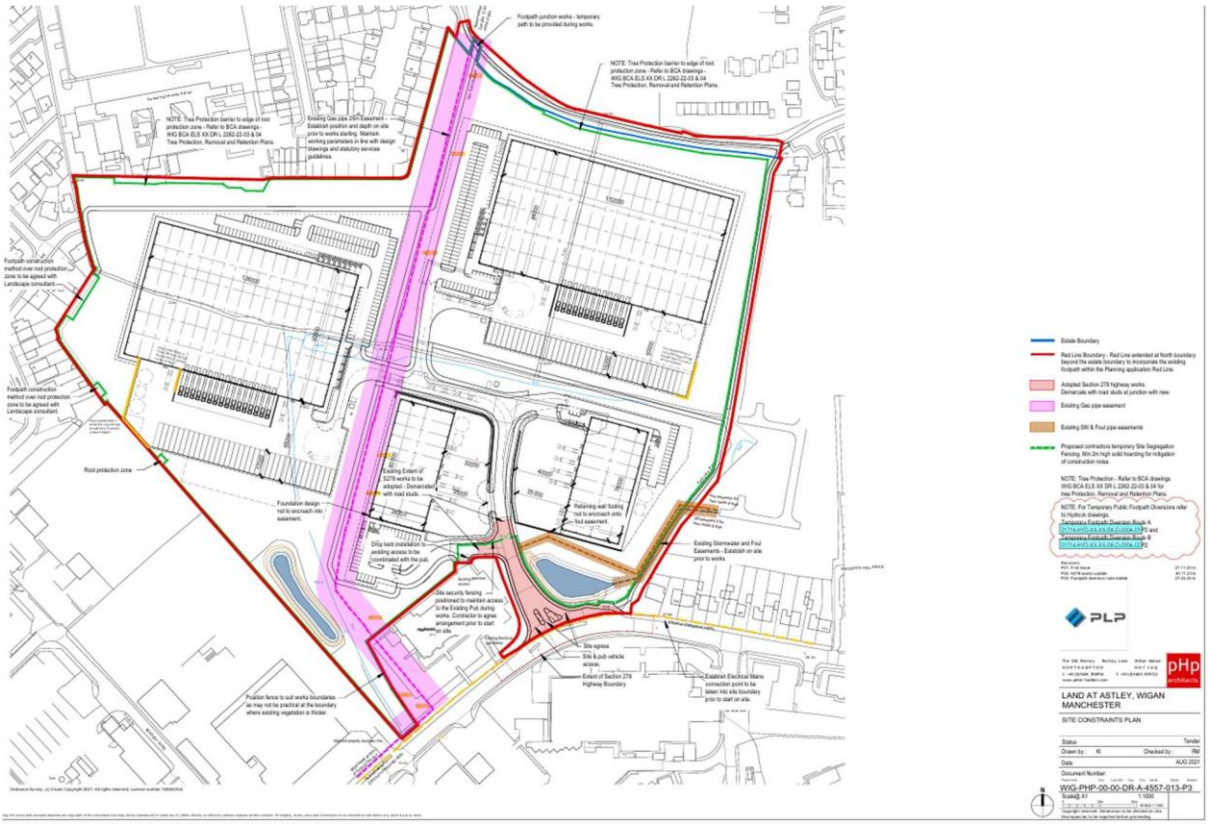
Due to a technical process works on the 14th Oct to 23rd Oct and on 11th Nov to 03rd Dec will extend beyond the standard working hours in the evening only. Works to be contained inside of the building only, 2-3 men maximum, no vehicle movements externally.

6.3 Site Delivery Not to Take Place Hours (inc removal of plant, equipment, machinery and waste) – local traffic avoidance

Monday – Saturday 08:00 – 09:00 & 15:00 - 16:00
Sunday None
Bank Holidays None

6.3.1 Site Delivery Vehicle Route

Site Access route for operatives, plant and heavy goods vehicle will be restricted to the most direct route from the East Lanks Road A580, Amans Worsley Indian roundabout turn-off – Chaddock Lane and Astley Park Way.



6.3 Boundary Fencing & Compound

Temporary or Permanent fencing will be placed all way around the perimeter of the site and compound. As shown below.

Site Boundary Treatment & Security Plan

In accordance with PHP's Drawing: ***Site Constraints Plan - WIG-PHP-00-00-DR-A-4557-013-P3***

6.5 Site Housekeeping

- No fires will be allowed on site
- Site housekeeping requirements will be included in the site induction and toolbox talks. A daily cleaning regime will be in place.
- Waste generated during the enabling works will be minimal and predominantly welfare waste, the excavated materials shall be reused within the general earthworks. Any requirement for removal of top soil from site (If required) will be under the requirements set out by CL:AIRE
- The Site material storage locations will change and evolve as the works progress

6.6 Noise

Works activities creating noise using guidance from assessment Ref: Tera Tech, Astley Business Park, Wigan – 784-B034505.

During the construction phase of the proposed development, noise levels are existing noise sensitive properties would be within the BS 5228 fixed limit criteria.

Therefore it s considered the development is below the *Lowest Observed Adverse Effect Level (LOAEL).*

Noise plant activity hours:
Monday – Friday: 08.00 – 18.00
Saturday – 08.00 – 13.00

Noise to be kept to a minimum by:

- The use of modern machinery that is regularly serviced.
- Instruction to operatives not to shout
- Not allowing loud radios to be played

Noise

- To ensure the previously described environmental impacts are kept to a minimum the following control measures will be implemented for the duration of the project:
- Ensure all site operatives are issued with PPE, including ear defenders
- All breaking of underground obstructions will use 'quiet' hydraulic powered demolition breaker attachments.
- Where possible loading operations will be at times to avoid rush hour periods. All loading operations will be attended by a banks man. Where possible loading will be coordinated with local
- businesses to minimise impact.
- Loading of materials, crushing, and screening to be done from within the center of the site maximizing the distance from neighboring properties.
- Each section of the project will be planned to ensure all noisy working requirements are identified along with the timescales so such information can be advised to all concerned parties. There will be no site working during any anti-social hours.
- Consideration will be given to all adjoining neighbours.

- The use of fully serviced plant with fully operational exhaust systems
- Ensuring all plant engine covers are kept always closed
- All site plant not in use will be shut down and not left idling on site
- All provided site generator plant will be of the new 'whisper' operational type
- The shouting out of instructions on site will be strictly forbidden, all site management and supervisors will be issued with site communication radios / mobile phones

- There will be no noisy working during any 'anti-social' hours or hours determined by the contract or in liaison with the local business and residential communities.
- The playing of radios etc. on site will be strictly forbidden at all times
- The sounding of vehicle hooters on site or in any adjacent street will be strictly forbidden at all times.
- All vehicle alarms are to be at audible levels so that all site personnel are aware of the vehicles.
- No commercial vehicles will be allowed to park in the adjacent streets waiting for access to the site, particularly with engines left 'ticking over'.
- All delivery and collection lorries to be in contact with the Site Team to know that they can gain immediate access to and from site so as not to congest the roads surrounding the site.
- All plant and lorry deliveries and collections in to and off site to be under the supervision of a Traffic Marshall
- Where possible all site plant will be effectively silenced and located in such areas of the site to cause the minimum amount of noise migration to areas beyond the site boundary.
- Maximum noise generation levels will be determined for each major item of plant from such information as supplied by manufacturers or company noise monitoring records. This will enable the potential level of noise generation to be anticipated.
- There will be no site activities or plant engines started or lorry movements to and from the site made before 7.30am and not after 6pm.
- All plant deliveries and collections plus all waste management requirements will be coordinated to ensure the noise impact from all such vehicle's movements on the community is kept to a minimum and is within agreed times.
- risk assessment in accordance with the latest Institute of AQM document 'Guidance on the assessment of dust from demolition and construction - 2014') and vibration impacts

6.7 Noise & Vibration

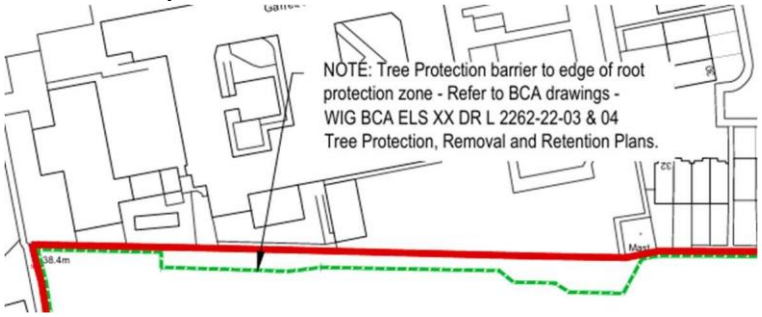
Every attempt will be made to keep exposure levels to a minimum.
Where levels exceed the lower level, every attempt will be made to reduce.
The higher exposure levels will not be exceeded.

VIBRATION

- All operatives should be informed of the hazards & instructed on the required safe systems of work & control measures.
- All operatives provided with appropriate PPE and trained in its correct use.
- All operatives informed of the potential irreversible damage caused by high exposure to vibration
- Ensure adequate supervision is provided & control measures remain valid for the duration of the works.
- Ensure appropriate PPE is made available to all staff, incl. gloves & warm clothing
- Consider health surveillance measures is staff are regularly exposed to excessive vibration
- When selecting plant, tools and other equipment consider low vibration variations. i.e.: compare various models & suppliers
- Ensure all plant and vehicles have adequate cushioning on their seats.
- Limit operatives expose to vibration – rotate staff so no person spends excessive amount of time exposed to vibration.
- Ensure all plant & tools are properly maintained to help reduce the vibration levels,
- Faulty equipment to be taken out of service & replaced with more appropriate equipment.
- Choose excavator-mounted pecker instead of hand-held breaker's if possible.
- risk assessment in accordance with the latest Institute of AQM document 'Guidance on the assessment of dust from demolition and construction - 2014') and vibration impacts

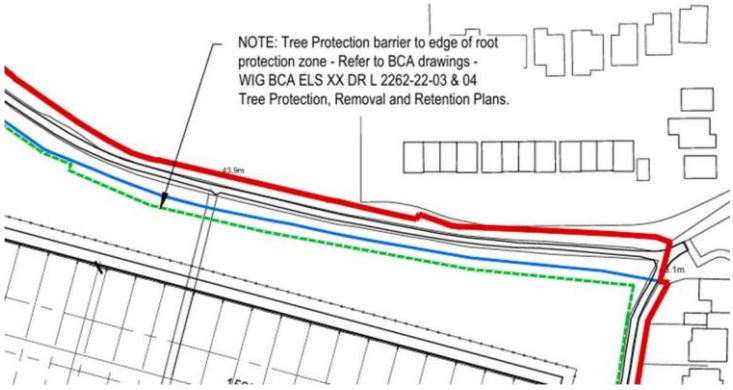
- Use alternative work methods that eliminate or reduce exposure to vibration.
- Consider staff rotation for heavy use of vibrating Rollers, if this is not possible operatives must have regular breaks to limit exposure.
- Provide suitable warm welfare facilities & encourage works to take regular breaks ensure they keep warm to aid circulation.

6.8 Archaeology



N/A

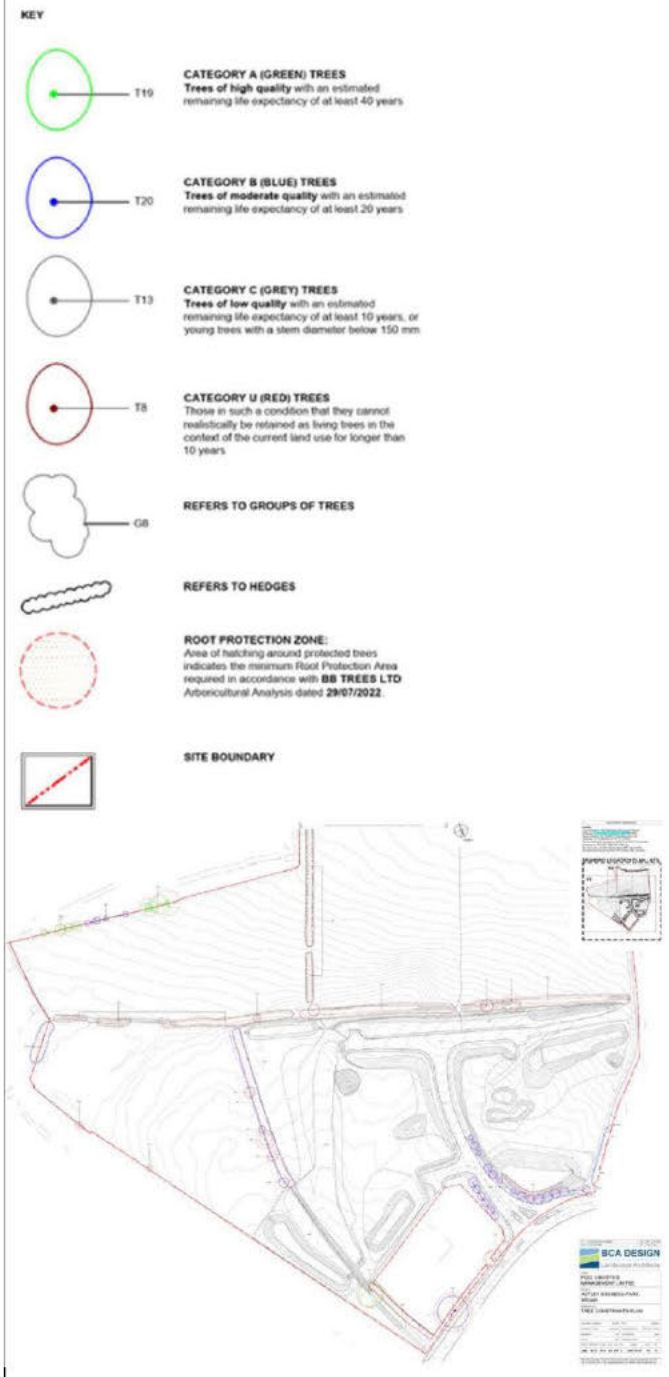
6.9 Trees – Construction Design



All Planning conditions, recommendations, fencing, no dig zones etc. to be clearly communicated to the entire team.

Protection accordance with PHP's Drawing: ***Site Constraints Plan - WIG-PHP-00-00-DR-A-4557-013-P3***

Zone to North/ West



Zone to North/ East

6.8 Trees – Temporary Protection

The Tree protection plan as landscape architect BCA Design drawing: **Tree Constraints Plan 2262-22-01-Rev 01**, highlights tree and root protection areas in the key:

The RPA for the retained trees will set out on site and a fence will be erected to prevent any accidental access and potential damage to the trees. The fence will be erected in accordance with BS5837 and consist of Heras panels and either poles driven in if beyond the RPA or will have legs braced back in towards the trees.

6.10 Contaminated Land

No contaminated ground is to leave site.
Contaminated land will be excavated & stored, until the inert material has been removed, then backfilled and buried and sealed.

6.11 Waste

The anticipated wastes will be:

- Inert & Non-hazardous from excavations
- Limited amount from drainage
- Grout & Concrete > provision made to use in backfill
- Blocks and mortar > provision made to use in backfill
- Canteen > Skip

Skips will be clearly labelled on site to segregate waste products

6.12 Materials

Materials used on the project will be:

- Cement
- Lime
- Drainage Materials
- MOT Type 1 Aggregate
- Asphalt

6.13 Transport

Wherever practical, Contractors and materials will be locally sourced.

Staff parking is referenced and detailed in section 6.3. At peak times there will be 80 staff/operatives arriving between 07:00 to 08:00 and leaving between 17:30 and 18:00
HGV movements will be minimal during the initial earthworks as we will be self-contained other than deliveries for welfare servicing and diesel (once a week). During import of aggregates and lime there will be 30 each way a day. During the topsoil movement from site there will be 50 each way a day.

6.14 Air Quality / Dust Control

The emissions to the air including dust and exhaust fumes can be caused by:

- Earthworks / excavations / demolitions
- Use of diesel-powered plant and equipment

Best practices will be observed.

Practical measures will be:

- The sheeting of vehicles carrying loose materials
- The compound and welfare facilities are to be set on hard ground
- Water bowsers / sprays will be used when the ground becomes dry
- Limit possible dusty tasks when windy
- No fires on site
- Compliance by construction vehicles with emission legislation, servicing, and MOT requirements
- No construction plant to be left idling when not in use
- Handheld dust monitoring to take place as described in the Dust Management Plan appended
- Visual dust monitoring to take place
- All cutting to have integrated water suppression capability
- Materials of a dusty nature to be covered

Mud & Dust Control Measures

- Whilst carrying out any crushing and screening activities we will control dust emissions at the rear of the property with a Diesel pressure washer – such as the 'Brendon 30KLM+Es' (see separate specification sheet).
- The equipment will be fed by a 1000 litre water bowser or IBC which we be filled using the mains supply water at the start of each working day and refilled as necessary.

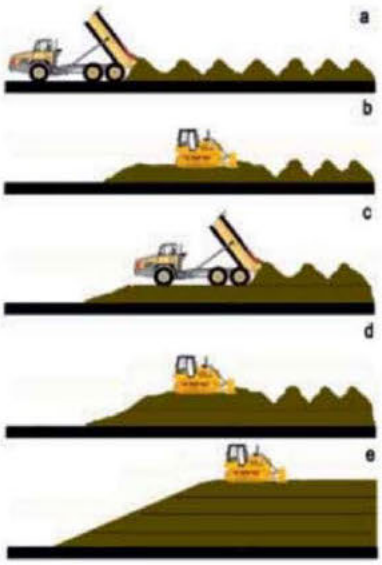
- Dust emissions will be monitored periodically throughout the day by our site supervisor and control measures altered whenever necessary.
- All tipper lorries removing potentially dusty materials, such as brick rubble will be sheeted prior to leaving site.
- All delivery vehicles will keep to the concrete / tarmac hard-standing areas which will be kept clear of debris by jet washing and with the use of a road sweeper.

- Vehicle tyres / tracks will be inspected prior to leaving site and if required cleaned using the jet wash
- Stockpiles will also be monitored for dust emissions and if required damped down

- Above all, the site will be always kept as clean and tidy as possible. This will include the regular removal of rubble stockpiles and regular loading and exchanging of skips.
- If any mud is taken off site, it will be cleaned up immediately by men on site with shovels and sweeping brushes and as a last resort, if necessary, a road sweeper will be employed.

6.15 Soils & Topsoils

See attached Ground Investigation & final Geo-environmental Assessments for reference



- Comprehensive survey, prior to the works of the soils and soil types present on site, in order to quantify material types and plan their use and handling.
- Contaminated soils stockpiled and buried after removal of inert soils.
- Inert soils removed from site and taken as fill to other sites in the locality.
- Topsoil Stockpiles will be in accordance with The Construction Code of Practice for the sustainable use of soils on construction sites (DEFRA). Generally, the stockpiles will be 3m high and no more than 4m high to minimise the effects of the soil becoming anaerobic.
- Stockpile locations shall be agreed with TanRo site management prior to formation.
- Stockpiles shall be formed as per below:

Soil stockpiling

Soil should be stored in an area of the site where it can be left undisturbed and will not interfere with site operations. Ground to be used for storing the topsoil should be cleared of vegetation and any waste arising from the development (e.g. building rubble and fill materials). Topsoil should first be stripped from any land to be used for storing subsoil.

Method 1 – Dry non-plastic soils

The soil is loose-tipped in heaps from a dump truck (a), starting at the furthest point in the storage area and working back toward the access point. When the entire storage area has been filled with heaps, a tracked machine (excavator or dozer) levels them (b) and firms the surface in order for a second layer of heaps to be tipped. This sequence is repeated (c & d) until the stockpile reaches its planned height. To help shed rainwater and prevent ponding and infiltration a tracked machine compacts and re-grades the sides and top of the stockpile (e) to form a smooth gradient.

6.16 Materials Management Plan

If required a materials Management Plan will be developed for the project in accordance with the Development Industry Code of Practice published by CL:AIRE. In Summary the MMP will:

- Be produced prior to excavation.
- Will contain details of the parties that will be involved with the implementation of the MMP;
- Will contain descriptions of the materials in terms of potential use and relative quantities of each category
- The specification for use of materials against which proposed materials will be assessed, underpinned by an appropriate risk assessment related to the place where they are to be used if required.
- Details of where and, if appropriate, how these materials will be stored
- Details of the intended final destination and use of these materials

- Details of how these materials are to be tracked
- Contingency arrangements that must be put in place prior to movement of these materials
- Verification Plan

6.16 Energy

In line with the UK Energy Efficiency Action Plan, energy efficiency measures and greener energy sources will be considered and implemented where possible.

- Energy consumption will be minimized, and energy used during construction monitored.
- Construction plant will be maintained to maximum fuel efficiency.
- Utilize energy from renewable sources where practical
- Workforce travel will be minimized by using local contractors and encourage the use of collective transport instead of individual cars.

7. OUTLINE POLLUTION CONTROL AND CONTINGENCY PLAN

7.1 General

A pollution control and contingency plan will be developed to provide details of the measures to be implemented in the event of an environmental incident or emergency

7.2 Pollutants

The possible pollutants to be considered will be:

- Silt
- Cement and concrete
- Oils and fuels
- Waste materials
- Wastewater from site accommodation
- Dust
- Noise
- Contaminated ground
- Vibration
- Light

7.3 Fuel and Oil Handling

All fuel and oil will be stored in accordance with the Control of Pollution Regulations 2001 and will be handled in such a way that risk of pollution is minimized, this will include:

- Fuel and oil storage tanks that will be locked when not in use.
- Storage areas will not be within 10m of a watercourse or highway gulley.
- Mobile bowsers will be bunded.
- Drums will be stored in bunded areas.
- Drums will be maintained in good condition.
- Only trained operatives will carry out refueling.
- Plan will regularly be checked for leaks and will be regularly maintained.
- Spill kits will be provided within close proximity to oil and fuel storage areas and operatives to be trained in their use.

7.4 Maintenance of Plant

Any maintenance of plant will be carried out no closer than 10m from any watercourse or road gulley.

Any plant considered to be a pollution risk will be either be repaired or removed from site.

7.5 Notification Procedures

Procedures for reporting any spillage or pollution will be set out.

The procedures will include recording all incidents in the project process report and providing details to the Client's representative.

Contact details will include:

- PC Operations Manager
- PC Construction Manager
- Client's Project Manager
- Fire, Police, Ambulance > 999
- Environment Agency > 0800 80 70 60

7.6 Water Management

Procedures for water management will be set out in the Site Water management Plan prior to commencement on site.

The procedures will include how uncontrolled run off will be prevented from entering the watercourse risking contamination of silt laden water. These control measures will be (not limited to)

- Installation of permanent ponds and swales
- Temporary V Ditches
- Installation of temporary land drains.
- Bunding of site boundary to trap any runoff in front of the river.
- Use of silt mats

7.7 Asbestos Discovery Plan

The site investigation does not indicate that any asbestos has been found while carrying out the testing.

However, notwithstanding this, if any suspect material is found during the course of the works, work is to stop immediately, and the find reported to the site management. The area should be fenced off and expert confirmation sought.

7.8 Site Lighting

The site lighting for construction works will be in accordance with the site working hours.
Security lighting in association with welfare will be PIR operated only coming of when sensing movement in case of intruders for security
Temp plighting to buildings for operative access and works will be switched in accordance with the site working hours.

8. HANDOVER ENVIRONMENTAL MANAGEMENT PLAN

8.1 Requirements

The CEMP being a live document that will consider further development / maintenance implications of the design to other phases of the project.

Mitigation measures – Earth Works

Install hard standing early where possible – Our aim is to get the hardstanding to the external areas in as quickly as possible. Our first task on site is to get the permanent access road tarmac in and use this to gain access to the site. Once we have the tarmac in this gives us a maintainable surface to which we can reduce the dust omitted.

Clean regularly, jetwash – Once the tarmac road has been installed we can regularly setup roadsweeper to maintain and clean the road. If necessary, we will setup a jetwash at the exit gate to clean the wheel s of vehicles as they leave site. We don't envisage a jetwash neing required.

Plan route away from vehicle's schools – As part of the planning for the site the main route into the plot is situated away from the site boundaries with the vehicle's/ school. The benefit of this to us during the construction process is that the disruption caused as vehicles enter and leave site is kept to a minimum.

Machines to be turned off when not in use – signs required – When site equipment is not in use the drivers have been instructed to switch off engines and not left in idle to reduce the emissions/ noise.

Tractor bowser to be used during earth works – During the early earthworks package there will be various machines moving/ modelling the ground to enable the superstructure to commence. During this period where ground becomes dry and dust generated, we will look to utilise a tractor with a water bowser to ensure the ground is kept damp and avoid unnecessary dust.

Powdered materials to be appropriately stored – There will be a need to store some powdered materials on site. We will ensure that these are transported to site correctly and stored correctly in the appropriate manner.

Install bunds to protect neighbours from dust – As part of the final scheme for the project we are to install topsoil planted bunds to the perimeter of the site where we back onto residents. Our plan is to get these works installed early to act as a barrier from a noise and dust point of view.

Top soil bunds planted / capped – We would look to plant/ cap the bunds early to prevent the spread of dust from these to the residents.

Stabilise ground to areas ASAP – When carrying out the earth works our aim to complete the cement stabilisation as early as possible to reduce the amounts of dust becoming airborne.

Mitigation measures – Construction

Dampen down – On days where the ground is particularly dry we will look dampen down areas to reduce the amount or airborne dust.

Vehicle wheel wash - We will have a gateman on site who will assess the state of a vehicles wheels as they leave site. He will have a jetwash on hand to clean the wheels as required.

Restrict/ plan deliveries to a minimum – During the planning phase of the build and throughout we will look to reduce the amount of deliveries entering and leaving site. This in turn will reduce the amount of emissions being produced and reduce the amount of dust being generated around the site.

Generator set away from Boundary – We are looking to utilise a permanent hardwired electrical connection during the construction phase. The benefit of this is that emisisons, noise and fumes are reduced as the alternative is a generator. For a short period of time during the early stages oof the project there will be a requirement for a generator whilst the permnent connection is processed. During this time the generator will be situated away from the site boundary, regularly maintained and turned off when not in use.

Lower speed limits – Site speed limits are set low with the aim to reduce the amount of dust being produced as site vehicles travel around the site.

Deliveries covered when entering/ leaving site – All deliveries carrying dusty materials entering/ leaving site are required to be covered. Only once the material is ready to tip is the cover taken off and dispersed. We will look to where possible avoid tipping of materials near the site boundaries and where possible look to dampen down material as it is tipped.

Waste from skips to be removed ASAP – During the construction phases we will look to remove skips from site at our earliest conveniance. This will prevent waste and dust being spread should the conditions turn windy.

Enclosed skip to be used – Where possible we will look to utilise enclosed skips to house waste on site. These will also be located away from the site boundary.

Proprietry hepa filtered vacuums installed to joinery and sanding machines internally - During the fit out phase woodworking/ sanding machines will be fitted with hepa filtered dust extractors to reduce the amount of dust emitted into the air.

Site notice board with information of who to speak to in event of a complaint – At the entrance to site we have a notice board informing visitors/ locals of our current/ planned works. Also, here we have details of who they need to contact in the event of a complaint to the site.

Delivery Focused
Main Contracting

Monitoring

As part of our daily checks we will monitor the noise and dust emissions form site. Where we deem there may be an issue we will carry out Dust and Noise monitoring. The results of which will be recorded and laid out within this plan

Delivery Focused
Main Contracting

Current Action

We will include evidence of the dust control measures we are implementing on site.

Delivery Focused

LE65 2AB

02/10/2025 – RB-L-002

REF Astley Business Park Project – C051

For the attention of Wigan Council Planning Department

On 14/10/25 to 23/10/25 and 11/11/25 to 03/12/25 the internal structural slabs are programmed for placement following completion of the cladding envelope. Once poured, the concrete must be allowed to progress through its curing cycle before mechanical finishing can commence. The precise timing of this window cannot be predetermined as it is dependent on multiple variables, including:

- Concrete mix design and curing characteristics.
- Ambient and substrate temperatures.
- Humidity and curing conditions.

As a result, power floating operations frequently extend into the evening. Interruption or delay at this stage would compromise surface tolerances, durability, and load-bearing performance, likely leading to non-compliance with design and industry specifications. This request is made solely out of necessity and to ensure a durable and compliant slab.

We are aware of the current sensitivity surrounding out of hours working on this project and that you are managing a high volume of enquiries and comments. To minimise disruption to residents while ensuring technical compliance and following several internal meetings reviewing any mitigation measures possible the following control measures will be implemented:

- Limiting activities strictly to the power floating process, no additional works will be undertaken.
- Works to be contained inside the units only, no external works to take place.
- Gates to be locked at 18:00 and all vehicles to be removed, no movements outside of the buildings will be permitted.

Delivery Focused Main Contracting

Unit N, Ivanhoe Business Park
Ashby De La Zouch
Leicester
England
LE65 2AB

- Restricting the workforce and equipment on site to the minimum required to achieve the necessary finish. 1-3 operatives maximum.
- Using acoustically suppressed machinery where practicable.
- Shielding task lighting to prevent light spill through external windows / doors & beyond the site boundary.
- Soundproofing to the pedestrian doors to the warehouse using “BIGBEN Sound Blocker acoustic barrier 1.2mx2m”
- A review of the concrete mix is currently ongoing to look for ways to reduce curing times.
- A review of the pour sizes has been completed to limit the disruption.
- Acceleration of works to reduce the duration.

We therefore respectfully request approval for a dispensation to extend working hours for this operation. We remain committed to liaising with you throughout and to implementing all practicable mitigation measures to limit the environmental impact.

Astley Business Park

Hi

For your records, please find attached a copy of the final response I am issuing now. [redacted] I have copied you in, just in case this prompts any contact with your team.

I am on leave tomorrow, but if anything comes in response to this tomorrow, I have asked my colleague [redacted] to make you aware of this.

Kind regards

[redacted]

Dear [redacted]

Stage 2 Complaint

I write in response to your complaint which has been escalated to Stage 2 of the Council's Complaints Procedure.

I have been asked to investigate your complaint and my role as investigating officer is to determine whether your Stage 1 complaint was investigated thoroughly, objectively and honestly, the conclusions reached were based on evidence obtained and the response was reasonable, appropriate and tried to achieve a resolution.

Background

On 7 August 2025, you raised a formal complaint concerning the PLP Construction site in Astley and the planning process. You advised that you had received previous correspondence from the Council, but your questions had not been fully addressed. Key concerns raised related to planning and development process, environmental and health issues, and site management.

Your complaint was investigated at Stage 1 of the Council's Complaints Procedure and responded to on 18 August 2025 by David Proctor, Assistant Director, Planning and Regeneration. A response was provided to each of the concerns that you had raised. You were advised that no fault had been found on the part of the Council in its handling of your enquiries or the planning application in question.

Escalation to Stage 2 of the Council's Complaints Procedure

On 28 August 2025, you requested that your complaint be escalated to Stage 2 of the Council's Complaints Procedure, as you remained dissatisfied with the answers provided, and requested further clarification.

Stage 2 Complaint Investigation Outcome

Following my investigation, I am satisfied that your Stage 1 complaint was investigated thoroughly, and the response provided was appropriate. Therefore, your Stage 2 complaint is not upheld.

Stage 2 Complaint Findings

Please note that the purpose of a Stage 2 investigation is to assess whether the Stage 1 complaint was handled appropriately and whether the response provided was reasonable. It is not within the scope of the Council's complaints process to re-visit the planning considerations of an application that has been determined, or to overturn the decision. However, I have included observations and further clarification in response to the concerns you have raised.

On review of the Stage 1 complaint response letter, I am satisfied that the responses provided to each of the issues that you had raised were appropriate and reflected the Council's position. I am also satisfied that where relevant, you were advised that your concerns would be referred to the Council's Planning Enforcement team.

- Publicity of Planning Application

In both your Stage 1 and Stage 2 complaints, you question why consultation letters were only issued to 99 properties despite the development affecting more homes. At Stage 2, you also comment that residents were not informed of the new application.

I am satisfied that the matter was appropriately addressed in the Stage 1 response. Regarding the recent application (Ref: A/23/96226/MAJOR), you were informed that neighbour notification letters were issued to 99 properties in the vicinity of the site. In addition, two site notices were displayed, and a press notice was published. These actions were in compliance with statutory requirements and Wigan Council's Code of Practice for the publicity of planning applications. For major developments, the Council is required to publicise the application via a press notice and either a site notice or neighbour notification. Where neighbour notification is used, the Council is only required to notify properties that are directly adjacent to the development site.

A significant proportion of occupants of those properties commented on the application, but in addition comments were received from multiple other addresses, demonstrating that there was broader public awareness of the application.

- Planning Process and Approval

In your initial complaint you asked why the industrial units had only been built after the houses had been built and sold, if planning permission was already in place. You also questioned why units of this size were allowed to be built in this area when the original plans had been for smaller units and offices.

I am satisfied that the situation was explained at Stage 1, regarding the outline planning permission that had been granted and the land designation. The original application was an outline application with all detailed matters reserved for future determination. The recent application was a full planning application, setting out the detailed proposals for the development.

In your Stage 2 complaint, you question if the Council was aware of the houses surrounding the site and raise concerns regarding the size of the units and the proximity to the houses surrounding the site. At Stage 1, you were advised that the Council's assessment of the proposal was carried out in full cognisance of the proximity of housing around the site. The report to Planning Committee referenced the residential areas surrounding the site, and the impact on the amenity of residents was considered. It was acknowledged that the proposed development would impact on the existing level of amenity experienced by local residents.

In your Stage 1 and Stage 2 complaint you have raised concerns that the planning application was approved, when a significant number of comments and objections had been submitted. In your Stage 2 complaint you comment that not one objection from the public had been taken onboard.

I am satisfied that this was appropriately addressed in the Stage 1 response. The number of representations received is not a material planning consideration, and a planning application cannot be declined based on the number received. However, objections are taken into consideration when the application is being determined.

It is recognised that you are dissatisfied with the outcome of the planning decision. However, the process followed all statutory and good practice. The application has been assessed at Planning Committee, where material planning considerations were taken into account, including the impact on the amenity for residents. Representations received were summarised and considered in the report to Planning Committee, and Members had access to view the detailed objections received.

You enquired whether Members of the Planning Committee had visited the site. One of four criteria would usually have to be established for a site visit to take place. These are set out in the Council's Constitution. There must therefore be a positive reason why a site visit should be held, rather than the default position being there will be a site visit unless there are reasons not to hold one. No member proposed a site visit. If they had, and it was seconded, the Committee would then vote on the proposal with the majority view determining the issue. It is not for officers to advise the Chair of the Committee to recommend a site visit, but any member of Committee can propose one as set out above. Officers can propose a site visit for extremely large strategic planning applications, for example town centre redevelopments or large sites released from the Green Belt, however that was not the case here and officers were satisfied that the detailed report and presentation given to members allowed them to fully understand the nature of the development and members must also have been content that this was the case.

In your Stage 1 and Stage 2 complaint you raised concerns regarding the financial impact on properties. I am satisfied that the Stage 1 response explained that this was not a matter which could be taken into consideration when determining a planning application.

- Site Working Hours

In your original complaint, you reported that work was commencing on site from 07:30 and did not stop until 18:30. At Stage 1, it was confirmed that the approved Construction Environmental Management Plan restricts the working hours on site from 08:00 to 18:00 Monday to Friday, and 08:00 and 13:00 on Saturdays. You were advised that your

concerns would be forwarded to the Planning Enforcement Team. In your Stage 2 complaint, you commented that the work was still commencing before 08:00.

A site visit was undertaken by the Planning Enforcement Team and working hours were addressed with the developer. Going forward, if you observe work taking place outside of the permitted hours, you are encouraged to directly report this to the Planning Enforcement Team for further investigation, via the Council's website Enforcement and breaches.

- Bunds

In your initial complaint, you raised concerns that the bunds that had been installed were only 2 metres high, instead of 3 metres as required. At Stage 1 you were advised that this had been passed to the Planning Enforcement Team.

Please note that the site is currently under construction and works are ongoing. At this stage, there is no requirement for the developer to have completed the bunds to the approved height. However, arrangements will be made for a site visit to confirm the current position, and the developer will be advised accordingly based on the findings.

- Landscaping

At Stage 1 you raised concerns regarding the landscaping. You were advised that the details of the landscaping scheme were determined under a condition application

In your Stage 2 complaint, you highlight that it will take time for the landscaping to mature with the projections being over 15 years.

Landscaping works are ongoing and the approved scheme has not yet been completed. A variety of tree and shrub species are to be planted, including both semi-mature specimens and those selected for their ability to establish quickly and effectively. It is recognised that some trees will take time to mature and that the landscaping may not fully obscure the buildings, however, it is intended to soften and break up the overall appearance of the buildings.

- Dust

In your Stage 1 and Stage 2 complaints, you raised concerns regarding dust from the site and the impact on health. At Stage 1 it was acknowledged that there had been an issue with dust earlier in the summer, and concerns were dealt with by the Planning Enforcement Team and the developer put in place a number of measures to mitigate the impact which appeared to have resolved the issue. However, if you had any continuing concerns in this regard, you were advised to let the Planning Enforcement Team know.

Officers have attended the site following concerns being raised and are satisfied with the mitigation measures that are in place. No evidence of the spread of dust from the site has been found since the initial issue was identified.

Going forward, if you have evidence of unreasonable dust emissions from the site, then you are advised to report this to the Planning Enforcement Team.

- Planned Operating Hours

In both your Stage 1 and Stage 2 complaint you have raised concerns regarding the operating hours of the industrial units, and the impact on residents in terms of noise, light and air pollution. I am satisfied that this was addressed at Stage 1, when you were advised that the planning permission permits 24-hour use of the units and the impact of the operating hours was considered in the report presented to the Planning Committee. The development has been designed so that the units face into the site, so activities are focussed on the internal area of the site as opposed to the boundaries.

With regards to lighting, the development is required to adhere to the approved External Lighting Statement and Plan.

Going forward, once the development is complete and business operations commence, if there are concerns regarding excessive noise, light or air pollution, any consider these to potentially be a statutory nuisance, you can report this to the Council's Environmental Health Team for further investigation. Further information can be found on the Council's website at Environmental health for businesses.

If there are concerns regarding potential planning breaches, these can be reported to the Planning Enforcement Team.

Complaint Handling

I am satisfied that your Stage 1 complaint was investigated and responded to within the target 10 working day timeframe. I sincerely apologise for the delay in responding at Stage 2. To ensure that all complaints are appropriately investigated and responded to, it may not always be possible to respond within the target or extended deadlines. In such cases, holding letters are issued to keep complainants informed.

Local Government and Social Care Ombudsman

This is the final response to your complaint. If you are unhappy with the outcome, or the way in which your complaint has been handled, you may now complain to the Local Government and Social Care Ombudsman. The Ombudsman is not a further appeal. It looks at whether public bodies have followed the right steps when taking action or reaching a decision. The Ombudsman decides whether it can and should investigate complaints. For example, the Ombudsman may decide not to investigate your complaint if you have not been significantly personally affected by the issue you are raising. You can find out more information about what complaints the Ombudsman may consider on its **website**.

If you wish to raise your complaint with the Ombudsman you can find out more information about how to do so below:

- Website: **https://www.lgo.org.uk/how-to-complain**
- Telephone: 0300 061 0614.

Yours sincerely

Stage 2 Complaints Team

Wigan Council

Report to Planning Committee

Application number: A/23/96226/MAJOR

Speaking arrangements:

One speaker against for 4 minutes. One speaker in favour for 4 minutes.

Applicant: Astley Unit Trust.

Development Proposed: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths '014/145/10', '014/152/10', '014/154/10' and '014/159/10' and associated engineering, infrastructure and landscaping works.

Location: Land at Astley Park Way, Worsley.

Ward: Tyldesley and Mosley Common.

Site description

The application site relates to approximately 12.5 hectares of an existing Primary Employment Area (PEA), Chaddock Lane, and is part of an area known as Astley Business Park. The site is located to the north of the East Lancashire Road (A580). The site extends from the immediate rear of Applewood Farm Public House, northwards where it will lie adjacent with further areas of the Business Park to the west and existing residential areas to the north, north-west and east of the site.

The site is currently undeveloped and is dissected by a number of public footpaths. The site has areas of dense vegetation, especially in parts in the south-west.

A partly constructed internal access road is present leading from the south of the site, off Chaddock Lane, to its centre. This was constructed as part of the wider development approved under planning application reference 'A/15/81365/OUTMAJ' which is discussed in more detail in the following sections of this report.

The surrounding area has a mixture of uses, predominantly industrial and residential. The land to the south of Chaddock Lane and south-west of the site forms part of the PEA and consists of a range of industrial uses. The northern boundary of the site is demarcated by Garrett Lane which extends east to west. On the northern side of Garrett Lane, a large-scale residential development is situated and remains under construction at the present time. Other pockets of residential development are located along the eastern boundary of the site. Residential development also bounds the west and north-west boundaries of the site.

The site forms part of an outline planning permission granted in 2017 for a mixed-use development comprising employment floor space (use classes B1, B2 and B8), up to 165 residential dwellings along with associated infrastructure and landscaping (planning application reference 'A/15/81365/OUTMAJ'). The residential elements of the approved outline scheme received reserved matters approval under planning application references 'A/17/83910/RMMAJ' (62 no. dwellings) and 'A/19/87155/RMMAJ' (103 no. dwellings). These areas are located to the north and east of the application site and are now built out.

The area proposed for employment under this application replicates the development approved in 2017, however no application for reserved matters was applied for and the time for doing so has now lapsed, hence the need for this application to come forward in 'full' form.

The proposal

Planning permission is sought for the development of the site for warehousing units which would have planning use classes of B2 (general industrial) and B8 (storage and distribution). The proposed units will consist of four separate buildings totalling almost 33,000 square metres (sqm). Each unit will have ancillary office and reception space, parking and servicing areas. The wider scheme will also consist of the provision of internal road accessways, associated infrastructure and landscaping works.

The buildings will be laid out across the site, with the two larger buildings located to the north and west of the area and two smaller buildings located centrally and to the east of the site. The associated servicing and parking areas are located alongside each unit. The buildings will have a maximum height of 18.3 metres. As is typical of large-scale warehouses within these planning use classes, the buildings would be available for use 24 hours a day.

The proposed development includes a landscaping scheme which includes landscaped bunds running across the northern and eastern boundaries and also a section along the western boundary. New areas of hedges, trees and low planting area proposed within the centre of the site. Two existing attenuation ponds will be retained along part of the southern boundary of the site which will form part of the landscape and drainage strategy for the site.

The proposed development will result in the need to permanently divert four public footpaths. The proposal includes new 3 metre wide footpaths leading from Chaddock Lane through the site and connecting with bridleway routes that run adjacent to the site.

Vehicular access into the site will be from Astley Park Way, the aforementioned partially constructed access point (approved under the outline scheme reference 'A/15/81365/OUTMAJ' for the wider site). This will be progressed to provide an internal road network which leads directly to each of the proposed warehouse units and the associated car parking and servicing areas.

The following documents support the application and are available to view on the Council's website and at the request of the Local Planning Authority:

- Planning application form, notices and certificates.
- Location plan.

- Existing site plan.

- Transport Assessment

National and local planning policy and guidance context

Local Plan Allocation

- Primary Employment Area: Chaddock Lane.

  (Saved Wigan Replacement Unitary Development Plan Policy EM1A – Primary Employment Areas)

Relevant local and national planning policy and guidance

- National Planning Policy Framework (NPPF), revised 2023.

The NPPF sets out a presumption in favour of sustainable development. Paragraph 7 of the NPPF states that the objective of sustainable development can be summarised as meeting the needs of the present without compromising the ability of future generations to meet their own needs.

Paragraph 9 of the NPPF states that plans and decisions need to take local circumstances into account, so that they reflect the character, needs and opportunities of each area.

The NPPF re-iterates that planning law requires that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.

- National Planning Practice Guidance (NPPG), as amended.

- Wigan Local Plan Core Strategy (Core Strategy) Policies

SP1 - Spatial Strategy for Wigan Borough
SP4 - Broad locations for new development
CP7 - Accessibility
CP10 - Design
CP16 - Flooding
CP17 - Environmental protection
CP18 - Developer contributions

- Saved Wigan Replacement Unitary Development Plan (UDP) Policies

A1S - Parking in New Development
EM1A - Primary Employment Areas
EV1B - Pollution

- Places for Everyone (Formerly Greater Manchester Spatial Framework) Policies

Places for Everyone (PfE) is a joint Development Plan Document being produced by nine Greater Manchester districts (Bolton, Bury, Manchester, Oldham, Rochdale, Salford, Tameside, Trafford and Wigan). Once adopted, the PfE Plan will form a key component of each district's development plan alongside individual district Local Plans.

PfE has now been adopted, and in effect from 21 March 2024.

The following PFE policies are considered to be of relevance to the proposal:

- *Strategy*

Policy JP-Strat8: Wigan-Bolton Growth Corridor
Policy JP-Strat14: A Sustainable and Integrated Transport Network

- *Sustainable and Resilient Places*

Policy JP-S1 - Sustainable Development
Policy JP-S2 - Carbon and Energy
Policy JP-S3 - Heat and Energy Networks
Policy JP-S4 - Flood Risk and the Water Environment
Policy JP-S5 - Clean Air
Policy JP-S6 - Resource Efficiency

- *Places for Jobs*

Policy JP-J1 - Supporting Long-Term Economic Growth
Policy JP-J2 – Employment Sites and Premises
Policy JP-J4 – Industry and Warehousing Development

- *Greener Places*

Policy JP-G1 - Landscape Character
Policy JP-G7 - Trees and Woodlands (2 for 1 replacement or other net enhancement)
Policy JP-G8 - A Net Enhancement of Biodiversity and Geodiversity (min. 10%)

- *Places for People*

Policy JP-P1 - Sustainable Places
Policy JP-P2 - Heritage
Policy JP-P5 - Education, Skills and Knowledge
Policy JP-P6 - Health
Policy JP-P7 - Sport and Recreation

- *Connected Places*

Policy JP-C1 - An Integrated Network (accessibility hierarchy)
Policy JP-C2 - Digital Connectivity
Policy JP-C3 - Public Transport
Policy JP-C4 - The Strategic Road Network (added)
Policy JP-C5 - Streets for All
Policy JP-C6 - Walking and Cycling
Policy JP-C7 – Freight and Logistics
Policy JP-C8 - Transport Requirements of New Development

- Access for All (2006)
- Policy Note: Car Parking Standards for New Development

Previous relevant planning decisions

Application reference A/19/87155/RMMAJ - Reserved matters application for A/15/81365/OUTMAJ seeking approval of appearance, landscaping, layout and scale for 103 dwellings and associated infrastructure. Approved September 2019.

Application reference A/17/83910/RMMAJ - Reserved matters for A/15/81365/OUTMAJ for residential development seeking approval of appearance, landscaping, layout and scale for 62 dwellings. Approved September 2017.

Application reference A/15/81365/OUTMAJ - Outline application for a mixed-use development comprising up to 28,000 SQM of employment floor space (use classes B1, B2 and B8), up to 165 dwellings, land for community use, open space, landscaping and association infrastructure (all matters reserved except employment access from Chaddock

Lane; residential access from Garrett Hall Road and Garrett Lane). Approved February 2017.

Application reference A/09/73189 - Provision of new access road and associated landscaping (Reserved Matters to A/08/72144, Outline application for employment park comprising up to 31,500 square metres of Class B1, B2 and B8 uses). Approved February 2010.

Application reference A/08/72144 - To vary condition 2 of planning approval A/06/67659 to accord with revised master plan and site access arrangement to outline application for an employment park comprising up to 31,500 square metres of class B1, B2 and B8 uses (All matters reserved except access). Approved April 2009.

Application reference A/06/67659 - Outline Application for employment park comprising up to 31500 square metres of Class B1, B2 and B8 uses (All matters reserved except access). Approved September 2007.

Consultation responses

- *Environment Agency:*

No objection subject to the following comments:

The development site appears to have been the subject of past industrial activity which poses a medium/high risk of pollution to controlled waters. However, we are unable to provide site-specific advice relating to land contamination and advise that the Council's Environmental Health team are consulted for advice on generic aspects of land contamination management. Where planning controls are considered necessary, we recommend that the environmental protection of controlled waters is considered alongside any human health protection requirements. This approach is supported by paragraph 180 of the National Planning Policy Framework.

- *Lead Local Flood Authority:*

No objection subject to confirmation on the following:

Please provide the hydraulic calculations to prove that no flooding will occur during the 1:1, 1:30 and 1:100 + CC events, this can be achieved through a suitably worded condition.

Plans have been provided which shown a culverted watercourse at the most southern point of the site boundary.

If a new connection into the culverted watercourse is required, then an application for Land Drainage Consent will need to be submitted to the LLFA although it is understood that the development will connect to an existing manhole which already has an existing connection to the culverted watercourse and no new connection is required.

- *Environmental Protection Officer:*

No objections, subject to the following conditions:

The applicant has submitted a noise report in support of this application. The installation of the acoustic fence must be carried out before the use of the development commences.

A Construction Environmental Management Plan (CEMP) is required to be submitted prior to any works taking place and this can be obtained through a condition.

Conditions are also required regarding electric charging points and land contamination.

- *Public Rights of Way Officer:*

No objection subject to a condition requiring details of surfacing, precise dimensions and a timetable for construction.

- *Highways Policy Officer:*

(18 April 2024) – No objection to the proposal on the basis the traffic generated by the development has minimal impact on the operation of the A580/A577 junction.

(16 January 2024) - No objection in principle subject to the following comments and conditions:

Trip generation and forecasting**:** The application relates to the proposed development for a B2 / B8 land use development comprising a Gross Floor Area [GFA] of circa 32,825sqm across a number of units, situated at Astley Park Way off Chaddock Lane.

The trip rates have been previously agreed and are acceptable.

It should be noted that growth factors and the following committed developments were used in this TA. The committed developments are:

- A/17/84108/OUTMAJ - Land North Of Garrett Lane, East Of Garrett Hall, West Of Mosley Common Road, And South Of The Guided Busway Tyldesley.
- A/17/83702/OUTMES - Parr Bridge Works, Mosley Common Road, Tyldesley, Manchester M29 8PR.
- A/17/84560/OUTMAJ - Land East Of Leigh Road South/West Of Bee Fold Lane.
- A/20/88849/MAJOR - North Leigh Park Nel Pan Lane Leigh.

Local junctions / network impact**:** The following modelling concerns have been identified:

- In terms of trip distribution, it is not clear how each MSOA area has been allocated to a particular route.
- The study area needs to be extended to all junctions on the network experiencing an increase of 30vph or more. All junctions experiencing an increase of 30vph should be modelled.

- The lane widths used in the modelling for both junctions are too high. The modelling should be corrected and resubmitted.

Public transport and sustainable travel**:** The proposed development site is in a reasonably accessible location and is well located to make use of the existing public transport links and pedestrian / cycle routes.

Road safety**:** The causes of road traffic accidents are random and multifunctional, with each accident having several different reasons and trying to spot one overall contributing factor may not be possible. It is for this reason that Greater Manchester Police (GMP) will normally attend and record accidents that occur on the borough's highway network, where the accident results in an injury to persons. As a part of this process, they will record the details of the accident; and undertake an accident investigation to try and determine the contributory factors that may have caused the accident. The Council will analyse this data over a 5 year period to see if any trends can be identified. It should be noted that 'damage' only incidents will not appear on the accident database.

Details of damage only accidents are held by insurance companies and because of data protection, the Council cannot access this information. Without a detailed accident investigation being undertaken, any information given to the Council cannot be verified and must be regarded as hearsay.

The Police database was checked for the A572 Chaddock Lane, which included its junctions with Coach Road and the A580 East Lancashire Road. During the last five-year period for which data was available, fourteen accidents were recorded. All accidents were attributed to road user behaviour and two accidents involved vulnerable road users.

The following conclusions can be made regarding the accident data:

- An average of 2.8 accident a year have been made per year in the study area.
- No accidents have occurred at the site access.
- No accident cluster have been identified.
- No accident trends have been identified.

Adoption record**:** It should be noted that the existing access is still subject to the certification process for adoption.

Visibility**:** The proposal uses an existing access and the visibility splays comply with Manual for Streets.

Servicing**:** Based on Drawing No: 21714-HYD-XX-XX-DR-TP-1003, a large articulated vehicle can enter and leave the site in forward gear.

Layout: The site highways layout is acceptable.

Parking**:** The basic car park layouts will allow for the free flow of traffic and a vehicle can enter and leave a bay in one manoeuvre. However, there are no pedestrian facilities and there should be a footpath at the rear of the parking bays that connects into building entrances. Cycle parking facilities will require a roof.

The applicant as offered no evidence that the proposed level of parking provision is suitable for the development site. The site should be self-sufficient in parking terms and not lead to inappropriate parking on the proposed highway network. This would raise concerns for highway safety and congestion.

Proposed mitigation measures**:** It is recommended that a contribution towards the upgrade and revalidation of MOVA at the junction of A580/Chaddock Lane is requested. TfGM anticipate that this would cost in the region of £15k. This would help to futureproof the development by mitigating any increased delay because of the increased traffic flows and changes in traffic patterns. Also, this would ensure that the network operates as efficiently as possible to ensure that congestion is minimised.

Conclusion on highways matters**:** No objections in principle, and the modelling concerns are addressed.

- *Transport for Greater Manchester:*

The accident data should be updated to 2022. In terms of trip distribution, it is not clear how each MSOA area has been allocated to a particular route. The study area needs to be extended to all junctions on the network experiencing an increase of 30vph or more. All junctions experiencing an increase of 30vph should be modelled. The lane widths used in the modelling for both junctions are too high. The modelling should be corrected and resubmitted.

- *Salford City Council:*

Neither objects nor supports for the following reasons:

A car park accumulation exercise should be undertaken to evidence that proposed car park provision. It should be considered why the previous planning permission for this site was required to mitigate its impact at the A5801 A577 junction and whether or not it is considered appropriate that this application does not assess its impact on that junction. The previous permission for this site secured financial contributions to improve the A5801 A572 junction yet the current TA concludes at paragraph 8.4.3 that this development of comparable scale will not have a material impact.

The submitted TA states at paragraph 8.2.1 that the Astley Park Access A572 Chaddock Land and A572 Chaddock Lane A580 Lancashire Road junctions had been assessed “given that the traffic impact was greater than +30 two way trips” yet figure 11 of the appendices shows 46 PCU movement to and from the A5801 A577 junction in the weekday AM peak and 54 in the PM peak. Whilst this exceeds the agreed threshold no consideration of the impact at this neighbouring junction has been considered.

There is also some confusion over the numbers shown on the flow diagrams where the spot checks focus on the right turn in the PM peak from the A1580 to the A572.

TfGM should be consulted on this application and a CEMP should be required which should include the routing of construction vehicles.

- *Greater Manchester Ecology Unit:*

The applicant has submitted an updated bat report and there is no reason/evidence to doubt the findings. No further information is required with respect to bats. It is recommended that section 4.2 of the Bat Report forms the basis of a condition.

The applicant has provided evidence from Natural England to confirm they are satisfied that the development is eligible for district licensing. Although this process is now in the hands of Natural England, a condition is recommended in the event that the changes to the mitigation approach are required.

Section 180 of the NPPF requires planning decisions to contribute to and enhance the natural and local environment. In this regard the DEFRA metric has been provided. The baseline value of the site appears fair (62.84 biodiversity units). The post development value has been calculated at 51.89 BU. As this application has been submitted prior to mandatory requirements on BNG, the shortfall can be accepted but must be off-set by a financial contribution for biodiversity enhancements off-site.

In addition to the above a habitat management and monitoring plan for the on-site provision and this can be achieved by condition.

No evidence of badger was recorded on the site, but habitats recorded as suitable. The consultant has therefore recommended updated surveys prior to earthworks and vegetation clearance. Whilst the risks would appear low, I accept that as this is a protected species, such an update is reasonable. I therefore recommend a condition requiring a survey of the site to be carried out prior to the commencement of earthworks.

It is accepted that other protected species such as water vole and otter can be reasonably discounted owing to a lack of suitable habitat on or near the site. No further information or measures are required.

Bird surveys determined that breeding birds were present but of only local value. The development will result in the loss of much of the existing nesting habitat. All British birds nests and eggs (with certain limited exceptions) are protected by Section 1 of the Wildlife & Countryside Act 1981, as amended. I recommend a condition to prevent works to trees, hedgerows and shrubs during the nesting season unless a detailed survey by a suitably experienced ecologist is carried out in the first instance.

The consultant has noted that the hedges and scrub on site provide potential cover for species such as hedgehog, a UK Biodiversity Priority Species as well as other mammals and amphibians. The levelling of the site could therefore lead to high an unnecessary mortality of mammals and amphibians if not carried out sympathetically.

Reasonable avoidance measures (RAMs) have been recommended as well as a Construction and Environmental Management Plan that includes ecology within its scope. Given the scale of the hedge removal, that RAMs are appropriate along the lines suggested within section 5.7.4 of the ecological report. A condition will be required to obtain the submission of a scheme for RAMs for mammals and amphibians.

Giant Hogweed is listed under schedule 9 part 2 of the Wildlife & Countryside Act 1981 (as amended), was recorded on the site. It is an offence to cause this species to spread in the

wild. This species also represents a public health risk. A condition is required detailing a method statement for its eradication.

- *United Utilities:*

Following review of the submitted Drainage Strategy, we can confirm that whilst the proposals are acceptable in principle, there is insufficient information on the detail of the drainage design. We request all foul and surface water manhole cover levels and finished floor levels be detailed on the plan in meters AOD and a hydraulic model of the 30 and 100yr+ climate change is submitted to assess surcharge/flooding on site. In addition, should planning permission be granted, we request a condition requiring the submission of a sustainable surface water drainage scheme prior to any development commencing.

- *Coal Authority:*

No objection, subject to a condition requiring further investigative works.

- *Urban/Landscape Design Officer:*

No objection subject to the submission of an amended landscaping scheme to ensure that a good mix of species, providing all year-round cover, is provided. The timing of the implementation of the scheme is critical to ensure the scheme achieves its goal of mitigating some of the harm of the scale of the buildings and this too can be achieved through a condition. The management and maintenance of the scheme can be controlled by way of BNG maintenance condition.

- *Cadent Gas:*

No objections. Information provided which should be made available to the applicant (a holding objection was originally submitted on 9 November 2023, but this was withdrawn as per their comments dated 16 November 2023).

Representations

The application was publicised in accordance with statutory requirements and the Wigan Council Code of Practice for the Publicity for Planning Applications.

Following this exercise, approximately 70 representations were received.

The representations raised the following summarised points in objection to the application:

- Significant harm to the character and appearance of the surrounding area.
- Impact on highway congestion in the local area and the local highway network cannot cope with existing developments.

- The investigation undertaken to determine the impact on traffic peak times is not reflective of the real situation.
- Noise and light pollution
- Impact on air quality
- Loss of green space and this impact on limited existing local provision, along with a loss of amenity area for local residents.
- Empty industrial units and brownfield sites should be used in the first instance.
- Impact on wildlife species, including protected species, who currently use the area.
- Devaluation of local houses.
- Increased drainage issues.
- No infrastructure in place to support more development in the area.
- A walkway circuit should be included.
- The proposed landscaping will not minimise the impact on local residents.
- No demand for more units in the area.
- 24-hour use will have a devasting effect on local residents
- Local housing estates could be used a cut through for associated vehicles and for parking for staff.
- Impact on local schools and the health and wellbeing of children who use them.
- Increase in potential hazardous materials in the local area.
- The well-being of local residents should be prioritised.
- Detrimental impact on climate change.
- Homes nearby would not have been purchased if it was known that this green area was going to be lost.
- This development does not support the NPPF's guidance on the need to transition to low carbon.
- With the recent new build homes, this area has become a predominantly residential area.
- Will the retained Public Rights of Ways be safe to use.
- The proposal is significantly different, in terms of scale, to the development approved in 2017 and there are now more homes in the local area.
- Residents are already impacted by noise and odours from local businesses.
- The associated benefits, including job creation, are a myth.
- Loss of daylight/sunlight to nearby resident.
- Impact on historic coal mines.
- Increase in crime rates in the local area.
- The proposal will undermine the sense of community in the local area.
- The provision of electrical vehicle charging point has been done without evidence to show if the grid can cope.
- Insufficient parking for staff.
- The inclusion of cycle parking does not off-set the resulting pollutants.
- Insufficient services to cope, such as doctors, dentists and schools.
- Loss of Green Belt land.
- The plans are incorrect, there is more housing in the area, especially to the east of the site.
- The path to Parr Bridge retail area needs to be upgraded and this area should be used to provide some high-street style service for local residents.
- The Travel Plan contains some discrepancies.
- The proposed landscaping will block light to residential properties.
- A thorough assessment of the socio-economic impacts should be conducted.

- A comprehensive assessment of flooding events, impact on gas main and traffic and pollution should be undertaken.
- The noise assessment considers volume of noise and not the nature of the noise.
- Concerns raised by Coal Authority, United Utilities and Cadent Gas
- Impact on land stability
- No site notice was displayed by the applicant.
- Unit 1 does not face internally, and the waste/recycling facility will be located immediately next to residential dwellings.
- The quiet nature of the area will be lost.
- Potential noise impacts exceed WHO guidelines.
- The development will outdo all the good work recently undertaken to rejuvenate the Mosley Common area.
- Heavy Goods Vehicles (HGVs) already cause harm to local roads and illegally turn right on Higher Green Lane
- The buildings are too tall.
- Roof cladding does not fit in with the character of the local area.
- The application was clearly submitted after the new housing estates were built and occupied.

Further to the above, James Grundy MP has objected to the development for the following reason:

- The warehousing units should not be built in such close proximity to the residential properties and schools.
- There will be an increase in pollution from ancillary vehicles and an increase in noise and lights 24 hours a day.
- Detrimental health effects on local residents and on local school children could arise.
- This area lacks the infrastructure for such development and it would cause congestion on the roads. The access road to this area is a single track and already very congested at certain times of the day.
- The local wildlife should be considered as this will take away more green space.
- The submitted site plan is not accurate, I have been informed that it does not reflect the residential aspects of the developments.

Representations are available to view on the Council's website.

Assessment

Decision-making and the 'Development Plan'

Section 38(6) of the Planning and Compulsory Purchase Act 2004 and Section 70(2) of the Town & Country Planning Act 1990 require planning applications to be determined in accordance with the statutory development plan, unless material considerations indicate otherwise. The 'Development Plan' for the borough of Wigan, in this instance, currently comprises:

- Saved Policies of the Wigan Replacement Unitary Development Plan (UDP, adopted 2006);

- Wigan Local Plan Core Strategy (Core Strategy, adopted 2013);
- Places for Everyone (adopted 21st Mach 2024);
- Greater Manchester Joint Minerals Plan (adopted 2013); and
- Greater Manchester Joint Waste Development Plan Document (adopted 2012).

Key material considerations in this respect include the national planning policies in the NPPF or 'The Framework' (revised 2021), National Planning Practice Guidance (as amended) and the Council's Supplementary planning guidance / documents, together with consultee responses and third-party representations.

Further to the above, the proposed development involves the erection of 4 no. units with a mixture of Planning Use Class B2 (General Industry) and Planning Use Class B8 (storage and distribution) uses and associated infrastructure at land off Astley Park Way. The following matters are therefore considered the key assessment criteria to be considered in the overall assessment of this application and are discussed within the report:

- **Principle of Development**

    - Sustainable development
    - The Primary Employment Area
    - Benefits as a result of the development
    - Developer contributions
    - Principle of development conclusion

- **Design and layout**

    - Planning policy and guidance
    - Design, layout, scale and appearance

- **Amenity relationships**

    - Planning policy and guidance
    - Design and layout in relation to amenity
    - Noise considerations
    - Air quality
    - Conclusion of amenity relationships

- **Transport, accessibility and parking**

    - Transport policy context
    - Impact on the local highway network
    - Site context/active travel
    - Vehicle and pedestrian access
    - Vehicle and cycle parking
    - Other matters
    - Conclusion on transport, accessibility and parking

- **Trees, landscaping, ecology and biodiversity**

- **Technical matters**

- Flooding and drainage arrangements
- Ground conditions

- **Observations on the representations**

Principle of development

- *Sustainable development*

The NPPF (or 'the Framework') sets out a presumption in favour of sustainable development. Paragraph 7 of the NPPF states that the objective of sustainable development is to meet the needs of the present without compromising the ability of future generations to meet their own needs. Paragraph 9 states that plans and decisions need to take local circumstances into account, so that they reflect the character, needs and opportunities of each area.

The Framework re-iterates that planning law requires that applications for planning permission must be determined in accordance with the development plan unless material considerations indicate otherwise.

Paragraph 85 of the NPPF sets out that planning policies and decisions should help create the conditions in which businesses can invest, expand and adapt. Significant weight should be placed on the need to support economic growth and productivity, taking into account both local business needs and wider opportunities for development.

The NPPF states that the purpose of the planning system is to contribute to the achievement of sustainable development. So that sustainable development is pursued in a positive way, at the heart of the NPPF is a presumption in favour of sustainable development, which, for decision-taking, means approving development proposals that accord with an up-to-date development plan without delay.

PfE Policy JP-S1 echoes the NPPF in stating that when considering development proposals, a positive approach that reflects the presumption in favour of sustainable development will be taken. Planning applications that accord with the policies in the Core Strategy will be approved without delay unless material considerations indicate otherwise. In order to achieve transformation, regeneration and create attractive places for people to live and businesses to locate and thrive,

Local planning policies expand on national planning policy and the Core Strategy, along with the saved policies in the UDP, focuses on making the Borough a more attractive place to live and to attract new employment and investment through a sustainable balance between economic progress, social progress and environmental protection and enhancement. Core Strategy Policy SP1 sets out the spatial strategy for the borough and states that development will be direct primarily towards the east-west core of the borough.

- *The Primary Employment Area*

The site is located within the east-west core of the Borough and is designated as a Primary Employment Area (PEA), Chaddock Lane, within saved UDP Policy EM1A. This policy states that: development for, or changes of use to, uses within Classes B1, B2 and B8 or other employment uses will be permitted provided that there will be no unacceptable environmental, amenity, highway, road safety or other adverse impact. Whilst the impact of the proposed development on the subjects mentioned above will be discussed later in this report, in principle of the erection of 4 no. units for B2/B8 planning use class purposes is acceptable as it accords with saved UDP Policy EM1A.

Policy JP-J2 of the PfE states that existing employment areas are important to maintaining a strong and diverse supply of sites and premises in our boroughs and will be protected from redevelopment to other uses, nurtured to ensure they remain competitive, and their accessibility improved where necessary. This will include local employment areas as well as key growth locations.

Policy JP-J4 of the PfE advises that the need to provide the level of industrial and warehousing land within the Plan reflects the need for Greater Manchester to compete internationally for investment and provide sufficient choice and flexibility to respond to the varied needs of different businesses. This will help Greater Manchester to maximise its ability to attract and retain businesses and hence support its long-term economic growth prospects and the availability of local jobs.

- *Benefits as a result of the development*

The development represents a significant inward investment for the Borough and will create employment, both in operational and construction phases, together with supporting supply chains, local businesses and income for in the form of business rates for the Council. Conditions are also proposed relating to the provision of employment and training opportunities for local people. In support of these statements, the applicant has supplied the following details:

Construction Phase:

- Approximately £30 million in construction investment;
- Creating approximately 140 gross on-site direct temporary full time equivalent jobs (FTE);
- Creating approximately 150 net direct, indirect and induced employment FTE jobs across the wider area; and
- Generating approximately £8.5million for the wider area of which approximately £3.6million could help support local economic growth within Wigan.

Operational Phase:

- Generating net additional impacts of approximately £21.6 million of net additional GVA annually for Greater Manchester of which approximately £12.5 million GVA could help support local economic growth within Wigan.
- The proposed development will support approximately 500 on-site jobs. As these jobs will be flexible depending on the number of hours worked, the new employment opportunities will be a mix of part-time and full-time.

- The creation of approximately 460 net additional FTE jobs within existing business / supply chains across Greater Manchester.
- Generating a tax yield to the Council from fully developed/occupied sites of approximately £280,000 per annum; and
- Meeting the needs of the labour market and the demand for jobs in Wigan and the wider Greater Manchester region.

- *Developer contributions*

In relation to development contributions, Core Strategy Policy CP18 seeks to ensure that there is capacity for new development and help make the borough an attractive place for people to live by ensuring that development funds, or contributes to the funding of, necessary off-site works or programmes in accordance with the provisions of legislation, national planning policy and other local planning policies, providing that it is viable.

A Section 106 is in the process of being prepared and has been agreed between the applicant and Local Planning Authority (LPA) on the basis of the following secured contributions:

- Highway contribution of £15,000; and
- The provision of £199,332 for biodiversity enhancement at Bedford Colliery.

Details as to why these contributions are being secured are discussed in the following sections of this report, and, on this basis, demonstrate the proposals compliance with Core Strategy Policy CP18 and the relevant sections of the NPPF.

- *Principle of development conclusion*

The proposed erection of 4 no. industrial units is acceptable in principle; the units are considered to complement the wider PEA where such units are supported in local and national planning policy.

Whilst the site has naturalised and may currently be used for informal amenity purposes by local residents, it remains an allocated site for employment purposes and has a long planning history, dating back to 2006, for that purpose. In accordance with national and local policies, it is necessary for such land to be prioritised for the development of employment generating purposes in such a manner that it ties in with the PfE requirement for the delivery of national and international investments.

Given the above, the principle of development is considered to be acceptable and compliant with saved Policy EM1A of the UDP, Core Strategy Policy CP18 and Policies JP-J2 and JP-J4 of the PfE, along with the relevant policy objectives contained within the NPPF.

Design and layout

- *Planning policy and guidance*

Core Strategy Policy CP10 seeks to ensure that new development is well designed and has regard to the scale, design, layout and materials of the surrounding and existing buildings

with no adverse impacts on the amenity of nearby land uses. The revised NPPF also states that the government attaches great importance to the design of the built environment. Good design is a key aspect of sustainable development, is indivisible from good planning and should contribute positively to making places better for people.

- *Design, layout, scale and appearance*

The proposal's design results in the development being spread across the site, with the larger two units located in the north and west of the site and smaller two located in the south and east. The built development would be set back from all boundaries with a landscape buffer extending along the north, east and west boundaries. Access would be taken from an existing, unfinished access point (approved under outline permission 'A/15/81365/OUTMAJ' for the site) and direct access to each unit would lead directly from this and in particular to the parking and servicing areas for each unit.

The site is generally level, and the proposed development would respect the existing topography of the site. Some retaining features are required within the central areas of the site to reflect area of a lower level, but these features would be contained within the site and not visible from the surrounding area.

The unit proposed as 'Unit 1' measures 15.8 metres x 8.4 metres with a total height of 18.3 metres and located close to the northern boundary of the site. The associated loading bays (12 no. in total) and serving area would be located along the southern elevation of the building (facing internally within the site) along with the associated parking for HGVs. Car parking would be located to the west and a total of 113 no. bays are proposed which include 2 no. disabled bays, 11 no, electric vehicle parking spaces (EVPS) and 6 car share bays. The building would be finished in a mixture of horizontal and vertical cladding in different shades of grey.

Unit 2 as proposed is located to the west of the site and would measure 13.6 metres x 9 metres with a maximum height of 18.3 metres. The associated loading bays (16 no. in total) and serving areas would be located to the south of the building, while the vehicular parking, a total of 141 no. spaces, would wrap around the north and east of the building. The building would be finished as described above also.

Units 3 and 4 as proposed are located to either side of the main accessway. Unit 3 measures 8 metres x 3.6 metres with a maximum height of 13.7m and would have 4 loading bays along its eastern elevation together with a general servicing area. Associated parking would be located to the south of the building. Unit 4 is the smallest of the proposed units, measuring 7.6 metres x 3.7 metres with a maximum height of 13.6 metres. The loading bays and associated servicing area would be located to the west of the building, with associated car parking located to the east. Again, both of these units would be finished in a similar manner to that described above.

The proposed development includes a comprehensive landscaping scheme which includes bunding around the north, west and east site boundaries. The landscaping scheme has been included for two purposes; firstly, to mitigate the impact of the development on the character of the surrounding area and secondly as a mitigation for neighbouring amenity purposes (which will be discussed later in this report). There are other areas of landscaping throughout the site and most notably along the proposed diverted public rights of way which

will remain and ensure connectivity. It is to be noted that the site does not fall into any particular landscape category as outlined in Policy JP-G1 of the PfE.

Expanding on the above, the proposals provide a scheme which incorporates a generous amount of landscaping to assimilate the development into its surroundings. Two of the buildings are high and the proposed landscape buffer around the site perimeter will help to mitigate the impact of the scale of these building when viewed from the north, west or east of the site where residential properties are located. In this respect the applicant has submitted justification for the scale of Units 1 and 2 in particular, which centres on the need to provide internal eaves height of at least 15 metres for units between 100,000 and 200,000 square feet to attract suitable investors. A comparable exercise with other existing warehouse units in the wider area has been provided to show that the scale of units 1 and 2 are not excessive for the proposed purpose, and this is accepted by Officers.

To the south and south-west of the site, the area is industrial in nature and, in this context the proposed development will be characteristic of the wider PEA.

The proposed layout offers a legible scheme where there are clear routes around the site and to each unit. The retention of public rights of way through the site and wider connectivity is important, and it is imperative that a scheme, which facilitates the safe movement of those who utilise these paths, is obtained through a suitably worded condition, which has been secured by Officers. The principle of the scheme submitted at this stage is acceptable as it retains connectivity to existing routes located adjacent to the site.

In general terms, the proposed design, appearance and finish of the proposed units is acceptable; the proposed materials and their finishes are characteristic of typical warehousing schemes. The proposed materials for the hard surfaces have been provided and these offer a good mix, distinguishing the different areas such as pedestrian areas, parking areas and road surfaces.

Due to the aforementioned landscaped buffer zone around a large part of the site area, the proposed fencing for the site sits within the site rather than around its boundaries. The exception between the south-west boundary which will lie adjacent to an existing industrial site. Here, 2.4 metre high paladin fencing is proposed which is considered to be acceptable. Internal fenced areas include areas of mesh security fencing and close boarded acoustic fencing which are considered to be acceptable and will not be visible in the surrounding areas due to the landscaped bunds.

Areas of waste and recycling have been indicated on the plans and Officers are satisfied that there is sufficient space to ensure that appropriate areas for such purposes can be provided. Given the scale of the site and provision of dedicated servicing areas for each unit, no further details on the bin storage areas are required and will be secured through the permission if forthcoming.

A lighting assessment has been submitted in support of the proposed development. The scheme acknowledges the need to provide a scheme given the open use of the site, but also the need to prevent light pollution through a combination of optimal mounting heights and the use of low energy efficient LED lighting luminaires that limit glare. The scheme focuses on the buildings themselves and areas around the buildings and as such is removed

from the fringes of the site to avoid, as far as is practically possible, any overspill into neighbouring residential areas.

It is acknowledged that the proposed development will significantly alter the character and appearance of the existing site. The scale of the proposed development is significant, and it will be visible from surrounding viewpoints. However, this is a designated PEA site and there are many examples of industrial units to both the south and west of the site, which vary in size and scale. Furthermore, the proposed units will sit back from the main highway, Chaddock Lane, and will not therefore be overly visible from this perspective. From other areas around the site, it is acknowledged the character of the site will change significant for local residents, especially those close to the site boundaries to the north, west and east. However, a scheme for landscaping bunding has been provided to seek to mitigate this impact along with setting the units and their associated areas back from the site boundaries where these meet with residential areas. The development will be visible from certain areas, including the landscape bunds, however Officers are satisfied that a suitable scheme of mitigation has been provided to minimise these impacts as much as possible and to acceptable levels.

Given the above, on balance the proposals are deemed by Officers to be compliant with Core Strategy Policy CP10 and the relevant related objectives within the NPPF.

Amenity considerations

- *Planning policy and guidance*

To assess the amenity relationships of the development, the proposal is to be assessed against Core Strategy Policy CP17 and the amenity related objectives of the NPPF. An aim of Core Strategy Policy CP17 is to ensure that new development is planned and designed so that it does not have an unacceptable adverse impact on amenity and quality of life. This is also reflected in Saved Policy EM1A of the UDP which states that development on PEAs will only be permitted provided that there will be unacceptable amenity impact.

- *Design and layout in relation to amenity*

Having regard to proposals of this nature, the most likely issue that will cause unacceptable adverse impacts on amenity or quality of life is noise, including associated traffic movements, and odour.

Further potential issues can be related to overlooking, outlook, overbearing and overshadowing, especially given the scale of the units, and in particular in relation to these proposals, Units 1 and 2.

With respect to Unit 1, this is located to the south of a recent residential development, known as Land East of Garrett Hall, and to the east and west of further housing developments which were granted outline permission in 2017, along with the industrial redevelopment for this application site. The proposed unit will be set in approximately 5 metres from the northern boundary and 4 metres from the eastern boundary. A landscaped bund will be located in between the unit and these neighbouring boundaries. It is proposed to plant this bund with a range of tree to provide some screening from the residential dwellings.

Associated activity with the unit will be focused to the south of the building where the loading bays and servicing areas are proposed; the elevation facing the neighbouring residential properties is blank.

Proposed Unit 2 is located to the south of Garrett Hall Primary School and the residential properties previously mentioned and the east of residential properties on Tanhouse Avenue, Whittington Drive and Riding Close. The side elevation of Unit 2, which will be blank, will face towards these neighbouring properties and a gap of approximately 5 meters will be remain between the site boundary and the edge of the building. As before, a landscaped bund will be provided in between the site boundary and the proposed building. Associated activity will be focussed on the southern side of the building which faces towards adjacent industrial buildings.

Unit 3 is located centrally within the site and a significant distance from local residential properties. It will be located to the rear of the neighbouring Applewood Farm public house, but given the use of this building, Officers are satisfied that no significant issue will arise as a result of this relationship.

Unit 4 will be located to the west of a relatively new housing development, the outline permission for which was granted along with the industrial redevelopment of the application site in 2017 (Reference 'A/15/81365/OUTMAJ'). As above, a landscaped bund will be provided in between the site boundary and the eastern, blank elevation of Unit 4. Associated activity will be focussed on the western side of the building.

As can be seen from the breakdown of the units' position and design above, the units face away from local residential properties, a specific design consideration to assist amenity relationships, and further internal fencing has been provided around vehicle parking areas in order to provide a further 'barrier' between elements of the development and the nearby residential properties.

The proposed landscaping scheme is considered to be critical to ensuring this proposed mitigation measure is effective. It is important that the planting scheme to go within the bunds includes both deciduous and evergreen species to ensure there is some element of screening all year around. Phasing of the landscaping scheme implementation will also be critical and as much as possible should be planted up front to begin screening the units as soon as is feasible. Whilst the submitted landscaping scheme is good, further details on the particular species to be used and a landscape management plan will be requested by condition.

Officers accept that the proposed development will impact the existing level of amenity experienced by local residents, especially those will live immediately adjacent to this PEA site. It must be accepted that views of these units cannot be completely mitigated for local residents, they will be seen despite the proposed landscaping scheme. However, the proposed scheme will help break up these views and the visual impact will be further minimised by the use of grey graded cladding. Therefore, whilst the proposed units will be visible to local residents, due to the siting, design and landscaping scheme, Officers are satisfied that the level of harm to amenity is, on balance, acceptable.

Due to the set back from site boundaries and the use of landscaping as an intervening tool of mitigation, Officers are satisfied that no significant overshadowing or overbearing impact

would occur on the neighbouring properties. It is noted that some residents have raised concerns over the impact of the landscaping itself on their amenities, however it must be noted that planning consent is not required to plant trees and such features could be introduced onto this site without any prior consent being required.

It is noted that one of the main concerns raised by local residents is the loss of the existing green space. As outlined in an earlier section of this report, this land is designated as PEA and not as open space, and as such, it cannot be protected long term for the purposes of informal amenity. Whilst it is regrettable that this area will be lost for that purpose, public footpaths will be retained through the site with connectivity to the adjacent bridleways which will ensure that local residents can still avail of the site for amenity purposes.

- *Noise considerations*

The application is supported by a noise assessment which has modelled the proposed 24-hour use of the units to establish the likely impacts of neighbouring residents. The report also establishes the existing noise climate in the surrounding area and whether the proposed operations at the site, on a worst-case scenario, would give rise to any unacceptable impacts. This assessment has been reviewed by the Council's Environmental Protection Officer and no objections have been raised.

Associated noise from the movement of HGVs and staff parking during both day and night-time would not significantly harm local residents due to a number of factors, namely the location of the servicing areas which face internally within the site and away from residential boundaries, the use of acoustic fencing throughout the development and the landscape bund around the periphery of the site. The submitted acoustic report evidences that noise levels derived from plant is predicted to be equal to existing daytime and night-time background noise levels.

In terms of traffic movements and general activity within the site, it is accepted that the proposal will increase the number of vehicles visiting the site but given that the access is off an existing roundabout on Chaddock Lane, in a predominantly industrial area, this is unlikely to cause any direct impact on local residents. It is the activity within the site that could give rise to impact but as outlined above, there are migration measures contained within the proposed scheme to off-set those impacts to an acceptable extent.

The applicant has also submitted a Construction Environmental Management Plan (CEMP) which will control the noise and disturbance during the construction phase. The submitted document presents a suitable framework for establishing acceptable principles during this phase of the development, however some amendments are required, and these will be sought through a condition.

- *Air quality*

The application is accompanied by an Air Quality Assessment (AQA). Chapter 15 of the NPPF, Policy CP17 of the Core Strategy and Policy JP-S5 of the PfE require the maintenance, enhancement and protection of our environment for the benefit of people of wildlife and to make the Borough a better place for people to live and businesses to locate and thrive in by (inter alia) managing air quality, particularly in our Air Quality Management Areas, including by minimising the air pollution likely to arise from new development.

In accordance the Council's Development and Air Quality SPD electric vehicles charging points are required (5% of total number of spaces relating to the proposed B2/B8 planning use class units). The proposed number of electric vehicle charging points (EVCP) is considered in principle to be acceptable to Officers. Specific details of these points, including location within the development, can be obtained through a suitably worded condition.

The conclusions of this report are that the associated construction activities and vehicular movements are not predicted to have significant impacts on air quality due to dust and exhaust emissions. In order to mitigate the impact that the development will have, the proposal includes extensive tree planting and as outlined above and will be conditioned to provide appropriate numbers of EVCPs.

Furthermore, and as referenced, a CEMP has been provided which provides a suitable framework within which the construction phase will take place, minimising the impact on the local environment where possible. Whilst this document does not capture all required information, Officers are satisfied that it provides an account of how phases of the development can be controlled to ensure the impact on the local environment is managed. An updated CEMP will be required prior to any development taking place, through a condition.

For the reasons outlined above, Officers are satisfied that the proposal is compliant with Policy CP17 of the Core Strategy, and the related objectives within the NPPF and PfE.

- *Conclusion of amenity considerations*

The proposed development, within this PEA, seeks to co-exist with the surrounding land uses which is a mixture of both residential and industrial. Officers are fully aware of the full extent of housing that surrounds parts of the site and that some of these houses are relatively new additions to the area. These factors have been fully considered in this assessment. The transition between large scale industrial units and residential dwellings is difficult and Officers understand the concerns raised by local residents in this regard. However, weight must be given to the allocation of the site and the need, reiterated in the recently adopted PfE Plan, to develop allocated employment sites to encourage inward investment and increase employment opportunities within the locality.

This is a finely balanced issue but given the level of mitigation provided and as outlined earlier, Officers are satisfied that, subject to the conditions mentioned, the proposed development will not have an impact on the amenities of local residents to an unacceptable degree, and therefore achieves compliance with saved UDP Policy EM1A and Policy CP17 of the Core Strategy, as well as the relevant objectives of the NPPF and PfE Plan.

Transport, accessibility and parking

- *Transport policy context*

The NPPF states at paragraph 108 that transport issues should be considered from the earliest stages of development proposals so that:

- The potential impacts of development on transport networks can be addressed;
- Opportunities from existing or proposed transport infrastructure are realised;
- Opportunities to promote walking, cycling and public transport use are identified and pursued; the environmental impacts of traffic and transport infrastructure can be identified, assessed and taken into account – including appropriate opportunities for avoiding and mitigating any adverse effects, and for net environmental gains; and
- Patterns of movement, parking and other transport considerations are integral to the design of schemes and contribute to making high quality places.

In addition, the planning system should actively manage patterns of growth in support of these objectives. Paragraph 109 of the NPPF states that 'significant development should be focused on locations which are or can be made sustainable, through limiting the need to travel and offering a genuine choice of transport modes. This can help to reduce congestion and emissions and improve air quality and public health.'

In assessing specific applications for development, revised NPPF paragraph 114 states that it should be ensured that appropriate opportunities to promote sustainable transport modes can be taken up, that a safe and suitable access to the site can be achieved for all users and any significant impacts from the development on the transport network (in terms of capacity and congestion), or on highway safety, can be effectively mitigated to an acceptable degree (if necessary).

All developments that will generate significant amounts of movement should be required to provide a travel plan, and the application should be supported by a transport statement or transport assessment so that the likely impacts of the proposal can be assessed (NPPF, paragraph 117). Importantly, the NPPF also confirms (at paragraph 115) that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.

At a local planning policy level, Core Strategy Policy CP7 'Accessibility' aims to improve accessibility to key destinations for people and goods a connect people to opportunities both within and outside the borough by a number of factors, including by:

- Maximising the capacity, efficiency and safety of the road network, reducing, as far as is practicable, the adverse impact of transport on our communities, town centres and the wider environment.
- Developing and enhancing on and off-road networks for walking and cycling, to, in part, connect local residents to employment facilities;
- Ensuring the provision of appropriate, well designed, convenient, safe and secure parking for cycles, motorcycles, cars and vans / lorries, including as part of new development; and
- Promoting the use of travel plans and requiring them to be produced and implemented for appropriate development; and supporting the appropriate provision of infrastructure for the charging of electric vehicles.

PfE Policy JP-C7 seeks to ensure that new development makes appropriate provision for deliveries and servicing in terms of road safety, traffic congestion and environmental impacts, in accordance with Policy JP-C8.

In regard to parking provision assessment, saved UDP Policy A1S 'Parking in New Development' is relevant and so is the Council's recent Parking Policy Note March 2023. This policy states that in new development, convenient, safe and secure provision will be required for:-

(a) Cycle and motorcycle parking and car parking for disabled people in accordance with the minimum standards adopted by the Council; and
(b) Car parking in line with the maximum standards adopted by the Council.

The revised Parking Policy Note March 2023 seeks to increase parking provision set out in saved UDP Policy A1S within new development sites, the maximum space numbers are not a fundamental requirement, and consideration can be given to site constraints, site locations and general design to allow a reduction in such provision.

The applicant has provided a Transport Assessment (TA) and a Travel Plan to support the application.

- *Impact on Local Highway Network*

The applicant has carried out an assessment of the impact of the development on the surrounding highway network and in particular the local junctions which will be affected by traffic associated with this development. Following the initial submission and consideration by the Highways Policy Officer, this required further assessment and in particular further remodelling of the A580 / A577 junction.

It was noted throughout the submitted information that HGVs would form the primary movements associated within the proposed development and Officers are satisfied that the surrounding highway network can accommodate the predicted levels of movements. Within the aforementioned assessment it was noted that the A580/A577 junction is currently operating over capacity; however, Committee will be aware that there is already a committed improvement scheme to take place at this junction funded by contributions from other developments including those at Garrett Hall, Parr Bridge and Mosley Common. With this improvement scheme in place, the impact of the development on this junction is acceptable.

In addition to the above it has been advised by the Council's Highway Policy Officer that this development should contribute to the upgrade and revalidation of MOVA (Microprocessor Optimised Vehicle Actuation) at the junction of A580/Chaddock Lane. The applicant has agreed to meet the £15,000 associated costs in this respect.

- *Vehicle and pedestrian access*

The proposed site access was fully approved under the outline permission for the site granted in 2017, and the access spine road is currently in situ. The access is considered appropriate for the movement of large vehicles that could be expected to arrive / exit the proposed development.

The proposed layout is considered to be acceptable and will be able to ensure that a large articulated vehicle can enter and leave the site in a forward gear. The vehicle parking layouts allow for the free flow of traffic and vehicles will be able to enter and leave a bay in one manoeuvre.

There is a need to improve pedestrian access from the proposed parking areas to each unit and such amendments can be obtained through a condition.

- *Vehicle and cycle parking*

Firstly, it is noted that the site is located in a sustainable location with access to public transport, walking and cycling opportunities.

The proposal provides a total of 328 no. car parking spaces and 77 no. HGV parking bays. In addition to this provision, 60 no. cycle parking spaces will be provided.

In line with the Council's adopted parking note, the maximum levels referred to with Appendix 9 of the saved UDP are for reference only and the site specifics must be applied. In this case, the proposed car parking levels for each unit fall within the maximum levels required for the class B8 storage planning use, i.e. 1 per 100sqm and a little below the maximum levels for B2 use, i.e. 1 per 100sqm. The applicant has submitted projected levels of staffing, being in the region of 500 employees. However, this is over a 24-hour period and not all staff would be present on site at any one time. When taking account of the sustainability of the site and the level of parking provided, which includes disabled parking, Officers are satisfied that the proposed car parking level is acceptable. The level of HGV parking is also considered to be acceptable when compared with the number of loading bays provided in each unit.

The level of cycle parking is considered to be acceptable, although further details of this provision will be required by way of a condition as local policies require such areas to be both secure and covered.

- *Conclusion on transport, accessibility and parking*

The application is accompanied by a Travel Plan and a Transport Assessment, and these documents have been reviewed by the Council's Highways Policy Officer.

It is accepted that the site is located in a sustainable meaning that future employees have a genuine alternative to car travel. Furthermore, all of the proposed units include cycle parking areas for future employees.

The proposed development would utilise an existing access, which has been partly constructed under the approved outline scheme for the site. This access, including its visibility splays, remain acceptable for the projected use associated with the proposed development.

A trip generation exercise has been undertaken and an assessment has been undertaken of the local highway network, including the junctions that are likely to be affected by associated traffic. Subject to a financial contribution for improvements at the A580/Chaddock Lane, Officers are satisfied that the submitted assessment is acceptable and the impacts on the local highway network will be minimal and would not meet the tests set down in the NPPF whereby developments can only be refused on highway grounds where an unacceptable impact on highway safety would arise or the impacts on road networks would be severe.

On the basis of the above, the proposal complies with Core Strategy Policy CP7, PfE Policies JP-C7 and JP-C8 and saved UDP Policy A1S from highways and parking perspectives respectively.

Trees, landscaping, ecology and biodiversity

Paragraph 180 (d) of the NPPF states that policies and decisions should contribute to and enhance the natural environment, resulting in net gain and no net loss. The Environmental Bill adopted by the Government requires a mandatory 10% net gain to be achieved and came into force in February 2024. This is a requirement for new major applications submitted following the adoption of this policy and can be achieved either on site, through biodiversity gains, registered off-site biodiversity gains or biodiversity credits and in all factors, must be managed long-term across a 30-year management period.

The revised NPPF and PfE Policy JP-G8 seek to support the policy objective of BNG, with the PfE policy requiring a net gain of no less than 10%.

In this respect, the applicant submitted a biodiversity metric which confirms that the proposed development will result in a loss of approximately 69 biodiversity units, however, 58 of these will be replaced through the proposed landscaping scheme on-site. A management and maintenance plan will be required to ensure that this scheme is delivered and retained on site. The applicant has acknowledged that the proposed scheme results in net loss on-site and has worked with the Council to provide a scheme whereby the required 10% net gain will be provided at Bedford Colliery. The Council has confirmed that it will cost just under £200,000 to provide the required net gain to achieve policy compliance at this site, and the applicant has agreed to meet these costs.

The applicant has provided an ecological assessment which has considered the impact on species who use or may use this site for foraging or habitat. The submitted assessments have been reviewed by the Council's ecology advisors and found acceptable. Subject to conditions, Officers are satisfied that the proposal will not have an unacceptable impact on the status of protected species in the local area.

As outlined earlier in this report, the proposed development will significantly alter the character of this PEA site as currently is. However, a comprehensive landscaping scheme has been provided which will mitigate this loss to some extent. This scheme is focused on the site boundary areas, but some cover will also be provided within the site, mainly to line the routes of the public footpaths which are being retained/redirected as part of the proposal. Further details of the scheme, such as the use of specific species, are required and these can be obtained through a condition.

On the basis of the above, Officers can confirm that the proposed development is fully compliant with the BNG requirements as required in Policy JP-G8 of the PfE and the NPPF. Furthermore, there are no unacceptable impacts on local species, subject to conditions and a suitable landscaping scheme has been provided in this context.

Technical matters

- *Flooding and drainage arrangements*

The site is located within Flood Zone 1 and the applicant has submitted a Flood Risk Assessment (FRA) which considers the potential impact of the development on flood risk within and around the application site. The application has also been assessed by the Environment Agency (EA) who raised no objections to the development.

The submitted report meets the requirements of the NPPF by considering the impact of runoff generated by the proposed development onto the downstream catchment area and assesses the risk of flooding on site and in the surrounding area from various sources.

The submitted FRA advises that the given the location of the site and the nature of the development proposed, there a low risk of flooding as a result of the proposal and that there are no known flooding events in this area and satisfactorily concludes that the risk of flooding as a result of the proposed development is low.

The proposed drainage scheme takes account of the details approved under the outline permission for the site in 2017 and also the fact that the residential parts of that permission have now been built out. It remains the case that surface water drainage by way of infiltration is not achievable on this site. The discharge point for the drainage strategy and the restricted discharge rates remains as previously approved.

The surface water drainage scheme is based on the collection of run-off water from the proposed units as well as the proposed hard surfaced areas in buried attenuation tanks located within the service yard areas of each unit, with outfall flows restricted to greenfield runoff rates.

There is an existing detention basin located in the south-east of the site which is to remain in situ. As part of the original outline approval (which approved the access details), this basin collects runoff from the existing spine road, and this will continue to be case going forward. Other sustainable urban drainage systems, or SuDS, will be used within the overall surface water drainage scheme including permeable paving.

In terms of foul water drainage, it is proposed to install a new pipe network to serve the building units on site which will connect to the existing system as a point within the spine road. This will utilise much of the pipe network previously installed as part of the outline approval.

The proposed drainage schemes have evidenced that the gas main located within the application site has been taken account of.

Whilst Officers are satisfied with the level of detail provided at this stage and the principle of the drainage proposals, it is considered necessary to obtain details of management and maintenance arrangements together with full details of the drainage schemes by way of a condition. Officers are satisfied that the applicant has given due consideration to the hierarchy of sustainable drainage methods as outlined in the NPPF and associated guidance.

In summary, Officers are satisfied that the proposal, subject to the aforementioned requirements to be controlled via condition, is in accordance with Policy CP16 of the Core Strategy, PfE Policy JP-S4 and section 14 of the NPPF.

- *Ground conditions*

The NPPF requires planning decisions to ensure that new development is appropriate for its location. Where a site is affected by contamination or land stability issues, the responsibility for securing a safe development rests with the developer and/or landowner (paragraph 179).

Core Strategy Policy CP17 'Environmental Protection' states that the Council will tackle land contamination and land stability issues, primarily on sites affected by past industrial uses and coal mining activities, by promoting the appropriate re-use of such sites and supporting the identification of contamination and stability issues and appropriate remediation.

In terms of land contamination, a Phase 1 Site Investigation report has been submitted which is considered to be an acceptable preliminary risk assessment. Further investigations and mitigation will be required following demolition and again prior to occupation and these investigations can be captured by a condition.

It is further recognised that the site falls within a Development High Risk Area in relation to coal mining. The applicant has submitted Coal Mining Risk Assessment which has been assessed and deemed acceptable by the Coal Authority. However, further intrusive works are required prior to any works taken place, but it is acceptable that these can be secured by a condition.

Observations on the representations

A number of the points of objection raised in the representations have been addressed within this report, particularly around noise, odour and traffic issues.

.

With regard to the remainder of the points that comprise of material planning considerations:

- The site is not located within the Green Belt, but within an allocated Primary Employment Area.

- The Outline permission granted for this site in 2017 did not include details of the industrial element of the development as the scheme was in outline form only with only details of the access fully approved. The linked residential schemes obtained reserved matters which determined their scale, size and appearance. The industrial element of the outline scheme never received such an approval, hence the need for this application.

Conclusion

Section 38(6) of the Planning and Compulsory Purchase Act 2004 and Section 70(2) of the Town & Country Planning Act 1990 require planning applications to be determined in

accordance with the statutory development plan, unless material considerations indicate otherwise. NPPF paragraphs 11 to 14 also emphasise this requirement.

Following assessment, the proposed development is considered compliant with the relevant national and local planning policy and guidance. The principle of the proposed development, within a Primary Employment Area is acceptable and no significant or unacceptable issues that haven't or can't be suitably mitigated to acceptable levels have been identified in relation to the impact on local residents, highway safety, parking capacity, design or appearance. The proposal therefore meets with the relevant material considerations and the objectives of Place for Everyone, the Core Strategy, saved UDP Policies and the national planning policy objectives contained within the revised NPPF.

The revised NPPF states that development proposals that accord with the development plan should be approved without delay. Whilst the concerns of local residents are noted and have been considered, the proposal is assessed to be consistent with the Development Plan as a whole, as well as the relevant policy objectives within the revised NPPF, the Council's adopted planning guidance and all other material considerations.

On this basis, and for the reasons detailed within this report, Members are therefore recommended to resolve to approve the application subject to the conditions listed within this report.

Human Rights Act 1998

Officers have considered the Human Rights Act 1998 in reaching a recommendation to grant planning permission, subject to conditions. Officers have considered the potential interference with the rights of the owners/occupiers of surrounding properties under Article 8 and/or Article 1 of the First Protocol of the Act and consider that it is proportionate.

Officers have also considered the interference with the human rights of the applicant under Article 8 and/or Article 1 of the First Protocol caused by imposing conditions.

Officers consider that the conditions are necessary to protect the rights and freedoms of others and to control the use of property in accordance with the general interest. The interference is therefore justifiable and proportionate.

Section 17 of the Crime and Disorder Act 1998

Officers have considered, with due regard, the likely effect of the proposal on the need to reduce crime and disorder as part of the determination of this application, in accordance with section 17 of the Crime and Disorder Act 1998. In reaching a recommendation to approve, officers consider that the proposal will not undermine crime prevention or the promotion of community safety.

Officer recommendation

(1). That Committee resolve to approve the application and grant planning permission for the proposed development for the reasons given in this report, subject to the following:

- The conditions specified in this report below;
- Satisfactory completion of a Section 106 Agreement containing the following financial contributions and provisions:
    - Highway contribution of £15,000; and
    - The provision of £199,332 for biodiversity enhancement at Bedford Colliery.

(2) Authority be delegated to the Assistant Director – Legal, Governance and Elections to enter into the said Agreement and to the Director of Place to issue the Decision Notice subject to the satisfactory completion of the above matters; or, if the Section 106 Agreement is not completed within six months of the date of this Committee, to refuse the application at their discretion.

Proposed conditions and reasons for the conditions:

1. The development hereby approved must be begun not later than the expiration of three years beginning with the date of this permission.

Reason: *Required to be imposed pursuant to Section 91 of the Town and Country Planning Act 1990 (as amended).*

2. The development hereby approved shall be carried out in accordance with the details indicated on the following plans and drawings:

- WIG-PHP-00-00-DR-A-4557-001-P37 (site plan);
- WIG-PHP-00-00-DR-A-4557-005- P12 (GA site sections);
- WIG-PHP-00-00-DR-A-4557-004-P12 (site finishes); and
- Drawing number 900 (existing and proposed site levels layout).

<u>Unit 1</u>

- WIG-PHP-01-DR-A-4557-200-P6 (GA Plan – level 00);
- WIG-PHP-01-ZZ-DR-A-4557-400-P4 (GA Section);
- WIG-PHP-01-ZZ-DR-A-4557-300-P6 (elevations);
- WIG-PHP-01-XX-DR-A-4557-202-10 (GA Plans – office);
- WIG-PHP-01-RF-DR-A-4557-205-P4 (roof plan); and
- WIG-PHP-01-01-DR-A-4557-201-P6 (GA Plan – level 01).

<u>Unit 2</u>

- WIG-PHP-02-01-DR-A-4557-200-P3 (GA Plan – level 00);
- WIG-PHP-02-ZZ-DR-A-4557-400-P4 (GA Sections);
- WIG-PHP-02-ZZ-DR-A-4557-300-P3 (elevations);

- WIG-PHP-02-XX-DR-A-4557-202-P4 (GA plans office);
- WIG-PHP-02-RF-DR-A-4557-205-P4 (roof plan); and
- WIG-PHP-02-RF-DR-A-4557-201-P3 (GA Plan – level 01).

Unit 3

- WIG-PHP-03-01-DR-A-4557-201-P7 (GA plan – level 01);
- WIG-PHP-03-01-DR-A-4557-200-P7 (GA Plan – level 00);
- WIG-PHP-03-ZZ-DR-A-4557-400- P5 (GA section A-A);
- WIG-PHP-03-ZZ-DR-A-4557-300-P8 (elevations);
- WIG-PHP-03-XX-DR-A-4557-202-P9 (GA plans office); and
- WIG-PHP-03-RF-DR-A-4557-205 P5 (roof plans).

Unit 4

- WIG-PHP-04-01-DR-A-4500-201-P6 (level 01);
- WIG-PHP-04-00-DR-4500-200-P6 (level 00);
- WIG-PHP-04-ZZ-DR-A-4500-400-P6 (section A-A);
- WIG-PHP-04-ZZ-DR-A-4500-300-P5 (elevations);
- WIG-PHP-04-XX-DR-A-4500-202-P6 (GA office plans); and
- WIG-PHP-04-RL-DR-A-4500-205-P6 (Roof plan).

Reason: *For the avoidance of doubt and to ensure a satisfactory standard of development that is carried out only as approved by the Local Planning Authority, in accordance with the policies contained within the Wigan Local Plan Core Strategy, Places for Everyone, the saved policies of the Wigan Replacement Unitary Development Plan and the National Planning Policy Framework.*

3. Prior to the commencement of any part of the development hereby approved, including site clearance, excavation or construction works or the entry of vehicles or plant into the site, all existing retained trees and hedges on and adjacent to the site, shall be physically protected from damage by plant, equipment, vehicles, excavation, deposit of excavated material and any other cause in accordance with the Tree Protection Plan reference '2262-22-04 rev 02 (1 of 2 and 2 of 2)'. The fencing shall be maintained for the duration of the development operations and no operations or storage whatsoever shall take place within the fenced protection areas of the development site.

Reason: *The measures are necessary prior to the commencement of development since they are fundamental to the initial site preparation works and the existing trees and shrubs represent a visual amenity which the Local Planning Authority consider should be substantially maintained, having regard to Policy CP10 of the Wigan Local Plan Core Strategy, Policies JP-G1, JP-G2 and JP-G8 and saved Policy EV2C of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

4. The use of the development hereby approved shall not commence until the following measures to protect the existing residential properties from noise from the proposed development have been fully implemented:

- The installation of acoustic fencing as detailed in Figure 6.1 “Noise Contour Plot Daytime with Mitigation (LAeq1hour)” of Tetra Tech’s noise report number 784-B034505, Revision 7, dated 14th May 2024, and submitted by the applicant.

Once fully installed, the above approved measures shall be retained thereafter.

Reason: *To minimise the impact of noise on existing development in the vicinity, having regard to Policy CP17 of the Wigan Local Plan Core Strategy, saved Policy EV1B of the Replacement Wigan Unitary Development Plan and the National Planning Policy Framework.*

5. No development approved by this planning permission shall commence until a remediation strategy to deal with the risks associated with contamination of the site in respect of the development hereby permitted, has been submitted to, and approved in writing by, the local planning authority. This strategy will include the following components:

Post any demolition necessary but prior to any further development commencing:

1. An updated site investigation scheme following on-site pressure grouting, including the results of subsequent additional gas monitoring, an updated ground gas risk assessment, and a combustion assessment, identifying the risk to all receptors that may be affected, including those off-site.
2. The results of the updated site investigation and the detailed risk assessment referred to in (1) and, based on these, an options appraisal and an updated remediation strategy giving full details of the remediation measures required, including a Gas Protection Design Report if gas protection measures are required, and how they are to be undertaken.
3. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (2) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

Prior to the occupation of the development:

4. Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved.

Reason: *Prior approval of such details is necessary since they are fundamental to ensure the development does not contribute to and is not put at unacceptable risk from or adversely affected by contamination having regard to Policy CP17 of the Wigan Local Plan Core Strategy, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

6. No development hereby approved shall commence until;

a) A scheme of intrusive investigations has been carried out on site to establish the risks posed to the development by past coal mining activity, and;

b) Any remediation works and/or mitigation measures to address land instability arising from coal mining legacy, as may be necessary, have been implemented on site in full in order to ensure that the site is safe and stable for the development proposed development.

The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.

Reason: *To ensure that the development is not put at unacceptable risk from or adversely affected by stability issues arising from coal legacy issues having regard to policies CP10 and CP17 of the Wigan Local Plan Core Strategy, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

7. Prior to the first occupation of any part of the development hereby approved, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.

Reason: *To ensure that the development is not put at unacceptable risk from or adversely affected by stability issues arising from coal legacy issues having regard to policies CP10 and CP17 of the Wigan Local Plan Core Strategy, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

8. Notwithstanding the details hereby approved, the first occupation of any building hereby approved shall not commence until all screen walls and/or fences associated with that building have been installed in accordance with plan reference 'WIG-PHP-00-00-DR-A-4557-001-P37'.

Reason: *To ensure that the details of the development are satisfactory and in order to protect the amenities of local residents, having regard to Policies CP10 and CP17*

of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.

9. Prior to occupation of any part of the buildings hereby approved, an Electric Vehicle Infrastructure Strategy and Implementation Plan shall be submitted to, and approved in writing by, the Local Planning Authority. The scheme shall include details of the number, location and maintenance of electric vehicle charging points for each unit, amounting to a minimum of 5% of the total vehicle parking provision within the development. The electric vehicle charging points shall be implemented in accordance with the approved details and timescales for implementation, with the agreed details maintained in a working manner thereafter. The Implementation Plan will provide details of how the future installation of electric charging points associated with that phase could occur in parking or servicing areas not provided with charging points from the outset.

Reason: *To ensure that adequate provision is made for smart electric vehicle charging points on the site; and to establish measures to encourage non-car modes of transport having regard to Policies CP7 and CP17 of the Wigan Local Plan Core Strategy, Places for Everyone Policy JP-S5 and saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

10. Prior to the first occupation of the buildings hereby approved, a scheme for the provision of cycle parking for the respective building, in accordance with the Council's relevant standards in force at the time, must be submitted to, and approved in writing by, the Local Planning Authority. The scheme shall also be implemented as approved before the respective building is brought into use and shall be retained as such thereafter. Notwithstanding the provisions of the Town and Country Planning Act (General Permitted Development) Order 1995 (or any Order revoking or re-enacting that Order) no building works, which reduces this provision, shall take place except following the express grant of planning permission by the Council.

Reason: *To provide secure cycle storage arrangements, and to encourage sustainable modes of transport having regard to Policies CP7, CP10 and CP17 of the Wigan Local Plan Core Strategy, Policy JP-C6 of Places for Everyone and the revised National Planning Policy Framework.*

11. The use of the development hereby approved shall not commence until the provision of vehicle parking spaces within the site has been implemented in accordance with the details shown on approved drawing reference 'WIG-PHP-00-00-DR-A-4557-001-P37'. Notwithstanding the details hereby agreed within Condition 2 (plans) of this permission, any new hard surface(s) shall be made of porous materials, or provision shall be made to direct run-off water from the hard surface(s) to a permeable or porous area or surface within site.

Reason: *To ensure there is not a negative impact on the surrounding highway network, having regard to Policy CP7 of the Wigan Local Plan Core Strategy, saved*

Policy A1S of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework, and to protect neighbouring amenity having regard to Policy CP17 of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.

12. The development hereby approved shall be constructed and undertaken in accordance with the physical security specifications as set out in the Crime Impact Statement (reference '2022/0247/CIS/01, Version A', dated:11 May 2023).

Reason: *To ensure the development is designed to reduce the risk of crime and anti-social behaviour, in accordance with Wigan Local Plan Core Strategy Policies CP10 and CP17 and the revised National Planning Policy Framework.*

13. No development works shall take place until details of a Construction Training and Employment Management Plan (CT&EMP) relevant to the development hereby approved has been submitted to, and approved in writing by, the Local Planning Authority. The CT&EMP will aim to promote training and employment opportunities for local people and include:

- Measures to ensure the owner and contractors work directly with local employment and training agencies;
- Targets for employing local labour;
- Targets for work experience opportunities;
- Measures to provide training opportunities in respect of any new jobs created; and
- Requirements to submit monitoring information on the plan at regular intervals to the Local Planning Authority.

The development shall be carried out in accordance with the agreed CT&EMP and any amendments to the CT&EMP shall be agreed in writing with the Local Planning Authority.

Reason: *Prior approval of these details is required as they are fundamental in order to ensure the development contributes positively to the local economy and employment provision in the area, in accordance with Policies JP-J1 and JP-J2 of Places for Everyone and the revised National Planning Policy Framework.*

14. No development hereby approved shall be occupied until details of a Training and Employment Management Plan (T&EMP) relevant to that phase / hereby approved building, has been submitted to, and approved in writing by, the Local Planning Authority. The T&EMP(s) will aim to promote training and employment opportunities for local people and include:

- Measures to ensure the owner and contractors work directly with local employment and
- training agencies;
- Targets for employing local labour;
- Targets for work experience opportunities;

- Measures to provide training opportunities in respect of any new jobs created; and
- Requirements to submit monitoring information on the plan at regular intervals to the Local Planning Authority.

The development shall be occupied in accordance with the agreed T&EMP(s) and any amendments to the T&EMP(s) shall be agreed in writing with the Local Planning Authority.

Reason: *Prior approval of these details is required as they are fundamental in order to ensure the development contributes positively to the local economy and employment provision in the area, in accordance with Policies JP-J1 and JP-J2 of Places for Everyone and the revised National Planning Policy Framework.*

15. Notwithstanding the details hereby approved, prior to the commencement of any development hereby approved including site clearance and remediation, no development shall take place until a site-specific Construction Environmental Management Plan (CEMP) has been submitted to, and has been approved in writing by, the Local Planning Authority. The CEMP must demonstrate the adoption and use of the best practicable means to reduce the effects of noise, vibration, dust and site lighting and shall include, as a minimum, the following details:

-Schedule of demolition and construction works and programme dates.
- Hours of construction which shall not exceed the following hours:
08:00-18:00, Monday to Friday,
08:00-13:00 on Saturdays,
- No construction work taking place on Sundays or Public Holidays, and
- Deliveries to the site, the removal of plant, equipment, machinery and waste from the site and the exportation or importation of materials to the site will not be allowed to take place between 08:00-09:00 and 15:00-16:00, Monday to Saturday, and not all on Sundays or Public Holidays
- Traffic Routes.
-Measures to control disruption.
- Methods to be employed to control and monitor noise, dust (based on a risk assessment in accordance with the latest Institute of AQM document 'Guidance on the assessment of dust from demolition and construction - 2014') and vibration impacts.
- Health and Safety requirements.
- Monitoring and Management.
- Construction Heavy Goods Vehicle routing.
- Details of the precautions to be taken to prevent the deposit of mud, grit and dirt on public highways by vehicles travelling to and from the site.
- A management plan to control surface water runoff during the construction phase and measures to be adopted to mitigate the risk to ground and surface waters from contaminated surface runoff.
- Measures for controlling the use of site lighting whether required for safe working or for security purposes.
- Procedures for maintaining good public relations including complaint management, public consultation and liaison.

The approved scheme shall be implemented to the full written satisfaction of the Local Planning Authority before the construction works are commenced and shall be maintained for the duration of the construction works.

Reason: *Prior approval of such details is necessary since they are fundamental to the initial site preparation works, to safeguard the amenities of the adjoining premises and the area generally, to provide an acceptable level of mitigation for air quality and to ensure surface water is appropriately managed during the construction phase and to provide for the safety and convenience of users of the highway and for the free flow of traffic, having regard to Policies CP7, CP16 and CP17 of the Wigan Local Plan Core Strategy, Policies JP-S5 and JP-C4 of Places for Everyone, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

16. The development hereby approved shall be carried out in accordance with the submitted Energy Statement (CPW, 220568) at all times.

Reason: *To ensure that the development provides a suitable amount of energy from low carbon sources in accordance with Policies CP10 and CP13 of the Wigan Local Plan Core, Places for Everyone Policy JP-S2 and the revised National Planning Policy Framework.*

17. The development hereby approved in relation to the employment units, as shown on drawing reference 'WIG-PHP-00-00-DR-A-4557-001-P37 (Proposed Site Layout)', shall be constructed to achieve a minimum rating of Building Research Establishment Environmental Assessment Method (BREEAM) 2014 'Very Good'. Within 12 months of the occupation of each unit, or within alternative timescales to be previously agreed in writing with the Local Planning Authority, the relevant certification demonstrating that BREEAM 'Very Good' has been achieved for the relevant unit shall be submitted to, and approved in writing by, the Local Planning Authority.

Reason: *To provide opportunities to maximise the sustainability of the development and to contribute to air quality improvements, having regard to Policy CP17 of the Wigan Local Plan Core Strategy, Policies SD1, JP-P6, JP-S2 and JP-S3 of Places for Everyone, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

18. With the exception of the detailed matters referred to by the conditions of this planning permission, the development hereby approved shall be carried out in accordance with the material details as specified in the approved plans listed in Condition 2 of this planning permission.

Reason: *To ensure that the external appearance of the buildings is satisfactory, having regard to Policy CP10 of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.*

19. Prior to the commencement of development hereby approved (excluding any demolition works), details of a sustainable surface water drainage scheme and a foul water drainage scheme shall be submitted to, and approved in writing by, the Local Planning Authority. The drainage schemes must include:

(i) An investigation of the hierarchy of drainage options in the National Planning Practice Guidance (or any subsequent amendment thereof). This investigation shall include evidence of an assessment of ground conditions and the potential for infiltration of surface water in accordance with BRE365;

(ii) A restricted rate of discharge of surface water agreed with the local planning authority (if it is agreed that infiltration is discounted by the investigations);

(iii) Levels of the proposed drainage systems including proposed ground and finished floor levels in AOD;

(iv) Incorporate mitigation measures to manage the risk of sewer surcharge where applicable; and

(v) Foul and surface water shall drain on separate systems.

The approved schemes shall also be in accordance with the Non-Statutory Technical Standards for Sustainable Drainage Systems (March 2015) or any subsequent replacement national standards. Prior to first occupation of any part of the proposed development, the drainage schemes shall be completed in accordance with the approved details and retained thereafter for the lifetime of the development.

Reason: *Prior approval of such details is necessary since they are fundamental to promote sustainable development and ensure that the development will be safe for its lifetime and to ensure flood risk is not increased elsewhere having regard to Policies CP16, CP17 of the Wigan Local Plan Core Strategy, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

20. Prior to the first use of the development hereby approved, a sustainable drainage management and maintenance plan for the lifetime of the development shall be submitted to the Local Planning Authority and agreed in writing. The sustainable drainage management and maintenance plan shall include as a minimum:

(i). Arrangements for adoption by an appropriate public body or statutory undertaker, or, management and maintenance by a management company; and

(ii). Arrangements for inspection and ongoing maintenance of all elements of the sustainable drainage system to secure the operation of the surface water drainage scheme throughout its lifetime.

The development shall subsequently be completed, maintained and managed in accordance with the approved plan.

Reason: *Prior approval of such details is necessary since they are fundamental to promote sustainable development and ensure that the development will be safe for its lifetime and to ensure flood risk is not increased elsewhere having regard to Policies CP16, CP17 of the Wigan Local Plan Core Strategy, saved Policy EV1B of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

21. The use of each building within the development hereby approved shall not commence until a scheme including the siting and appearance of refuse and recycling storage facilities within the site, has been implemented for the respective building in accordance with details previously submitted to, and approved in writing by, the Local Planning Authority. The agreed details shall be maintained at all times thereafter.

Reason: *To provide a secure waste and recycling area within the development and to assimilate the scheme into the wider area, having regard to Policies CP10 and CP17 of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.*

22. The development hereby approved shall adhere to the approved External Lighting Statement and Plan (reference: 70090159, September 2023, WSP). The approved details shall be maintained for the lifetime of the development.

Reason: *To ensure safe pedestrian access is provided along the planned footpath routes, to promote active travel, to safeguard the ecological value of the area and to safeguard the amenity of neighbouring amenity, having regard to Policies CP7, CP10, CP12 and CP17 of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.*

23. Prior to any earthworks or vegetation clearance taking place at the site, a method statement detailing control and/or avoidance measures Giant Hogweed present on, or affecting, the site shall be submitted to, and agreed in writing by, the Local Planning Authority. The agreed method statement shall be adhered to and implemented in full accordance with the approved details at all times.

Reason: *Prior approval of such details is necessary since they are fundamental to ensure the development is not put at unacceptable risk from, or adversely affected by, and would not lead to the spread of invasive species, having regard to Policy JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

24. Prior to any vegetation clearance or earthworks being undertaken at the site, a reasonable avoidance measures method statement for mammals and amphibians covering both the site clearance and construction phase, shall be submitted to, and

agreed in writing by, the Local Planning Authority. Development shall only be carried out in complete accordance with the approved details.

Reason: *Prior approval of such details is necessary since they are fundamental to ensure the development does have a detrimental impact on mammals having regard to Policy JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

25. No removal of, or works to, any trees and shrubs or works to or demolition of buildings and structures that may be used by breeding birds shall take place on site between 1st March and 31st August inclusive, unless a competent ecologist has undertaken a careful, detailed check of vegetation and structures for active birds' nests immediately before the vegetation is cleared or works commence and provided written confirmation that no birds will be harmed and/or that there are appropriate measures in place to protect nesting bird interest on site. Any such written confirmation should be submitted to the local planning authority.

Reason: *To ensure that the proposals would not have a detrimental impact on nesting birds, having regard to having regard to Policy JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

26. The development hereby approved shall proceed in accordance with the agreed mitigation approach for Great Crested Newts as outlined in the submitted Ecological Assessment (reference '19314-Eco_B', dated: 7 September 2023 and prepared by The Ecology Practise) and the submitted District Level Licensing Certificate (enquiry number: 'DLL-ENQ-GMAN-00027') unless otherwise agreed in writing by the Local Planning Authority before any works take place.

Reason: *To ensure that the proposals would not have a detrimental impact on great crested newts, having regard to having regard to Policy JP-G8 of Places for Everyone and the National Planning Policy Framework.*

27. The development hereby approved shall adhere to the submitted Ecological Assessment (reference: '19314-Eco_B', dated 7 September 2023 and prepared by The Ecology Practise) at all times.

Reason: *To ensure that the proposals would not have a detrimental impact on protected species, having regard to having regard to Policy JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

28. The development hereby approved shall adhere at all times to the recommendation outlined in section 4.2 of the accompanying Bat Report (reference: '19314-BR_A', dated: April 2024 and prepared by The Ecology Project).

Reason: *To ensure that the proposals would not have a detrimental impact on bats, having regard to having regard to Policy JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

29. Notwithstanding the details shown on the hereby approved plans, prior to the commencement of any above ground works on site, a biodiversity management and maintenance plan for a period of 30 years, including the initial management and maintenance for new tree planting within the development, shall be submitted to, and approved in writing by, the Local Planning Authority. The agreed plan shall be implemented in full accordance with the agreed details thereafter.

Reason: *To enhance the ecological value and biodiversity across the development site, in accordance with Policy JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

30. Notwithstanding the details hereby approved, prior to the commencement of the construction of any buildings or hard surfaces hereby approved, full details of the soft landscape works, with an associated implementation plan, shall be submitted to, and approved in writing by the Local Panning Authority. These details shall include:-

- Schedules of plants and trees, noting species, plant sizes and proposed numbers/densities.

All planting shall be implemented in accordance the management and maintenance plan to be secured under Condition 29. Any trees or plants which die, become diseased, or are removed during the maintenance period shall be replaced with specimens of an equivalent species and size.

Reason: *Prior approval of such details is necessary since they are fundamental to ensure the development would be assimilated into its surroundings and for the protected of neighbouring residents, and to enhance the ecological value and biodiversity across the development site, having regard to Policies CP10 and CP17 of the Wigan Local Plan Core Strategy, Policies JP-G1, JP-G2 and JP-G8 of Places for Everyone and the revised National Planning Policy Framework.*

31. Except for site clearance and remediation, and notwithstanding the details hereby approved, no development shall take place until full details in the form of scaled plans and/or written specifications have been submitted to, and approved in writing by, the Local Planning Authority to illustrate the following:

a) The measures to be taken to protect the use of the retained Public Right of Way during the construction phase.
b) Method(s) of surface materials and edging of the diverted Public Rights of Way.

The development shall be carried out in accordance with the approved drawings and details.

Reason: *To ensure a satisfactory development of the site and a satisfactory standard of the finished design of the Public Right of Way in the interests of the amenity, accessibility and convenience of users of the Public Right of Way, having regard to Policies CP7 and CP10 of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.*

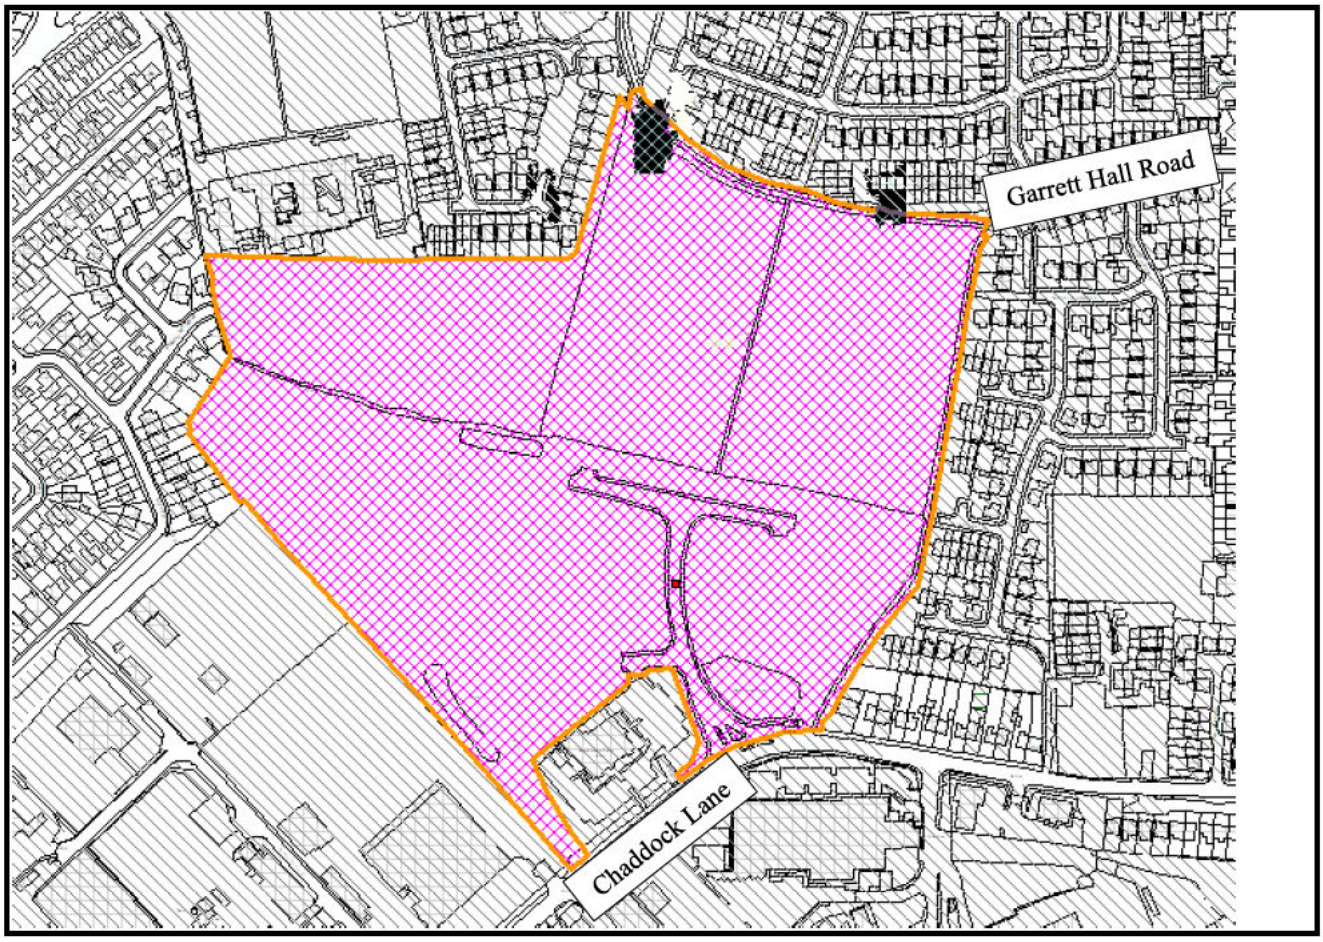
32. Except for site clearance and remediation, and notwithstanding the details hereby approved, no development shall take place until full details in the form of scaled plans and/or written specifications have been submitted to, and approved in writing by, the Local Planning Authority to illustrate the following details:

a) All types of surfacing (including tactile paving), kerbing and edging, and
b) full working drawings for showing the parking areas with pedestrian links to each of the units hereby approved.

The development shall be carried out in accordance with the approved drawings and details prior to first occupation of the development unless otherwise agreed in writing by the Council as Local Planning Authority.

Reason: *To ensure a satisfactory development of the site and a satisfactory standard of highway and footpath design and construction in the interests of highway and pedestrian safety and the amenity and convenience of highway users and pedestrians having regard to Policies CP7 and CP10 of the Wigan Local Plan Core Strategy, saved Policy A1S of the Wigan Replacement Unitary Development Plan and the revised National Planning Policy Framework.*

33. No materials or equipment shall be stored on the site outside the hereby approved buildings, save that waste and/or recycling materials that may be kept in appropriate facilities for removal periodically.



Reason: *To safeguard the amenities of the adjoining premises and the area generally and to ensure the appearance of the development is satisfactory, having regard to Policies CP10 and CP17 of the Wigan Local Plan Core Strategy and the revised National Planning Policy Framework.*

Application number: A/23/96226/MAJOR

Development Proposed: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works

Location: Land at Astley Park Way, Worsley.

Ward: Tyldesley and Mosley Common.

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Dear Mr Thatcher

Further to the last Wigan MPs meeting at the Town Hall, Michael has received the below email from the Action Group representing the residents impacted by the PLP development in Astley.

Please can you confirm that the residents will be receiving a response as soon as possible.

Please can I also ask that Michael be sent a copy of this response.

Kind regards

Jennifer

Subject: Awaiting response to Open Letter

Aidan,
On Wednesday last week, we published an open letter to Wigan Council accompanied by a video highlighting just some of the issues we have faced in the planning and construction at Astley Business Park.
With more than half a million views and thousands of supportive comments / likes, it's very alarming that the one comment or reply we haven't received is from Wigan Council.
Can you please address our letter, which is as follows:
Open Letter to Wigan Council & PLP
Wigan Council and PLP, you have betrayed us.
Our community is being forced to live in the shadow of four giant warehouses, 18 metres high, dumped next to our homes and our schools.
It is destroying people's lives.
Neighbours who never needed medication are now on anti-depressants. People are lying awake at night from stress. Families sit at the kitchen table in tears because their homes cannot be sold. Children breathing in dust clouds are already suffering with health problems, and they will now grow up under floodlights, with diesel lorries thundering past 24 hours a day, seven days a week.
And you let this happen.

The maps given to the Planning Committee did not even show many of our houses. It was as if we did not exist. Ninety-six objections were submitted, yet the officer's report claimed there were only 70.
A field full of wildlife and mature trees has been ripped apart, and the warehouses are now dangerously close to homes, raising serious fire safety issues.
And the worst thing. At the planning meeting, those who spoke up to object were publicly laughed at by the councillors who are supposed to represent them. One even suggested 'ask them to turn the noise down after 8pm'.
You have left us without any communication or support to deal with the impending 24/7 HGV noise, reversing alarms and pollution. Floodlights blasting into bedrooms. There have been cracks in homes, sales falling through, house values hit, and for what? A Whistl factory powered by automated robots, which will supposedly bring jobs to the area.
To add insult to injury, nearly £200,000 of "biodiversity money" from PLP, has gone to Bedford Colliery, miles away. Not a penny of it in our area. We have lost our fields and wildlife, and are left with grey prison walls and a concrete jungle.
We want answers. We demand accountability from the people who signed this off and not simply the suggestion of planting some saplings that may make a small difference in 30 years' time.
We want to know why our objections disappeared, why our houses were missing from the maps, why the consultation was rushed and handled so badly.
We want proper fire safety and environmental checks.
And finally, we want a real solution going forward.
We are not going away. We are over a thousand strong, and have the nation backing us.
You can bulldoze fields.
You will not bulldoze us.
Astley Warehouses Action Group

Cc: Thatcher, Aidan; [redacted]
Subject: RE: Astley Warehouses

Hi David

[redacted] and I visited the site this morning and met with [redacted]. Here is a summary of our findings:

No particular high risk dust sources of concern at this point in construction. The earth mounds around the boundary are mostly compact and vegetated. One mound that is currently being added to will be compacted with priority after our suggestion (this is the section of the bund in the south east corner of the site which has not yet been complete) . This should minimise wind whipping of loose materials on the mound to the adjacent residential. No visual evidence of any dusts settled in the residential areas beyond the boundary, site was well dampened and trackout minimal. Aggregate piles are mostly stones, so not highly dust generating. I did notice one sand aggregate pile near the office that was in use for concrete mixing. I have advised that all fine particulate aggregates and other similar stocks are covered with sheeting. This was agreed.

The site manager produced evidence of daily visual inspections and PM10 monitoring was shown. This is being done three times a day (morning, midday, and afternoon). The Dust Management Plan was also shown to us. All other logs as per the CEMP are being kept and updated. A copy of the IAQM Risk Assessment recommendations (taken from the applicants AQ assessment submitted as part of the planning application) was discussed and this highlighted that, where practical, the stated measures are being undertaken. We discussed that the site has incorporated measures to control AQ and dust beyond and in addition to those in the CEMP – e.g the PM10 monitoring. On this basis, it was advised that the IAQM RA is reviewed and all measures that are being used on site are inserted into the CEMP as a revision of the live document via condition discharge.

We discussed the recent request for extended hours of operation for the specific purpose of power floating operations. The site manager confirmed that the activities would be internal only, carried out by two operatives using a machine which makes a similar sound to a generator. The wagons bringing the concrete on site would arrive during permitted hours (i.e. before 6pm) but the power floating operation would continue until midnight Monday-Friday for a period of 5 weeks, depending on site conditions. The site manager advised that the operators could park outside of the site so that no vehicles would enter or leave during the extended hours. From what we were told this morning, it sounds like the activities would have very little impact on the amenities of local residents and I was satisfied that the site manager had explored all other alternatives but given the nature of the process, none avoid working beyond the permitted hours. My view on this is to invite this amendment to be included in the application to discharge the CEMP again (as outlined above). Does this sound reasonable?

[redacted] were satisfied that there are no further measures required to minimise the stated impacts at this time. Furthermore, it was noted that the majority of higher risk works have been

completed, and it is more a case of keeping on top of the measures in place, stepping up control measures where applicable, when direct/detailed complaints are received, and being vigilant during the remaining earthworks and concreting. The site manager was asked if they had received direct complaints on this subject and they confirmed they had but they weren't specific to location/time etc but more of a general complaint. Also, the site manager confirmed that they had received no direct complaints from the local school.

Apologies for the detailed response but I hope this helps in advance of your meeting on Thursday.

Regards,

Hi all,

See the latest below from the residents' group at Astley. Can we pick up with the contractor / site manager please about measures to control dust / wind-borne material leaving the site? We want to be able to provide assurance that the CEMP is being complied with.

Our meeting is Thursday so before that please, let me know if any issues.

Thanks
David

Good morning Christine.
I just wanted to keep you informed of trends developing via the residents complaints of late.
More and more complaints of rat infestation.
Several parents have notified us of breathing problems developing in children. Parent speaking to [redacted] (MEN) re her daughter's recently diagnosed asthma.
Lagging from the site (dangerous if inhaled or touched) being blown onto pathways and into peoples gardens. (TANRO informed)
Thanks again for all your support. We have a Teams meeting with Proctor / Thatcher scheduled for October 2nd.

Subject: RE: Query about planning approval

Morning,

I understand that several (if not all) members of the Committee have been approached with similar questions. There is a standard form of words for responding to queries on this topic, which the Leader asked for and has OK'd. It is:

Planning Committee considered this application in June 2024 (reference A/23/96226/MAJOR), and the planning permission was issued on 14th August 2024 once the required Section 106 agreement had been signed. There would have been a six-week window from 14th August within which any legal challenge to the planning permission had to be made – no such challenge was received and so the permission stands.

In consulting on the application the Council wrote directly to 99 residential properties in the vicinity of the site and placed site notices in the locality. All comments received were taken into account and the issues raised were reported to Committee.

The permission includes screen landscaping to be planted on bunds between the new buildings and the existing areas of housing. This should start to be planted from November onwards and will begin to soften the appearance of the development as it includes semi-mature trees, though it is recognised that the planting will take a period of time to fully mature.

We do recognise that developments under construction cause disruption for communities, and our teams have been proactively monitoring the site to ensure that the plans and the relevant planning conditions are being complied with. This has included taking measurements of the buildings and the bunds (which are partially constructed at present), and no issues have been found. If residents believe that any requirements are not being complied with, they can report this via our website and our team will investigate.

Officers met with representatives of a residents' group on 2nd October. The meeting covered a wide range of issues, and the group have agreed to submit a list of further questions which will be responded to.

Trust this assists.

Regards
David

To: [redacted] Thatcher, Aidan
Cc: [redacted]
Subject: RE: URGENT: Withington Drive, Astley- Warehouses

Thanks [redacted] suggested statement:

Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.

"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.

"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."

Ends

The key issue seems to be that residents feel they didn't know about the full application etc so I've focused on that rather than planning being on site during construction.

It would helpful to have the heads up on public meetings etc if they come into your team, as we can then hopefully be a bit more prepared 😊

Thanks,

[redacted]

Sent: 29 August 2025 11:24
To: Thatcher, Aidan ; [redacted]
Cc: Maguire, Therese
Subject: RE: URGENT: Withington Drive, Astley- Warehouses

[redacted]

My draft statement below that I've summarised - from the attached correspondence, David to the local MP, Legal and DM Team Leader to the local Cllr – the best I can whilst defending the Council's on this and the Planning Committee's decision.

Wigan Council understands that residents have concerns about the size and location of the new warehouses being built at Astley Park Industrial Estate, an allocated primary employment area, especially while construction is ongoing and the buildings are not yet finished.
The development was approved through a full planning application, which included detailed plans for the buildings, in accordance with the relevant planning policy and guidance. We understand there may be some confusion due to earlier approved outline plans, which were more general and didn't set the final size or layout of the buildings.
Council Officers are monitoring the site to make sure the work matches what was approved.
Once construction is complete, landscaping, including tree planting and bunds, will be added to help reduce the visual impact of the buildings.
The Council is committed to working with residents and the developer to make sure the development, which is expected to bring benefits to the area, including new jobs and investment, is delivered properly.

Hope this is of assistance, regards,

[redacted]

Subject: RE: URGENT: Withington Drive, Astley- Warehouses

Morning all,
I'm in the process of compiling the information on this to inform a statement for Aidan – it has a complex planning history – but the crux is the development is acceptable, has a lawful planning permission and has been assessed, and can continue to be assessed, if necessary, by the Council's planning enforcement team.
I'll have this completed and returned to Aidan by 11am – the response below you've drafted Kasia is only a part of the issue here.
Kind regards,

[redacted]

Subject: FW: URGENT: Withington Drive, Astley- Warehouses
Importance: High

Hello,

To update- they are also planning to run this piece on lunchtime news today, so we need to provide a statement asap.
[redacted] - Do we recognise anything in the allegation that the units have completely changed, or are we content that they are as expected- it sounds like we are from the below, but just checking?
Aidan for info- original enquiry attached and this is the full address given- Astley Park Way, Chaddock Ln, Worsley, Manchester M28 1FJ
I've assumed these are the warehouses that [redacted] helpfully shared a member enquiry response about (below) and drafted up this as a starting point:
Aidan Thatcher, director of place at Wigan Council, said: "We fully appreciate the concerns raised by residents living close to the site, especially during construction when the unfinished development can appear stark and intrusive.
"Out Planning and Enforcement teams have been on site, and have verified that the building is in the right location and being built to the height as approved in the plans. The final plans include landscaping which will help to screen and soften the appear, and mitigate the impact on nearby properties.
"Details re consultation…
"We will continue to monitor the site throughout construction."
Ends
Thanks,

[redacted]

Hi all

Sorry to chase- I've been given a deadline of noon today to respond to this enquiry and it's for BBC North West this evening.

I've attached the original query.

Thanks,

Subject: RE: Withington Drive, Astley- Warehouses

Afternoon [redacted]
If it's the same development I believe it is, Planning and Regeneration have received correspondence from elected Members on the matter.
The below is the body of text taken form one of those responses – given it was personal to a constituent please do not share or pass on the below. If any queries do come up, we'll be happy to engage with a response, but hopefully the below gives you a bit of context at this stage:

> *Thank you for your recent correspondence on behalf of your constituents regarding the development of warehousing units at Astley Park Industrial Estate, under planning permission reference: 'A/23/96226/MAJOR'.*
> *I fully appreciate the concerns raised by residents living close to the site, particularly during the construction phase when the unfinished development can appear stark and intrusive. Officers within both the Planning and Enforcement teams are aware of these concerns and are actively monitoring the situation to ensure compliance with the approved plans.*
> *Following a recent site inspection by one of our Planning Enforcement Officers, I can confirm that Unit 1 is currently under construction. During the visit, the Officer used a measuring tool to verify the height of the structure, which was recorded at 18.3 metres, a height consistent with the height of the unit on the approved plans. The unit is also correctly positioned in accordance with the approved site layout.*
> *In direct response to your request, I have attached the following approved documents for reference:*
> - *The site layout plan, showing the location of all approved units.*
> - *The elevational drawing for Unit 1.*
> - *The landscaping scheme for the area surrounding Unit 1, including details of the bund and proposed tree planting.*
>
> *While the bund identified within the drawings has already been formed on site, the necessary landscaping works have not yet commenced due to the ongoing construction. Once implemented, the landscaping will provide additional screening and help soften the visual impact of the development on neighbouring properties.*
> *In response to previous enquiries on this development, links to the approved plans and guidance on how to access them have been shared with residents. I acknowledge that the constituents who contacted you may not be aware of this facility. For ease of access, the approved plans can be viewed on the Council's website using the application reference number A/23/96226/MAJOR via the following link:*

[Search and comment on planning applications]

Monitoring of the site by the Council's Planning Enforcement Officers is ongoing and will continue throughout the construction period. Further visits will be undertaken as necessary to ensure that the development is being carried out in accordance with the approved plans and conditions.

I hope this response provides clarity and reassurance to both you and your constituents that the Council remains committed to working constructively with local residents and the developer to ensure the delivery of a high-quality scheme, in full accordance with the approved planning permission.

Hope this helps, regards,

Hi [redacted]

We've been tagged into a facebook post about warehouses on Withington Drive- it's getting a lot of engagement so I'm expecting an enquiry on it.

The general jist is that people feel they are bigger and closer than on the plans, and they were not consulted.

Is there any background to this one please?

Thanks

Subject: Warehouses- Letter

Hello,

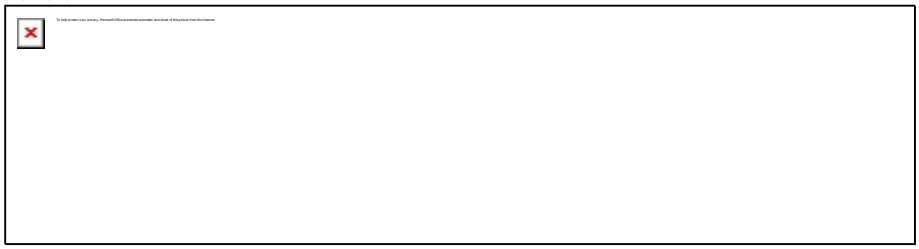
[redacted] has just asked me to share the latest of what we've sent to the press, in case it helps with the letter to the steering group:

Response:
Aidan Thatcher, director for place at Wigan Council, said: "This planning application went through our planning consultation and committee process.
"The final plans include landscaping which will help to screen and soften the appearance, and mitigate the impact on nearby properties.
"We will continue to monitor the site throughout construction, ensuring this development bringing new jobs and investment to the area is delivered properly."

Ends

For context:

- This land has been allocated as employment land since 2006.
- The outline planning application for this site approved the principle of industrial development on this site, which is an extension of Astley Business Park, in 2017.
- The outline planning permission did not set final size or layout of the buildings, but we appreciate this planning process may be the cause of some of the confusion.



- The full planning application went to committee in June 2024, which set out the size, footprint and height of the units and there has been no fundamental change to those since permission was granted.
- Ahead of this letters were sent to 99 neighbouring properties, site notices were displayed, and a press notice was published in the Leigh Journal. The application received approximately 100 individual responses from the residents of approximately 70 addresses in the area. All objections raised were fully considered during the decision-making process.
- The development will create around 500 on-site jobs, and another estimated 460 across Greater Manchester.

Would you mind sharing the letter with us please, as we'd expect it to be shared with the media?

Thanks

Our reference: DP/MEM005772-2
Please ask for: David Proctor
Extension: 89126
Direct line: 01942 489126

Date: 7 August 2025

Dear Michael,

Thank you for your recent correspondence on behalf of your constituents regarding the development of warehousing units at Astley Park Industrial Estate, under planning permission reference: 'A/23/96226/MAJOR'.

I fully appreciate the concerns raised by residents living close to the site, particularly during the construction phase when the unfinished development can appear stark and intrusive. Officers within both the Planning and Enforcement teams are aware of these concerns and are actively monitoring the situation to ensure compliance with the approved plans.

Following a recent site inspection by one of our Planning Enforcement Officers, I can confirm that Unit 1 is currently under construction. During the visit, the Officer used a measuring tool to verify the height of the structure, which was recorded at 18.3 metres, a height consistent with the height of the unit on the approved plans. The unit is also correctly positioned in accordance with the approved site layout.

In direct response to your request, I have attached the following approved documents for reference:

- The site layout plan, showing the location of all approved units.
- The elevational drawing for Unit 1.
- The landscaping scheme for the area surrounding Unit 1, including details of the bund and proposed tree planting.

While the bund identified within the drawings has already been formed on site, the necessary landscaping works have not yet commenced due to the ongoing construction. Once implemented, the landscaping will provide additional screening and help soften the visual impact of the development on neighbouring properties.

In response to previous enquiries on this development, links to the approved plans and guidance on how to access them have been shared with residents. I acknowledge that the constituents who contacted you may not be aware of this facility. For ease of access, the

approved plans can be viewed on the Council's website using the application reference number A/23/96226/MAJOR via the following link:

Search and comment on planning applications

Monitoring of the site by the Council's Planning Enforcement Officers is ongoing and will continue throughout the construction period. Further visits will be undertaken as necessary to ensure that the development is being carried out in accordance with the approved plans and conditions.

I hope this response provides clarity and reassurance to both you and your constituents that the Council remains committed to working constructively with local residents and the developer to ensure the delivery of a high-quality scheme, in full accordance with the approved planning permission.

Yours sincerely,

David Proctor

Hi

This was a major that went to committee in June. A copy of the Section 106 is attached, and on civica and needs to be redacted please.

The decision is due on 16 August, but if it can go before then that would be great.

Thanks

RECITALS

(A) The Council is the local planning authority for the purposes of the 1990 Act for the area in which the Site is located and a local authority for the purposes of the Acts.

(B) The Council is the highway authority for the purposes of the 1980 Act.

(C) The obligations contained in this Deed are planning obligations for the purposes of section 106 of the 1990 Act and covenants under the 1990 Act.

(D) The First Owner owns the freehold interest in the First Property registered at the Land Registry with Title Absolute.

(E) The Second Owner owns the freehold interest in the Second Property registered at the Land Registry with Title Absolute.

(F) The Chargee has an interest in the First Property by way of two registered charges over title number MAN117935 dated 19 September 2013 and 6 July 2020.

(G) The Application was submitted to the Council on 3 October 2023.

(H) On 11 June 2024 the Council's Planning Committee resolved to approve the Application subject to conditions and the completion of this Deed.

(I) The parties have agreed to enter into this Deed to secure the planning obligations and covenants contained herein with the intention that they may be enforced by the Council against the First Owner and its respective successors in title.

IT IS AGREED

1. DEFINITIONS AND INTERPRETATION

1.1 The following words and phrases shall, unless the context otherwise requires, bear the following meanings:-

"1980 Act"	means the Highways Act 1980 (as amended);
"1990 Act"	means the Town and Country Planning Act 1990 (as amended);
"2007 Agreement"	means the agreement made pursuant to Section 106 of the 1990 Act dated 28 August 2007 between the Council (1) and Peel Investments (North) Limited (2)
"2009 Agreement"	means the agreement made pursuant to Section 106 of the 1990 Act dated 27 March 2009 between the Council (1) and Peel Investments (North) Limited (2)
"2012 Agreement"	means the agreement made pursuant to Section 106 of the 1990 Act dated 19 November 2012 between the Council (1) and Peel Investments (North) Limited (2)
"2017 Agreement"	means the agreement made pursuant to Section 106 of the 1990 Act dated 24 February 2017 between the Council (1) and Peel Investments (North) Limited (2) and Lloyds Bank Plc (3) as varied by the 2018 Agreement
"2018 Agreement"	means the agreement made pursuant to Section 106 of the 1990 Act dated 20 December 2018 between the Council (1) and Peel Land (Intermediate) Limited (2) and Peel Investments (North) Limited (3) and Lloyds Bank Plc (4)
"Acts"	means section 111 of the Local Government Act 1972, section 33 of the Local Government (Miscellaneous Provisions) Act 1982 and section 1 of the Localism Act 2011;
"Application"	means the application for planning permission for the Development received by the Council and allocated reference number A/23/96226/MAJOR;
"BCIS Index"	means the Building Cost Information Service All in tender Price Index produced by RICS or if such index is no longer maintained, such replacement or alternative index as the Council and the First Owner may agree in writing;
"Biodiversity Net Gain"	means the system of enhancement of habitat in respect of the authorisation of new development

	pursuant to part 6 and schedule 14 of the Environment Act 2021;
"Biodiversity Off-setting Contribution"	means the sum of £199,332 (one hundred and ninety nine thousand three hundred and thirty two pounds) Index Linked to off-set the loss of habitats on the Site and to provide a net gain of 10% for the purposes of Biodiversity Net Gain and to be used by the Council or its nominee towards the establishment of new or improved habitat in accordance with the Biodiversity Off-setting Scheme.
"Biodiversity Off-setting Scheme"	means the establishment of new or improved habitat by the Council at Bedford Colliery.
"Development"	means the Development of warehousing units (Use Class B2/B8) including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/20 and 014/159/10 and associated engineering, infrastructure and landscaping works;
"First Property"	means that part of the land edged red on the Plan which is registered at the Land Registry at the date hereof under title number MAN117935
"Highway Contribution"	means the sum of £15,000 (fifteen thousand pounds) Index Linked payable to the Council towards the upgrade and revalidation of MOVA at the junction of A580/Chaddock Lane;
"Implementation"	means implementation of the Planning Permission by the carrying out of any material operation as defined in section 56(4) of the 1990 Act but excluding operations consisting of site clearance, demolition work, archaeological investigations, investigations for the purpose of assessing ground conditions, remedial work in respect of any contamination or other adverse ground conditions, diversion and laying of services, erection of any temporary means of enclosure, the temporary display of site notices or advertisements (and the expressions or phrases 'Implement', 'Implemented' and 'Implementation of the Development' shall be construed accordingly);
"Implementation Date"	means the date the Planning Permission is Implemented;
"Index Linked"	means increased (or decreased if applicable) in proportion to movements in the BCIS Index between

	the date of this Deed and the date when the particular payment is made;
"**Interest**"	means interest at 4 per cent above the base lending rate of Barclays Bank plc from time to time;
"**Occupation**"	means occupation for the purposes permitted by the Planning Permission but not including occupation by personnel engaged in construction, fitting out or decoration or occupation for marketing or display or occupation in relation to security operations during construction or as a show unit and 'Occupy' and 'Occupying' shall be construed accordingly;
"**Planning Permission**"	means the planning permission to be granted by the Council pursuant to the Application;
"**Plan**"	means the plan attached to this Deed;
"**RICS**"	means the Royal Institution of Chartered Surveyors;
"**Second Property**"	means that part of the land edged red on the Plan which is registered at the Land Registry at the date hereof under title number MAN192479
"**Site**"	means the First Property and the Second Property shown edged red on the Plan;
"**Working Day**"	means any day which is not a Saturday, a Sunday, a bank holiday or a public holiday in England.

2. CONSTRUCTION OF THIS DEED

2.1 Unless the context otherwise requires, a reference to any particular statute includes any statutory extension, modification, amendment or re-enactment of such statute and also includes any subordinate instruments, regulations or orders made in pursuance of it.

2.2 The headings appearing in this Deed are for ease of reference only and shall not affect the construction of this Deed.

2.3 References to clauses and Schedules (unless the context otherwise requires) are to the clauses and Schedules of this Deed.

2.4 Unless the context otherwise requires, words in the singular shall include the plural and in the plural shall include the singular.

2.5 Unless the context otherwise requires, a reference to one gender shall include a reference to the other genders.

2.6 A person includes a natural person, corporate or unincorporated body (whether or not having separate legal personality).

2.7 A reference to a company shall include any company, corporation or other body corporate, wherever and however incorporated or established.

2.8 A reference to any party shall include that party's personal representatives, successors and assigns and in the case of the Council the successors to its respective statutory functions.

2.9 A reference to this Deed or to any other Deed or document referred to in this Deed is a reference to this Deed or such other Deed or document as varied or novated (in each case, other than in breach of the provisions of this Deed) from time to time.

2.10 Any words following the terms including, include, in particular, for example or any similar expression shall be construed as illustrative and shall not limit the sense of the words, description, definition, phrase or term preceding those terms.

2.11 Where an obligation falls to be performed by more than one person, the obligation can be enforced against every person so bound jointly and against each of them individually.

2.12 An obligation on a party to do any act or thing includes an obligation to procure that it be done and a covenant not to do any act or thing includes a covenant not to permit or allow the doing of that act or thing.

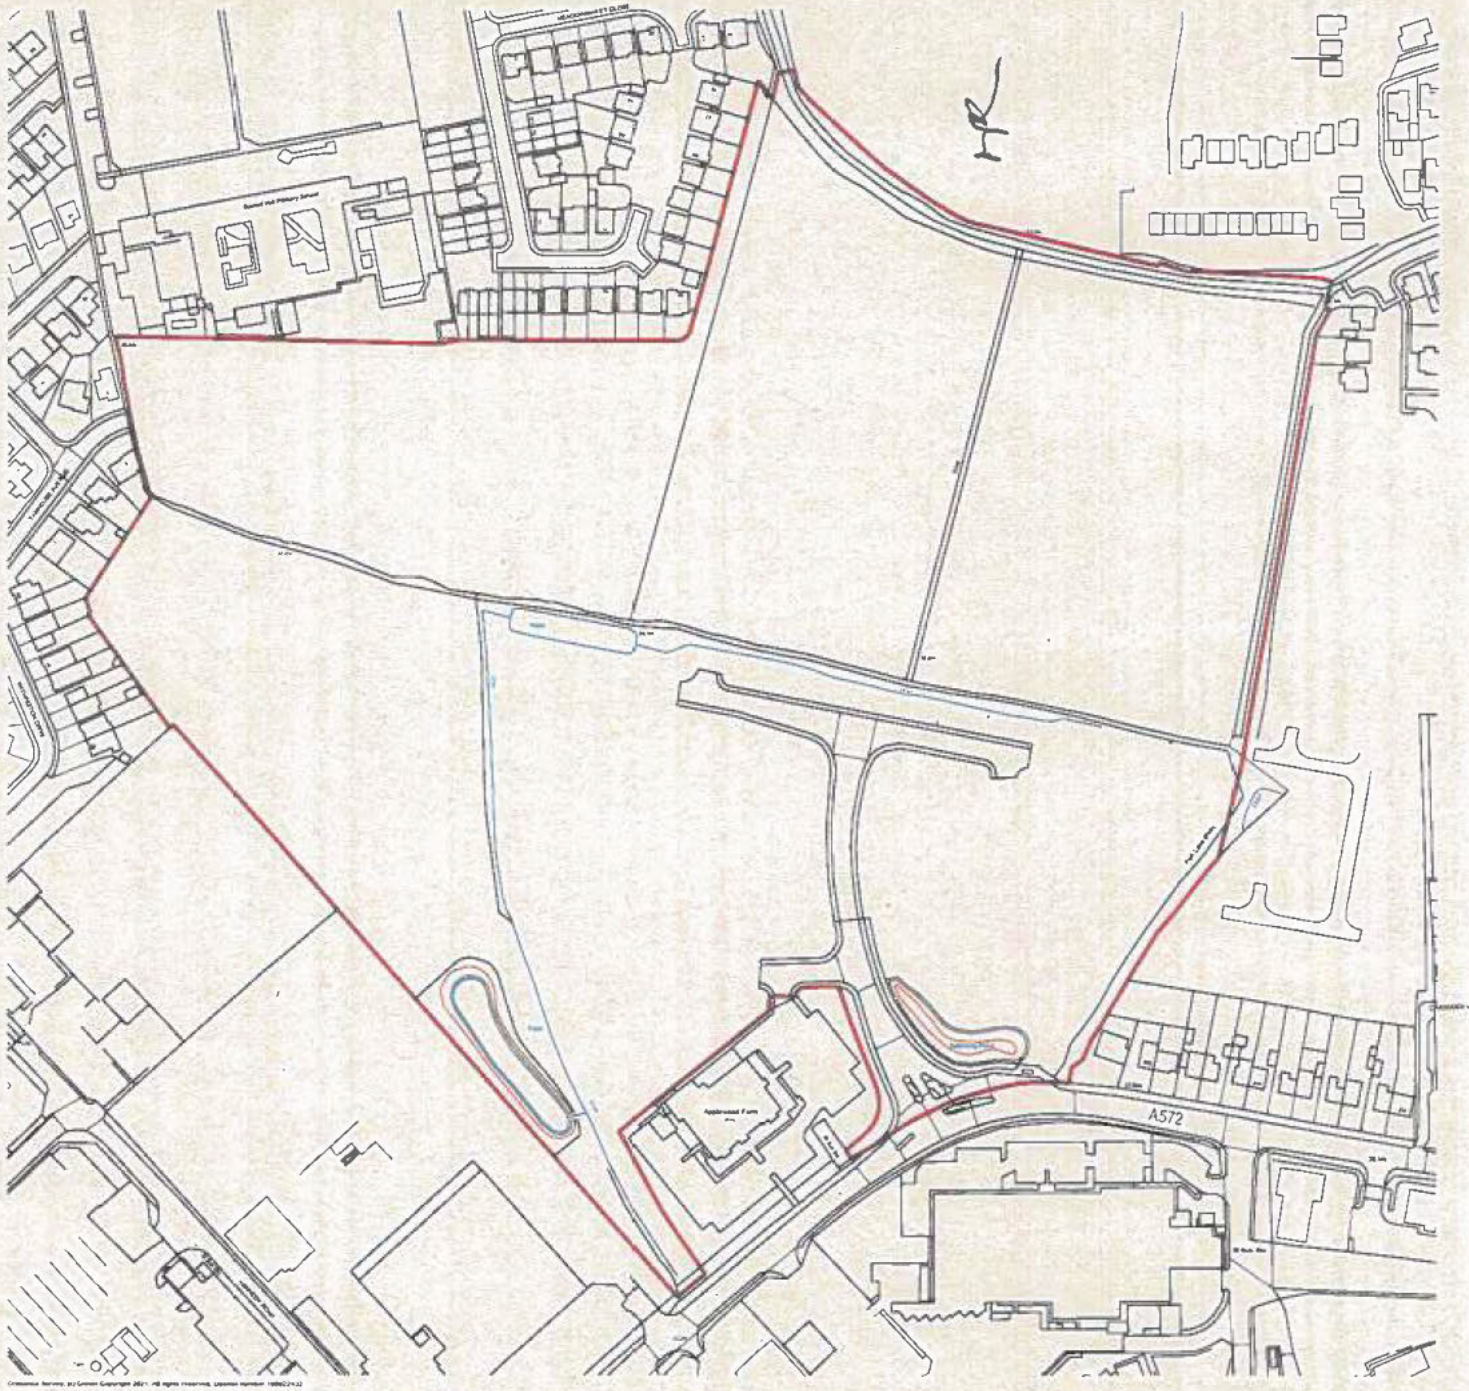
3. STATUTORY PROVISIONS

3.1 This Deed constitutes a planning obligation for the purposes of section 106 of the 1990 Act, section 111 of the Local Government Act 1972, section 1 of the Localism Act 2011 and any other enabling powers.

3.2 The covenants, restrictions and obligations contained in this Deed are planning obligations for the purposes of section 106 of the 1990 Act and are entered into by the First Owner and the Second Owner with the Council with the intention that they will bind the interests held by those persons in the Site and their respective successors and assigns as set out in this Deed.

3.3 The covenants, restrictions and obligations contained in this Deed are enforceable by the Council and in accordance with section 106 of the 1990 Act.

4. CONDITIONALITY



4.1 With the exception of clauses 5.4 and ~~4.10~~ 11 (which take effect immediately), this Deed is conditional upon:

(a) the issuing of the Planning Permission; and

(b) the Implementation of the Development pursuant to the Planning Permission.

5. FIRST OWNER'S COVENANTS WITH THE COUNCIL

The First Owner covenants with the Council:

Scale@ A1	1:1000

5.1 to observe and perform the obligations set out in this Deed (including the Schedules hereto);

5.2 to give at least 5 Working Days written notice to the Council of the intended Implementation Date; and

5.3 to give the Council immediate written notice of any change in ownership of any of its interest in the Site occurring before all the obligations under this Deed have been discharged such notice to give details of the Transferee's full name and registered office (if a company or usual address if not) together with the area of the Site purchased by reference to a plan;

5.4 on the signing of this Deed to pay the Council's reasonable legal costs and disbursements of and incidental to the preparation and execution of this Deed in the amount of £500 (five hundred pounds).

6. SECOND OWNER'S COVENANTS WITH THE COUNCIL

6.1 The Second Owner covenants with the Council to give the Council immediate written notice of any change in ownership of any of its interest in the Site occurring before all the obligations under this Deed have been discharged such notice to give details of the Transferee's full name and registered office (if a company or usual address if not) together with the area of the Site purchased by reference to a plan;

7. COVENANTS BY THE COUNCIL

The Council covenants with the First Owner and separately the Second Owner to:

7.1 observe and perform the obligations which are to be observed and/or performed by the Council as set out in in this Deed (including the Schedules hereto);

7.2 grant the Planning Permission within 5 Working Days of completion of this Deed.

8. LIMITATION OF LIABILITY

8.1 No person shall be liable for any breach of a covenant, restriction or obligation contained in this Deed after parting with all of its interest in the Site or the part to which such breach relates, except in respect of any breach subsisting prior to parting with such interest.

9. EXCLUSIONS OF LIABILITY

9.1 No obligations contained in this Deed shall be binding upon or enforceable against any statutory undertaker in respect of any part of the Site (or interest therein) that they have acquired solely for the purpose of the supply of electricity, gas, water, drainage, telecommunication services.

9.2 This Deed shall not be enforceable against owners or occupiers of individual units constructed on the Site pursuant to the Planning Permission.

9.3 This Deed shall not be enforceable against any person whose interest in the Site is of the nature of an easement or covenant.

10. DETERMINATION OF DEED

10.1 If the Planning Permission shall expire before the Implementation of the development or shall at any time be quashed, revoked or otherwise withdrawn or (without the consent of the First Owner and the Second Owner) is modified by any statutory procedure this Deed shall forthwith determine and cease to have effect (to the extent that it has not already been complied with).

11. LOCAL LAND CHARGE

11.1 This Deed is a local land charge and shall be registered as such by the Council.

12. EFFECT OF PLANNING OBLIGATIONS

12.1 It is acknowledged that the 2012 Agreement replaced the 2007 Agreement and the 2009 Agreement and it was agreed that the planning obligations not already discharged under the 2007 Agreement and the 2009 Agreement were no longer enforceable under those agreements FOR THE AVOIDANCE OF DOUBT the 2007 Agreement and the 2009 Agreement ceased to have effect pursuant to the 2012 Agreement and shall be removed from the Register of Local Land Charges by the Council.

12.2 With effect from the date of this Deed the Site shall be released from the 2012 Agreement and the 2017 Agreement (as varied by the 2018 Agreement) and the obligations therein will be treated as revoked and of no further effect in relation to the Site only FOR THE AVOIDANCE OF DOUBT the Site shall be bound by this Deed only.

13. REASONABLENESS

13.1 Any approval, consent, direction, authority, agreement or action to be given by the Council under this agreement shall not be unreasonably withheld or delayed.

14. CANCELLATION OF ENTRIES

14.1 Once the First Owner has discharged its obligations under this Deed the Council shall on the written request of the First Owner cancel all entries made in the local land charges register in respect of this Deed within 10 Working Days of the Council receiving such a request and issue a written confirmation of such cancellation to the First Owner and the Second Owner.

15. RESOLUTION OF DISPUTES

15.1 In the event of any dispute relating to or arising out of the terms of this Deed, the Council or the First Owner or the Second Owner may invite the other party to resolve the dispute by mediation in such manner as the parties may agree.

15.2 Clause ~~10~~ 11.1 notwithstanding and without prejudice to the exercise by the Council of its statutory functions, in the event of a dispute relating to or arising out of the terms of this

Deed (other than a dispute relating to a matter of law or in relation to the interpretation of this Deed) the matter in dispute will on the application of either party be referred to a surveyor acting as an expert (hereinafter referred to as "**the Expert**") (being a member of the Planning Division of RICS) with not less than ten years recent experience in the field of town and country planning and development whose identity will be agreed between the parties or in default of agreement appointed by or on behalf of the President for the time being of RICS on the application of any party and:

(a) The determination of the Expert will be final and binding on the parties save in the case of manifest error;

(b) The parties will be entitled to make representation and counter-representations in accordance with such timetable as the Expert shall direct; and

(c) The Expert's costs will be borne in such proportions as he may direct failing which each party will bear its own costs of the reference and determination and one half each of the Expert's costs.

16. NO FETTER OF DISCRETION

16.1 Nothing (contained or implied) in this Deed shall fetter or restrict the Council's statutory rights, powers, discretions and responsibilities.

17. FUTURE PERMISSIONS

17.1 Nothing in this agreement shall prohibit or limit the right to develop any part of the Site in accordance with any planning permission (other than the Planning Permission or modification, variation or amendment thereof) granted after the date of the Planning Permission.

18. SECTION 73 VARIATION

18.1 In the event that the Council shall at any time hereafter grant a planning permission pursuant to an application made under Section 73 of the 1990 Act in respect of conditions attached to the Planning Permission, save and in so far as this Deed has been amended by way of a deed of variation prior to the grant of such planning permission, references in this Deed to the Application and the Planning Permission shall (save for the purposes of the definition of Planning Permission in clause 1) be deemed to include any such subsequent planning applications and planning permissions as aforesaid and this Deed shall henceforth take effect and be read and construed accordingly.

19. THE CHARGEE

19.1 The Chargee for itself and its successors in title consents to the First Owner entering into this Deed and covenants with the Council that in the event that the Chargee takes possession of the Site or any part of it and/or exercises its power of sale under the provisions of the charge then the Chargee and its successors in title will observe and perform and be bound by the terms and conditions of this Deed so far as the same remains to be observed and performed.

20. NOTICES

20.1 Any notice or other communication to be given under this Deed must be in writing and must be:

(a) delivered by hand; or

(b) sent by pre-paid first class post or by guaranteed next day delivery (via Royal Mail).

20.2 Any notice or other communication to be given under this Deed must be sent to the relevant party as follows:

(a) to the Council at Town Hall, Library Street, Wigan WN1 1YN and marked for the attention of the Assistant Director – Legal, Governance and Elections;

(b) to the First Owner at their registered office address from time to time and marked for the attention of the Legal Department;

(c) to the Second Owner at their registered office address from time to time and marked for the attention of the Legal Department;

(d) to the Chargee whose Registered Office is at 25 Gresham Street, London EC2V 7HN;

or as otherwise specified by the relevant party by notice in writing to each other party.

20.3 Any notice or other communication given in accordance with clause ~~18.1~~ 20.1 and clause ~~18.2~~ 20.2 will be deemed to have been received:

(a) if delivered by hand, on signature of a delivery receipt or at the time the notice or document is left at the address provided that if delivery occurs before 9.00 am on a Working Day, the notice will be deemed to have been received at 9.00 am on that day, and if delivery occurs after 5.00 pm on a Working Day, or on a day which is not a Working Day, the notice will be deemed to have been received at 9.00 am on the next Working Day; or

(b) if sent by pre-paid first class post or by guaranteed next day delivery (via Royal Mail), at 9.00 am on the second Working Day after posting.

20.4 This clause does not apply to the service of any proceedings or other documents in any legal action or, where applicable, any arbitration or other method of dispute resolution.

21. INTEREST

21.1 Without prejudice to any other right remedy or power herein contained or otherwise available to the Council if any payment of any sum referred to herein shall have become due but shall remain unpaid for a period exceeding seven days the First Owner shall pay on demand to the Council Interest thereon from the date when the payment became due until payment has been made.

22. NO WAIVER

22.1 No waiver (whether express or implied) by the Council of any breach or default by the First Owner in performing or observing any of the covenants, obligations or restrictions contained in this Deed shall constitute a continuing waiver and no such waiver shall prevent the Council from enforcing any of the said covenants, obligations or restrictions, or from acting upon any subsequent breach or default in respect thereof by the First Owner.

23. THIRD PARTY RIGHTS

23.1 A person who is not a party to this Deed shall not have any rights under the Contracts (Rights of Third Parties) Act 1999 to enforce any term of this Deed. For the avoidance of doubt the successors-in-title and Assignees to the First Owner and the Second Owner and the successors to the Council's statutory functions shall have the right to enforce any of the obligations rights and covenants within this Deed.

24. GOVERNING LAW

24.1 This Deed and any dispute or claim arising out of or in connection with it or its subject matter or formation (including non-contractual disputes or claims) shall be governed by and construed in accordance with the law of England.

25. INVALIDITY

25.1 It is agreed and declared that if any clause or sub-clause of this Deed shall be deemed to be unenforceable or ultra vires the remainder shall remain in full force and effect provided severance from this Deed is possible.

This document has been executed as a Deed and is delivered and takes effect on the date stated at the beginning of it.

SCHEDULE 1 BIODIVERSITY OFFSETTING

1. COVENANTS BY THE FIRST OWNER

1.1 The First Owner covenants with the Council as follows:

(a) to pay the Biodiversity Off-setting Contribution to the Council on or before the Implementation Date;

(b) not to Implement the Development until the Biodiversity Off-setting Contribution has been paid to the Council;

(c) to notify the Council of such payment within 5 Working Days of it being made.

2. COVENANTS BY THE COUNCIL

2.1 The Council covenants with the First Owner as follows:

(a) to use the Biodiversity Off-setting Contribution towards the establishment of new or improved habitat in accordance with the Biodiversity Off-setting Scheme and for no other purpose;

(b) in the event that the Biodiversity Off-setting Contribution has not been so expended within 30 years from receipt of the Biodiversity Off-setting Contribution then the Council shall refund the unexpended part of the Biodiversity Off-setting Contribution to the person(s) who paid it together with Interest thereon for the unexpended part only (such interest to be calculated at the Base Rate from and including the date of receipt of the payment by the Council to the date of its repayment.)

SCHEDULE 2 HIGHWAY CONTRIBUTION

1. COVENANTS BY THE FIRST OWNER

1.1 The First Owner covenants with the Council as follows:

(a) to pay the Highway Contribution to the Council prior to first Occupation of the Development;

(b) not to Occupy or permit Occupation of the Development until the Highway Contribution has been paid to the Council;

(c) to notify the Council of such payment within 5 Working Days of it being made.

2. COVENANTS BY THE COUNCIL

2.1 The Council covenants with the First Owner as follows:

(a) to use the Highway Contribution towards the upgrade and revalidation of MOVA at the junction of A580/Chaddock Lane and for no other purpose;

(b) in the event that the Highway Contribution has not been so expended within 5 years from receipt of the Highway Contribution then the Council shall refund the unexpended part of the Highway Contribution to the person(s) who paid it together with Interest thereon for the unexpended part only (such interest to be calculated at the Base Rate from and including the date of receipt of the payment by the Council to the date of its repayment.)

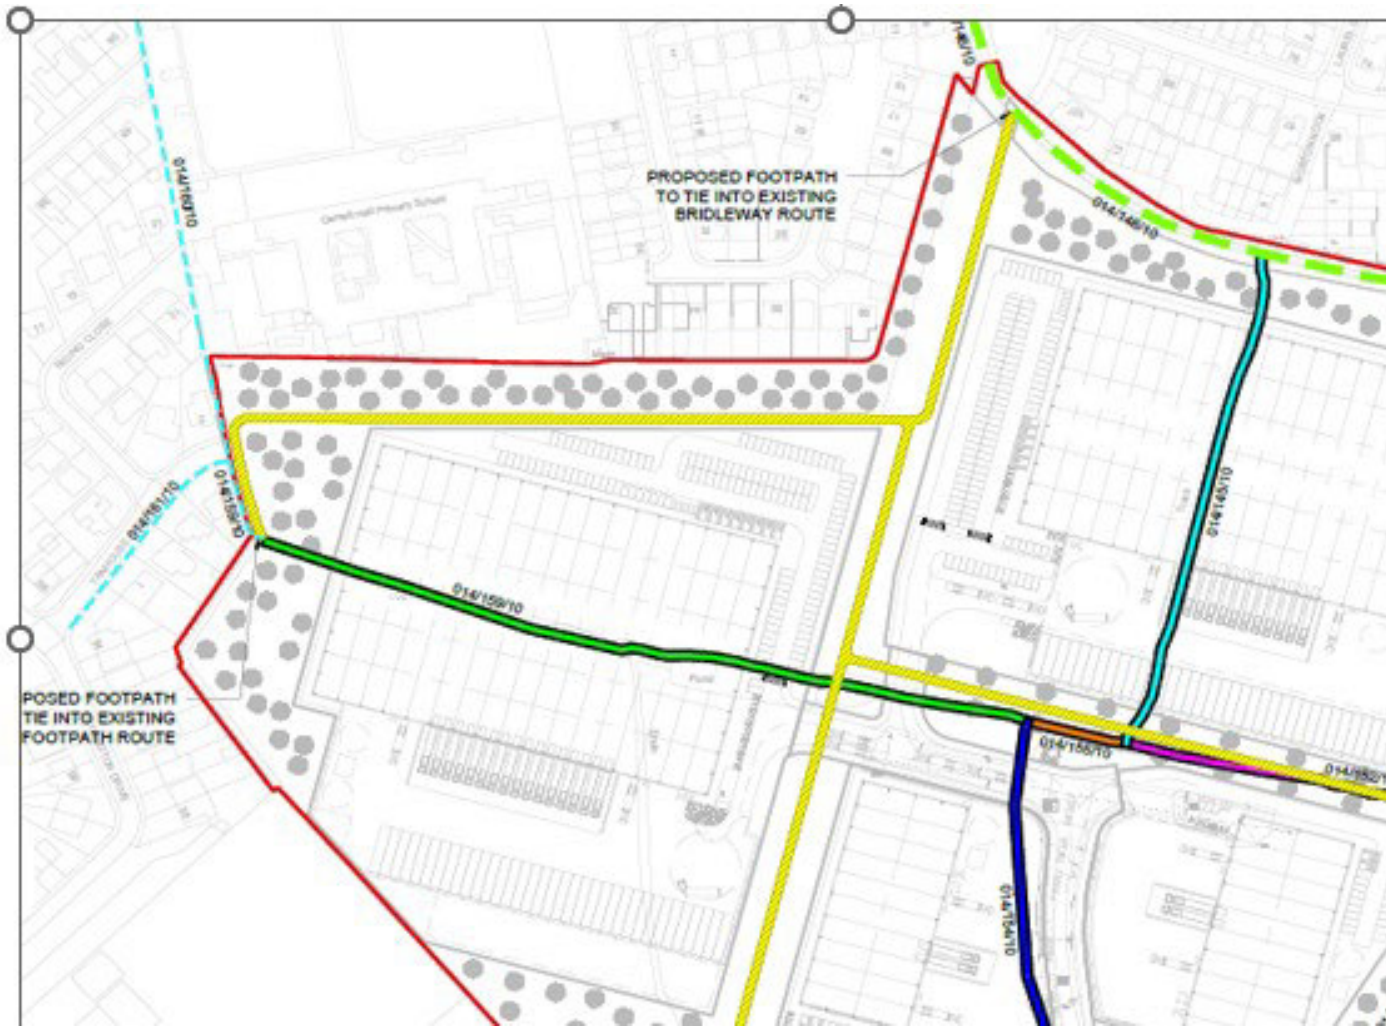
Subject: A/23/96226/MAJOR - Astley Business Park



Hi [redacted]

I'll upload the presentation now. I've amended the public representations as discussed and added in "former" in relation to James Grundy.

I've added in a slide to acknowledge my stupid mistake and I've added this slide just to show the existing and proposed PROWs through the site as this may be a point of interest tomorrow. The key is on the slide but basically the yellow is the proposed PROW, the dashed green is the retained bridleway, the dashed light blue is a retained footpath and all other colours are existing PROW which are to be stopped up (also the subject of a s247/248 app).

Thanks again for your help on this.

Therese

Hello all,

In view of the number of questions still being asked about this, Aidan and I could do with increasing the level of detail that we know about it – evolution through pre-app, consultation on the application etc.

Would it be possible please to a set up a full morning or afternoon, for us to sit in a room and have you talk us through the background with images / files up on screen as we need?

@[redacted] can help arrange this – we'll need all those included in this email, in a room with a decent screen that you can actually see – so maybe Room C in WLCS.

Ideally if we can try for the end of the first week back after half term or the start of w/c 10th Nov, so that colleagues have time to prepare but we keep moving with it. We'll all need to prioritise this so please help [redacted] as far as possible in moving other things around.

Thanks
David

Hi [redacted], sorry to come back on this but I see [redacted] is off now – are you able to help with the specific query below, about the Cadent responses and the approved plan that the bunds are being constructed to?

The links to the Cadent responses don't work for me so can that be checked out as well please.

If this can be done Wednesday morning that would be fantastic, if not then can you let me know when we can get the info please.

Thanks
David

Hello again, as predicted I have been asked by the Mayor's office for an update!

If it is not going to possible to provide a full response tomorrow on my queries below, could someone advise me, in the morning, on timescales for a full response, so that I can manage expectations at this end.

Thanks

Thanks, Aidan, Monday/Tuesday would be great, if possible.

The residents seemed to be pleased that the Mayor agreed to meet them. He didn't commit to anything and was very much in listening mode. He explained that he has no remit in terms of planning decision making in Wigan, but he did offer to look into their concerns around the Cadent pipeline and the construction of the bunds. So I think the residents felt the meeting went ok and there was an amicable atmosphere (Michael Wheeler MP was also present).

Thanks again and have a good weekend

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hello both

I wanted to update you following yesterday's meeting with the Astley Action Group, which, in the end, I was asked to attend.

At the meeting the group raised a query about the availability of the consultation responses from Cadent; they indicated that these were no longer available to view on your website, so we agreed to look into this. This morning I reviewed this document page on your website (Planning Documents), which relates to the application approved in June 2024.

I have found links to two Cadent consultation responses. It is true that the "pdf" links in both cases do not work, but the "download file" buttons work in both cases and I was able to download the attached emails using these links.
The link to the first "holding response" can be found here: Document Viewer
The link to the second email, which updated Cadent's position, can be found here: Document Viewer

I also note the officer's report to the planning committee refers to the original holding objection being withdrawn/superseded as per the comments in the second email. However, it looks like the dates in the officer report are slightly different to the ones in the attached two emails, 9th and 16th November 2023 vs 8th and 15th in the attached. Before we share this information with the group, I wanted to check that I'm right in assuming this is a typo in the report and not that other responses exist and also whether any further correspondence has been received more recently from Cadent in relation to this development and its relationship to the gas main in the locality . If any additional correspondence is available from Cadent, please could you provide me with copies?

Related to the availability of Cadent's responses, the local residents believe the extent/height of the bunds might have been limited, possibly in part due to the existence of the gas pipeline. In the letter sent to residents, I can see you have explained that the bunds are not finished as yet, but you do not appear to be suggesting that the bunds are not being completed as anticipated. Therefore, please can you confirm which approved plan the bunds are being constructed in accordance with and their anticipated height/extent (noting that this height is to be measured relative to the ground level of the ground within the development). Apologies, I realise this information may well be available on the above page, or via the various amendments, but I am struggling to locate the relevant documents as I am not as familiar with the documentation as you and your team will be.

As you can imagine, the Mayor is keen to get back to the group with an update as soon as possible, ideally early next week. Therefore I'm happy to have a call if that would be helpful.

Thanks

Hi [redacted],

Just to keep you in the loop on this as its relevant to the conversation we had earlier about workloads.

[redacted] has reiterated the gaps in this application and has previously advised that the information requested below is needed before we go before Members. I'm not surprised as when [redacted] originally raised his concerns, the applicant advised that it would take too long to carry out the remodelling required and next thing they submitted the additional info! It was very unlikely that there was anything new in there.

I'll go back to the agent tomorrow (prepare for the back lash!) and given where we are, there is some doubt that all the boxes will be ticked in time for April's planning committee. This would probably help me in focusing on Eckersleys for the next couple of weeks (whether its delegated or committee) but, as discussed today, will proceed as directed.

Thanks

To: [redacted]
Cc: [redacted] (Planning)
Subject: RE: A/23/96226/MAJOR Astley Business Park, Wigan

Hi [redacted]

Sorry for the delay in my response.

I've reviewed the Technical Note and its more of the same I'm afraid, with lots of references to our previous responses. Please see below comments on the response:

1. Assessment Years – consultant is arguing that a year of app and 5+ year assessment is ok as end user is unknown and this is a consistent approach taken at other local authorities in the NW. The fact that the end user is unknown only strengthens my point. Its going to be a minimum of 3 years before the development is operational. We need to understand the impact growth in traffic will have on the adjacent transport network.

2. Committed Developments – fine to exclude Mosley Common, as noted in your email Therese.

3. HGV Trip Distribution – Observed count data from June 2022 was used to identify HGV movements. This needs to be explained in greater detail (where in the TA, the split between east and west movements, the locations). The further evidence of HGV movements travelling westbound is a Google image taken from September 2021. This cannot be considered conclusive evidence.

4. Distribution Methodology – JTW information taken from 2011 should be used to support a planning application submitted in 2023. Turning count data or another form of relevant information must be used instead.

5. Traffic Flow Figures – Response noted, conversion of HGVs to PCUs not accounted for within assessment. As a PCU is equivalent to one standard LGV trip junctions experiencing 30 or more PCU movements should be assessed to accord with the initial response from Network Management.

6. Junction Assessments – Must be updated to account for assessment years and potentially updated HGV distribution.

7. Proposed Car Parking Provision – with no end supplier identified it is difficult to determine the appropriate level of parking provision. A list of recently consented developments taken from various locations across the north west is not adequate justification. Once operational these sites could have issues with on-street parking for example. There will also be a number of speculatively developed sites with more parking.

We don't really have any new information, its just a reiteration of the initial TA. We need more before this is considered acceptable.

Kind Regards

Good afternoon [redacted], [redacted]

The applicant has provided the attached, and commentary below, responses to the issues identified by yourselves and Salford Council. As discussed during our meeting with the applicant/agent a couple of weeks ago, I'm not intending on re-consulting with Salford Council so long as we are satisfied that the issues raised have been addressed.

[redacted] – Will you reconsult with TfGM?

Please can you review the attached and let me have your comments as soon as possible?

Thanks

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thank you for your email. Whilst clearly disappointing to have reached this position so very late in the process, we are where we are and are eager to resolve matters as soon as possible. As such, for completeness, the transport consultant has provided technical notes in response to each party's highway comments, as follows:

- 2nd Response to Wigan Council (WC) comments (i.e. [redacted]'s comments dated 16 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1003.P02
- 3rd Response to WC comments (i.e. [redacted]'s comments dated 11 Feb 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1004.P02
- SCC Response (i.e. SCC's comments dated 19 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1005.P01

We have submitted the responses as 3 x separate technical notes as we feel it would be easier for the different parties to review/address, given the number of appendices also included within the individual documents.

In terms of addressing the Mosley Common junction point, Hydrock have included the following paragraph in the '3rd WC response' document which should provide sufficient justification / comfort as to why the junction has not been assessed:

Para 2.3.4 - Notwithstanding the above, Hydrock have reviewed their Traffic Flow Figures (which were previously provided along with the previously submitted TA as part of the application), and identified that the only junction within close proximity of the Mosley common site impacted by the proposed development flows is the A580 / A577 junction. However, as shown in our Traffic Flows figures, the total 2-way vehicle trips (associated with the proposed development) travelling along the A580 to/from the A580 / A577 junction only equates to 19 in the AM peak, and 23 in the PM peak, which is less than the 30+vehicle 2-way trips assessment criteria suggested by WCC. Therefore, this junction was not requested to be assessed. Furthermore, it should also be noted that this junction was also recently upgraded in 2023.

We would hope it isn't necessary given the clarity provided in the various notes/responses but if a meeting is required to resolve any residual matters following review of the above, please can you coordinate as soon as feasibly possible.

Please can you confirm receipt and please can you re-consult the three parties and request their urgent review of the above/attached and confirmation that highways matters are indeed now resolved so that we can move forward to Committee.

Kind regards

[redacted]

Subject: A/23/96226/MAJOR Astley Business Park, Wigan

Good afternoon [redacted],

Apologies for the delay in providing an update for you but I can confirm that my highway colleagues have held further discussions earlier this week as planned, and the outcomes of those discussions have been shared with [redacted] and myself.

Taking all matters into account, I remain of the view that the points raised below must be addressed in full before Officers can make a positive recommendation to Members; the only exception to this is the reference made to the Mosley Common application. I accept that this was not a committed development when the application was submitted (nor did the Mosley Common application take this application into account in their transport studies). However, I would advise that providing some commentary on the combined impacts (now that it is a committed development) may provide some additional comfort to Members.

I appreciate that some of the points below were addressed in the Technical Note received early last week but it would be appreciated if this could be combined with a full response on all other points for publication and re-consultation.

The information is necessary to ensure that Officers can confirm that the proposed development is acceptable in highway terms and confidently relay this to Members. It is important to note that this application has attracted 100+ objections from local residents, a call in from local Councillors and an objection from James Grundy MP. One of the common themes running through all of these is the impact on the local highway network and as such, taking the application before Members at the present time and in advance of all matters raised by [redacted] and Salford Council being addressed, raises a significant possibility that Members could overturn or defer the application.

I appreciate that issues have been raised that were not done so at the pre-application stage and whilst that is regrettable, it is not a reason to move past them without addressing them in full to ensure that when this application is reported to Members, Officers can be confident of our positive recommendation being accepted.

On other matters, I can confirm receipt of the CGIs earlier this week. In addition, I have requested some further guidance from our ecology advisors on a potential financial contribution to achieve net gain off site but would welcome your position on this matter also as previously discussed.

Regards

- *Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).*

- *Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.*
- *Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.*
- *Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.*
- *Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)*
- *Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.*
- *Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.*

Hi [redacted]

You'll see from my email chasers to [redacted] (today and yesterday) that unfortunately we have not yet received an update from [redacted] following his meeting with [redacted] on Monday, despite what we had agreed at last week's meeting, which is clearly disappointing as we are no clearer as to what the Council's collective highways position is. Please can you chase internally and provide an urgent update?

It is worth noting the attached email trail between the transport consultants, Hydrock, and [redacted] (which [redacted] was cc'd to – I assume it is the same [redacted] that has now raised issues). The attached email trail clearly shows that [redacted] and others were provided with the draft TA and Framework Travel Plan prior to submission, comments which were picked up in the submission versions. It is therefore all the more confusing that despite having had sight of a draft TA that new issues have been raised.

I trust you can provide us with an urgent update so that we are clear where we stand.

Kind regards

Good afternoon [redacted],

Hope you are well.

Sorry to be emailing you again. I have been forwarded an email from one of the Councillors saying that the footpath located next to the Northwest corner of the site which runs from Tanhouse Avenue to Garrett Hall School has been flooded by water runoff from the site.

Firstly, could I clarify whether you are aware of the issue?

Secondly, is it runoff from the site?

Thirdly, are there any proposed measures to mitigate this issue?

Thank you

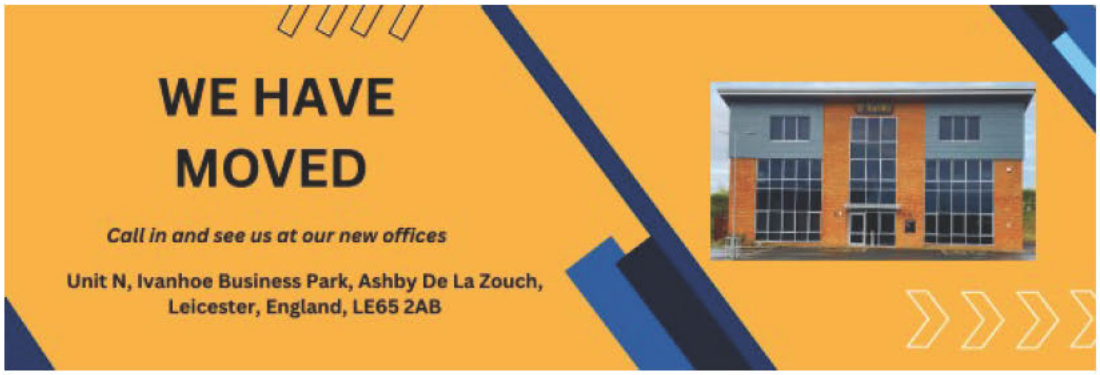
Good Morning [redacted]

I hope you are well.

As I'm sure you are aware there is a lot of media attention on site currently, I wondered if you are available for a site visit to review the works we are currently doing and how we are operating? Appreciate you are not an advisory role but given the recent attention we are keen to make sure that we are working to the highest possible standard and wondered if a site review would help.



It may also be an opportunity to review any of the recent comments you have received from any residents. I've noticed a lot of comments about us starting works before 8:00 and Sunday working which just isn't true and I can demonstrate this on site.

Kind Regards

Hi [redacted]

I've copied you into an email to [redacted] I was holding off and hoping that the agreement might have been sealed today but that's not going to happen now.

If he does let you know that the agreement is sealed next week, uniform is up to date re conditions and informatives with an EOT until 14th Aug. If there is any house keeping to do on Civicia, I can pick that up when I get back.

To be honest, if you aren't chased by anyone, I'm quite happy to sort this out when I get back.

Just so you know (on the slight chance it's raised with you), the agents are trying to convince us to amend the land contamination condition on this one. [redacted] and [redacted] have been involved but all you need to know is that they know that the decision must be issued in line with what was reported to Members and so are expecting all of the conditions as listed on Uniform. If we do agree to any amendments, they know this will be post decision under a s73/NMA app.

Thanks again.

Subject: FW: A/23/96226/MAJOR - Extension of time

Hi [redacted],

As this may come up in the next couple of weeks, I just wondered how you would like me to leave it.

This app went to Planning Committee in June, but the legal agreement has taken some time to finalise. It looks like [redacted] may be able to seal it next week or the week after, but he is still awaiting some documentation so its hard to know for sure.

The agents want to know who they can contact in my absence if we're in a position to issue the decision? I don't really want to say no one (I would have said [redacted] as he knows all about this!) but do you want me to say that or can I give them your email address, or [redacted]'s or [redacted]'s?

Uniform is up to date re conditions and informatives and there is an EOT agreed until Wed 14th Aug so it would just be someone putting an X in uniform and advising

[redacted]'s team the decision is good to go once [redacted] has confirmed the legal agreement has been finalised.

[redacted] is one of the agent but he is also going on leave on Friday; any emails over the next couple of weeks will come from [redacted]

Thanks

[redacted] - Land Condition

Hi [redacted]

I hope you are well and thanks for your help on the condition 5 matter to date.

Just picking up on your response to [redacted] below I thought it was worth myself providing a observation on the matter as unfortunately unless we can achieve flexibility on the Councils proposed wording for condition 5 (as suggested in [redacted] email below dated 10th July) which in our opinion achieves the same outcome the Council require we have a material viability issue with the project as we will effectively have a 4-6 month timing implication on the construction programme with associated cost and delay which unfortunately means we would need to return to investors for approval as this could be a material variance to the currently approved construction budget and programme (we currently have a fixed price and programme offer from a Contractor) this investor approval may not be forthcoming meaning the scheme does not happen.

We are also at early-stage discussions with a potential occupier of the larger unit and again this delay would mean we could not meet their occupational timescales so potentially we would lose this opportunity.

We found our last call productive so given the significance of the issue we face here I was hoping we could again convene to discuss this and hopefully make some progress.

We would be available any time on Monday up until 3 pm on TEAMS if this would work for you and colleagues?

Thanks,

Subject: RE: A/23/96226/MAJOR - Land Condition

Hi [redacted],

Thanks for your email.

Myself and [redacted] (EP) do not consider there to be any other possible amendments to the agreed wording of the condition which could fall under a non-material amendment. I have therefore asked [redacted] for advice on what next steps he wants us to take and once he has come back to me, I will let you know.

I imagine the developer is gathering the information needed for clause 1 of the condition at the present time. Please submit any results from that work for [redacted] to consider but in the absence of that information, as I said, I don't see any other acceptable non-material amendments to the agreed condition.

I will come back to you with [redacted]'s direction as soon as possible.

Regards

[redacted]

Hi [redacted]

Hope you are well.

I'm just following up on [redacted]'s email below to check if you've had chance to review the issues raised, and also if you have found a space in diaries for the quick TEAMS call [redacted] suggested.

This one issue is starting to impact significantly on our construction programme, so we are very keen to bottom things out as speedily as possible. With this in mind if you could come back to me with your availability, I'll ensure we can work around it at this side.

Look forward to hearing from you.

Many thanks

[redacted]
Subject: RE: A/23/96226/MAJOR - Land Condition

Hi [redacted]

Thanks again for your response and continued efforts to help resolve our concerns and to reach an agreeable position regarding condition 5.

I've reviewed your latest response below with the team and whilst it reassuring that you advise that clauses 2 and 3 would not prevent site enabling works being carried out following the satisfaction of clause 1 (which I assume you mean to be the provision of an updated ground gas risk assessment, we still have concerns which are rooted in the sequencing of works required in the lead in to the updated ground gas risk assessment – concerns that I've set out in previous emails.

In any case, I'm also not sure the currently proposed condition 5 wording is clear in that site enabling works could be commenced after clause 1 as there is no reference to site enabling works being excluded and the preceding text refers to "*following demolition*" (which there isn't any required on site) and then "*prior to any further development commencing…"* but the first part of the condition also refers to the submission/approval of a Remediation Strategy prior to commencement of any development. So, there is no part of the condition that clearly refers to when site enabling works can commence, which if it proved to be a workable comprise for us (which I'm not sure it is) would to have some additional/amended wording shoe-horned in as part of an amended condition for clarity/precision.

I appreciate this is becoming a laboured matter and really do appreciate the Council's willingness to resolve and be flexible where possible. If the Council is amenable, please could we arrange a further short Teams meeting to try and set out our concerns and discuss a potential compromise that works for all parties as I think the concerns on both sides are being missed in the email back and forth. We shouldn't need any more than 15-20 minutes and I think it will allow us to all reach a definitive conclusion on the matter one way or another.

If you could please advise of your and [redacted]'s availability over the next week or so we can get coordinate the necessary team members from our side to suit your diaries.

I'm on leave myself the next two weeks but my colleagues [redacted], both cc'd, are on hand to progress this matter in my absence.

Kind regards

[redacted]

Cc: [redacted] (Planning) [redacted]
Subject: RE: A/23/96226/MAJOR - Land Condition

Hi [redacted]

Thanks for your email.

I can confirm that the content has been considered by our EP colleagues and concern remains about shifting clause 2 and 3 to pre-occupation for the reasons discussed at our last meeting and doing so could not be considered a non-material amendment to the development as approved.

However, as [redacted] has previously advised, clause 2 and 3 does not prevent works up to the build phase commencing; so enabling works such as roads, drainage, site levelling etc can be commenced following the submission of the details required under clause 1 (and subject to the requirements of the other agreed pre-commencement conditions). Furthermore, the information required by clause 1 could be obtained now, submitted and, depending on the result, provide the justification to amend clause 2 and 3 later down the line.

The importance of clause 1 also needs to be stressed, as additional considerations relating to the potential gas risk following the proposed grouting works affecting both on-site and off-site needs to be explored, as well as the combustion assessment. These assessments required through clause 1 may indicate significant considerations or proposals that will inform the requirements of clauses 2 and 3.

As previously advised, the decision notice for the development will include the condition as agreed prior to the application going before Members (once the legal agreement has been finalised). Hopefully the above will provide your client with the time needed to obtain the information needed to comply with clause 1 and potentially further consider clause 2 and 3 and/or the comfort that the proposed wording does not prevent enabling works taking place as outlined above following compliance with clause 1.

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thank you for your response below following our meeting last month and apologies for the delay in responding to your email below of 25th June - I've been stuck at a seemingly never ending planning inquiry but I have now managed to review your email below and suggested alternative condition 5 wording with the team.

As I expressed following our meeting last month we are grateful for the Council's willingness to work with us to find agreeable amendments to the condition 5 wording and to show flexibility in the approach in which we formalise such amendments (i.e. as a Non-Material Amendment). To that end we are grateful for you and colleagues taking time to discuss the matter further and to provide suggested alternative condition wording.

However, having reviewed with the team, unfortunately the alternative amendments suggested in your email would not materially change the issue of the trigger point and sequence of events required to satisfy the condition and would still cause significant issues to the build programme, for the reasons summarised below:

- The sequencing of the required works means that ground gas monitoring can only take place following completion of on-site pressure grouting.
- As such, the amended condition 5, clause 1 and retained clauses 2 and 3 as pre-commencement elements do not really change anything in that on-site pressure grouting would need to take place, after which an updated ground gas risk assessment and combustion assessment can be undertaken and submitted to the Council for discharge following completion, which as identified in my email attached could potentially mean a lead-in time of 6 months before construction can commence.
- As clause 1 requires all the above prior to development commencing, the significant programme constraint remains.

As such, whilst we can agree to the revision to clause 1 suggested in your email, it is critical that clauses 2 and 3 drop down to beneath the 'pre-occupation' line to alleviate this significant programme constraint and the condition wording you've provided below instead reads as follows:

"No development approved by this planning permission shall commence until a remediation strategy to deal with the risks associated with contamination of the site in respect of the development hereby permitted, has been submitted to, and approved in writing by, the local planning authority. This strategy will include the following components:

Post demolition but prior to any further development commencing:

1. An updated ground gas risk assessment (considering on-site pressure grouting works and the subsequent ground gas risk), and a combustion assessment, identifying the risk to all receptors that may be affected, including those off-site.

Prior to the occupation of the development:

2. The results of the updated site investigation and the detailed risk assessment referred to in (1) and, based on these, an options appraisal and an updated remediation strategy giving full details of the remediation measures required, including a Gas Protection Design Report if gas protection measures are required, and how they are to be undertaken.

3. A verification plan providing details of the data that will be collected in order to demonstrate that the works set out in the remediation strategy in (2) are complete and identifying any requirements for longer-term monitoring of pollutant linkages, maintenance and arrangements for contingency action.

4. Prior to any part of the permitted development being occupied a verification report demonstrating the completion of works set out in the approved remediation strategy and the effectiveness of the remediation shall be submitted to, and approved in writing, by the local planning authority. The report shall include results of sampling and monitoring carried out in accordance with the approved verification plan to demonstrate that the site remediation criteria have been met.

Any changes to these components require the written consent of the local planning authority. The scheme shall be implemented as approved."

I note also your reference to the risks on the developer side: "*as the recently proposed condition wording of 'prior to occupation' does not ensure that the appropriate gas protection measures will be incorporated into the design of building foundations prior to being installed. This prevents the development from progressing beyond a stage where changes become difficult and costly to amend*." – whilst we appreciate your concerns, I must be clear that the developer is willing to take on this risk as any such risk would either fall with the developer or contractor and be their responsibility and cost to deal with and is not a matter that the Council should be concerned about nor would it prevent the Council enforcing the condition wording above. Fundamentally, the condition is focused on the risks to future occupiers of the development / site and not on the developer during the construction phase.

With the above in mind, please can you re-consider the amendments to the condition wording and confirm whether you can agree to the revised wording I've suggested above? If concerns remain or the above explanation is not clear, then it will be important for all parties that attended the Teams meeting last month to jump on another meeting ASAP so that we can resolve this matter.

I trust that you can understand our position and the significant issue we have currently and that an agreeable way forward can be reached.

Kind regards

From: [redacted]
Sent: Tuesday, June 25, 2024 5:08 PM
To: [redacted]
Subject: FW: A/23/96226/MAJOR - Land Condition

Hi [redacted],

Further to my email yesterday, we have held some internal discussions and have made some amendments to the condition – see attached.

The reasoning behind the suggested amendment is as follows:

Initially, we would require the submission of a new ground gas risk assessment and refined conceptual site model, including a detailed lines of evidence approach and more justification when considering appropriate standards and guidance as to the final risk from ground gases following the proposed grouting work.

If this revised assessment determines that post grouting gas monitoring is required, then a proposal will need to be submitted. On the other hand, if it is deemed that no further monitoring is required and the proposals & justification is agreed, then we can move forward from there.

Regarding post grouting gas monitoring (if required), we would be open to any proposals such as a more intensive monitoring regime - e.g a continuous 24/7 set up over a shorter period of time – as long as this is fully explored and presented appropriately. Similarly, any other methodology that would be considered best fit and falls within the standards and guidance could be proposed with justification and lines of evidence.

I can advise that the amended wording, as attached, would be considered a non-material amendment to the permission.

After discussion, it has been decided that these elements would need to be submitted prior to the build phase and so cannot accept your amendments in full; this is to prevent additional risk on the developer side, as the recently proposed condition wording of 'prior to occupation' does not ensure that the appropriate gas protection measures will be incorporated into the design of building foundations prior to being installed. This prevents the development from progressing beyond a stage where changes become difficult and costly to amend.

We hope the attached wording offers a reasonable and workable compromise for your client.

Regards

Hi [redacted]

It was utilised by Trafford Council on one of their pre-mandatory BNG applications, or at least it was in the draft section 106 I was consulted on.

I liked the idea as it covered the eventuality that there was a change of the on-site contribution, that can theoretically occur between outline and reserved matters for instance resulting in the LPA receiving a reduced contribution per BU if a fixed cost has been agreed, which did occur on one Bury site, due to no fault of the developer or LPA. Engineers suddenly decided a load of landscaping had to come out at reserved matters for site lines.

In hindsight it may not have been accepted as I only saw the draft.

Hi [redacted]

I wonder if you could shed any further light on the formula below.

I haven't come across it before and as yet it seems there is no standard for calculating a BNG unit price due to the national/ regional variation in the cost of mitigation work and case-specific considerations.

Kind Regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Apologies for not spotting this earlier.

With regards the Urban trees, I accept that a lot of trees are being proposed but the plans were difficult to interpret as some of the standard trees are planted within the woodland planting and thicket planting, they are therefore unlikely to count as urban trees in 30 years having been subsumed in to the woodland. Once mandatory we would not be able to recommend a decision whilst the landscape proposals and biodiversity net gain proposals were not clearly a match, which is the case for this application. I accept however that BNG is not as yet mandatory and that a significant number of urban trees are proposed. I could count the number of trees I accept would count as urban trees but this should be job of the developer for a complex site such as this spread over two separate plans.

I do not however, given not as yet mandatory any objection to the post development biodiversity net gain score being finalise via a condition for on-site value and section 106 with an agreed rate per unit formula. Below is an example from a development where this approach was applied to the section 106 due to uncertainty on the number of off-site units required.

SCHEDULE 4

Biodiversity Net Gain Contribution Formula

The Biodiversity Net Gain Contribution shall be calculated applying the following formula –

A = ((B 1.1 – C)) = D* E*

Where:

A- is the the amount of the Biodiversity Net Gain Contribution

B- is 10.15 (being the Biodiversity Pre-Development Site Value)

C – is the Biodiversity Post-Development Site Value

D- is the number of Biodiversity Units to achieve the Biodiversity Net Gain Target

E – £12,000 per Biodiversity Unit.

For indicative purposes only, below is an application of the above formula based on the Developer's Update Ecological Impact Assessment dated 1st July 2021 that the Biodiversity Post-Development Site Value is anticipated to be 5.84 Biodiversity Units:

10.15 1.1= 11.165 – 5.84= 5.325*

5.325 12,000 = 63,900*

A= £63,900 is the Biodiversity Net Gain Contribution.

With regards the grassland as this is on site it could be dealt with via a detailed condition. Good condition theoretically possible, just in my experience very doubtful in practice and once mandatory, we hopefully will set some guidance on when we believe good conidition can and cannot be claimed. I have done some receptor sites for Bury, much simpler than this one and generally only regarded moderate condition as realistically achievable, occasionally fairly good.

If a decision is required happy to condition a habitat management and monitoring plan requiring the 7 criteria bullet pointed to be achieved.

Off-site Compensation
I accept that it is for Wigan to determine the off-site compensation and receptor site. No further issues with regards this point.

Hi [redacted]

Further to your comments on this application, the applicant has provided a response in red and attached.

Would you please be able to provide some guidance on the appropriate contribution required to achieve net gain should there be a loss of 10.95BU on site?

There is quite a bit of pressure to move this forward to the next planning committee so if you could come back to me today, just with that figure, that would be a great help.

Thanks

Importance: High

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thanks again for your [redacted]'s time yesterday.

I write to respond to the GMEU comments, as follows in red:

- The details of the urban tree planting schedule is provided to ensure that 150 trees are proposed – The submitted landscape plans propose that 319 standard trees are planted across the site. This is over double the 150no. stated in the GMEU response and is hopefully satisfactory to the LPA on this point.

- That at least 56 have the potential to exceed 30cm dbh after 30 years - Please find revised landscape plans 2266-22-05+06 Rev P04 attached. The revised drawings include 56no. Semi mature trees proposed within areas of grassland (individual trees) as opposed to the 26no. semi mature trees previously proposed on Rev P03. The following 'upgrades' in size have been made on Rev P04:
    - 26no. EHS (14-16cm girth) have been upgraded to be of Semi mature standard (20-25cm)
    - 4no. EHS (extra heavy standard) 18-20cm girth have been upgraded to be of Semi mature standard (20-25cm)
    - For the avoidance of doubt these are not additional trees but instead an upgrade to 30no. trees from extra heavy standard to semi mature. As such, the ecologist has confirmed this has no impact on the currently submitted BNG Metric/spreadsheet and/or habitat loss calculations.

- Details on the other neutral grassland proposed to achieve good condition are provided. The other neutral grassland on site is already in 'good' condition. It will be translocated on site. However, in order to maintain it as such the following should be undertaken:
    - The grassland should continue to be consistent with the UK Habs description of other neutral grassland
    - Sward height is varied (at least 20% of the sward is less than 7 cm and at least 20% is more than 7 cm) creating microclimates which provide opportunities for insects, birds and small mammals to live and breed.
    - Cover of bare ground is between 1% and 5%, including localised areas, for example, rabbit warrens
    - Cover of bracken Pteridium aquilinum is less than 20% and cover of scrub (including bramble Rubus fruticosus agg.) is less than 5%.
    - Combined cover of species indicative of suboptimal condition and physical damage (such as excessive poaching, damage from machinery use or storage, damaging levels of access, or any other damaging management activities) accounts for less than 5% of total area.
    - Ensure Schedule 9 invasive species remain absent from the habitat.
    - There are 10 or more vascular plant species per m2 present, including forbs that are characteristic of the habitat type

- I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided. This is a matter to be progressed / agreed with WMBC as part of S106 drafting – as a starting point, we will consider with our ecologist what we believe to be an accurate price per unit but we request that WMBC does the same via its own advisors / habitat values charged for other schemes in the Borough.

Please can you confirm receipt and re-consult GMEU as necessary and request their urgent review/response/confirmation that the queries have now been satisfactorily resolved.

Kind regards

Subject: FW: Consultee Comments for Planning Application A/23/96226/MAJOR

Hi [redacted],

You may already have seen the comments below as they are online but I just wanted to bring them to your attention.

As you will see further information is required re BNG.

There is now a need for a re-consultation with GMEU, Highways, Transport Policy Team and Salford City Council. In order to manage your client's expectations, its important to point out that all of the above will require a 14 day re-consultation period once the required information is received and as reports for March committee need to be completed by 19th Feb, there is a possibility that this application will not be ready to be presented at that time.

Given the level of objection in the surrounding area, it will be imperative that all outstanding issues are resolved before Officers can bring this before committee.

I am of course not ruling out making the March agenda, but I think its important to be realistic as we go forward.

Regards

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 07/02/2024 12:49 PM from [redacted] Greater Manchester Ecology Unit (Not Available) on behalf of Greater Manchester Ecology Unit.

Application Summary

Reference:	A/23/96226/MAJOR
Address:	Land At Astley Park Way Worsley
Proposal:	Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Case Officer:	[redacted]

Click for further information

Comments Details

Comments:	Hi [redacted] Thank you for consulting on the additional information.

1. Great Crested Newts
An unredacted version of the license has been provided. This confirms that Natural England are satisfied that the development is eligible of for district licensing.

Technically no condition is now required as the process is now in the hands of Natural England and their agent for delivery of the new ponds unless the LPA would want mitigation beyond the requirements of DLL. However the developer may decide to change their approach and not enter in to DLL at which point further survey may be required. I therefore recommend a condition along the following lines is applied to any permission.

"The development has the potential to cause harm to great crested newts and entered in to District Level Licensing.

Prior to development confirmation that:

• no changes to this mitigation approach have occurred or;
• if changes have occurred further information on the new mitigation approach to gcn.

should be provided to and agreed in writing by the LPA"

2. Contributing to and Enhancing the Natural Environment & Biodiversity Net Gain
Section 180 of the NPPF 2023 states that the planning policies and decisions should contribute to and enhance the natural and local environment. The defra metric has been provided in excel format as requested.

The baseline value of the site appears fair, I am therefore willing to accept 62.84 biodiversity units (BU) as the baseline.

The post-development value has been calculated at 51.89 BU a loss of 10.95 BU and a shortfall of 17.24 BU to achieve 10% BNG. This includes a significant number of units generated through urban tree planting, 150 trees achieving moderate condition, of which 56 are forecast to achieve medium size after 27 years. It also includes 0.6819 ha of other neutral grassland forecast to achieve good condition. Both are relatively high risk proposals, with a lack of detail (that I could find) on the tree planting schedule or grassland proposals. There is therefore a risk of the loss being higher.

I therefore recommend that prior to determination:

- the details of the urban tree planting schedule is provided to ensure that 150 trees are proposed ;
- that at least 56 have the potential to exceed 30cm dbh after 30 years and;
- details on the other neutral grassland proposed to achieve good condition are provided.

I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided.

Between January and November 2024, we will be carrying out a significant refurbishment and upgrade of our offices at the Brampton in Newcastle under Lyme.
The first of our 23 offices across the country, the Brampton remains at the heart of our business and is our main operational hub. We are delighted to be making this significant investment in the Staffordshire region for our people and our clients.
We will be moving into temporary accommodation in Newcastle under Lyme while these works are completed. During this time our facilities will be limited, and therefore please contact us first before coming to visit us so we can make appropriate arrangements for you. Our postal address and all other contact details will remain unchanged.
We look forward to welcoming you to our newly refurbished office in November 2024.

Hi [redacted],

Thank you for alerting me of this. I have just tried to call on the alternative number you gave to [redacted] but there was no option to leave a voicemail.

I have just spoken with the landowner's solicitor and the manuscript amendments have been missed, with apologies.

We really need this to be sealed by the Council tomorrow, and given the nature of the amendments and these only being in relation to cross referencing predominantly, would you be content to make these and initial, if myself and Peel's solicitor give authority that we are happy for you to do so? Previous authorities have accepted this in my experience.

For the avoidance of doubt, the manuscript amendments are in accordance with the attached comparison previously sent to you by [redacted], with the amendments required being as follows for ease:

- Clause 4.1 – change clause 10 to clause 11
- Clause 15.2 – change 10.1 to 11.1
- Clause 20.3 – change 18.1 to 20.1 and 18.2 to 20.2
- Sch 1, para 2.1 (b) – close bracket to be inserted at end of para
- Sch 2, para 2.1 (b) - close bracket to be inserted at end of para

Kind regards

Hi [redacted]

Just to advise that the landowners have prepared engrossments using a slightly earlier version of the agreed draft rather than the pdf engrossment I sent to you on 30 July. As the chargee has already signed it is proposed that manuscript amendments will be made to ensure the cross referencing is correct before completion.

I have attached a comparison of the final agreed draft and the pdf engrossment so you can see the amendments which will be made in manuscript.

I trust that this is acceptable but please advise as soon as possible if you consider there are any issues with this approach.

Kind regards, [redacted]

[redacted]

Between January and November 2024, we will be carrying out a significant refurbishment and upgrade of our offices at the Brampton in Newcastle under Lyme.
The first of our 23 offices across the country, the Brampton remains at the heart of our business and is our main operational hub. We are delighted to be making this significant investment in the Staffordshire region for our people and our clients.
We will be moving into temporary accommodation in Newcastle under Lyme while these works are completed. During this time our facilities will be limited, and therefore please contact us first before coming to visit us so we can make appropriate arrangements for you. Our postal address and all other contact details will remain unchanged.
We look forward to welcoming you to our newly refurbished office in November 2024.

Hi [redacted]

Further to my email below I attach a pdf engrossment for completeness. I shall arrange for the same to be printed and signed and then sent to you for sealing/completion. Please let me know if the documents should be sent to an alternate contact/address for sealing.

In the meantime, could you please confirm that your costs are in the amount of £500 (no VAT) as set out in the agreement so that I may ensure that we have the necessary funds.

Hi [redacted]

Thank you for providing the draft with your amendments which are agreed. I have accepted all tracked changes and have amended the definition of Site further to your comments. This is shown in tracked if you could please confirm this is acceptable.

My understanding is that the chargee will only consider the document once it is in agreed form therefore, on the assumption that the definition of Site will be agreed, the attached version of the draft has been sent to the chargee for approval. I shall advise if they raise any concerns with the chargee clause/the document.

With regard to your query regarding the freehold owner of title number MAN117935, I have asked my property colleague who has a more extensive knowledge of the site to confirm and will let you know as soon as possible.

Kind regards, [redacted]

Hi [redacted]

Thank you for confirming.

The parties have raised some further comments on the draft and have requested some minor amendments to the same.

As a brief explanation as to the amendments, the Second Owner has agreed to enter as a party to the S106 because a very small section of gravel footpath is to be constructed on land within their ownership (now defined as the Second Property) therefore they will enter as a party to covenant to notify of change in ownership of that part of the Site but the S106 obligations should sit with the First Owner (and their successors in title) who will be carrying out the Development.

I attach the amended version in tracked changes if you could please review and confirm approval.

Please note that we are still awaiting chargee approval.

I look forward to hearing from you.

Kind regards, [redacted]

Hi [redacted],

Thank you for your emails. I have taken instructions and we don't have any issues with the amendments or the use of the plan, although I am not altogether clear why, in clause 11, the word 'February' has been inserted before '2017 Agreement'.

As for the execution of the Deed, we would normally require wet signatures, unless there are particular reasons for this not being possible, and for the plans to be signed as well.

The Council's sealing days are Tuesday's and Thursday's, but this may sometimes need to be varied depending upon office attendance.

The other points in your email are noted but do not need to delay the engrossments being prepared.

If you have any questions, do not hesitate to contact me.

Hi [redacted]

Thank you for providing the amended draft. I have accepted your tracked changes and have added some further amendments in tracked for your review. Could you please also confirm that you are happy for us to use the application plan as the S106 plan?

Once we have your approval of the same we are happy to prepare engrossments. We presume the Council will require wet ink and all parties to sign all parts of the document but please advise if otherwise. Could you please also confirm the Council's sealing days.

Just to advise, I am currently liaising with my property colleague regarding the pending applications on the title and will advise if any affect the interest in the site as shown on the backdated title registers.

I am aware that there is an option to purchase land in favour of Astley Unit Trust affecting the site but this has not been exercised therefore we do not consider that Astley Unit Trust need to enter as a party to the agreement.

Hi [redacted]

Thank you for your email.

Please find attached an amended draft which now includes the BNG drafting which you kindly provided as well as reference to historic planning obligations relating to the Site (new clause 11). Please note that the draft remains subject to any further comments from my client.

I have attached a comparison to the previous version of the draft so you can see more easily what amendments have been made.

I am seeking instructions regarding the proposed S106 plan and shall send this to you shortly.

I also attach title to the site but please note that the registers and plans are backdated pending completion of registrations with the Land Registry. I attach the registers recently obtained from the Land Registry portal but we still await some of the plans by post. I shall forward these on once received but have attached some older plans which we have on file in the meantime.

You will note that there is a very small parcel of land within the leasehold title which falls into the application boundary. We do not propose to include the leaseholder as a party to the site due to the size and position of the overlapping parcel and given that our client is the freehold owner in any event.

I should be grateful if you would review the attached and provide comments/approval of the same.

I look forward to hearing from you.

Hi [redacted],

Thank you for your email and your comments are noted.

Regarding BNG, the following expressions and meanings were included in Clause 1 of a similar Agreement:-

"Biodiversity Net Gain" – the system of enhancement of habitat in respect of the authorisation of new development pursuant to part 6 and schedule 14 of the Environment Act.

"Biodiversity Off-setting Contribution" – the sum of £199,332 to off-set the loss of habitats on the Site and to provide a net gain of 10% for the purposes of Biodiversity Net Gain and to be used by the Council or its nominee towards the establishment of new or improved habitat in accordance with the Biodiversity Off-setting Scheme.

"Biodiversity Off-setting Scheme" – the establishment of new or improved habitat by the Council at Bedford Colliery.

As far as the Schedule is concerned, the Owner covenanted to pay the Contribution prior to the Commencement of Development and the Council covenanted to spend or commit it within 30 years from the date of the payment.

I have not run this proposed wording past [redacted] yet, but hopefully she can agree to it or make any necessary changes.

Good morning [redacted]

I believe the initial draft and my contact details may have been passed on via an email from my client's consultant, [redacted].

I can confirm that I am instructed in respect of the Section 106 agreement going forward.

I shall make some minor amendments to the draft in respect of the agreed highway contribution and will provide the amended draft and title to you shortly. We also intend to make some amendments with a view to referencing the existing planning obligations in respect of the land which we hope will not be contentious.

I understand that the Council may be able to provide drafting for the BNG contribution which has been used in other matters in respect of the same BNG scheme. If you are able to provide this in the meantime, I can add this into the draft, otherwise are you happy for the schedule to be left blank and you insert the relevant drafting upon review of the document?

Kind regards, [redacted]

Hi both

I have reviewed the agent comments and the technical notes regarding the land contamination condition. I have some comments to pass over.

It is proposed that points 1&2 of the condition are removed (relating to more gas monitoring being needed following earthworks), and a pre-emptive ground gas barrier is included. I do have some concerns without reviewing at least a revised and detailed ground gas risk assessment.

I have detailed some options below:

The land condition currently requests an updated site investigation following on-site mine stabilsation works. This requires additional gas monitoring and an updated ground gas risk assessment once these earthworks are completed.

As detailed in the phase 2 ground investigation report by Discovery CE Limited, the risk from ground gas falls under CS2 and as such gas protection measures are required. However, as mine stabilisation works can lead to a change in the ground gas risk, Section 6.14.3 states that 'ground gas monitoring should be undertaken both during and post completion of any earthworks to confirm that this Characteristic Situation remains appropriate'. We consider that grouting/ mine stabilsation works fall under earthworks.

This approach is agreed by EP as it follows the guidance set out in 'Good Practice for Risk Assessment for Coal Mine Gas Emissions, CL:AIRE (October 2021)'.

The engineer proposals are that a pre-emptive gas membrane is to be installed to remove the need for post grout monitoring.

As it is true that the proposed grouting works may cause a reduced risk from ground gases, the opposite is also possible with an increased ground gas risk from altered migration pathways or acidic groundwaters being displaced (as detailed in the CL:AIRE document above).

Therefore, there are two options that I see as appropriate at this stage:

1. Completion of post grouting works gas monitoring and an updated risk assessment to confirm the current on-site risk from ground gases (as originally recommended).
2. Submission of an updated ground gas risk assessment **without** additional monitoring but including a detailed lines of evidence approach and more justification when considering appropriate standards and guidance as to the final risk from ground gases following the proposed grouting work.

If the conclusion of the risk assessment as mentioned in option 2 points towards further monitoring being required, then this will need to be complete, and the risk reassessed following.

>>>

It also needs to be noted that not all the pre-commencement of the build phase elements of the condition can be removed (notably the remediation strategy aspects of point 2 in the condition), regardless of the decision relating to additional gas monitoring.

Defining the ground gas risk and the initial selection of appropriate gas protection measures is only part of the overall process. It is the responsibility of the appointed designer/specifier of gas protection measures to understand the gas risk assessment findings and any building related influences when considering design options and choices to be used for the gas protection measure.

Designing ground gas protection systems in accordance with BS 8485:2015+A1:2019 is more than just adopting a Characteristic Situation and adding up points. It requires a detailed justification of each component, including for any gas membrane and calculations for any underfloor ventilation system that is specified. The points assigned to the floor construction should also be justified. Subsequent validation of each component will also be required.

The detailed design and specification of the protection measures, as recommended by the appointed designer/specifier (who has overall design responsibility), should be recorded in a detailed design report and shown on detailed site specific drawings for construction, with each component of the gas protection design, product specification(s) and verification plan being clearly defined and justified, as detailed within British Standard BS 8485:2015+A1:2019 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings' (s.7.4 and s. 8.3 in particular) and CIRIA C735 'Good practice on the testing and verification of protection systems for buildings against hazardous ground gases').

Therefore, a Remediation Strategy & Verification Plan (including a ground gas design report as detailed above), will need to be submitted for approval prior to commencing the build phase.

The condition can be reworded to accommodate whatever approach is taken, but it must be stressed that all gas protection measures need to be approved as part of the RS/VP prior to commencement of the build phase.

Please let me know your thoughts regarding an agreed approach for the gas risk, as I can update the condition accordingly.

Many Thanks

Hi [redacted]

The below was for the applicant to comment on before a condition together. Would you prefer me to write a new condition with those options below?

This could all be sorted as part of a condition; the original condition is still suitable to be honest. Even if they don't agree with it, they could have submitted their correspondence as part of the con discharge application and there would be no difference.

To summarise for yourself, the site needs some earthworks that may increase the risk of ground gas. We ask that they do further gas monitoring after these earthworks to confirm if the gas risk has increased. The applicant does not want to do that, and has submitted some consultant comments about installing gas measures as a precaution.

The two options I have given is: 1. for the consultant to submit a full risk assessment including the detailed justification and prediction of what the gas risk will be after the earthworks, or 2. Do the gas monitoring as normal and submit a risk assessment afterwards with the results (as originally conditioned).

Push comes to shove; the original condition is still suitable in my opinion and might be easiest for you as you have it already. If so, I would just consider these comments from the applicant once the con discharge request comes in. The comments below could still be passed on for them to consider before the discharge request comes in.

Give me a teams call if you would prefer, much harder to explain myself over email!

Many Thanks

Subject: A/23/96226/MAJOR - Astley Park Way - Land Contamination

Hi both

I have reviewed the agent comments and the technical notes regarding the land contamination condition. I have some comments to pass over.

It is proposed that points 1&2 of the condition are removed (relating to more gas monitoring being needed following earthworks), and a pre-emptive ground gas barrier is included. I do have some concerns without reviewing at least a revised and detailed ground gas risk assessment.

I have detailed some options below:

The land condition currently requests an updated site investigation following on-site mine stabilsation works. This requires additional gas monitoring and an updated ground gas risk assessment once these earthworks are completed.

As detailed in the phase 2 ground investigation report by Discovery CE Limited, the risk from ground gas falls under CS2 and as such gas protection measures are required. However, as mine stabilisation works can lead to a change in the ground gas risk, Section 6.14.3 states that 'ground gas monitoring should be undertaken both during and post completion of any earthworks to confirm that this Characteristic Situation remains appropriate'. We consider that grouting/ mine stabilsation works fall under earthworks.

This approach is agreed by EP as it follows the guidance set out in 'Good Practice for Risk Assessment for Coal Mine Gas Emissions, CL:AIRE (October 2021)'.

The engineer proposals are that a pre-emptive gas membrane is to be installed to remove the need for post grout monitoring.

As it is true that the proposed grouting works may cause a reduced risk from ground gases, the opposite is also possible with an increased ground gas risk from altered migration pathways or acidic groundwaters being displaced (as detailed in the CL:AIRE document above).

Therefore, there are two options that I see as appropriate at this stage:

1. Completion of post grouting works gas monitoring and an updated risk assessment to confirm the current on-site risk from ground gases (as originally recommended).
2. Submission of an updated ground gas risk assessment **without** additional monitoring but including a detailed lines of evidence approach and more justification when

considering appropriate standards and guidance as to the final risk from ground gases following the proposed grouting work.

If the conclusion of the risk assessment as mentioned in option 2 points towards further monitoring being required, then this will need to be complete, and the risk reassessed following.

>>>

It also needs to be noted that not all the pre-commencement of the build phase elements of the condition can be removed (notably the remediation strategy aspects of point 2 in the condition), regardless of the decision relating to additional gas monitoring.

Defining the ground gas risk and the initial selection of appropriate gas protection measures is only part of the overall process. It is the responsibility of the appointed designer/specifier of gas protection measures to understand the gas risk assessment findings and any building related influences when considering design options and choices to be used for the gas protection measure.

Designing ground gas protection systems in accordance with BS 8485:2015+A1:2019 is more than just adopting a Characteristic Situation and adding up points. It requires a detailed justification of each component, including for any gas membrane and calculations for any underfloor ventilation system that is specified. The points assigned to the floor construction should also be justified. Subsequent validation of each component will also be required.

The detailed design and specification of the protection measures, as recommended by the appointed designer/specifier (who has overall design responsibility), should be recorded in a detailed design report and shown on detailed site specific drawings for construction, with each component of the gas protection design, product specification(s) and verification plan being clearly defined and justified, as detailed within British Standard BS 8485:2015+A1:2019 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings' (s.7.4 and s. 8.3 in particular) and CIRIA C735 'Good practice on the testing and verification of protection systems for buildings against hazardous ground gases').

Therefore, a Remediation Strategy & Verification Plan (including a ground gas design report as detailed above), will need to be submitted for approval prior to commencing the build phase.

The condition can be reworded to accommodate whatever approach is taken, but it must be stressed that all gas protection measures need to be approved as part of the RS/VP prior to commencement of the build phase.

Please let me know your thoughts regarding an agreed approach for the gas risk, as I can update the condition accordingly.

Many Thanks

Hello

Just to clarify via email and pass on if needed –

Points 1 and 2 of the condition cannot be removed with the information submitted. The current approach in the condition is for further monitoring post earthworks, risk assess, and revise the remediation strategy to include the specific required gas protection measures.

The other approach given in my previous email, would be to submit a detailed ground gas risk assessment with evidenced justification of the predicted gas risk post earthworks. If this risk is suitably justified and agreed, then monitoring could be avoided depending on the outcome, and a precautionary gas protection measure could be installed. The remediation strategy would need to be revised to incorporate this proposal.

Depending on which approach is taken, points 1 and 2 of the condition remain valid as an updated ground gas risk assessment is required.
Also, both options require a revised remediation strategy & verification plan prior to commencement of the build phase (Point 2 & 3 of condition).

Therefore, the current condition remains appropriate.

If approved, then a condition discharge consultation will be required in future to resolve this condition with either of the above approaches taken and the reports submitted for approval prior to commencement of the build phase.

The details relating to cover systems, ground gas design reports, and other technical guidance within my previous email should be fully considered and included.

Many Thanks

Hi [redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with the requirements through condition discharge. Please can you let me know either way?

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

[redacted] / [redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious 〈A1〉, both in the sheet material [A)] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; 〈A1〉 • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • 〈A1〉 *Text deleted* 〈A1〉 • sufficiently strong 〈A1〉 [B)] 〈A1〉 to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); 〈A1〉 and to withstand in-service stresses (e.g. settlement if placed below a floor slab); 〈A1〉 • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. 〈A1〉 *Text deleted* 〈A1〉 If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A)] 〈A1〉 A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B)] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. 〈A1〉

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

wsp

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours/[redacted]s thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure Gareth is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted],

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Subject: RE: A/23/96226/MAJOR Astley Business Park, Wigan

Morning [redacted]

Has the below moved on last week?

If not, my view is that firstly they need to secure 10% BNG as required by development plan policy in the PfE, and if not, why not? The landscape has moved on since [redacted]'s S.Lancs application, their proposal needs to be assessed on its own merits and there isn't a precedent here to fall back on.

On the cost of a unit, you need to understand what is driving the difference in figures, where does this come from? Is it the type of habitat being lost, the type of habitat they're replacing, where the new habitat is being located? From here I would suggest you're in a position to push back to the applicant on what is required.

My take here though is that we're confusing/muddying the BNG process for pre & post mandatory requirements, are they just paying £x amount for units, and if so, where are they being paid to? That's easy then once a cost of the units is agreed. If we're collecting money on the basis of spending it on Council land (on the basis the application came in before mandatory BNG and the land doesn't need to be formally registered – because no Council land is in respect of the latter), then between [redacted] and GMEU, we need to agree an ecological scheme that (with whatever they're putting on site) achieves 10% gain (that the applicant is in agreement with), then ask for a financial amount through a UU to implement such a scheme on Council land (no need to work out credits or units, just a scheme to get 10% and what that'll cost). This will need coordinating with [redacted] GMEU and the applicant – [redacted], in his emails, has identified Council sites, in my mind what can he do on that land to achieve 10% and how much will it cost?

Hope the above helps and happy to discuss if easier, probably with [redacted] in the room.

Regards,

Subject: FW: A/23/96226/MAJOR Astley Business Park, Wigan

Hi [redacted],

Agreement on the BNG contribution is (I hope) the final point to agree on for the Astley Business Park application that will come before Members in June.

The total loss is agreed now at 10.95 units but we have yet to settle on the financial contribution which will achieve net gain.

The applicant is comparing it to the appeal decision on one of [redacted]s at Lockett Road (see ref below) where by circa £5k per units appears to have been accepted. But lately the Council has been seeking around £20k per unit.

GMEU have advised using a formula to work out the contribution (see email attached) and David confused me as he included £12k per unit but this wouldn't be consistent with cases brought lately before Members and he has confirmed its up to us what we charge.

I have informed the agent that their offer is very low but I need some guidance on how to proceed given that we don't have a great degree of consistency on costs. See email attached from [redacted] too.

The agent is looking for another meeting on this one next week to discuss progress; I've been told they have paid the full PPA fee today.

[redacted]

[redacted]

On a separate matter, I write to set out our position in respect of the BNG offsetting and specifically a reasonable value to be ascribed to the biodiversity units to be offset to reach the 'no net loss' position. I note that Wigan Council with input from GMEU will also be providing its own view on this matter.

Having reviewed recent planning permissions in Wigan for comparable examples of offsetting requirements for a logistics scheme, we refer you to the Meridian 6 scheme by Glenbrook (Application Ref: A/21/92036/OUTMAJ) which was allowed on appeal in May 2023 following the refusal of consent.

The appeal decision and Committee report prior to the application being refused both refer to a [redacted] BNG contribution in order to reach a 'net gain' position (but not 10%, just a 'no net loss' – the same approach we are taking with the Astley scheme).

Looking at applicant's Planning Statement (see attached at page 62), it refers to a significant habitat loss of 24.99 units (59% net loss) and a 100% loss of hedgerow units. [redacted]

Given the similarities of this scheme insofar as the type of development/use classes proposed on a greenfield site, we consider the habitat value of [redacted] per habitat unit to be a useful precedent and one that we feel should be applied to the PLP Astley scheme.

We welcome your view and how we progress matters pertaining to BNG offsetting / the S106 mechanism.

Kind regards

wsp

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thank you for your email. Whilst clearly disappointing to have reached this position so very late in the process, we are where we are and are eager to resolve matters as soon as possible. As such, for completeness, the transport consultant has provided technical notes in response to each party's highway comments, as follows:

- 2nd Response to Wigan Council (WC) comments (i.e. [redacted]s comments dated 16 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1003.P02
- 3rd Response to WC comments (i.e. [redacted]'s comments dated 11 Feb 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1004.P02
- SCC Response (i.e. SCC's comments dated 19 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1005.P01

We have submitted the responses as 3 x separate technical notes as we feel it would be easier for the different parties to review/address, given the number of appendices also included within the individual documents.

In terms of addressing the Mosley Common junction point, Hydrock have included the following paragraph in the '3rd WC response' document which should provide sufficient justification / comfort as to why the junction has not been assessed:

Para 2.3.4 - Notwithstanding the above, Hydrock have reviewed their Traffic Flow Figures (which were previously provided along with the previously submitted TA as part of the application), and identified that the only junction within close proximity of the Mosley common site impacted by the proposed development flows is the A580 / A577 junction. However, as shown in our Traffic Flows figures, the total 2-way vehicle trips (associated with the proposed

development) travelling along the A580 to/from the A580 / A577 junction only equates to 19 in the AM peak, and 23 in the PM peak, which is less than the 30+vehicle 2-way trips assessment criteria suggested by WCC. Therefore, this junction was not requested to be assessed. Furthermore, it should also be noted that this junction was also recently upgraded in 2023.

We would hope it isn't necessary given the clarity provided in the various notes/responses but if a meeting is required to resolve any residual matters following review of the above, please can you coordinate as soon as feasibly possible.

Please can you confirm receipt and please can you re-consult the three parties and request their urgent review of the above/attached and confirmation that highways matters are indeed now resolved so that we can move forward to Committee.

Kind regards

[redacted]

From: [redacted]
Sent: Friday, February 23, 2024 3:07 PM
To: [redacted]
Subject: A/23/96226/MAJOR Astley Business Park, Wigan

Good afternoon [redacted]

Apologies for the delay in providing an update for you but I can confirm that my highway colleagues have held further discussions earlier this week as planned, and the outcomes of those discussions have been shared with [redacted] and myself.

Taking all matters into account, I remain of the view that the points raised below must be addressed in full before Officers can make a positive recommendation to Members; the only exception to this is the reference made to the Mosley Common application. I accept that this was not a committed development when the application was submitted (nor did the Mosley Common application take this application into account in their transport studies). However, I would advise that providing some commentary on the combined impacts (now that it is a committed development) may provide some additional comfort to Members.

I appreciate that some of the points below were addressed in the Technical Note received early last week but it would be appreciated if this could be combined with a full response on all other points for publication and re-consultation.

The information is necessary to ensure that Officers can confirm that the proposed development is acceptable in highway terms and confidently relay this to Members. It is important to note that this application has attracted 100+ objections from local residents, a call in from local Councillors and an objection from James Grundy MP. One of the common themes running through all of these is the impact on the local highway network and as such, taking the application before Members at the present time and in advance of all matters raised by [redacted] and Salford Council being addressed, raises a significant possibility that Members could overturn or defer the application.

I appreciate that issues have been raised that were not done so at the pre-application stage and whilst that is regrettable, it is not a reason to move past them without addressing them in full to ensure that when this application is reported to Members, Officers can be confident of our positive recommendation being accepted.

On other matters, I can confirm receipt of the CGIs earlier this week. In addition, I have requested some further guidance from our ecology advisors on a potential financial contribution to achieve net gain off site but would welcome your position on this matter also as previously discussed.

Regards

Hi [redacted]

You'll see from my email chasers to [redacted] (today and yesterday) that unfortunately we have not yet received an update from [redacted] following his meeting with [redacted] on Monday, despite what we had agreed at last week's meeting, which is clearly disappointing as we are no clearer as to what the Council's collective highways position is. Please can you chase internally and provide an urgent update?

It is worth noting the attached email trail between the transport consultants, Hydrock, and [redacted] (which [redacted] was cc'd to – I assume it is the same [redacted] that has now raised issues). The attached email trail clearly shows that [redacted] and others were provided with the draft TA and Framework Travel Plan prior to submission, comments which were picked up in the submission versions. It is therefore all the more confusing that despite having had sight of a draft TA that new issues have been raised.

I trust you can provide us with an urgent update so that we are clear where we stand.

Kind regards

Subject: RE: A/23/96226/MAJOR Astley Business Park, Wigan

Ok, put it in the diary please. 10% is from PfE and its part of the development plan, if they can't achieve it we can still approve on the basis of a 'planning balance' argument, but then it comes down to why they can't, which if they're throwing money at it will be viability, and that'll come with potential delays. It maybe that we accept such a position without going external, but as a starting point, and as part of the negotiations, we say there's a development plan policy that requires 10% BNG, what is your position on being non-compliant with it? I would suggest we need a bit more than 'we submitted before PfE was adopted'.

Hi [redacted]

I think we'll need to have a chat about this and you've lost me to be honest.

Due to the timing of the submission, and the legislative requirements at the time, they only need to provide net gain and not 10% (this is recognised by GMEU).

I'll try and find 30mins in the diary this week for a further discussion.

Regards

Therese

To: [redacted]
Subject: RE: A/23/96226/MAJOR Astley Business Park, Wigan

Morning [redacted]

Has the below moved on last week?

If not, my view is that firstly they need to secure 10% BNG as required by development plan policy in the PfE, and if not, why not? The landscape has moved on since [redacted]'s S.Lancs application, their proposal needs to be assessed on its own merits and there isn't a precedent here to fall back on.

On the cost of a unit, you need to understand what is driving the difference in figures, where does this come from? Is it the type of habitat being lost, the type of habitat they're replacing, where the new habitat is being located? From here I would suggest you're in a position to push back to the applicant on what is required.

My take here though is that we're confusing/muddying the BNG process for pre & post mandatory requirements, are they just paying £x amount for units, and if so, where are they being paid to? That's easy then once a cost of the units is agreed. If we're collecting money on the basis of spending it on Council land (on the basis the application came in before mandatory BNG and the land doesn't need to be formally registered – because no Council land is in respect of the latter), then between [redacted] and GMEU, we need to agree an ecological scheme that (with whatever they're putting on site) achieves 10% gain (that the applicant is in agreement with), then ask for a financial amount through a UU to implement such a scheme on Council land (no need to work out credits or units, just a scheme to get 10% and what that'll cost). This will need coordinating with [redacted], GMEU and the applicant – [redacted], in his emails, has identified Council sites, in my mind what can he do on that land to achieve 10% and how much will it cost?

Hope the above helps and happy to discuss if easier, probably with [redacted] in the room.

Thank you for issuing the attached correspondence

We have issued a series of emails containing documents and amended plans to address points numbered 2-7 in your attached letter.

With regards to point 1 on the need to provide to a CEMP, we can address this during the course of determination of the application but it shouldn't hold up validation. In many cases, this is recommended as a planning condition by consultees.

Please can you confirm the above?

Kind regards

Hi [redacted]

They are basically the raw data that is used in junction modelling. The applicant's transport consultant can provide them.

TfGM will check the raw data and run the files to see if there are inconsistencies in the modelling. Sometimes a naughty consultant will input the wrong data to make a junction appear to have spare capacity!

Good evening,

The Local Highway Authority consulted TfGM in respect of Application A/23/96226/MAJOR on the 24th November 2023. Please could you advise of the timescale that you would require comments by.

Please note that in order for TfGM to carry out a full review and validate the modelling work, the LINSIG files will need to be supplied.

Kind regards

Good afternoon,

TfGM were notified about this application today, so would it be possible to pass on comments by the 15th December (within the usual 21 days)?

Also, would it be possible to request that the consultant sends across the Linsig file for TfGM to review?

Many thanks,

[redacted]

Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works.

Hi [redacted]

The above application may be coming before Members in March 2024 and there will be a short fall of BNG on site which will require financial contribution for off-site allocation. I have attached the BNG spreadsheet provided by the applicant.

There are still some questions about the exact level of loss on site but we're looking at around 11 units. GMEU haven't suggested a figure yet but [redacted] has asked if we can start looking at where this money could be spent as things are moving fast and we will need to provide some idea to Members as to its allocation.

I usually forget to provide you with something you need so please do let me know if you need anything else!

Regards

To: [redacted]
Subject: RE: A/23/96226/MAJOR - Land At Astley Park Way, Worsley

Hi [redacted]

Sorry for the delay. Please see below comments:

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).
- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.
- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.
- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.
- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)
- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.
- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.

FYI This is my first real involvement with the development and [redacted]'s pre-app comments (in the TA appendices) might make it difficult for us to challenge the developer too much.

Kind Regards

Good afternoon [redacted], [redacted]

The above application has attracted a lot of attention locally and a lot of the concerns raised relate to the traffic, highways etc. David Proctor has indicated that a highways contribution would be required so the agent is waiting for the amount to be confirmed so that they can progress the legal agreement.

We need your initial comments as soon as possible please as the applicant is seeking to enter into a PPA, which mean we will have to prioritise our responses etc.

[redacted]– apologies, I don't think I formally consulted you but could you please accept this email as a consultation request?

Happy to a quick chat through the details of the scheme if that would help.

Thanks

Therese

Subject: RE: [Hydrock: 21714-TMBI] A/23/96226/MAJOR Astley Business Park, Wigan

Hi [redacted]

Sorry to bother you again on this one but for the purposes of our planning committee report, would it be possible to receive a more comprehensive "final" response on this, taking the points below as those which need to be specifically addressed?

Just a couple of lines under each would allow me to compose a suitable paragraph in my report which will in turn form the basis of the likely discussion at planning committee.

Thanks

[redacted]

I've reviewed the Technical Note and its more of the same I'm afraid, with lots of references to our previous responses. Please see below comments on the response:

1. Assessment Years – consultant is arguing that a year of app and 5+ year assessment is ok as end user is unknown and this is a consistent approach taken at other local authorities in the

NW. The fact that the end user is unknown only strengthens my point. Its going to be a minimum of 3 years before the development is operational. We need to understand the impact growth in traffic will have on the adjacent transport network.

We had to accept the previous methodology that [redacted] initially agreed. Although it is not ideal, a year of application and a five year plus assessment still allows us to understand the impact the development would have on the operation of the highway network now and in the future, with appropriate traffic growth factors applied to the future year assessment to account for increases in traffic.

2. Committed Developments – fine to exclude Mosley Common, as noted in your email Therese.

   No further comments required.

3. HGV Trip Distribution – Observed count data from June 2022 was used to identify HGV movements. This needs to be explained in greater detail (where in the TA, the split between east and west movements, the locations). The further evidence of HGV movements travelling westbound is a Google image taken from September 2021. This cannot be considered conclusive evidence.

   Further information provided to demonstrate that the distribution of HGV's was based on observed traffic count data taken from Chaddock Lane in June 2022.

4. Distribution Methodology – JTW information taken from 2011 should be used to support a planning application submitted in 2023. Turning count data or another form of relevant information must be used instead.

   We had to accept the previous methodology that [redacted] initially agreed. Again, not ideal, however, it is the industry standard method for distributing traffic onto the network. Census data collected in 2021 should not be used due to the restrictions placed on society because of the pandemic and the impact it had on journey to work methods.

5. Traffic Flow Figures – Response noted, conversion of HGVs to PCUs not accounted for within assessment. As a PCU is equivalent to one standard LGV trip junctions experiencing 30 or more PCU movements should be assessed to accord with the initial response from Network Management.

   Additional junction assessment of A580 / Mosley Common Road undertaken.

6. Junction Assessments – Must be updated to account for assessment years and potentially updated HGV distribution.

   As above, additional junction assessment of A580 / Mosley Common Road undertaken. This demonstrated that the junction is over capacity both with and without the development in place for the year of application and future year assessments. The impact the development will have on the operation of the junction is neglible and therefore mitigation is not required.

   It should be noted that a junction improvement scheme is proposed as part of the Mosley Common planning application, which was approved by Planning Committee in January 2024.

7. Proposed Car Parking Provision – with no end supplier identified it is difficult to determine the appropriate level of parking provision. A list of recently consented developments taken from various locations across the north west is not adequate justification. Once operational these sites could have issues with on-street parking for example. There will also be a number of speculatively developed sites with more parking.

   We agreed to disagree on this. Probably best to say 'evidence has been provided to demonstrate that the proposed parking provision is suitable to serve the development. Furthermore, the developer is happy to consider the introduction of Traffic Regulation Orders in the form of double yellow lines within the immediate vicinity of the site.'

We don’t really have any new information, its just a reiteration of the initial TA. We need more before this is considered acceptable.

Good afternoon,

TfGM were notified about this application today, so would it be possible to pass on comments by the 15th December (within the usual 21 days)?

Also, would it be possible to request that the consultant sends across the Linsig file for TfGM to review?

Many thanks,

[redacted]

Attachments: Committee Report TM001.docx

Hi [redacted]

Please find attached my first draft for the above committee item. This one had a PPA and [redacted] was involved in many of the discussions so not sure if its best that this one just goes straight through to him, but I'll leave that up to you.

The report contains some notes for [redacted]'s attention. I also have to add the plans list (Civica keeps crashing today so I've given up and I'll complete that later today). The attached report is saved in the delegated folder, and I'll use that version to complete the plans list later.

I'm on leave next week so only around until Friday to do any amendments.

Thanks

Therese

Hi[redacted],

Hope you are well! I realise I am well behind on this one, trying to catch up as much as possible before Christmas!

Just a quick question though, I seem to remember having some pre app for this site and agreeing points for a LVIA to support the application but one hasn't been submitted. I can't remember what the app reference for the preapp is could you let me know so I can dig out my previous comments or you might have them on file. I think it was some time last year when [redacted] was dealing with it.

Cheers

Landscape Design Comments

Application Number:	A/22/93349/PREAPP
Proposal:	Pre app advice for large scale major warehousing and logistics
Development at:	Land At Astley Park Way Worsley

Landscape Design

The proposal site has long been earmarked for employment uses and has secured permission for such in the past. I therefore have no comments to make with regards to the suitability of the site for this use in strategic landscape terms.

With regards to the layout and landscape design there are some concerns that will need to be addressed in any subsequent planning application. The main concern is with regards to the height of proposed buildings, their relationship with adjacent residential development and their visual impact. The proposed plan submitted with this application suggests landscaped mounds around site boundaries. There needs to be a joined-up approach to the mitigation of noise and visual impacts for adjacent residential areas. A full application should be supported by photomontages of proposed units in situ from various viewpoints and site sections showing the relationship of units, ground levels and existing housing.

There are well established historic field boundaries with native hedgerows both through and on the boundaries of the proposed development site. Their retention should be sought wherever possible and suitable mitigation provided both in terms of landscape character and habitat enhancement through landscaped areas in any subsequent layout plan. It is not clear from this layout plan if any of the existing hedgerows are to be retained.

There are several public rights of way that run across and around the site, access to all of these should be retained and enhanced to encourage sustainable travel to the site and connections to the wider green infrastructure network.

The applicant will need to consider the need to provide net gains for biodiversity.

Hi [redacted]

I have spoken to the applicant today and he has advised that he agreed with [redacted] that a full VIA would not be required along with the formal submission. There is no record of this unfortunately so have no basis to challenge this.

He has however agreed to submit some CGIs to assist, and he will use some of the viewpoints agreed during the pre-app.

[redacted] sat in on that meeting too and was happy with that; there may be some pressure to bring this one before Members in March so it would be useful to have your general comments quite quickly following recent of those CGIs. As I'm on leave next week, would it be okay if I shared your email with the agent so that he can send them to you directly early next week?

Thanks

Hi [redacted]

I realise we never had a catch up regarding this.

I have attached my pre app comments and email correspondence with [redacted] from before he left. As you will see I was under the impression that the applicant had agreed to undertake a visual impact assessment so that we could better understand and visualise the relationship between the new building units and existing residential dwellings.

I'm not sure if there was some subsequent advice or agreement made that they didn't need to do a visual impact assessment.

Cheers

Hi Councillor,

Thank you for your email.

[redacted]

In terms of A/23/96226/MAJOR (Astley Business Park), we are currently still in the assessment phase and the applicant is working through some comments made recently by the highways team and Salford Council. I would imagine that the earliest this proposal would come before Planning Committee is March, but I don't know for certain at the present time.

I hope this is of assistance.

[redacted]>
Cc: [redacted]
Subject: A/23/96226/MAJOR - Astley Park Way - Land Contamination

Hi both

I have reviewed the agent comments and the technical notes regarding the land contamination condition. I have some comments to pass over.

It is proposed that points 1&2 of the condition are removed (relating to more gas monitoring being needed following earthworks), and a pre-emptive ground gas barrier is included. I do have some concerns without reviewing at least a revised and detailed ground gas risk assessment.

I have detailed some options below:

The land condition currently requests an updated site investigation following on-site mine stabilsation works. This requires additional gas monitoring and an updated ground gas risk assessment once these earthworks are completed.

As detailed in the phase 2 ground investigation report by Discovery CE Limited, the risk from ground gas falls under CS2 and as such gas protection measures are required. However, as mine stabilisation works can lead to a change in the ground gas risk, Section 6.14.3 states that 'ground gas monitoring should be undertaken both during and post completion of any earthworks to confirm that this Characteristic Situation remains appropriate'. We consider that grouting/ mine stabilsation works fall under earthworks.

This approach is agreed by EP as it follows the guidance set out in 'Good Practice for Risk Assessment for Coal Mine Gas Emissions, CL:AIRE (October 2021)'.

The engineer proposals are that a pre-emptive gas membrane is to be installed to remove the need for post grout monitoring.

As it is true that the proposed grouting works may cause a reduced risk from ground gases, the opposite is also possible with an increased ground gas risk from altered migration pathways or acidic groundwaters being displaced (as detailed in the CL:AIRE document above).

Therefore, there are two options that I see as appropriate at this stage:

1. Completion of post grouting works gas monitoring and an updated risk assessment to confirm the current on-site risk from ground gases (as originally recommended).
2. Submission of an updated ground gas risk assessment **without** additional monitoring but including a detailed lines of evidence approach and more justification when considering appropriate standards and guidance as to the final risk from ground gases following the proposed grouting work.

If the conclusion of the risk assessment as mentioned in option 2 points towards further monitoring being required, then this will need to be complete, and the risk reassessed following.

>>>

It also needs to be noted that not all the pre-commencement of the build phase elements of the condition can be removed (notably the remediation strategy aspects of point 2 in the condition), regardless of the decision relating to additional gas monitoring.

Defining the ground gas risk and the initial selection of appropriate gas protection measures is only part of the overall process. It is the responsibility of the appointed designer/specifier of gas protection measures to understand the gas risk assessment findings and any building related influences when considering design options and choices to be used for the gas protection measure.

Designing ground gas protection systems in accordance with BS 8485:2015+A1:2019 is more than just adopting a Characteristic Situation and adding up points. It requires a detailed justification of each component, including for any gas membrane and calculations for any underfloor ventilation system that is specified. The points assigned to the floor construction should also be justified. Subsequent validation of each component will also be required.

The detailed design and specification of the protection measures, as recommended by the appointed designer/specifier (who has overall design responsibility), should be recorded in a detailed design report and shown on detailed site specific drawings for construction, with each component of the gas protection design, product specification(s) and verification plan being clearly defined and justified, as detailed within British Standard BS 8485:2015+A1:2019 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings' (s.7.4 and s. 8.3 in particular) and CIRIA C735 'Good practice on the testing and verification of protection systems for buildings against hazardous ground gases').

Therefore, a Remediation Strategy & Verification Plan (including a ground gas design report as detailed above), will need to be submitted for approval prior to commencing the build phase.

The condition can be reworded to accommodate whatever approach is taken, but it must be stressed that all gas protection measures need to be approved as part of the RS/VP prior to commencement of the build phase.

Please let me know your thoughts regarding an agreed approach for the gas risk, as I can update the condition accordingly.

Many Thanks

Hi [redacted]

[redacted] has reviewed the latest submitted noise document : '784-B034505: PLP ASTLEY BUSINESS PARK, ACOUSTIC BARRIER TECHNICAL NOTE'.

The technical note refers to deviating away from the required barrier specifications as proposed in the original noise assessment.

The noise assessment will need to be revised, with updated noise modelling based on the newly proposed acoustic barrier as detailed in the technical note.

The original CONG7 condition is no longer recommended, and this information will need to be submitted upfront.

Many Thanks

Hi [redacted],

Just a quick on the meeting at 12pm. There will be very little to talk about as there hasn't been much progression since my last one 2 weeks ago. There a couple of things with the applicant which hasn't come through yet such as addressing PROW comments and providing an draft Heads of Terms (David P advised them that there would be highway contributions required but as yet I don't know what these are or what they will be for).

On our side, we are waiting for consultee comments mainly Highways, EP and GMEU. They are late coming through, but I did explain that this might be the case in the run up to Christmas.

Not really sure what else they will want to discuss.

I'm logging off for an hour this morning to go to [redacted] but will be back on line at around 11:45.

Importance: High

Hi [redacted],

[redacted]'s comments are attached, along with [redacted]'s and those from Salford Council. All raise issues which I would be concerned about going before Members with given the amount of local objections (including a recent objection from James Grundy MP).

[redacted] did acknowledge that [redacted] did some pre-app comments (pre-app was led by [redacted], I think) which he had no input into.

I'm not entirely convinced that we can deal with GMEU's comments by condition. There is a lack of clarity on the true loss and whilst I have not asked for a 10% gain, given the application was submitted before today, I don't know if we can calculate a figure to cover the total loss off-site.

I'm working on my reports for the food court at Eckersley which will be ready by Friday. I'm off Mon-Wed next week but could write this one up at the end of next week which would give us time to make the March agenda so it is doable but I'm concerned about the focus on highways and the fact that [redacted] is essentially asking us to proceed without addressing the concerns [redacted] has raised.

I'm on leave tomorrow and I know you're at PC so I will respond to say its not possible to meet tomorrow and I'll leave the one in for Thursday and send you an invite to that one.

Further to your email below and the Transport Planning Team Manager's comments attached, I write to set out our position on the various points raised.

As a starting point, whilst I appreciate that you are seeking to manage expectations, we are nevertheless very concerned by the suggestion that we may miss the March Committee date due to outstanding matters and extremely frustrated with the Transport Planning Team Manager's comments (set out further below).

GMEU

Starting with the GMEU comments, I am entirely confident that the GMEU queries can be dealt with either by condition (such as a condition for a detailed landscaping/planting schedule prior to commencement) and legal agreement (i.e. the biodiversity offsetting mechanism, which we await your solicitor's input to) – whilst the ecology consultant is reviewing the queries, I do not see why they need all of the points summarised at the foot of their response clarifying prior to determination and it risk leading to an unnecessary delay to determination. We also disagree with their suggestion of needing to demonstrate full details/scheme of mitgation to achieve a 10% net gain – you and [redacted] are already well aware of our position on this, noting the Core Strategy policy and the fact PfE is not yet adopted (not to mention that our understanding is that the mandatory requirement only comes into effect for major development submitted after 12 February 2024).

Highways

Turning to the highways comments, as mentioned we are extremely frustrated and confused with the content of the Transport Planning Team Manager's response as it seems to conflict with the transport modelling approach and methodology long agreed with [redacted] as part of the paid (and prolonged) pre-application advice process (as demonstrated further in the Hydrock responses below). We are also extremely frustrated that despite having signed up to a PPA and paid the additional cost (in addition to a significant application fee), it is one of Wigan Council's own officers (the Transport Planning Team Manager) that has provided a consultation response so very late in the process (not to mention the conflicting view with your own Highways Officer), and it is now being suggested that highways issues could be a contributing factor to potentially missing the March Committee. This is an unacceptable position for the applicant that needs urgently resolving.

A Technical Note is nevertheless being prepared to address the comments raised by Kenny and SCC, some of which will also address the Transport Planning Team Manager's comments below, however we request that the Transport Planning Team Manager is furnished with the responses below as it will clarify the long agreed methodology for the TA and should therefore address the majority of comments, with the remaining comments (i.e. those raised by [redacted] and SCC) to be addressed in the aforementioned Technical Note, which will be submitted imminently. The parking provision query will be addressed in the Technical Note and we are comfortable that the provision provided is wholly acceptable for the quantum of floorspace and use classes for which permission is sought.

Mindful of the above and the critical point we are at in the determination period / Committee lead-in, I would reiterate my request for an urgent meeting with you and the highway officers to allow us to resolve matters ASAP. We cannot afford to wait until our scheduled meeting on Thursday as we simply cannot afford to miss the March Committee, not least due to a difference of opinion with your highway officers so late in the process and despite the extensive pre-app discussions – this certainly would not align with the collaborative approach to date and that sought in the PPA.

Please can you therefore advise of your availability to meet tomorrow to resolve matters.
@[redacted] – we will require you in attendance also given the critical nature of this matter.

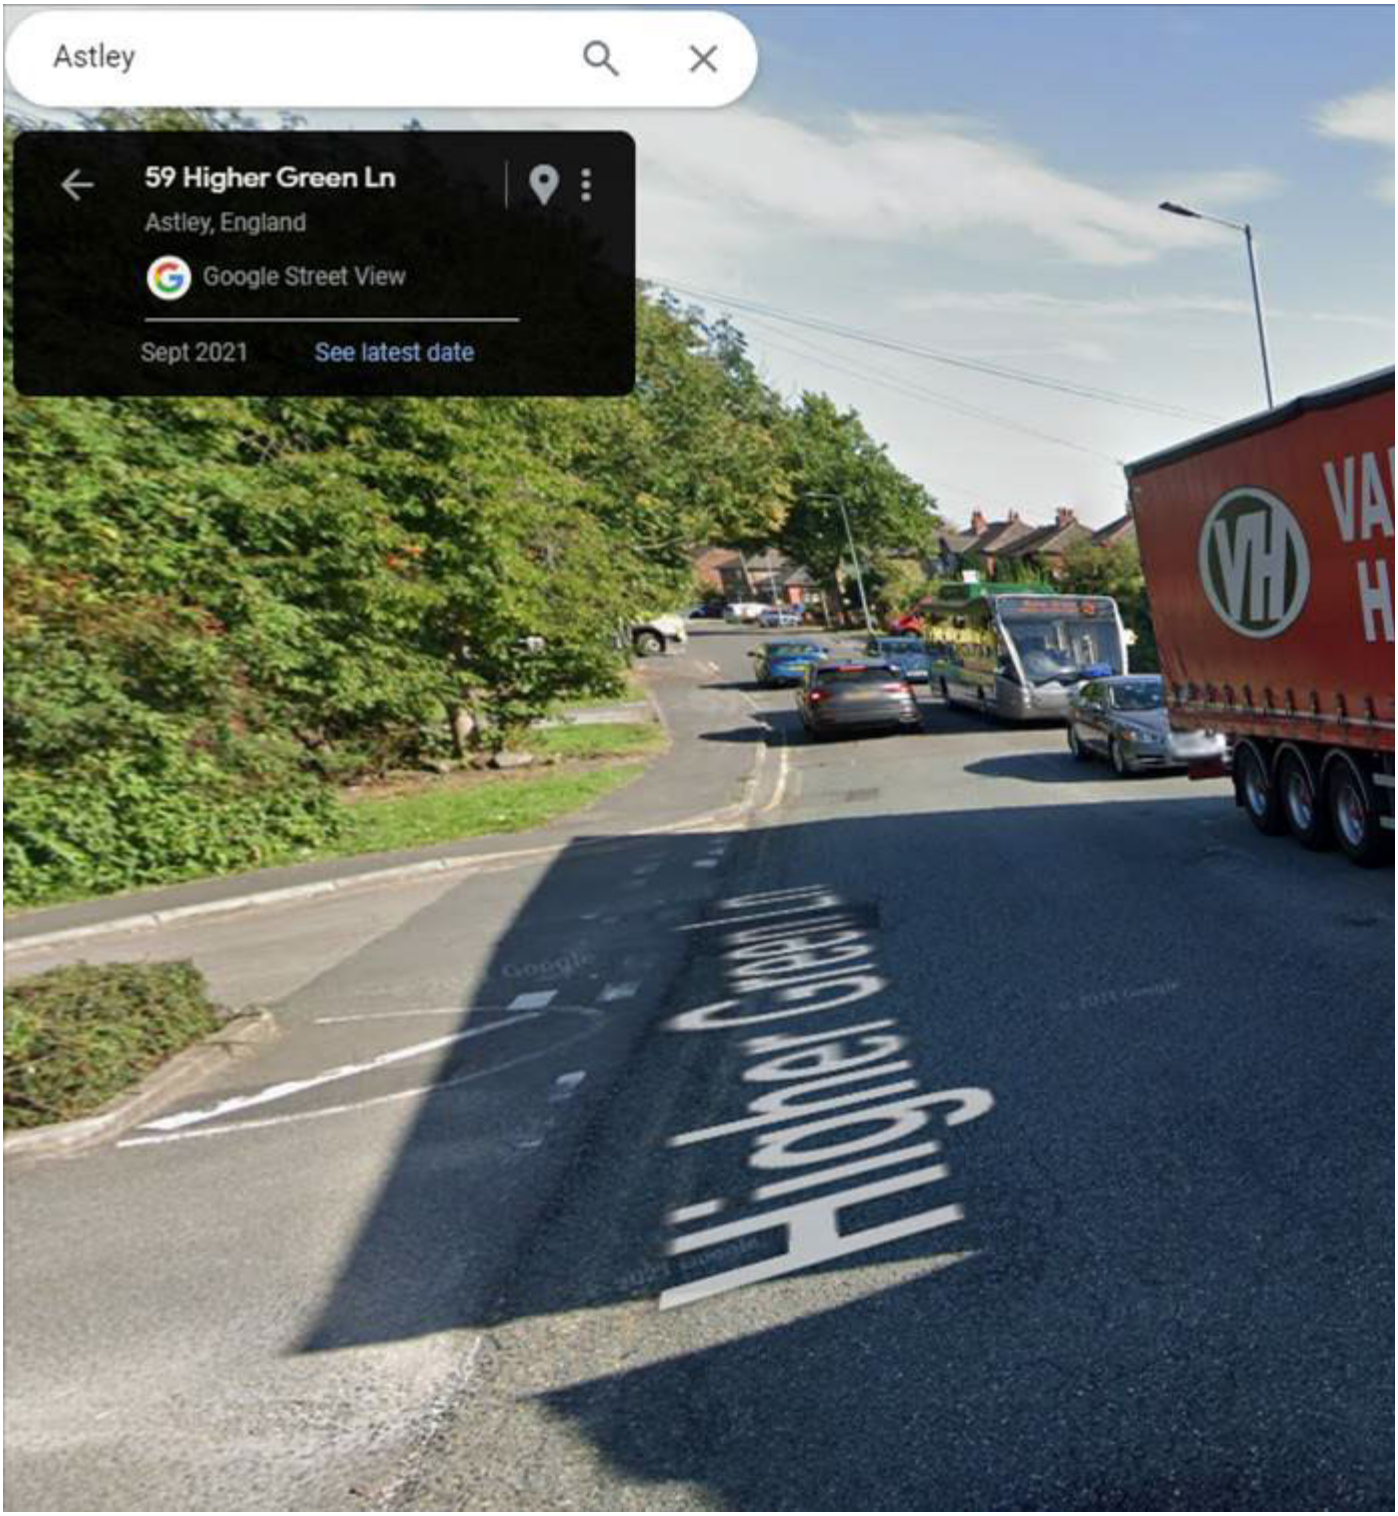
WMBC Comments on Transport Planning Team Manager Response (Hydrock summary response in red text):

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032). Noted. However, our proposed methodology, including Year of opening and future year assessment was agreed with WC highways officers [redacted]) as part of scoping discussions in May 2022.

- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network. The list of committed developments that should be included within our assessment was provided by WC highways officers ([redacted]) as part of scoping discussions in May 2022.

- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580. Noted. However, evidence within the 2022 observed baseline traffic flow survey indicated that a similar amount of HGVs came from the west of the site access (as per the east), from a combination of Higher Green Lane / A572, and Higher Green Lane / A580 junctions. This is further confirmed by the image shown below at Figure 1.

- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011. Noted. However, the proposed methodology, including proposed distribution was agreed with WC highways officers ([redacted]) as part of scoping discussions in May 2022. Additionally, as described above, the HGV distribution is actually based on observed baseline traffic flow surveys.



- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue). The numbers are not incorrect. The assessment criteria from WC requested Hydrock to assess any junction which had a total development 'vehicle' impact of greater than 30 2-way trips. Not PCU. Figure 7 within the traffic flow figures presented within the TA illustrates the correct 'vehicle' development traffic.

  Additionally, Salford Council's other query regarding the traffic flow figures presented was around Figures 7, 8 and 9, and the total numbers provided within our assessments. This is due to the lights, and HGVs being converted to PCUs (by a factor of 2.9 for HGVs) as per the industry standard assessment criteria.

- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions. The list of junctions that should be included within our assessment was agreed with WC highways officers [redacted]) as part of scoping discussions in May 2022, based on a total 2-way 30+ vehicle development impact upon surrounding junctions.

- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs. Parking justification to be provided in the aforementioned Technical Note to evidence the appropriateness of a comparable ratio of parking provision for numerous B2/B8 schemes across the North West.

Figure 1 – HGV Image Example from Google Maps in September 2021 from junction of Higher Green Lane / A580

Good afternoon [redacted],

The following bullet points reflect the views of the Transport Planning Team Manager. This needs to be considered in line with the previously provided comments by the Highways team and those from Salford Council.

Regards

[redacted]

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).
- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.
- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.
- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.
- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)
- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.
- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Further to our meeting last week, I'm just wondering if you've had any feedback yet from Wigan's Transport Policy Manager?

Separately, in addition to the BNG spreadsheet provided under separate cover, I attach the unredacted signed (and counter-signed) GCN License agreed with Natural England and as requested by GMEU in their consultation response (attached). Please can you pass this on? We've also commissioned the requested additional bat endoscope survey (requested pre-determination) and should have a supplementary letter/survey to submit to this effect in the next week or so.

Kind regards

[redacted]

Hi [redacted]

Please see attached comments from Salford Council. These have also gone over to our highways and transport policy teams.

Regards

[redacted]
>><<

Places Directorate: Economy, Waste and Infrastructure
Memorandum

To: Development Management	**From:**	[redacted]
		Traffic Group
	Phone/Ext:	
Ref: [redacted]		
	Date:	16th January 2024

Application No: A/23/96226/MAJOR
Proposal: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Location: Land At Astley Park Way Worsley
Grid Reference: E 370899 N 401108

Trip generation and forecasting: The application relates to the proposed development for a B2 / B8 land use development comprising a Gross Floor Area [GFA] of circa 32,825sqm across a number of units, situated at Astley Park Way off Chaddock Lane.

The trip rates have been previously agreed and are acceptable.

It should be noted that growth factors and the following committed developments were used in this TA. The committed developments are:

- A/17/84108/OUTMAJ - Land North Of Garrett Lane, East Of Garrett Hall, West Of Mosley Common Road, And South Of The Guided Busway Tyldesley.
- A/17/83702/OUTMES - Parr Bridge Works, Mosley Common Road, Tyldesley, Manchester M29 8PR.
- A/17/84560/OUTMAJ - Land East Of Leigh Road South/West Of Bee Fold Lane.
- A/20/88849/MAJOR - North Leigh Park Nel Pan Lane Leigh.

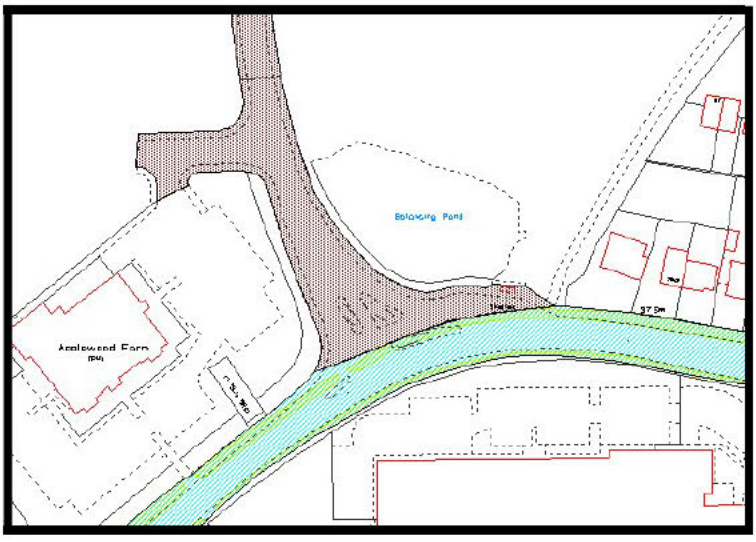
Local junctions / network impact: The following modelling concerns have been identified:

- In terms of trip distribution, it is not clear how each MSOA area has been allocated to a particular route.
- The study area needs to be extended to all junctions on the network experiencing an increase of 30vph or more. All junctions experiencing an increase of 30vph should be modelled.
- The lane widths used in the modelling for both junctions are too high. The modelling should be corrected and resubmitted.

Public transport and sustainable travel: The proposed development site is in a reasonably accessible location and is well located to make use of the existing public transport links and pedestrian / cycle routes.

Road safety: The causes of road traffic accidents are random and multifunctional, with each accident having several different reasons and trying to spot one overall contributing factor may not be possible. It is for this reason that Greater Manchester Police (GMP) will normally attend and record accidents that occur on the borough's highway network, where the accident results in an injury to persons. As a part of this process, they will record the details of the accident; and undertake an accident investigation to try and determine the contributory factors that may have caused the accident. The Council will analyse this data over a 5 year period to see if any trends can be identified. It should be noted that 'damage' only incidents will not appear on the accident database.

Details of damage only accidents are held by insurance companies and because of data protection, the Council cannot access this information. Without a detailed accident investigation being undertaken, any information given to the Council cannot be verified and must be regarded as hearsay.



The Police database was checked for the A572 Chaddock Lane, which included its junctions with Coach Road and the A580 East Lancashire Road. During the last five-year period for which data was available, fourteen accidents were recorded. All accidents were attributed to road user behaviour and two accidents involved vulnerable road users.

The following conclusions can be made regarding the accident data:

- An average of 2.8 accident a year have been made per year in the study area.
- No accidents have occurred at the site access.
- No accident cluster have been identified.
- No accident trends have been identified.

Public rights of way: The PRoW Officer should be consulted.

Adoption record: The drawing below shows the extent of the adopted highway, which is depicted in blue/green:

It should be noted that the existing access is still subject to the certification process for adoption.

Visibility: The proposal uses an existing access and the visibility splays comply with Manual for Streets.

Servicing: Based on Drawing No: 21714-HYD-XX-XX-DR-TP-1003, a large articulated vehicle can enter and leave the site in forward gear.

Layout: The site highways layout is acceptable.

Parking: The basic car park layouts will allow for the free flow of traffic and a vehicle can enter and leave a bay in one manoeuvre. However, there are no pedestrian facilities and there should be a footpath at the rear of the parking bays that connects into building entrances.

Cycle parking facilities will require a roof.

The applicant as offered no evidence that the proposed level of parking provision is suitable for the development site. The site should be self-sufficient in parking terms and not lead to inappropriate parking on the proposed highway network. This would raise concerns for highway safety and congestion.

Proposed mitigation measures: It is recommended that a contribution towards the upgrade and revalidation of MOVA at the junction of A580/Chaddock Lane is requested. TfGM anticipate that this would cost in the region of £15k. This would help to futureproof the development by mitigating any increased delay because of the increased traffic flows and changes in traffic patterns. Also, this would ensure that the network operates as efficiently as possible to ensure that congestion is minimised.

Conclusion on highways matters: No objections in principle, but the modelling concerns are addressed.

Hi [redacted]

I've just spoken to [redacted] and he has confirmed he can't get involved as used to work for the highway consultancy (Hydrock), only leaving them in November when this application was being prepared. He's good friends with the consultant involved and just feels its inappropriate. He also doesn't think [redacted] will respond or attend. [redacted] has strongly advised that we wait for [redacted] to return on Monday (please note I'm on leave next week, Mon- Wed, for half term).

I'm not sure which was way to go on this now; the agent has submitted some further info this morning, so I think it's a re consult but appreciate from the tone of the emails that this won't go down well.

Do you want me to draft an email to the agent to explain that there is no one available from highways tomorrow but we'll circulate what was submitted this morning and arrange a meeting for next week when [redacted] has returned?

Hi [redacted],

I have shared the Transport Note sent through by the agents yesterday (the one that they went through today) with [redacted] and [redacted] but I have not formally consulted them or TfGM or Salford Council. I think on the call today you said that was okay and further consultation would not be needed subject to [redacted] and [redacted] being satisfied on all concerns raised. Please let me know if I misunderstood that.

If/when additional ecology information is submitted, unless this is received tomorrow, we won't have time to reconsult GMEU in order make the agenda for March. Again, I think you said that wouldn't be needed but that you could speak directly to GMEU if needed. I have emailed [redacted] today re a possible location for the allocation of the necessary contribution.

Let me know if you need me to do anything else tomorrow. If all is okay, I'll start my report next Thursday when I return from leave so its going to come through late to you, but I'll try and write it as quickly as possible. If there is anyone available to help out when I'm off that would be great, even summarising the objections would be give me a good start when I get back.

Thanks

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 20/11/2023 6:45 PM from [redacted] Greater Manchester Ecology Unit (Not Available) on behalf of Greater Manchester Ecology Unit.

Application Summary

Reference:	A/23/96226/MAJOR
Address:	Land At Astley Park Way Worsley
Proposal:	Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Case Officer:	[redacted]

Comments Details

Comments:	Hi Thank you for consulting the GMEU Summary Provision of the biodiversity net gain spreadsheet and signed unredacted district licensing form is recommend prior to determination as well as a review of the bat survey findings. Other potential ecological issues include badgers, nesting birds, invasive species, other wildlife and orchids. 1. Bats A number of the trees proposed for removal were assessed as having moderate bat roosting potential, with others assessed as low risk. Subsequent endoscope surveys failed to find any evidence of bat. I have no reason to doubt the findings of the report. The surveys did however occur in 2022, it noted that if the trees were not removed by the end of the 2023 survey season that updated surveys should

be required. This date has now passed.

- I therefore recommend that prior to determination a review of the previous findings and if necessary undated endoscope and/or emergence surveys provided. -

2. Great Crested Newts
No evidence of great crested newts has been found in the ponds on the site previously and given the landlocked nature of the site and recent construction of the ponds, it would seem unlikely that colonisation has occurred since the previous surveys.

However, the applicant intends to enter in to district licensing, negating the need for further surveys. Whilst supporting this approach, the license provided is redacted and does not appear to have been signed.

-I therefore recommend that prior to determination an unredacted license signed by both parties (ie developer and Natural England) is provided. -

3. Badger
No evidence of badger was recorded on the site but habitats recorded as suitable. The consultant has therefore recommended updated surveys prior to earthworks and vegetation clearance.

Whilst the risks would appear low, I accept that as this is a protected species, such an update is reasonable. I therefore recommend a condition along the following lines is applied to any permission.

-Prior to commencement of earthworks or vegetation clearance a survey of the site for badger setts will occur and the findings supplied to and agreed in writing by the LPA.

4. Other Protected Species
I accept that other protected species such as water vole and otter can be reasonably discounted owing to a lack of suitable habitat on or near the site. No further information or measures are required.

5. Nesting Birds
Bird surveys determined that breeding birds were present but of only local value. The development will result in the loss of much of the existing nesting habitat.

All British birds nests and eggs (with certain limited exceptions) are protected by Section 1 of the Wildlife & Countryside Act 1981, as amended. I recommend a condition along the following lines be applied to any permission.

- No works to trees, hedgerow or shrubs shall occur between the 1st March and 31st August in any year unless a detailed bird nest survey by a suitably experienced ecologist has been carried out immediately prior to clearance and written confirmation provided that no active bird nests are present which has been agreed in writing by the LPA.-

6. Other Wildlife
The consultant has noted that the hedges and scrub on site provide potential cover for species such as hedgehog, a UK Biodiversity Priority Species as well as other mammals and amphibians. The levelling of the site could therefore lead to high an unnecessary mortality of mammals and amphibians if not carried out sympathetically.

Reasonable avoidance measures (RAMs) have been recommended as well as a Construction and Environmental Management Plan that includes ecology within its scope. I agree given the scale of the hedge removal that RAMs are appropriate along the lines suggested within section 5.7.4 of the ecological report. The

finalised details can be provided via a condition along the following lines.

- Prior to any earthworks or vegetation clearance, a reasonable avoidance measures method statement for mammals and amphibians will be provided to and agreed in writing by the LPA. -

7. Giant Hogweed
This species listed under schedule 9 part 2 of the Wildlife & Countryside Act 1981 (as amended), was recorded on the site. it is an offence to cause this species to spread in the wild. This species also represents a public health risk. I therefore recommend a condition along the following lines is applied to any permission.

- Prior to any earthworks a method statement detailing eradication of giant hogweed on the site, should be supplied to and agreed in writing to the LPA. The agreed method statement shall be adhered to and implemented in full unless otherwise agreed in writing by the LPA. -

8. Marsh Orchid
A good colony of hybrid marsh orchids was regarded on part of the site. Translocation of sections of the turf with the orchid is recommended in the ecological report. Such hybrid orchids are not however rare in Greater Manchester and opportunistic in the colonisation of disturbed and compacted grassland sites. I would therefore regard this as unnecessary l. I am therefore satisfied that no specific measures are required., whilst also not objecting to such translocation as part of the wider biodiversity mitigation and enhancement proposals.

9. Contributing to and Enhancing the Natural Environment & Biodiversity Net Gain
Section 174 of the NPPF 2021 states that the planning policies and decisions should contribute to and enhance the natural and local environment. The development will result in a large area of former improved agricultural land currently developing in to other neutral grassland and a smaller area of grassland that has already developed in to moderate value grassland following disturbance. There will also be the loss of mature hedgerows and trees. This will be replaced primarily with buildings and hard standing, with a landscape woodland plantation. Wildlife issues appear restricted primarily to nesting birds, with potential issues relating to bats.

A biodiversity net gain assessment has been provided that indicates a significant loss at the site level. The defra metric has however not been provided, it is therefore difficult to verify the accuracy of the assessment.

- I therefore recommend that prior to determination a copy of the excel spreadsheet is provided. -

Second the soft landscape plan (ie buffer strip includes a number of species that are not locally native in the woodland and hedgerow planting. eg field maple and dogwood amongst others. Given the likely biodiversity loss at the site level, I recommend they maximise the quality of on-site mitigation through use of locally appropriate species.

With regards nesting birds and other wildlife, I accept that mitigation is likely achievable on the site and with regards nesting birds would recommend targeting of house sparrow and house martin on the new build given both species were recorded foraging across the site.

Importance: High

Hi [redacted]

Further to your comments on this application, the applicant has provided a response in red and attached.

Would you please be able to provide some guidance on the appropriate contribution required to achieve net gain should there be a loss of 10.95BU on site?

There is quite a bit of pressure to move this forward to the next planning committee so if you could come back to me today, just with that figure, that would be a great help.

Thanks

Importance: High

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thanks again for your and [redacted]'s time yesterday.

I write to respond to the GMEU comments, as follows in red:

- The details of the urban tree planting schedule is provided to ensure that 150 trees are proposed – The submitted landscape plans propose that 319 standard trees are planted across the site. This is over double the 150no. stated in the GMEU response and is hopefully satisfactory to the LPA on this point.

- That at least 56 have the potential to exceed 30cm dbh after 30 years - Please find revised landscape plans 2266-22-05+06 Rev P04 attached. The revised drawings include 56no. Semi mature trees proposed within areas of grassland (individual trees) as opposed to the 26no. semi mature trees previously proposed on Rev P03. The following 'upgrades' in size have been made on Rev P04:
    - 26no. EHS (14-16cm girth) have been upgraded to be of Semi mature standard (20-25cm)
    - 4no. EHS (extra heavy standard) 18-20cm girth have been upgraded to be of Semi mature standard (20-25cm)

- For the avoidance of doubt these are not additional trees but instead an upgrade to 30no. trees from extra heavy standard to semi mature. As such, the ecologist has confirmed this has no impact on the currently submitted BNG Metric/spreadsheet and/or habitat loss calculations.

- Details on the other neutral grassland proposed to achieve good condition are provided. The other neutral grassland on site is already in 'good' condition. It will be translocated on site. However, in order to maintain it as such the following should be undertaken:
  - The grassland should continue to be consistent with the UK Habs description of other neutral grassland
  - Sward height is varied (at least 20% of the sward is less than 7 cm and at least 20% is more than 7 cm) creating microclimates which provide opportunities for insects, birds and small mammals to live and breed.
  - Cover of bare ground is between 1% and 5%, including localised areas, for example, rabbit warrens
  - Cover of bracken Pteridium aquilinum is less than 20% and cover of scrub (including bramble Rubus fruticosus agg.) is less than 5%.
  - Combined cover of species indicative of suboptimal condition and physical damage (such as excessive poaching, damage from machinery use or storage, damaging levels of access, or any other damaging management activities) accounts for less than 5% of total area.
  - Ensure Schedule 9 invasive species remain absent from the habitat.
  - There are 10 or more vascular plant species per m2 present, including forbs that are characteristic of the habitat type

- I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided. This is a matter to be progressed / agreed with WMBC as part of S106 drafting – as a starting point, we will consider with our ecologist what we believe to be an accurate price per unit but we request that WMBC does the same via its own advisors / habitat values charged for other schemes in the Borough.

Please can you confirm receipt and re-consult GMEU as necessary and request their urgent review/response/confirmation that the queries have now been satisfactorily resolved.

Kind regards

Subject: FW: Consultee Comments for Planning Application A/23/96226/MAJOR

Hi [redacted]

You may already have seen the comments below as they are online but I just wanted to bring them to your attention.

As you will see further information is required re BNG.

There is now a need for a re-consultation with GMEU, Highways, Transport Policy Team and Salford City Council. In order to manage your client's expectations, its important to point out that all of the above will require a 14 day re-consultation period once the required information is received and as reports for March committee need to be completed by 19th Feb, there is a possibility that this application will not be ready to be presented at that time.

Given the level of objection in the surrounding area, it will be imperative that all outstanding issues are resolved before Officers can bring this before committee.

I am of course not ruling out making the March agenda, but I think its important to be realistic as we go forward.

Regards

Consultee comments

Dear Sir/Madam,

A consultee has commented on a Planning Application. A summary of the comments is provided below.

Comments were submitted at 07/02/2024 12:49 PM from [redacted] Greater Manchester Ecology Unit (Not Available) on behalf of Greater Manchester Ecology Unit.

Application Summary

Reference:	A/23/96226/MAJOR
Address:	Land At Astley Park Way Worsley
Proposal:	Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Case Officer:	[redacted]

Comments Details

Comments:	Hi [redacted] Thank you for consulting on the additional information. 1. Great Crested Newts An unredacted version of the license has been provided. This confirms that Natural England are satisfied that the development is eligible of for district licensing.

Technically no condition is now required as the process is now in the hands of Natural England and their agent for delivery of the new ponds unless the LPA would want mitigation beyond the requirements of DLL. However the developer may decide to change their approach and not enter in to DLL at which point further survey may be required. I therefore recommend a condition along the following lines is applied to any permission.

"The development has the potential to cause harm to great crested newts and entered in to District Level Licensing.

Prior to development confirmation that:

• no changes to this mitigation approach have occurred or;
• if changes have occurred further information on the new mitigation approach to gcn.

should be provided to and agreed in writing by the LPA"

2. Contributing to and Enhancing the Natural Environment & Biodiversity Net Gain
Section 180 of the NPPF 2023 states that the planning policies and decisions should contribute to and enhance the natural and local environment. The defra metric has been provided in excel format as requested.

The baseline value of the site appears fair, I am therefore willing to accept 62.84 biodiversity units (BU) as the baseline.

The post-development value has been calculated at 51.89 BU a loss of 10.95 BU and a shortfall of 17.24 BU to achieve 10% BNG. This includes a significant number of units generated through urban tree planting, 150 trees achieving moderate condition, of which 56 are forecast to achieve medium size after 27 years. It also includes 0.6819 ha of other neutral grassland forecast to achieve good condition. Both are relatively high risk proposals, with a lack of detail (that I could find) on the tree planting schedule or grassland proposals. There is therefore a risk of the loss being higher.

I therefore recommend that prior to determination:

- the details of the urban tree planting schedule is provided to ensure that 150 trees are proposed ;
- that at least 56 have the potential to exceed 30cm dbh after 30 years and;
- details on the other neutral grassland proposed to achieve good condition are provided.

I would also recommend given that even if the habitat creation proposals are reasonable given the forecast loss of 10.95BU and 17.24BU shortfall in achieving 10% that further information is provided on how full mitigation/compensation will be provided.

ORNAMENTAL HEDGEROW
(300mm depth of topsoil + minimum 600mm depth subsoil)
Planted at 450mm centres in a double staggered row. Rows to be 500mm apart.

%	Species	Size	Pot	
100%	Carpinus betulus	1000-1250mm	1m Trough	

TALL ORNAMENTAL SHRUB PLANTING
(300mm depth of topsoil + minimum 300mm depth subsoil)
Ultimate plant height is above 1m.

LOW ORNAMENTAL SHRUB/HERBACEOUS PLANTING
(300mm depth of topsoil + minimum 300mm depth subsoil)
Ultimate plant height is below 1m.

GRASS SEEDED AREAS
(150mm depth of topsoil + minimum 150mm depth subsoil)
To be sown with Emorgsate Flowering Lawn Mixture - EL1 or similar approved. To be sown at a rate of 4g/m²

PROPOSED TRANSLOCATED GRASSLAND
To be carried out in accordance with ecologists recommendations & methodologies.

SPECIES RICH GRASSLAND AREAS
(Cultivated subsoil to a depth of 300mm)
To be sown with Emorgsate EM2 Seed mix or similar approved.
Sown at a rate of 4g/m²

DAMP TOLERANT GRASS AREAS
(Cultivated subsoil to a depth of 300mm)
To be sown with Emorgsate EM8 Pond edge mix or similar approved.
Sown at a rate of 4 g/m²

1 INTRODUCTION

1.1 BACKGROUND

1.1.1 This report provides the results of bat activity surveys and endoscope surveys undertaken 2022, as well as the updated endoscope surveys carried out in 2024.

1.1.2 The surveys are in response to an initial Ground Level Tree Survey (GLTA) carried out by The Environment Partnership on 29th June 2021 (TEP 2021)[1]. The GLTA was then verified through two separate aerial surveys in the 2022 bat active season. Works have now been postponed beyond the 2023 active season and the data is no longer valid (Colins 2016[2]). Based on this a third aerial survey was carried out on 26th February 2024, to ensure that all the conditions on site remained the same.

1.2 SITE DESCRIPTION

Location

1.2.1 The Site (12.6 ha) is at the address Astley Park Way, Parr Bridge, Wigan, Greater Manchester, England, M28 1FJ, with a central grid reference SD 70827 01215. The wider area comprises of urban development with Bolton to the north, Wigan to the west, agricultural land to the south and Manchester to the east. The Site is bounded to the south by Chaddock Lane and Applewood Farm, a school to the north and residential properties from the east and west (see Figure 1).

Proposals

1.2.2 The proposals are for the development of up to 32,825 sqm (353,343 sq ft) B2/B8 floorspace (including ancillary integral office space (Use Class E(g)) with associated car parking and service yard; new internal access road;

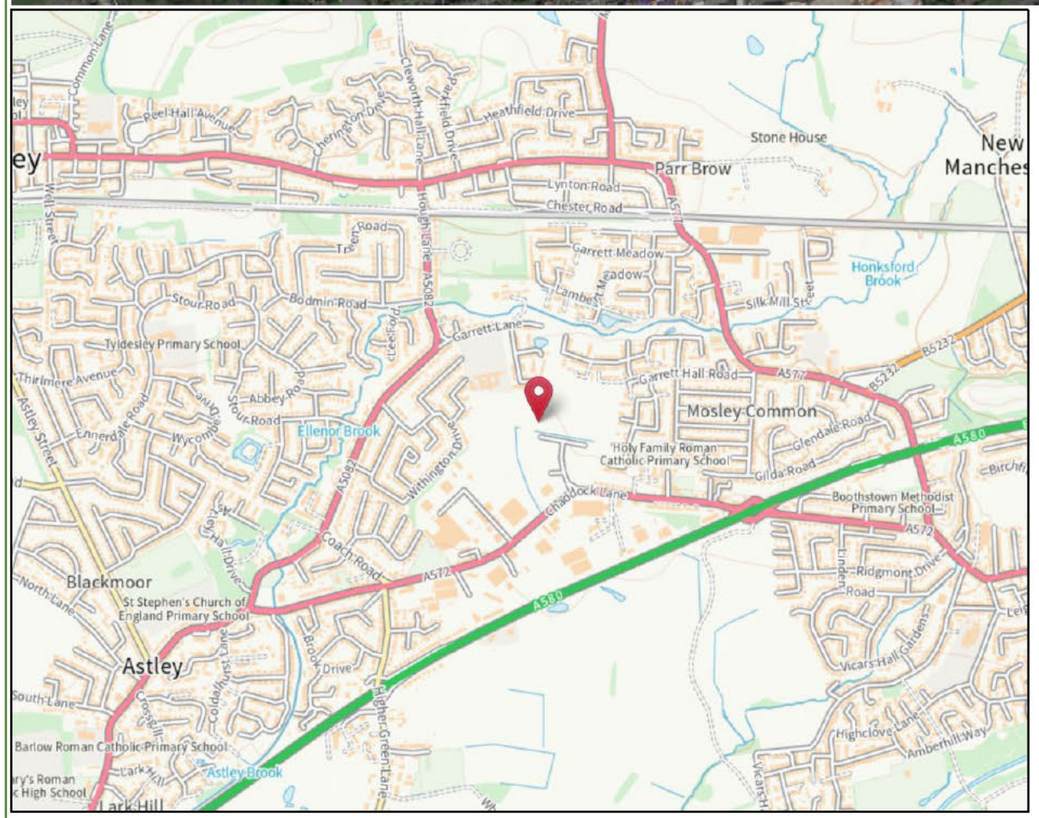
diversion of existing Public Rights of Way; and associated engineering, infrastructure and landscaping. A proposals layout is shown in Figure 2.

1.3 LEGISLATION



Bat legislation

1.3.1 All species of bat, and their roosts (whether occupied or not), are fully protected in the UK by the Conservation of Habitats and Species Regulations 2017 (as amended), and the Wildlife and Countryside Act 1981 (as amended). Legislation states that you are committing an offence if you:

- Intentionally or recklessly kill, injure, or take a bat.
- Damage or destroy a bat roost.
- Obstruct access to any place of shelter, breeding, or place of rest.
- Disturb a bat occupying a structure or place.
- Possess or control (live or dead bats, or any of their parts); and

Sell, barter, or exchange these species, or parts of

2 METHODOLOGY

Transect Surveys

2.1.1 The activity survey methodology was designed in accordance with current bat survey guidelines for 'Low suitability', as a reasonable effort to determine bat activity based on habitat suitability as shown in Table 8.3 in Colins (2016[2]). This required one transect survey visit per season, Spring, Summer, and Autumn. Together with a data logger collecting data for five consecutive nights each of the three seasons.

Ground Level Tree Assessment

2.1.2 A Ground Level Tree Survey (GLTA) was carried out in 2021 and reported in TEP 2021[1]. The survey followed the GLTA survey guidelines provided by Colins (2016[2]).

Endoscope survey

2.1.3 Following the GLTA, the trees were surveyed following endoscope survey guidelines set out by Andrews (2018[3]). The trees were climbed using appropriate methods to access and inspect PRFs using a torch and endoscope, as follows:

1. A Natural England Level 2 licenced surveyor climbed the bat trees to view the PRFs.
2. All visits were separated by at least two weeks apart with surveys conducted during the optimal bat activity period of May to August.
3. PRFs that were not initially visible in the GLTA, were identified and inspected during this aerial survey.
4. The endoscope utilised had motion camera and capture capabilities to record evidence of bats.
5. Each tree was surveyed according to GLTA grade. i.e.

    a) High roost potential was subject to three individual roped access surveys

[3] **Andrews, H. 2018.** Bat Roosts in Trees: A guide to identification and assessment for tree-care and ecology Professionals, 1st Edition. Pelagic Publishing.

b) Moderate roost potential was subject to two individual roped access surveys
c) Low roost potential did not require an endoscope survey and was only required to be soft felled in accordance with Collins (2016[2]).

2.1.4 The aerial technique above is a non-standard method. The method is pragmatic and brings several strengths to the data that nocturnal surveys are limited to, particularly in sites with a deep canopy that would limit visibility:

1. Nocturnal surveys specified by Collins (2016[2]) are weak in identifying field signs within the features as they cannot be identified during a nocturnal survey.
2. Often nocturnal surveys of trees are limited because of tree canopy and clutter leading to low incidence of recording bats and / or specific roost site location during low light conditions.
3. The nocturnal survey method is limited to identification of the species exiting the roost, since if there are other bats flying or a bat leaves/returns to the feature without calling it is likely that it will not be identified.
4. The survey method of nocturnal surveys is also labour intensive in terms of survey particularly with the number of trees on large sites.
5. Other strengths of this type of survey include confidence in a negative result for the series of visits to that tree thereby demonstrating where the colony “is not” as well as where “it is”.
6. This method also identifies presence of competitors as well as unsuitable features that can be downgraded due to the close inspection.

2.1.5 If aerial surveys were not possible due to limited access to the feature or health and safety issues with climbing the tree, a nocturnal survey was undertaken using the methods as identified by Collins (2016[2]).

2.2 SURVEY CONSTRAINTS

2.2.1 It was agreed with the GMEU that there would be no requirement for an autumn transect when submitting for planning, given the low number of bats during the spring and summer transect (see Section 5.1).

2.2.2 Furthermore, other surveyors within the planning team had equipment stolen from the Site and were confronted by members of the public displaying intimidating behaviour. Therefore, the bat static detector was not set out for the second transect survey and the surveyors were accompanied by security to conduct the transects at night.

2.3 PERSONNEL

Table 1: Personnel

3 RESULTS

3.1 BAT ACTIVITY SURVEY

3.1.1 In accordance with Collins (2016[2]) the habitat has been graded as low, given the urbanised environment and the low connectivity to the wider area. This is consistent with TEP 2021[1].

3.1.2 Two bat activity surveys were undertaken in the form of walked transects and static detector surveys. The transect surveys were completed on 25th May 2022 and 19th September 2022 by two experienced surveyors in suitable conditions. It was agreed with the local planning authority that the autumn survey was not required due to the low number of bats recorded during the first two surveys (see Section 5.1).

3.1.3 A static detector was left in situ for 7 days from 25th May 2022, located in an area estimated to be the most suitable for bat activity (see Figure 4). Following this survey there were reports of other planning team surveyors having equipment stolen from the Site, therefore the static detector was not set out for the remaining surveys and the surveyors were accompanied by security to conduct the transects at night.

Transect Surveys

3.1.4 The survey parameters are detailed in Table 2. The surveys found low evidence of bats within the Site boundary with most bats recorded in the western portion of the Site, associated with Hedgerows 3a and 4. Activity levels and the overall number of bat calls recorded (either commuting or foraging) were similar for both surveys.

3.1.5 Only common pipistrelle and soprano pipistrelle were recorded commuting across the site during the transects with common pipistrelle being the most frequently recorded. Bat activity was closely associated with hedgerows (predominantly H3a and H4) and associated trees. No recordings of bats were obtained within the eastern portion of the Site during either transects. The transects route and bat activity are shown in more detail in Figure 4 and Figure 5.

Table 2: Transect survey parameters

Parameter	Survey #1	Survey #2
Date	25/05/22	19/07/22
Weather	Overcast, dry	Clear, dry
Wind (Beaufort)	B1	B1
Temp. at start (°C)	14	28
Temp. at end (°C)	13	26
Sunset	21:19	21:28
Survey start	21:19	21:28
Survey end	22:55	23:00

Static Detector

3.1.6 The static data logger recorded 256 passes, the species recorded again only included common and soprano pipistrelle. Common pipistrelle was recorded the most frequently making up 92.5% of the passes and soprano pipistrelle made up the remaining 7.5%. A breakdown of the calls each night is shown Table 3.

Table 3: Static bat detector and analysis

Dates	Species		Total number of passes
	CPIP	SPIP	
25/05/23	27	0	27
26/05/23	57	7	64
27/05/23	54	0	54
28/05/23	9	2	11
29/05/23	23	2	25
30/05/23	32	8	41
31/05/23	28	0	28
01/06/23	7	0	7
Total	**238 (92.5%)**	**19 (7.5%)**	**256**

3.2 GROUND LEVEL TREE ASSESSMENT

3.2.1 A GLTA was carried out in 2021 reported in TEP 2021[1] and the results are shown in Figure 3 and Table 4.

Table 4: 2021 GLTA results

Tree ID	Species	Feature	BCT Category
T1	Ash	Young to semi-mature, multi-stemmed ash with occasional ivy cover on edge of a ditch. No obvious potential roost features and ivy is unlikely to be a feature.	Negligible
T2	Oak	Semi-mature oak on edge of dry ditch. A north-facing crevice is present at 5m height between two branches while a large cavity is present on a south-facing branch at 4m height.	Moderate
T3	Sycamore	Semi-mature sycamore with cracked bark, which is lifted in places. A cavity is present on the south-facing branch at 3m height.	Moderate
T4	Ash	Young, multi-stemmed ash located to north of hedgerow with branches overhanging into the site. No obvious potential roost features.	Negligible
T5	Ash	Semi-mature multi-stemmed ash present at the end of a hedgerow. A dead branch is present at 1.5 m height facing west, with a cavity at the end but cracks at the top suggest this is exposed and allows rainwater in.	Negligible
T6	Sycamore	Sycamore tree in hedgerow. A crack is present on the north-west facing branch, which is obscured by foliage.	Low
T7	Sycamore	Semi-mature sycamore in	High

Tree ID	Species	Feature	BCT Category
		hedgerow with south-facing cavity at 3 m height. A large cavity, where a branch has snapped, is present on the south side, whilst on the west side several small cavities are present along a branch.	
T8	Oak	Mature tree on edge of area of dense scrub in the south-west of the site. A close inspection of this tree was not possible, but it is of an age and size that could support potential roost features.	Moderate (precautionary)

3.3 BAT ENDOSCOPE SURVEY

Further to the GLTA (3.2.1), all trees classified as having High – Moderate potential to support bats, were subject to climbing. During the aerial survey each feature was visually inspected, using an endoscope where possible/necessary.

3.3.1 Each tree was assessed twice during the 2022 bat active season and then checked a third time in 2024.

Endoscope survey

3.3.2 Table 4 shows the results of all three surveys, no bat roosts or evidence of bats were found within any of the trees. During the first visit, T7 was downgraded from 'High' to 'Low' upon a closer inspection with the surveyor noting:

"[The] Cavity on [the] South side is 15cm deep with an entrance of 8cm diameter. Downgraded to low. All other features downgraded to negligible after close inspection."

3.3.3 A new feature was identified in T3 during the 2024 survey, this did not result in a change to the grading of the tree and no evidence of bats were found.

3.3.4 The grading for all other trees remained as per the GLTA carried out in 2021.

Table 5: Endoscope Survey results

Tree ID	Species	Original Ground based assessment	Original BCT category	1st aerial check 6/5/2022	2nd aerial check 7/6/2022	3rd aerial check 26/2/2024
2	Ash (not oak)	Semi-mature oak on edge of dry ditch. A north-facing crevice is present at 5 m height between two branches while a large cavity is present on a south-facing branch at 4 m height.	Moderate Remains moderate	North facing crevice negligible. South facing cavity has rams horns which have moderate potential for low numbers of individual small bats.	No change to feature. No evidence of bats	No change to feature. No evidence of bats
3	Sycamore	Semi-mature sycamore with cracked bark, which is lifted in places. A cavity is present on the south-facing branch at 3 m height.	Moderate Remains moderate	Bark features negligible. Cavity on South facing branch has an entrance of 4cm diameter and extends 15cm into branch. Moderate potential for individual bats.	No change to feature. No evidence of bats	No change to feature. No evidence of bats. **New feature;** broken branch stub in top of crown: no evidence of bats.
7	Sycamore	Semi-mature sycamore in hedgerow with south-facing cavity at 3 m height. A large cavity, where a branch has snapped, is present on the south side, whilst on the west side several	High Downgraded to low	Cavity on South side is 15cm deep with an entrance of 8cm diameter. Downgraded to low. All other features downgraded to negligible after close inspection.	N/A	N/A

Tree ID	Species	Original Ground based assessment	Original BCT category	1st aerial check 6/5/2022	2nd aerial check 7/6/2022	3rd aerial check 26/2/2024
		small cavities are present along a branch				
8	Oak	Mature tree on edge of area of dense scrub in the south-west of the site. A close inspection of this tree was not possible, but it is of an age and size that could support potential roost features.	Moderate (precautionary) Remains moderate	Hazard beam on lowest branch on South side of tree. Moderate potential for individual small bats. Hollow dead branch at a height of 3m on west side of tree. Cavity 3cm x 20cm moderate potential for small bats.	No change to features. No evidence of bats	No change to features, no evidence of bats

4 CONCLUSIONS

4.1 STATUS

4.1.1 There are no roosts present on Site, or structures that could provide roosting opportunities for bats.

4.1.2 Three trees have 'Moderate' potential for bats to roost (trees T2, T3 & T8) and two further trees have 'Low' potential (T6 & T7). During the update endoscope surveys, it was shown that there is currently no evidence of bat use in these trees.

4.1.3 The bat foraging and commuting habitat has been graded as 'Low', and the subsequent transect surveys showed that the bat assemblage is unremarkable, dominated by a small number of pipistrelle species.

4.2 RECOMMENDATIONS

4.2.1 The trees that have 'Moderate' potential (T2, T3 & T8) should be removed with a licensed bat person present who may elect to undertake another endoscope assessment prior to felling, and these trees should be soft-felled as follows:

i) The felling work will be undertaken during weather conditions suitable for bats to be active, avoiding the main hibernation period, to minimise the risk of significant disturbance;
ii) A supervising ecologist with appropriate experience (licensed bat ecologist for High to Moderate trees) will be present on site to advise on felling methods and what to do in the event bats are encountered;
iii) Sections of the tree containing features suitable for roosting bats, will be softly lowered to the ground, following which these will be subject to a more detailed inspection by the supervising ecologist to confirm absence of bats;
iv) After felling, the potential roost feature will be retained in a suitable location overnight allowing bats to disperse, in the unlikely event that any are present but undetectable

4.2.2 Trees that are graded 'Low' potential (T6 & T7) should be soft-felled with an ECW present.

4.2.3 Post-construction, at least one bat box / feature lost should be provided, of woodcrete-type construction and maintenance-free as defined by Mitchell-Jones 2004[4]:

- There should be a minimum of five boxes to mitigate the five features removed i.e., T2, T3, T6, T7 & T8.
- The boxes should be provided in advance of tree removal.
- Boxes must not be illuminated by the lighting scheme.
- Box provision should be detailed in a Biodiversity Enhancement Plan for the proposals.

4.2.4 The landscape scheme should provide linear features at least the length that is being lost. Native species should be used. These features should be interconnected wherever possible and connect to the wider landscape beyond the Site boundaries. The lighting scheme should leave these features in as dark a place as possible, avoiding direct illumination where health and safety allows.

Hi [redacted]

I agree at this late stage, and given that you have spring and summer data a transect survey now is unlikely to significantly change the results you already have. Do you have the name and address of the site so I can put this on our files?

Kind regards

Subject: RE: Autumn Bat Transect

Hi [redacted]

Thanks for your response. To be clear, I am referring to bat habitat/transect surveys and not

emergence surveys. Under the BCT guidelines 'low' suitability habitat requires a spring, summer and autumn transect survey to assess the use of habitat by commuting and foraging bats. Under autumn, the final month is considered as October. See Table 8.3 for further detail.

Our spring and summer transect surveys have identified small numbers of common bats using the site. Since, the developer has put a hold to the project and I was considered that GMEU may wish to see data from an autumn transect also. My personal opinion is that we have sufficient data and that an autumn/October survey will not change the results in any significant way, however, I am concerned that GMEU may wish to see this data and could potentially object without it.

All of our bat roost assessment surveys were completed during the appropriate times of year, with no constraints.

Please do call me if you wish to discuss further.

Best wishes,

Thank you for issuing the attached correspondence

We have issued a series of emails containing documents and amended plans to address points numbered 2-7 in your attached letter.

With regards to point 1 on the need to provide to a CEMP, we can address this during the course of determination of the application but it shouldn't hold up validation. In many cases, this is recommended as a planning condition by consultees.

Please can you confirm the above?

Kind regards

[redacted]

Date 27th October 2023

Dear Sirs

Town and Country Planning Act 1990
Town and Country Planning (Development Management Procedure) (England) Order 2015
Application Number : A/23/96226/DCINV
Location : Land At Astley Park Way Worsley
Proposal : Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and, associated engineering, infrastructure and landscaping works

An initial examination of your submission has shown that it is not a valid planning application until the following requirements/details have been included.

1. Please provide a Construction Environment Management Plan.

2. Please provide a Topographical Survey.

3. Please provide an existing site plan.

4. Proposed site plan car parking numbers do not appear to match. Unit 2 parking 141 should be 143, Unit 1 parking 113 should be 112.

Please reply to:
Places Directorate: Growth and Housing, Development Management
Wigan Council, PO Box 100, Wigan WN1 3DS
E-mail: validation@wigan.gov.uk
www.wigan.gov.uk

Please ensure that all plans that show car parking have the correct number of spaces for the units.

5. Please provide elevations of Unit 4.

6. The following documents require splitting as over the 10mb threshold -
Ecological Assessment
Flood Risk Assessment
PH1 desk Study
PH2 Ground Investigation
Planning Statement

7. No scale bars on tree constraints plans, tree protection plans, landscape cross sections. Please add scale bars to these drawings.

We will require all the information specified above to be submitted no later than 14 days from the date of this letter. We will check the application again once. If all the required information has been submitted the application will be deemed valid. If all the requested information has not been provided to the required standard within the specified time period, the application will be treated as withdrawn, the file destroyed, and your application fee minus an administration fee will be returned. No reminders will be sent. Details of the administration fee can be found on our website using the following link:

Apply for planning permission (wigan.gov.uk)

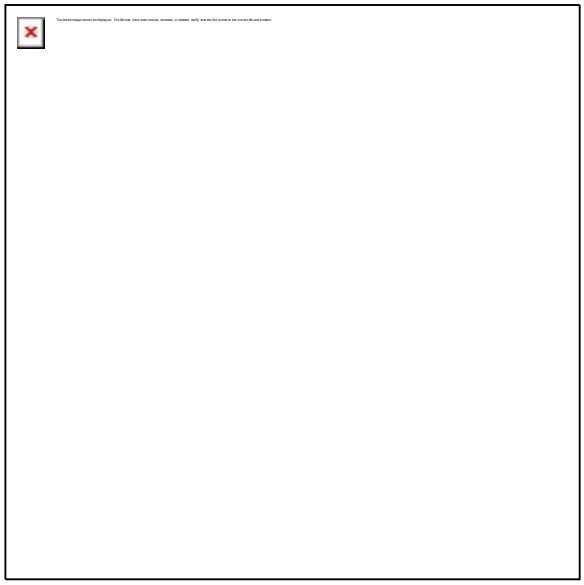
Please see the Council's planning validation check list for all validation requirements:

https://www.wigan.gov.uk/Resident/Planning-and-Building-Control/Planning/About-the-application-process.aspx

If your application is to retain development that has already been carried out, this matter will be referred to the Planning Enforcement Section for further investigation and where necessary Enforcement proceedings.

Please email or post any required details and quote the reference number (A/23/96226/DCINV) in any further correspondence in the matter.

Payment



You can pay for all your Planning and Building Control Fees on the Council's website at the following link:

https://www.wigan.gov.uk/Pay-for-it/PayCouncilBill.aspx

Yours faithfully

Follow Up Flag: Follow up
Flag Status: Flagged

Good afternoon [redacted],

The following bullet points reflect the views of the Transport Planning Team Manager. This needs to be considered in line with the previously provided comments by the Highways team and those from Salford Council.

Regards

[redacted]

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).
- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.
- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.
- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.
- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)
- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.
- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.

Hi [redacted]

Further to our meeting last week, I'm just wondering if you've had any feedback yet from Wigan's Transport Policy Manager?

Separately, in addition to the BNG spreadsheet provided under separate cover, I attach the unredacted signed (and counter-signed) GCN License agreed with Natural England and as requested by GMEU in their consultation response (attached). Please can you pass this on? We've also commissioned the requested additional bat endoscope survey (requested pre-determination) and should have a supplementary letter/survey to submit to this effect in the next week or so.

Kind regards

[redacted]

Subject: ARTICLE 16 CONSULTATION RESPONSE

Dear Sir/Madam,

Proposal: The development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works (A/23/96226/MAJOR)

Location: Land at Astley Park Way, Worsley, Wigan

I am writing in response to your consultation, of 7th November 2023, within which you requested comments on the above application.

SCC Local Highway Authority reviewed the proposed scheme and raised a number of questions, outlined below:

- There are 327 parking spaces proposed as part of the development and 105 HGV Docks/Parking Bays. It is accepted that shift patterns for Industrial warehousing may not mirror the conventional 9am-5pm work pattern and the corresponding network peak, however, we would ask that the applicant provide a flow profile for trips in and out over a 24-hour period and a car park accumulation exercise to demonstrate the following:

a) That the car park provision is appropriate for the expected demand; and
b) The peak times in terms of trip generation for the proposed development.

- SCC would also ask that Wigan Highways to consider and provide feedback as to why the previous planning permission on this site was required to mitigate its impact at the A5801 A577 junction and if it is considered appropriate that this application does not assess its impact at that junction.

- A s106 agreement requiring contributions of E750,000 to improve the A5801 A572 junction and E700,000 to was secured as part of previous planning permission A/15/81365/0UTMAJ, yet the current TA concludes at paragraph 8.4.3 that this development of comparable will not have a material impact (para 8.4.3).

- The submitted TA states at paragraph 8.2.1 that the Astley Park Access A572 Chaddock Lane and A572 Chaddock Lane A580 Lancashire Road junctions had been assessed "given that the traffic impact was greater than +30 two-way trips" yet Figure 11 of the Appendices shows 46 PCU movement to from the A5801 A577 junction in the Weekday AM peak and 54 in the PM Peak. Whilst this exceeds the agreed threshold no consideration of the impact at this neighbouring junction has been considered

- There is also some confusion over the numbers shown on the flow diagrams, where the spot check below focuses on the right turn in the PM peak from the A580 to the A572

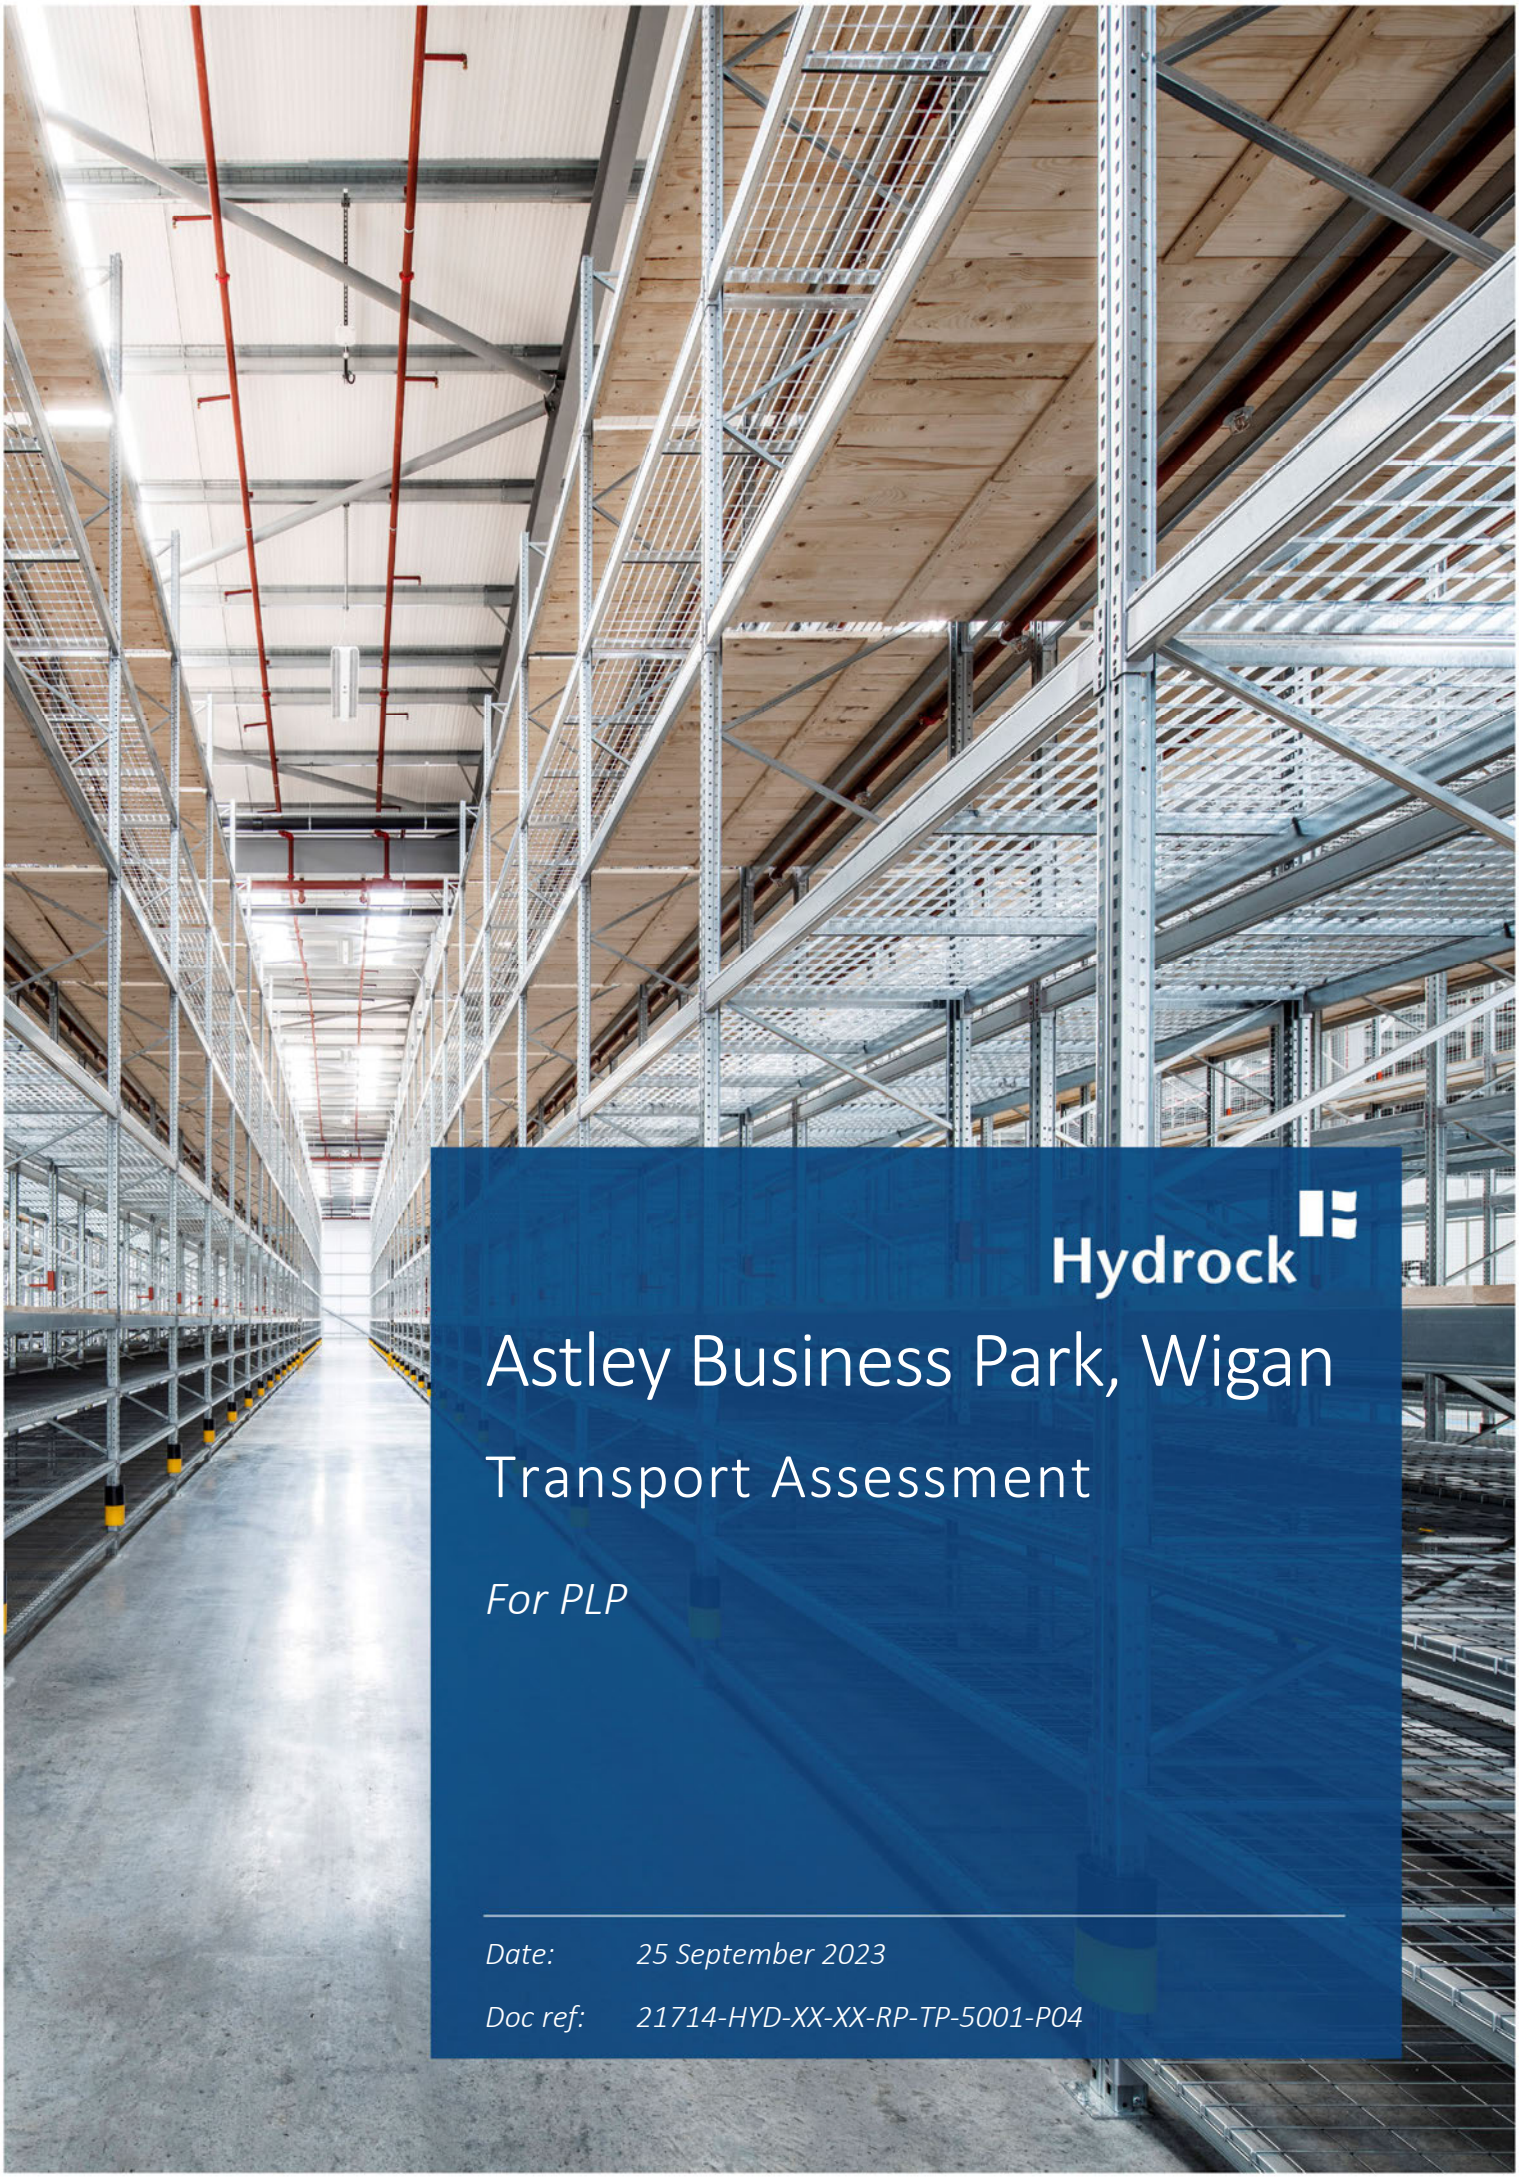
  - Figure 7 - Total Vehicles - 9
  - Figure 8 - Lights Only - 3
  - Figure 9 - HGVs Only - 12

The numbers below are for the right turn into the site from the A572 during the Weekday PM Peak

  - Figure 7 - Total Vehicles - 20
  - Figure 8 - Lights Only - 7
  - Figure 9 - HGVs Only – 24

Consideration needs to be given as the why the numbers and/or flow diagram titles do not appear to be correct.

- It is not clear whether TfGM has been consulted on this application, but this is considered imperative given the potential impact that the development may have on the A580 corridor.



- A Construction Environment Management Plan (CEMP) should be conditioned if Wigan Council are to grant permission for this development. The CEMP should agree the routing of construction vehicles ensuring that these use the A580 to access/ egress the site. We would not want construction vehicles arriving from/departing to the M60 to utilise the more residential A572, where queuing is already experienced, on the approach to Jnc 13.

In view of the above, Salford City Council Local Planning Authority, due to insufficient and/or contradicting information submitted with the above-mentioned application is unable to make a decision on whether to support and object to the proposed scheme. Should Wigan Council's case officer allocated to the above-mentioned application be able to address issued raised by SCC Highways officer above, SCC Local Authority would be then pleased to re-consider their position on the proposed scheme.

Yours sincerely,

[redacted]

1. INTRODUCTION

1.1 Overview

1.1.1 Hydrock have been instructed by PLP to prepare a Transport Assessment [TA] in support of a planning application for a B2/B8/ancillary B1 land use development situated at Astley Business Park off the A572 Chaddock Lane.

1.1.2 The existing site previously obtained planning approval (Ref No: A/15/81365/OUTMAJ) which granted the following:

"Outline application for a mixed-use development comprising up to 28,000 SQM of employment floor space (use classes B1, B2 and B8), up to 165 dwellings, land for community use, open space, landscaping and association infrastructure (all matters reserved except employment access from Chaddock Lane; residential access from Garrett Hall Road and Garrett Lane)."

1.1.3 While this permission has now lapsed the premise of this type of development has been accepted at this site location.

1.1.4 Given the above, the application will seek construction for a proposed B2/B8/ancillary B1 land use development comprising a Gross Floor Area [GFA] of 32,826sqm across a number of units. A detailed description of the development proposals is outlined in Section 5.

1.1.5 This TA will therefore consider the impact of the proposed development on the local highway network.

1.2 Scope of Assessment

1.2.1 Hydrock issued a scoping email to Wigan Council [WC] highway officers on 01/04/22 to agree the scope of assessments in principle, and to obtain additional information relating to the site or the surrounding highway network.

1.2.2 Hydrock received an initial response from WC on 28/04/22 confirming the following:

- *The adoption record for the existing access is still subject to the certification process for progression and adoption;*
- *Hydrock's proposed trip rates are acceptable; and*
- *WC to provide a list of committed developments.*

1.2.3 Following receipt of the above information, Hydrock contacted WC on 03/05/22 to confirm that the proposed scope of junction assessments is acceptable. With WC responding on the same date stating:

"The proposed junctions are fine, but it should be noted that we would expect any junction that experiences 30 or more additional two-way trip to be modelled."

1.2.4 Given the above, Hydrock undertook a local highway traffic impact assessment for the proposed development trips upon the surrounding junctions.

1.2.5 The assessment is provided in more detail within Section 7 of this TA, however in summary the assessments identified that the only two junctions required for capacity assessments, due to an excess of 30 vehicle trips (as requested by WC), are the following two junctions:

- Proposed Site Access / A572 Chaddock Lane; and
- A572 Chaddock Lane / A580 East Lancashire Road.

1.2.6 Hydrock presented the results of the assessments to WC on 10/05/22, with WC responding on 26/05/22 confirming that the traffic impact assessments and proposed junctions to be assessed are acceptable.

1.2.7 A copy of all the aforementioned scoping discussions is presented in full within **Appendix A**.

1.3 Site Location

1.3.1 The development site is located at Astley Business Park off the A572 Chaddock Lane, approximately 2.5km to the southeast of Tyldesley, and approximately 3.5km west of Worsley. The site is bounded by Chaddock Lane and existing industrial land uses to the south, Garrett Lane and Garrett Hall Primary School to the north, and existing residential dwellings to the east and west.

1.3.2 The site location is illustrated in **Figure 1.1**.

Figure 1.1: Site Location

Source: GoogleMaps©

1.3.3 This TA has been developed in accordance with the now superseded DfT document "Guidance on Transport Assessment" [GoTA] (2007) and gives due regard to the NPPG "Transport Evidence in Plan Making" document. It sets out the transport matters relating to the development site and provides details of the development proposals, including an assessment of the predicted traffic flows, the corresponding impact on the surrounding highway network and matters associated with accessibility and connectivity.

1.3.4 The report seeks to conclude that the proposed development can be accommodated without detriment to the operational capacity or safety of the local highway network and that it can be suitably accessed on foot, by cycle and by local public transport services.

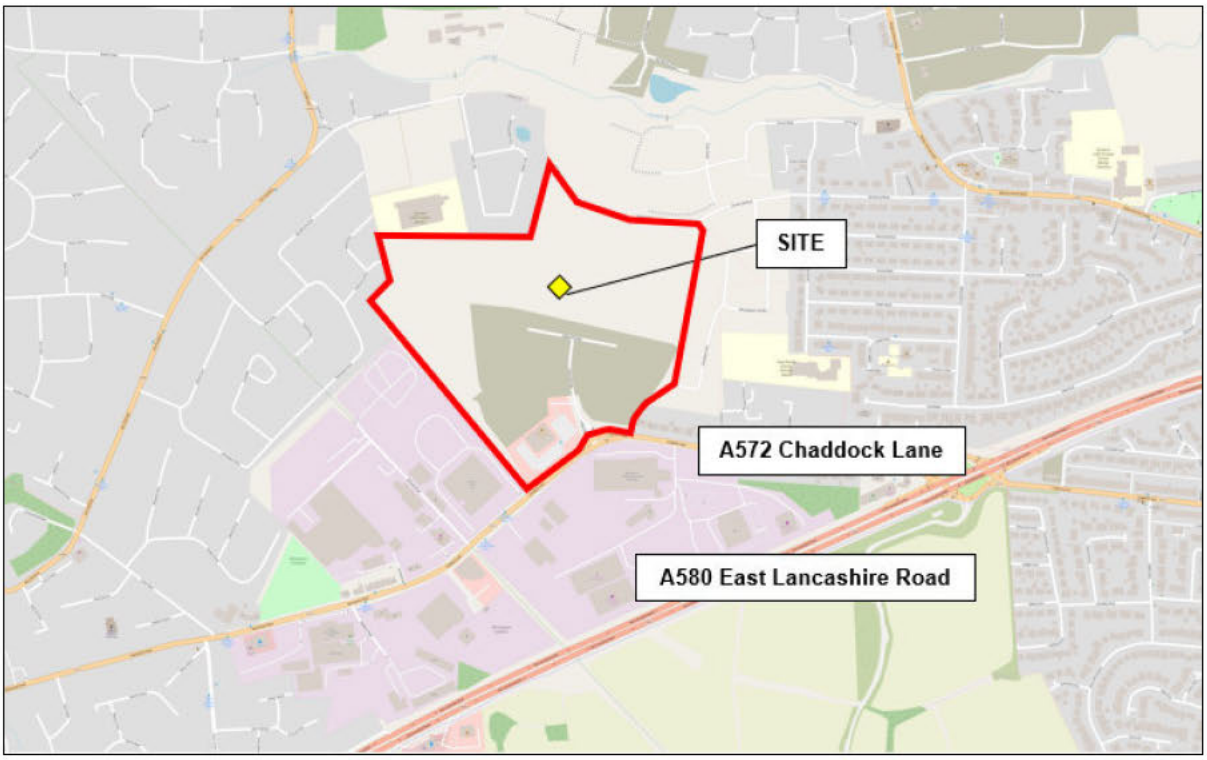
1.4 Structure of Report

1.4.1 This report comprises nine sections, including this introduction:

- Section 2 examines the site location, existing conditions, and accident analysis;
- Section 3 summarises the national and regional transport policies;
- Section 4 presents the accessibility of the site;
- Section 5 discusses the development proposals;
- Section 6 describes the future baseline traffic conditions on the local highway network;
- Section 7 estimates the number of vehicle trips generated by the development;
- Section 8 presents capacity assessments of the proposed development vehicle trips upon the network; and
- Section 9 sets out the summary and conclusions.

2. EXISTING CONDITIONS

2.1 Site Description



2.1.1 The development site is located at Astley Business Park off the A572 Chaddock Lane, approximately 2.5km to the southeast of Tyldesley, and approximately 3.5km west of Worsley.

2.1.2 As discussed previously, the existing site previously obtained planning approval (Ref No: A/15/81365/OUTMAJ) for a mixed-use development comprising a GFA of up to 28,000sqm of employment floor space (use classes B1, B2 and B8), and up to 165 dwellings.

2.2 Highway Network

2.2.1 The site location is illustrated in contrast to the surrounding local highway network in **Figure 2.1** below.

Figure 2.1: Local Highway Network

Source: GoogleMaps ©

2.3 A572 Chaddock Lane

2.3.1 The A572 Chaddock Lane is a single carriageway situated to the south of the site. The road is governed by a 30mph speed limit, and links the A572 to the A580 East Lancashire Road

2.3.2 The A572 Chaddock Lane aids pedestrian movements through regularly spaced signalised pedestrian crossing facilities. There are also 1.5m and 1m wide pedestrian footways on the northern and southern side of the carriageway with regularly spaced street lighting, dropped kerbs and tactile paving at crossing points.

2.3.3 **Figure 2.2** below shows Chaddock Lane from a southwestern bound direction.

Figure 2.2: Local Highway Network - Chaddock Lane

Source: GoogleMaps

2.4 A580 East Lancashire Road

2.4.1 The A580 East Lancashire Road is a dual carriageway situated to the south of the site. The A580 East Lancashire Road is governed by a 40mph speed limit, and connects the M6 in the north west to the M60 in the north east.

2.4.2 The A580 East Lancashire Road aids pedestrian movements through 1.5m wide pedestrian footways on the southern side of the carriageway with regularly spaced street lighting, and dropped kerbs.

2.4.3 **Figure 2.3** shows the A580 East Lancashire Road from a southwestern bound direction.

Figure 2.3: Local Highway Network - A580 East Lancashire Road

Source: GoogleMaps©

2.5 Traffic Flow Figures

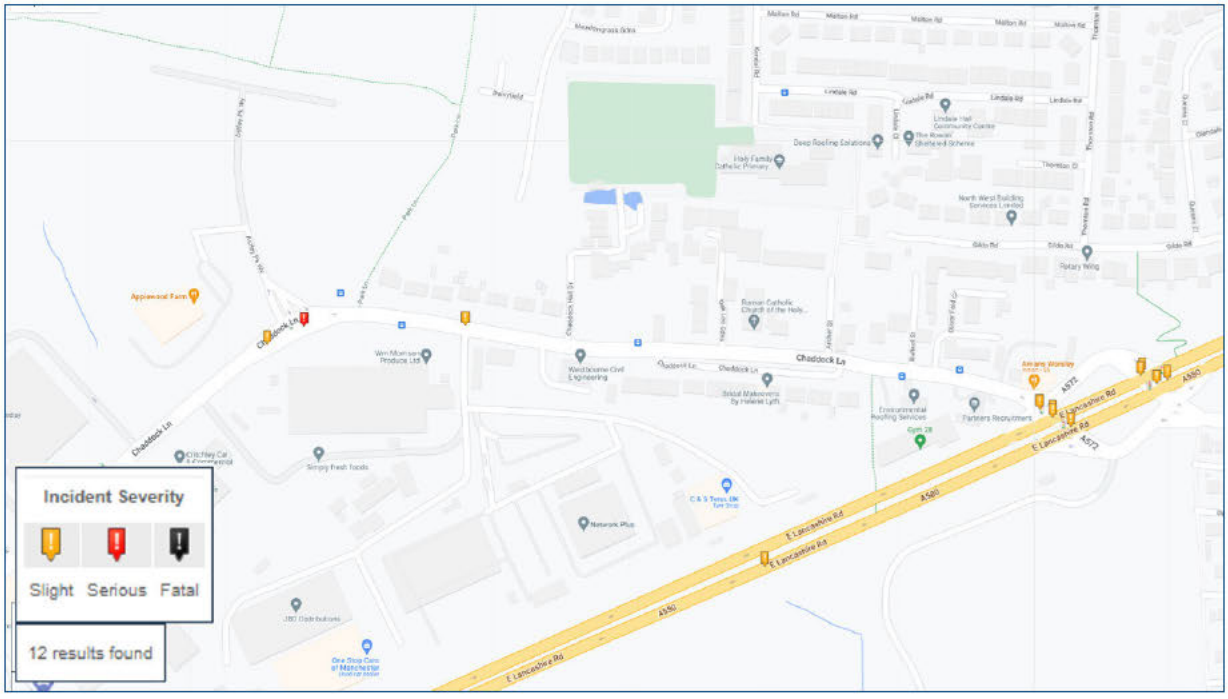
2.5.1 In order to establish the existing traffic flow demand on the local network within the study area, manual classified turning count traffic flows and queue length surveys were undertaken on Monday 13th June 2022 at the following junction:

- Site Access / Chaddock Lane Junction; and
- Chaddock Lane / A580 Junction

2.5.2 The full results of the traffic surveys can be found at **Appendix B**. These surveys have been used to assess the effect of the development proposals on the local transport network and is discussed in more detail within sections 6 and 7 of this report.

2.5.3 Analysis of the observed traffic flows indicate that the AM peak hour occurs between 07:30 and 08:30, with the PM peak hour occurring between 16:30 and 17:30 within the study area.

2.6 Accident Analysis



2.6.1 The DfT document "Guidance on Transport Assessment" states that:

"Critical locations on the road network with poor accident records should be identified. This is to determine if the proposed development will exacerbate existing problems or, if proposed, whether highway mitigation works or traffic management measures will help to alleviate the problems".

2.6.2 A review of the Personal-Injury Accidents [PIAs] recorded within the study area has been undertaken using the most recently available five-year data (1st January 2017-31st December 2021) available from the DfT.

2.6.3 **Figure 2.4** below illustrates the recorded findings.

Figure 2.4: Study Area Accident Record

Source: Crashmap.co.uk©

2.6.4 **Table 2.1** summarises the accident record and severity over the last 5 years in more detail.

Table 2:1: Study Area Accident Record Summary

Year/Severity	Slight	Serious	Fatal	Total
2017	5	-	-	5
2018	2	1	-	3
2019	1	-	-	1
2020	2	-	-	2
2021	1	-	-	1
Total	11	1	-	12

2.6.5 Examination of the PIA data revealed that during the five-year period a total of 12 accidents occurred. Of those 12 accidents, all were slight injuries except for 1 which resulted in a serious injury.

2.6.6 Whilst all accidents are unfortunate, it is Hydrock's view that given the nature of the road network and subsequently traffic flows, the collisions can be attributed to random fluctuations, with circumstantial factors and weather conditions likely to have been the main causes.

2.6.7 Therefore, Hydrock consider the accident history is not a result of existing layout design issues, and concludes that there are no underlying accident concerns within the study area.

3. TRANSPORT POLICY CONTEXT

3.1 Policy Overview

3.1.1 In line with local and national policy, this section outlines the potential travel demand for all modes with regards to the proposed development, against the existing transport provision within the area.

3.2 National Planning Policy Framework

3.2.1 The NPPF sets out the Government's policies for delivering sustainable development through the planning system. Local authorities are required to take these policies into account when formulating local development plans and when determining planning applications.

3.2.2 The most recent NPPF report was published in July 2021 and sets out the Government's planning policies for England and how these are expected to be applied at a local level. The NPPF is a significant material consideration in plan making and decision taking.

3.2.3 Paragraph 104 seeks to encourage opportunities to promote walking, cycling and public transport use. This is supplemented by paragraph 105 which states that development should be focused in sustainable locations and offer a genuine choice of transport modes.

3.2.4 Development proposals should also give priority to pedestrian and cycle movements and facilitate access to high quality public transport. The needs of people with disabilities and reduced mobility should also be addressed (paragraph 112).

3.2.5 Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.

3.2.6 Priority should be given to walking, cycling and public transport movements; conflicts between vehicles and vulnerable road users should be minimised through effective layout design.

3.2.7 Having regard to the above objectives, the proposed site access strategy includes measures to connect the site with the adjacent community and sustainable travel network, including existing public transport services. The TA considers the accessibility of the site by all modes and proposes a layout and access strategy that seeks to maximise the use of sustainable modes.

3.3 Planning Practice Guidance: Travel Plans, Transport Assessments and Statements in Decision-Making

3.3.1 In March 2014, the Department for Communities and Local Government [DCLG] in conjunction with the Department for Transport [DfT], released advice on when transport assessments and transport statements are required and what they should contain, which is intended to assist stakeholders in determining whether an assessment may be required. If an assessment is required, the level and scope of that assessment is then outlined within the document.

3.3.2 The advice reflects current Government policy, promoting a shift from the 'predict and provide' approach to transport planning to one more focused on sustainability. The document focuses on encouraging environmental sustainability, managing the existing network and mitigating the residual impacts of traffic from the development proposals.

3.4 Manual for Streets [MfS]

3.4.1 Manual for Streets (March 2007 and Sept 2010) supersedes Places Streets & Movement and Design Bulletin 32. Manual for Streets should now be used where 85th percentile monitored traffic speeds are less than 37mph.

3.4.2 The Manual deals with first principles in respect of what a street is for. It outlines five principle functions, namely:

- Place;
- Movement;
- Access;
- Parking; and
- Drainage and utilities.

3.4.3 A sense of place encompasses a number of characteristics, namely, local distinctiveness, visual quality and human interaction. Of the five functions, place and movement are the most important in determining the character of streets and should be considered together, as opposed to in isolation.

3.4.4 In new developments, Manual for Streets highlights that locations with a relatively high place function would be those where people are likely to gather and interact with each other, such as the town centre.

3.4.5 In section 3 of Mfs – the design process highlights that the design of a scheme should follow the user hierarchy shown in **Table 3.1**:

Table 3:1:User Hierarchy (taken from Table 3.2 of MfS, March 2007)

Consider First	Pedestrians
	Cyclists
	Public Transport Users
	Specialist service vehicles (e.g. emergency services, waste etc.)
Consider Last	Other motor vehicles

Source: MfS (2007)

3.5 Other National Policies / Guidelines Reviewed

3.5.1 Various walking distances are quoted in the Chartered Institution of Highways and Transportation's (CIHT's) "Guidelines for Providing for Journeys on Foot". **Table 3.2** (taken from Table 3.2 of the document) sets out the acceptable walking distances in various contexts:

Table 3:2: Acceptable Walking Distances

Criteria	Town Centre (m)	School / Commuters (m)	Elsewhere (m)
Desirable	200	500	400
Acceptable	400	1,000	800
Preferred Maximum	800	2,000	1,200

3.6 Greater Manchester Local Transport Plan

3.6.1 The Greater Manchester Transport Strategy 2040, published in February 2017, sets out TfGM's sustainable mobility plan for the future and forms Greater Manchester's 4th Local Transport Plan (GMLTP4). Building on its own 2040 Vision, the Strategy provides detail on the priority interventions needed to deliver that Vision. The document highlights several key objectives relevant to the application site:

- Reducing the need to travel by car, and the distance travelled.
- Making the best use of existing infrastructure, particularly through increasing the density of development close to public transport nodes.
- Increasing the use of sustainable transport to reduce the negative impacts of car use. The design of new development needs to make it easier for people to use sustainable modes e.g., the availability of safe and direct walk/cycle routes, the provision of secure cycle parking or the availability of EV charging points.
- Establish cycling as a recognised and attractive component of the future integrated transport offer. 'Aim to double and double again' the proportion of trips made by bicycle by 2025, with the aspiration that 10% of all trips should be made by bike.

3.6.2 The proposed development corresponds with the Greater Manchester Local Transport Plan by providing a high-density residential development within proximity to the city core and associated public transport infrastructure.

3.7 Places for Everyone Document [PfE] (Draft 2021)

3.7.1 Places for Everyone is a Joint Development Plan or Bolton, Bury, Manchester, Oldham, Salford, Rochdale, Tameside, Trafford and Wigan which will set out the strategic policy framework for the 9 boroughs and helps these areas meet their local housing and employment needs.

3.7.2 The plan is set to replace the Greater Manchester Spatial Framework [GMSF] and is being developed by the feedback from residents, businesses and the development industry.

3.7.3 The five-year Transport Delivery Plan contained within the PfE document (draft 2021) sets out all the transport projects hoped to be delivered and developed in the next five years to support growth and meet carbon reduction targets.

3.8 Wigan Local Plan Core Strategy (September 2013)

3.8.1 Wigan Council adopted the Wigan Local Plan Core Strategy on September 2013. The Local Plan outlines the spatial vision for how the Council wants the borough to be like in 2026, as well as number of strategic objectives and policies.

3.8.2 The Council has produced a Transport Strategy for Wigan to 2026 which sets out the borough's transport issues in much more detail and highlights how they will be addressed. The Transport Strategy sits very much alongside the Core Strategy and the two documents are complementary.

3.8.3 The transport strategy covers a full range of transport issues, including congestion, parking, cycling, walking, and public transport to ensure that, in future, the Council can provide an effective and efficient transport system to get people moving.

3.8.4 The over-arching vision of the transport strategy is that by 2026, the Council want people to have good access to an attractive transport system, which provides choice for jobs, goods and services, and balances the needs of sustainable residential communities with strategic business networks.

3.8.5 The Council has developed four key objectives, which will help to ensure that they can deliver the vision of the transport strategy by 2026. The four objectives are set below:

1. Sustainable transport to deliver economic, environmental and social outcomes
2. Equitable access between communities, businesses, services and goods
3. Diverse and adaptable networks for choice and resilience
4. Attractive transport experience to encourage modal shift

3.9 Wigan Metropolitan Borough Council Parking Standards

3.9.1 Wigan parking standards (Policy A1S) are contained within Appendix 9 of the Wigan Unitary Development Plan (UDP) 2006 document. Many policies of the UDP have now been replaced by Core Strategy policies and therefore no longer remain part of the development plan. Policy A1S, parking in New Development, remains in force.

3.9.2 With regards to land use classification B2/B8, **Table 3.3** suggests the maximum and minimum parking provision for car, cycle and motorcycle.

Table 3:3 Wigan Parking Standards

Type of Development	Maximum standard for car parking provision	Minimum standard for cycle parking provision	Minimum standard for motorcycle parking
B1 - Business Stand alone Business Parks	1 per 35 sqm 1 per 40 sqm	For 1 cycle per 400 sqm- minimum provisions for 2 cycles	1 per 1,400 sqm - minimum of 2 spaces
B2 - General Industry	1 per 60 sqm	For 1 cycle per 700 sqm - minimum provision for 2 cycles	1 per 2,800 sqm minimum of 2 spaces
B8 - Storage or Distribution	1 per 100 sqm	For 1 cycle per 850 sqm – minimum provision for 2 cycles	1 per 4,000 sqm – minimum of 2 spaces

3.9.3 Car parking provision for disabled people should be provided in addition to general car parking provision. This applies to all of the land uses, with the exception of individual dwelling houses. The minimum standard for car parking provision for disabled people can be found in **Table 3.4** below.

Table 3:4 Car parking provision for disabled people

Total number of car parking spaces allowable under the maximum standard for car parking provision in Table A of the Wigan UDP (notwithstanding whether the full provision is being made)	Minimum standard for car parking provision for disabled people
Up to 4 spaces	1 space
5 - 12 spaces	2 spaces
13 - 50 spaces	3 spaces
51 - 200 spaces	6% of total capacity
Over 200 spaces	4 spaces plus 4% of total capacity

3.10 Summary

3.10.1 The above policy review summaries both local and national transport policies relevant to the proposed development site. As such it sets out the context in which the proposed development needs to be compliant.

3.10.2 Access on foot, cycle and public transport is discussed in the following section of this report.

4. SUSTAINABLE ACCESSIBILITY

4.1 Access on Foot

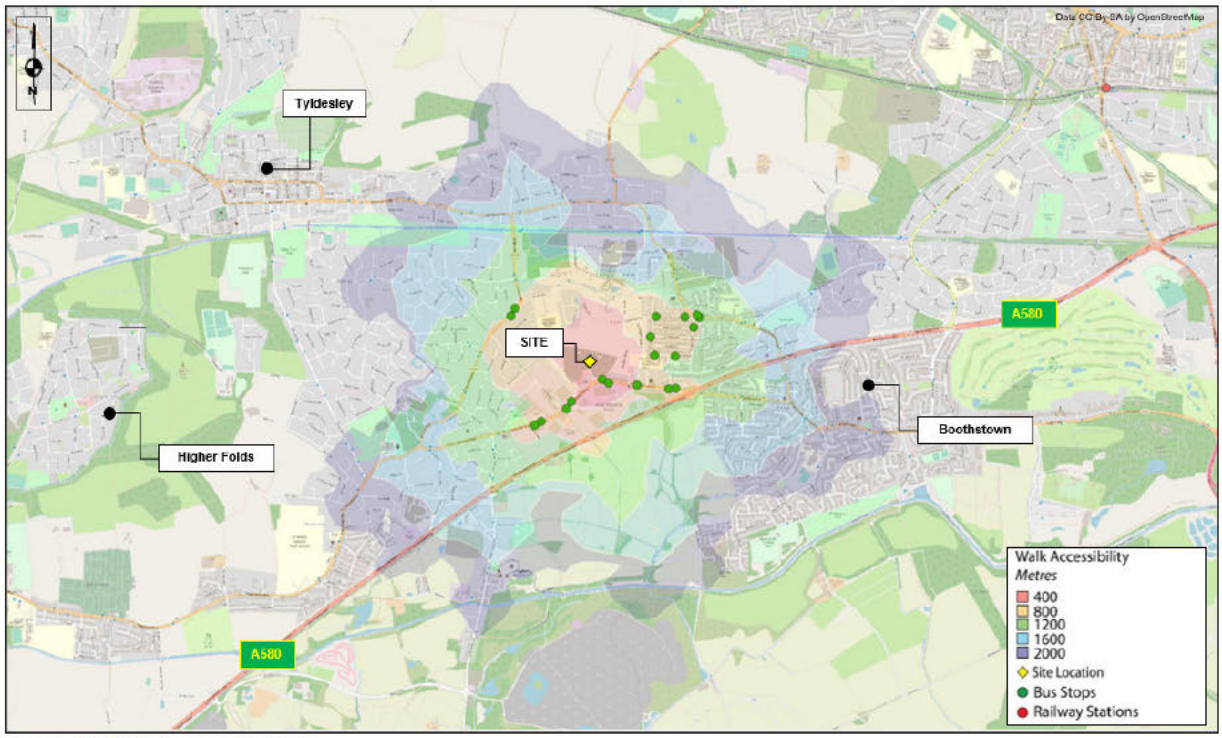
4.1.1 Walking is the most important mode of travel at the local level and offers the greatest potential to replace short car trips, particularly those under 2km. The guidance on the preferred maximum walking distances to amenities is given in the Chartered Institution of Highways and Transportation [CIHT] document 'Providing for Journeys on Foot' (2000).

4.1.2 In terms of commuting journeys by foot, the desirable distance is 500m, the acceptable distance is 1km and the preferred maximum is 2km. However, the distance that people are prepared to walk depends upon many factors; there are obvious physical factors such as age, health and disabilities, along with factors concerning the quality of the route and the environment.

4.1.3 In relation to shorter trips in particular, the CIHT publication Planning for Walking (section 2.1) states that *"across Britain about 80% of journeys shorter than 1 mile are made wholly on foot."*

4.1.4 Manual for Streets [MfS] emphasises this advice, stating that *"walkable neighbourhoods should have a range of facilities available within 800m."* However, this distance is not regarded as the upper limit for walking journeys, and MfS uses the principle that walking offers the greatest potential to replace short car trips, particularly those under 2km in length.

4.1.5 The location of development is within reach of the public transport network, this is particularly important in terms of encouraging travel by this mode and supporting the viability of public transport services.



4.2 Current Local Environments for Walkers

4.2.1 The local highway network facilitates pedestrian movements through 1.5m and 1m wide pedestrian footways on the northern and southern side of the carriageway on the A572 Chaddock Lane, as well as 1.5m wide pedestrian footways on the southern side of the dual carriageway on the A580 East Lancashire Road.

4.2.2 The A572 Chaddock Lane includes regularly spaced street lighting, dropped kerbs and tactile paving at crossing points. There are also signalised pedestrian crossings on the A572 Chaddock Lane to allow for pedestrians to cross the carriageway safely.

4.2.3 Figure 4.1 below provides an extract of the indicative 2km walk catchment plan using GIS software - Basemap's Visography (TRACC) program which provides sustainable travel mapping. A copy of the full 2km walking catchment is provided within Figure 1 of Appendix C.

Figure 4.1: 2km Walking Catchment

Source: CC-BY-SA by openstreetmap

4.2.4 As demonstrated in **Figure 4.1,** within 2.0km of the site, there are a number of bus stops which will help facilitate pedestrian movements to and from the site, to the surrounding areas. The nearest pair of stops can be found along the A572 Chaddock Lane, approximately 264m away to the south of the site.

4.2.5 The proximity of the site to the local bus network provides significant opportunities for pedestrians to access a variety of local destinations.

4.2.6 There are a number of local amenities within the vicinity of the site. A detailed list of these amenities is as follows:

- Applewood Farm Restaurant - circa 280m from the site;
- Garrett Hall Primary School - circa 550m from the site
- Holy Family Catholic Primary School Boothstown - circa 750m from the site;
- Lindale Hall Community Centre - circa 850m from the site;
- Co-op Food Convenience Store and Petrol Station – circa 850m from the site;
- St Johns Mosley Common C Of E Junior & Infant School - circa 1.2km from the site;
- Texaco Petrol Station - circa 1.3km from the site;
- Lidl Supermarket - circa 1.4km from the site; and
- Londis - circa 1.8km from the site

4.2.7 In summary, the site is extremely accessible on foot and within proximity to local amenities, which will reduce the requirement for employees to make short car journeys.

4.3 Disabled Accessibility

4.3.1 Disabled accessibility is facilitated through a 1.5m wide pedestrian footway with dropped kerbs, spaced street lighting, and tactile paving at crossing points for wheelchair users on the northern side of the carriageway on the A572 Chaddock Lane.

4.3.2 The A572 Chaddock Lane also provides pedestrian signalised crossings to assist staff and visitors that are visually impaired, travelling to and from the site.

4.4 Public Rights of Way

4.4.1 There are six Public Rights of Way [PRoW] within the vicinity of the development site. This includes PRoW path number 145, 152, 154, 155, 159, and 160 providing access to Tanhouse Avenue, Daisyfield, and Garrett Lane.

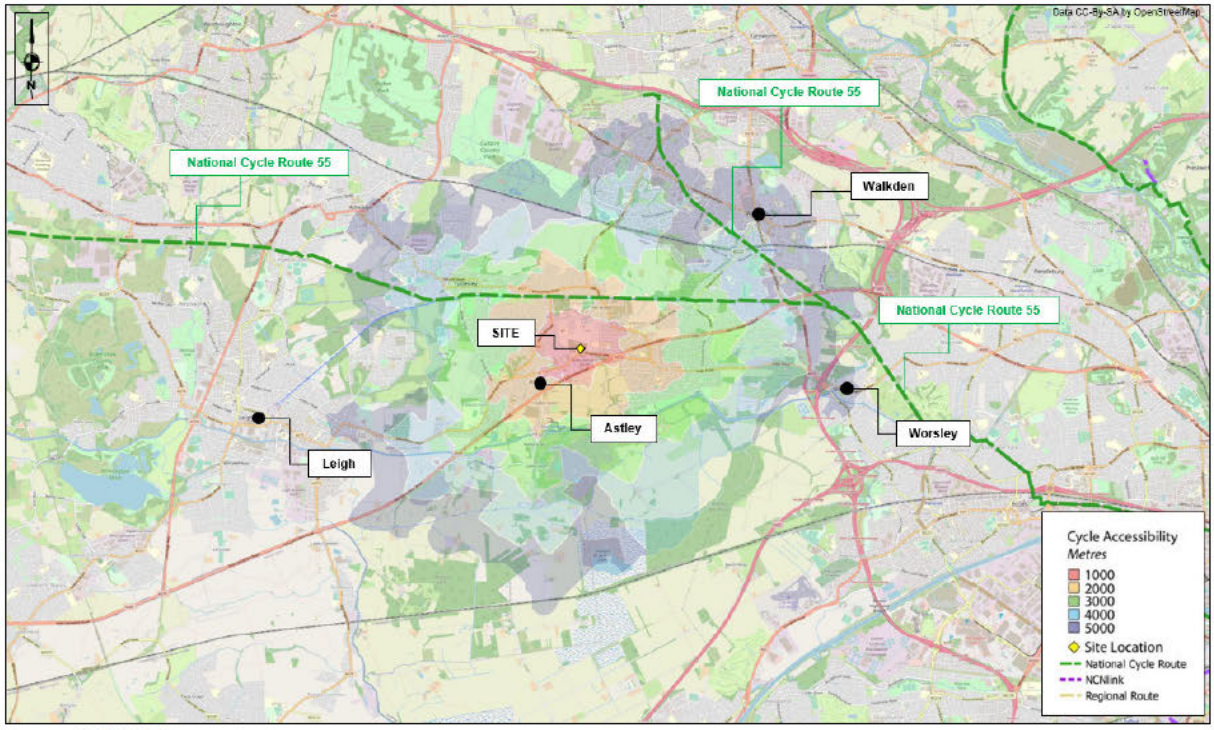
4.5 Access by Bicycle

4.5.1 It is widely recognised that cycling can act as a substitute for short car journeys, particularly those up to 5km in length. This is consistent with the statement in LTN 1/20 Cycle Infrastructure Design (paragraph 2.2.2) that states:

"two out of every three personal trips are less than five miles in length – an achievable distance to cycle for most people, with many shorter journeys also suitable for walking."

4.5.2 A round trip on a waymarked leisure route could easily involve distances of 20 to 30 miles. Experienced cyclists will often be prepared to cycle longer distances for whatever journey purpose.'

4.6 Current Local Environment for Cyclists



4.6.1 The general topography surrounding the proposed development site is reasonably flat which should assist in encouraging employees and visitors of the proposed development to travel by cycle. The local highway network is generally conducive to encourage cycling through relatively wide carriageways.

4.6.2 It is noted that Walkden Railway Station is located within the 5km cycling catchment, providing future employees and visitors of the site the option of traveling via more sustainable modes through linked trips, thus enhancing accessibility for commuters travelling from further afield.

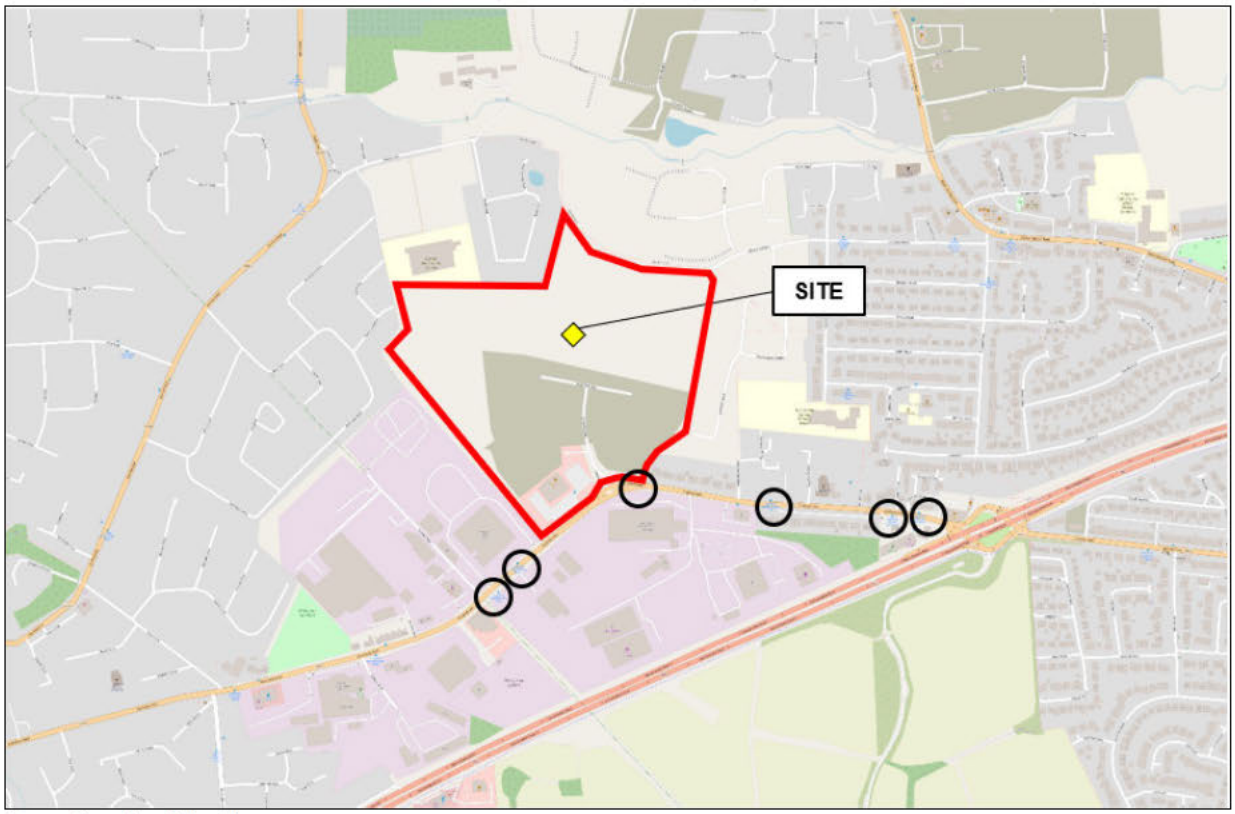
4.6.3 There is also the availability of National Cycle Route 55 when complete. National Cycle Route 55 will connect Ironbridge to Preston via Stafford, Macclesfield, Stockport and Wigan or Bolton. Between Stafford and Stoke-on-Trent, the route follows Route 5.

4.6.4 Figure 4.2 below provides an extract of the indicative 5km cycling catchment plan, again using GIS software - Basemap's Visography (TRACC) program, and is equivalent to a typical cycle time of 15-20 minutes. A copy of the full walking catchment is provided within Figure 2 of Appendix C.

Figure 4.2: 5km Cycling Catchment

Source: CC-BY-SA by openstreetmap

4.6.5 The figure further illustrates that a number of local areas are accessible within a 5km cycle including Walkden and Worsley. Cycling would therefore be a viable mode of transport for employees commuting to and from work.



4.7 Access by Bus

4.7.1 The nearest pair of stops can be found along the A572 Chaddock Lane, approximately 264m away to the south of the site. These stops serve Bus Service No. 126 which travels from Leigh to The Trafford Centre, Bus Service No. 34 which travels from Leigh to Manchester via Worsley, and Bus Service No. 987 from Atherton to St Mary's RC High School in Astley. These buses are conducive for employees of the site with services serving morning and evening peak hours.

4.7.2 Additional stops are located further along to the east and west of A572 Chaddock Lane.

4.7.3 A map illustrating the location of the bus stops is provided in **Figure 4.3**, whilst the frequency of the service is summarised in **Table 4.1**. For simplicity and to avoid double counting, the frequencies are taken at the nearest available stop for each service. The AM and PM peak for the Weekday are 08:00-09:00 and 17:00- 18:00. On Saturday the peak is 12:00-13:00.

Figure 4.3: Bus Stop Map

Source: OpenStreetMaps©

Table 4:1: Bus Timetable Summary

Service Number	Route	Monday - Friday					Saturday			
		First	AM Peak	PM Peak	Last	Per Day	First	Peak	Last	Per Day
126	Leigh - The Trafford Centre	06:08	1	1	21:50	16	07:40	1	21:50	15
	The Trafford Centre - Leigh	06:40	1	1	23:30	16	08:50	1	22:30	14
34	Leigh - Manchester via Worsley	05:00	1	2	18:15	23	07:22	3	18:00	20
	Manchester - Leigh via Worsley	06:28	3	2	19:38	26	08:48	2	19:18	20
987	Atherton - St Mary's RC High School (Astley)	07:36	-	-	-	1	-	-	-	-
	St Mary's RC High School (Astley) - Atherton	15:00	-	-	-	1	-	-	-	-
Totals		-	6	6	-	83	-	7	-	69

Source: traveline.info

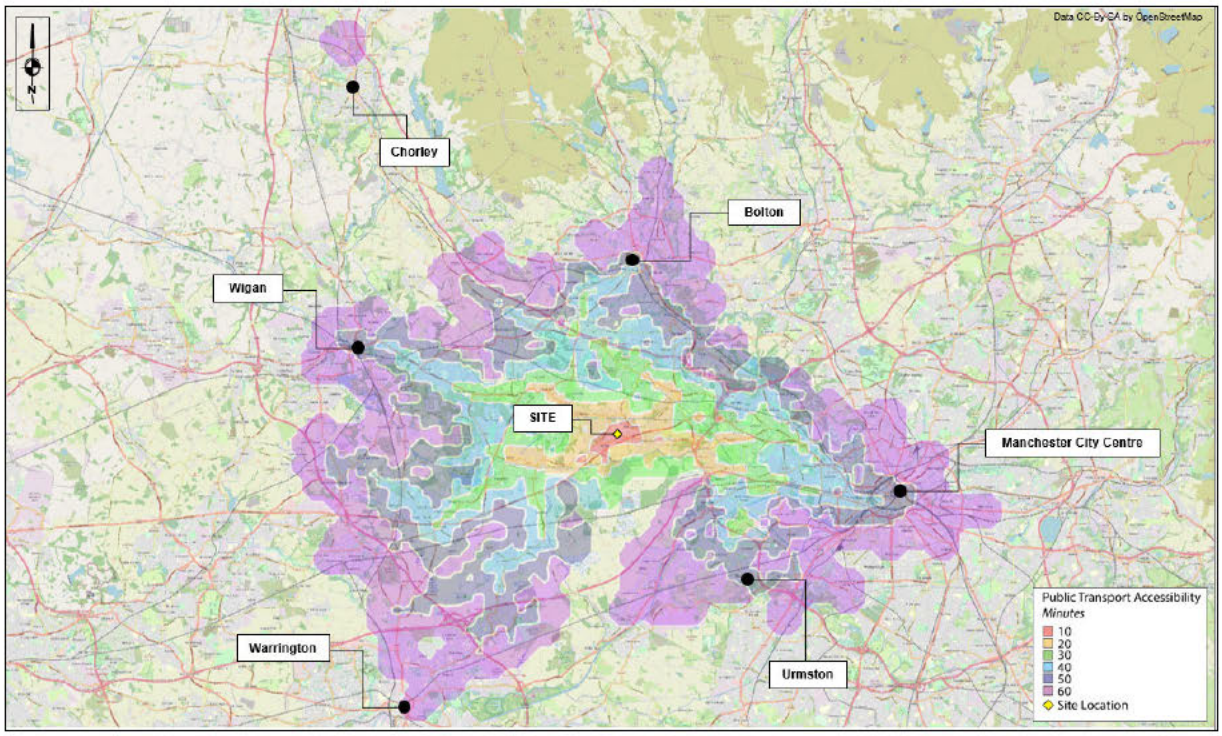
4.7.4 Table 4.1 demonstrates that the site is accessible by bus for commuters, with circa 83 buses passing the site daily on the weekdays and 69 buses passing the site daily on weekends. The early start and later finish times are conducive to employees and visitors.

4.7.5 It is also evident that these services link the site to a number of residential areas. There is the potential for these residential areas to provide a percentage of the development's workforce and, as such, be a strong factor in encouraging bus to travel to and from work.

4.7.6 Based on the above, it is therefore concluded that the site benefits from good access by bus, offering an attractive mode of transport and a viable alternative to single occupancy car journeys. Given the frequency of the services available, this has the potential to provide a significant alternative to single occupancy car journeys.

4.8 Access by Rail

4.8.1 The nearest rail station to the proposed development site is Walkden Railway Station located approximately 4.4km to the north east of the site.



4.8.2 Northern Rail serves the station, which has two platforms and operates on the Manchester-Southport Line. Walkden Station run services twice an hour in both directions to Wigan North Western, Southport, Kirkby, Blackburn, as well as hourly services to Manchester, Huddersfield, and Leeds.

4.9 Journey Times by Public Transport

4.9.1 A calculation has been undertaken, using GIS software - Basemap's Visography (TRACC) program, to illustrate the distance that can be travelled within 60 minutes by public transport to and from the proposed development site. The time includes the walk to the bus stops or railway station and demonstrates that key areas such as Wigan, Warrington, Bolton, and Manchester to name a few are all within a 60-minute public transport journey.

4.9.2 Figure 4.4 below provides an extract of the public transport 60-minute catchment area. A copy of the full plan is provided within Figure 3 of Appendix C.

Figure 4.4: 60-minute Public Transport Catchment

Source: CC-BY-SA by openstreetmap

4.10 BREEAM Assessment TRA 01 Accessibility Calculator

4.10.1 Further to the above, the BREEAM UK New Construction 2018 Tra 01 Public Transport Accessibility Index Calculator has been used to measure the accessibility of the site by public transport according to the BREEAM criteria.

4.10.2 The aims of this assessment are to recognise where the proximity of good public transport networks has been reviewed, and encourage the implementation of alternative solutions where the proximity to public transport networks is poor; thus, alleviating transport related congestion and pollution.

4.10.3 The assessment has been carried out, with the site yielding an index score of 2.33 and hence achieving 1 credit for this class of development. The results of the calculation are summarised in **Appendix C.**

4.11 Conclusions

4.11.1 In summary, the proposed development site is located in a reasonably accessible location and is well located to make use of the existing public transport links and pedestrian / cycle routes.

5. DEVELOPMENT PROPOSAL

5.1 Introduction

5.1.1 The application relates to the proposed development for a B2 / B8 land use development comprising a Gross Floor Area [GFA] of circa 32,826sqm across a number of units, situated at Astley Park Way off Chaddock Lane.

5.1.2 The proposed site layout is illustrated in **Figure 5.1** below with a copy of the full plan located at **Appendix D.**

Figure 5.1: Proposed Site Layout Plan

Source: PHP Architects

5.2 Schedule of Accommodation

5.2.1 The following schedule of accommodation is proposed at the site:

Unit 1

- Warehouse = 12,827sqm (or 138,072sqft)
- Office = 734sqm (or 7,895sqft)

Unit 2

- Warehouse = 12,297sqm (or 132,359sqft)
- Office = 697sqm (or 7,511sqft)

Unit 3

- Warehouse = 2,893sqm (or 31,143sqft)
- Office = 247sqm (or 2,653sqft)

Unit 4

- Warehouse = 2,907sqm (or 31,295sqft)

  Office = 224sqm (or 2,408sqft)

TOTAL = 32,826sqm (or 353,336sqft)

5.3 Proposed Site Access Arrangement

5.3.1 It is proposed that the site access for vehicle parking will be taken off Astley Park Way via Chaddock Lane.

5.3.2 Swept path analysis has been undertaken with a large car and 16.5m articulated vehicle to demonstrate that the existing access arrangement and proposed internal layout is suitable and access and egress manoeuvres can be performed safely for both the staff vehicle access and the HGV access. The swept path analysis drawings are presented in **Appendix E.**

Pedestrian and Cycle Access

5.3.3 Pedestrian and cycle access will be taken from the same proposed access road as the vehicular entry point, off Astley Park Way via Chaddock Lane.

5.4 Parking

5.4.1 All parking areas are proposed to be accessed off Astley Park Way via Chaddock Lane. The car parking schedule is as follows:

Vehicle Parking

- Car Parking Bays = 327
  - » inclusive of 33 EV Bays; and
  - » inclusive of 17 Disabled Bays (4 spes + 4% (13) of total provision).
- Cycle Parking Spaces = 140;
- Motorcycle Bays = 16;

HGV Parking

- HGV Docks = 32;
- HGV Level Access Doors = 8;
- HGV Parking Bays = 73;

5.4.2 The level of parking provision at the proposed development is policy compliant as it is within the Council's 'Maximum' car parking standards discussed within Section 3.

5.4.3 Given the above, it is Hydrock's view that this level of parking provision is suitable for this scale of development, taking into consideration its location, intended use and local factors.

5.5 Refuse Servicing

5.5.1 The refuse servicing requirements of the development have been considered to ensure that the site can successfully accommodate refuse servicing vehicles on the proposed site. It is envisaged that a large 4-axle refuse vehicle will enter the site, collect the waste, manoeuvre within the site, and exit in a forward gear.

5.5.2 The swept path manoeuvres of a large 4-axle refuse vehicle have been undertaken as described above and are presented at Appendix F.

6. FUTURE BASELINE TRAFFIC CONDITIONS

6.1 Introduction

6.1.1 This chapter describes the future baseline traffic conditions on the local highway network in relation to traffic growth.

6.2 Traffic Growth

6.2.1 Hydrock have used the following traffic growth assessment years as part of their assessments:

- Assessment years to comprise of:
  - » A base / application year scenario (2022);
  - » Future year 2027 (+5 years from application year); and
  - » Future year 2027 + proposed development.

6.2.2 Therefore, based on the above, and in accordance with the DfT's "Guidance on Transport Assessment", the future assessment year for this TA comprises 2022 (base / application year), and 2027 (i.e. +5 years from base / application year).

6.2.3 TEMPRO v7.2 has been used to calculate background traffic growth from the base / application year of 2022, through to the design build out future year of 2027 for the Wigan area (029).

6.2.4 The growth factors that have been obtained from TEMPRO are summarised in **Table 6.1** below.

Table 6:1: TEMPRO Traffic Growth Factors (Wigan 029)

Period	Weekday AM Peak (07:30-08:30)	Weekday PM Peak (16:30-17:30)
2022 - 2027	1.0385	1.0379

Source: TEMPRO

6.2.5 The above growth factors are applied to the surveyed AM and PM peak hours from the 2022 base traffic flows to obtain the future growthed surveyed traffic flows (2027), as presented in the Traffic Flow Figures located at the end of this report.

6.3 Committed Developments

6.3.1 During Hydrock's initial scoping discussions, WC provided a list of committed developments to be included within Hydrock's Assessments. In summary, these committed developments are as follows:

- **Ref No: A/17/84108/OUTMAJ** - Land North Of Garrett Lane, East Of Garrett Hall, West Of Mosley Common Road, And South Of The Guided Busway Tyldesley
- **Ref No: A/17/83702/OUTMES** - Parr Bridge Works, Mosley Common Road, Tyldesley, Manchester M29 8PR;
- **Ref No: A/17/84560/OUTMAJ** - Land East Of Leigh Road South/West Of Bee Fold Lane
- **Ref No: A/20/88849/MAJOR** - North Leigh Park Nel Pan Lane Leigh

6.3.2 Given the above, Hydrock have obtained the relevant traffic flow information from WC's planning portal.

6.3.3 Following a review of the available data Hydrock were able to identify that only application A/17/84108/OUTMAJ has traffic passing through the proposed study network.

6.3.4 As such Hydrock have obtained the relevant traffic flow information and have included these within Hydrock's Assessments for the future growthed surveyed traffic flows (2027) + committed developments, as shown in the Traffic Flow Figures located at the end of this report.

7. TRIP GENERATION, DISTRIBUTION AND ASSIGNMENT

7.1 Introduction

7.1.1 This section of the report considers the trip generation levels associated with the proposed development and the impact it will have on the local highway network. Under the proposed application, the site proposals involve the construction of an industrial warehousing unit comprising 32,826sqm GIA for B2/B8/ancillary B1 land use development.

7.1.2 With regards to the proposed light vehicles and HGV trips associated with the development, the weekday morning and weekday evening peak hours have been assessed.

7.1.3 It should be noted that no deduction has been applied for the extant trip generation as part of Hydrock's assessments of the proposed development in order to provide a robust assessment.

7.2 Trip Generation - Proposed B2/B8/ancillary B1 Land Use (Industrial Warehousing - 32,826sqm GFA)

7.2.1 To determine the vehicular trips associated with the proposed development land use, the industry-standard Trip Rate Information Computer System [TRICS] has been interrogated for surveys of both B8 > EMPLOYMENT > WAREHOUSING (COMMERCIAL) and EMPLOYMENT > INDUSTRIAL UNIT Land use developments. The TRICS database is an industry accepted tool for predicting the likely number of trips from a development by comparing the site with existing developments of a similar size and characteristics within the UK.

7.2.2 In order to obtain appropriate trip rates, sites within Greater London and Ireland have been omitted from this calculation. The trip generation methodology is based on the proposed allocated land-use for the development. Under the latest proposals, the proposed development is allocated B2 / B8 Land Use.

7.2.3 The results of the TRICS interrogation are shown in **Table 7.1** below, whilst the TRICS outputs for the proposed B2 / B8 land classification are presented in **Appendix G**. In the following table, the trip rates are given per 100sqm.

Table 7:1: Proposed B2 / B8 Trip Rates

Trip Rates	Weekday AM Peak (08:00-09:00)		Weekday PM Peak (17:00-18:00)	
	Arrivals	Departures	Arrivals	Departures
B2 Industrial Unit				
Total Vehicle Trip Rates	0.162	0.042	0.002	0.161
HGV Trip Rates	0.013	0.013	0.004	0
B8 Commercial Warehouse				
Total Vehicle Trip Rates	0.121	0.102	0.107	0.157
HGV Trip Rates	0.036	0.055	0.072	0.036

7.2.4 As agreed during scoping discussions with WCC the higher B8 trip rates have be used for the purposed of the assessment of the site. The result of the trip generation exercise are set out in **Table 7.2** below.

Table 7:2: Proposed Site Trip Generation

32,826sqm	Weekday AM Peak (08:00-09:00)		Weekday PM Peak (17:00-18:00)	
	Arrivals	Departures	Arrivals	Departures
B8 Commercial Warehouse				
Total Vehicle Trips	40	33	35	52
HGV	12	18	24	12
PCU	55	57	66	67

**Note: Results subject to rounding*

7.2.5 It can be seen from the above table that the development is expected to generate the following two-way PCU trips:

- 112 in the morning peak; and
- 133 in the evening peak;

7.3 Trip Distribution

7.3.1 The resultant trip generation flows have been distributed onto the local highway network via the following methods:

- Lights using a journey to work distribution profile; and
- HGVs have been split based on the existing HGV tidal movements along the A580.

7.3.2 The outputs from the journey to work calculations are included in **Appendix H** for reference

7.3.3 The Trip Generation and Trip Distribution results are shown within Traffic Flow Figures located at the end of this report.

8. ANTICIPATED HIGHWAYS IMPACT

8.1 Introduction

8.1.1 This section assesses the impact of the development proposals with regards to increases in traffic along the local highway network.

8.2 Proposed Traffic Impact Assessment - Local highway network

8.2.1 Following scoping discussions with WCC it was agreed that the following junctions required assessment given that the traffic impact was greater than +30 two-way trips.

8.2.2 Hydrock have undertaken detailed capacity assessments at the following two junctions within the surrounding local highway network:

- Astley Park Access / A572 Chaddock Lane; and
- A572 Chaddock Lane / A580 Lancashire Road.

8.2.3 The capacity of the junctions has been assessed using LINSIG 3 software for the following scenarios:

- Base / application year of 2022;
- The future base year of 2027;
- The future base year of 2027 + committed development; and
- The future base year of 2027 + committed development + development.

8.2.4 The development proposals, with the full analysis of the development assessment scenario shown within the Traffic Flow Figures located at the end of this report.

8.2.5 To model the junctions signal timing data was purchased from TfGM and is included in Appendix I for reference.

8.3 Astley Park Access / A572 Chaddock Lane

8.3.1 An assessment of the signalised Astley Park Access / A572 Chaddock Lane junction, has been undertaken using LINSIG 3 software. With the LINSIG 3 models the results generated provide a Degree of Saturation (DoS) along with an estimate of the likely traffic queues.

8.3.2 RFC values between 0% & 90% states that junctions are 'within' capacity whereas, values between 90% and 100% represent a junction that is 'approaching' capacity and results in variable operation (i.e. possible queues building up at the junction during the period under consideration and increases in vehicular delay moving through the junction). DoS values in excess of 100% represent overloaded conditions (i.e. congestion).

8.3.3 The full LINSIG model outputs are presented in Appendix J, with the future base year of 2027 + committed development results summarised in Table 8.1 below.

Table 8:1: LINSIG CAPACITY ASSESSMENT - Astley Park Access / A572 Chaddock Lane

Arms	Weekday AM Peak (07:30-08:30)		Weekday PM Peak (16:30-17:30)	
BASE 2027 + Committed + Development				
	DoS%	Queue	DoS%	Queue
Astley Park Way	16	1	21.1	1
Chaddock Lane West	26.8	3	27.2	3
Chaddock Lane East	15.2	1	48.4	7

8.3.4 While all test runs have been modelled it is clear from the above summary that in the most onerous scenario the junction will work well within capacity.

8.3.5 Chaddock Lane / A580 East Lancashire Road

8.3.6 An assessment of the Chaddock Lane / A580 East Lancashire Road junction has been undertaken using LINSIG 3 software.

8.3.7 The full LINSIG model outputs are presented in **Appendix J**, with the assessment results summarised in **Table 8.2** below.

Chaddock Lane North Left Ahead	44.3	0	30.6	0
Chaddock Lane North (Through) U-Turn Ahead	55.3	9	56.4	11
Chaddock Lane North Left Ahead	86.7	15	40.7	6

8.3.8 Based on the evidence above it is clear that the vehicle impacts associated with the proposed development at both junctions are not severe, with the junctions clearly operating within capacity, and are concluded to result in minimal change to the future situation.

8.3.9 As such, it is Hydrock's view that the development impact on the local network is immaterial, and does not require further consideration.

8.4 Summary

8.4.1 Based on the above, the number of trips associated with the proposed development is considered negligible and would not have an impact on the local highway network.

8.4.2 It should also be considered that no extant development trips have been netted off the operational assessments, therefore the junction assessment results can be viewed as robust.

8.4.3 Therefore, having regard to all of the above, the proposed development will not have a material impact.

9. SUMMARY AND CONCLUSION

9.1 Summary

9.1.1 Hydrock have been instructed by PLP to prepare a TA in support of a planning application for a B2/B8/ancillary B1 land use development situated at Astley Business Park off the A572 Chaddock Lane.

9.1.2 The existing site previously obtained planning approval (Ref No: A/15/81365/OUTMAJ) which granted the following:

"Outline application for a mixed-use development comprising up to 28,000 SQM of employment floor space (use classes B1, B2 and B8), up to 165 dwellings, land for community use, open space, landscaping and association infrastructure (all matters reserved except employment access from Chaddock Lane; residential access from Garrett Hall Road and Garrett Lane)."

9.1.3 While this permission has now lapsed the premise of this type of development has been accepted at this site location.

9.1.4 Given the above, the application will seek construction for a proposed B2/B8/ancillary B1 land use development comprising a Gross Floor Area [GFA] of 32,826sqm across a number of units.

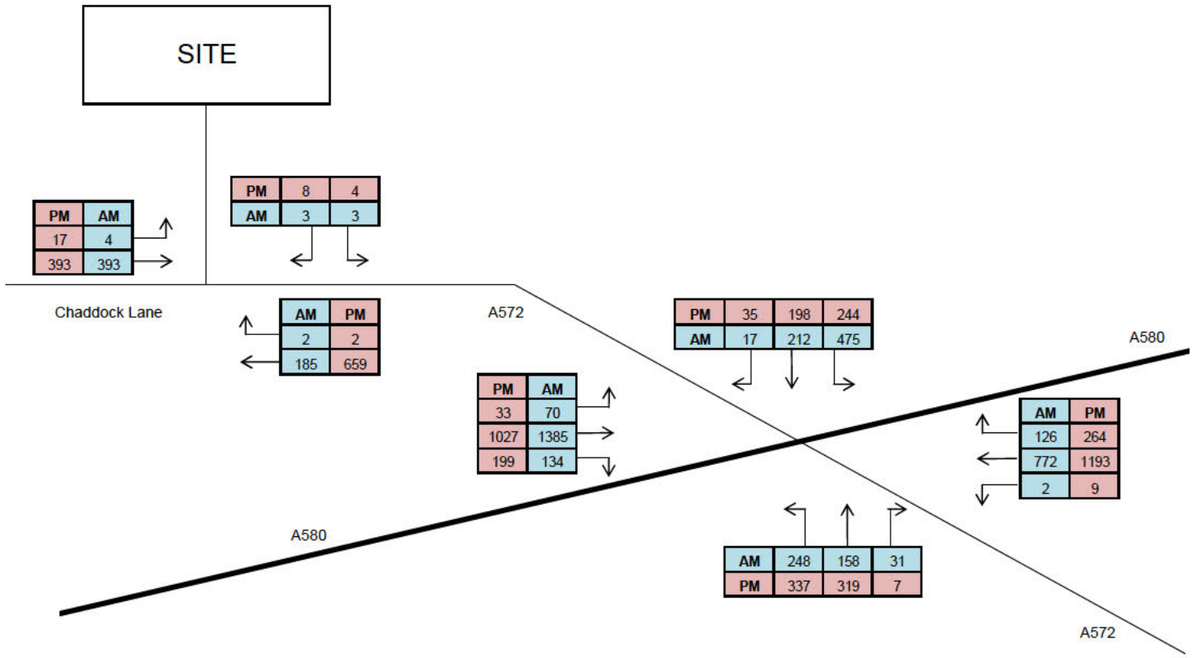
9.1.5 The sustainability assessment shows that the site is accessible by non-car modes. The ability to readily access wider destinations by walking, cycling, bus or rail provides a key advantage in providing a real alternative to car travel (e.g. for journeys to work) and as such promotes the aim of reducing car travel.

9.1.6 The assessments indicate that the vehicle impacts associated with the proposed B2 / B8 employment land uses would not lead to a severe impact to either the existing or the future forecast capacity on the local highway network.

9.1.7 Therefore, the traffic impact assessment shows that there is no detrimental traffic impact upon the existing highway network that would be considered severe.

9.1.8 NPPF (July 2021 - paragraph 111) states that:

> *"Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe."*



9.1.9 The traffic impact assessment shows that the proposed development would not have a “severe” impact on the local highway network.

9.2 Conclusion

9.2.1 Having undertaken a comprehensive analysis of the development site and after reviewing planning policies, it has been demonstrated by this TA that the proposed development accords with highway access design recommendations and sustainable values and hence there is no basis for highway and transportation objections to the proposals.

9.2.2 There are no highways or transport related reasons upon which a refusal of the planning application for the proposals would be justified.

CAUTION: This email originated from outside of Hydrock. Do not click links or open attachments unless you recognise the sender and know the content is safe.

Hi [redacted],

The committed developments are:

A/17/83702/OUTMES

Parr Bridge Works Mosley Common Road Tyldesley Manchester M29 8PR

Outline application for mixed use development comprising erection of up to 154 dwellings, three Class A1 units up to 2,169 sqm floor space, one Class D2 unit of 753 sqm, three Class A3 (cafes and restaurants) up to 1,144 sqm floor space, one children's day nursery (Class D1) and one life centre (GP Practice and ancillary services within D1) up to 1,255 sqm, together with associated landscaping and access.

A/17/84108/OUTMAJ

Land North Of Garrett Lane East Of Garrett Hall West Of Mosley Common Road And South Of The Guided Busway Tyldesley

Outline Application for residential development of up to 271 dwellings and associated landscape works; including provision of public open space (all matters reserved except for access)

A/17/84560/OUTMAJ

Land East Of Leigh Road South/West Of Bee Fold Lane

Outline planning application for the development of up to 830 dwellings with associated open space, road infrastructure and landscaping with all matters reserved, except for access from Leigh Road, Bee Fold Lane and Crab Tree Lane

A/20/88849/MAJOR

North Leigh Park Nel Pan Lane Leigh

Hybrid application for: 1. Full planning permission for the erection of 250 dwellings and a link road from Leigh Road to Atherleigh Way together with associated works including junction and highway works, internal access roads, car parking, landscaping, a substation and associated engineering operations (the total number of dwellings on the wider North Leigh Park strategic site will not exceed 1,800 dwellings); and, 2. Outline planning permission for a local centre A1, A2, A3, A4, A5 and/or D1 uses and other associated works seeking approval of access. All other matters reserved

The TRICS data is based on a small number of sites, but is seems OK. The selected junctions are acceptable based on TRICS. Nevertheless, it should be noted that TfGM will assess the submitted modelling and we will require a set of the modelling files for this purpose.

Regards,

[redacted]

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Morning [redacted]

Thanks for the email.

We look forward to receiving the information when you can.

Re the junctions we sent you a spreadsheet to review in my email sent on the 10th of May.

I have reattached the email for your ease of reference. On this we have presented the development trips and identified the following two way trips:

Table 5 – Proposed Development Vehicle Trip Impact

Proposed Development Trip Impact		
Junctions	Total 2-way Vehicle Trips – AM Peak	Total 2-way Vehicle Trips – PM Peak
Site Access / A572 Chaddock Lane	67	79
A572 Chaddock Lane / A580	33	37
A577 Mosley Common Road / A580	18	21
Higher Green Lane / A580	13	15

The above results, as shown on the attached the 'Proposed Dev Flows' figure, confirm that the only two junctions required for capacity assessments due to an excess of 30 vehicle trips are the following two junctions:

- Proposed Site Access / A572 Chaddock Lane; and
- A572 Chaddock Lane / A580 East Lancashire Road.

Given the evidence above, can you please confirm that the above two junctions are the only junctions required as part of our capacity assessments?

Many thanks

Kind regards

Morning [redacted],

I apologise for the delay, but I am struggling to get a list of the committed developments due to areas long history and cross boundary issues. However, I anticipate my colleague will have it later today.

The TP proposal and the proposed junction assessments are acceptable. However, if TRICS shows that if the proposal generates thirty or more additional two-way traffic movements through a junction, then we would expect that junction to be modelled in addition to the agreed ones.

Regards,

Hi [redacted]

The attached email does not answer our queries which were set out in my email dated the 10th May, which I attach for ease of reference.

To confirm this was asking for confirmation:

- on the junction assessments based on the data presented;
- committed development, I understood you were looking on your systems for this information; and
- you were going to liaise with colleagues on the travel plan scope and confirm if that was acceptable.

Many thanks

Kind regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Hope you are well.

Further to our ongoing discussions/recent pre-app regarding PLP's proposed development at Astley Business Park, we are having immense difficulty in getting the required information out of [redacted] to allow the Transport Assessment to progress and to also understand potential implications regarding S106 contributions.

As the email trail below suggests, numerous chaser emails have been sent without any response and looking at notes from the pre-app meeting (20/04), [redacted] confirmed that he would get back to Hydrock on all queries no later than close of play 25/04. We are now 3.5 weeks on and still await the response to allow the transport work to progress.

This delay is not only holding up the transport work, but is preventing the noise and air quality assessment work from progressing, which will clearly delay the submission of the application if it is not resolved ASAP. This in turn will create commercial pressures as the risk of delayed submission is heightened.

Please can you therefore chase [redacted] / someone in his team internally to provide the information requested ASAP.

I appreciate the Council is no doubt under resourcing constraints but we have been waiting an awful long time now and PLP has paid a not insignificant pre-application advice fee, therefore I trust you can assist us internally to break the deadlock.

Please can you confirm receipt and update me as soon as you have spoken with [redacted] / the highways team.

Kind regards

[redacted]

Importance: High

Afternoon [redacted],

I hope you are well.

Have you had any joy getting the committed development data that you were looking for?

Further to the above our previous correspondence, you stated:

"The proposed junctions are fine, but it should be noted that we would expect any junction that experiences 30 or more additional two-way trip to be modelled."

Given the above comment, we have undertaken a local highway traffic impact assessment for the proposed development trips, which we previously provided (for 100% B8 Land use for Robustness) and are summarised again in **Tables 1 & 2** below for ease.

Table 1 – Proposed Trip Rates

Land Use	Morning Peak 08:00-09:00			Evening Peak 17:00-18:00		
	Arrivals	Departures	Total	Arrivals	Departures	Total
B8 Total Vehicles	0.121	0.102	0.223	0.107	0.157	0.264
B8 HGVs	0.036	0.055	0.091	0.072	0.036	0.108

Table 2 – Proposed Trip Generation

Land Use	Msq	Morning Peak			Evening Peak		
		Arrivals	Departures	Total	Arrivals	Departures	Total
B8 Total Vehicles	30,000	36	31	67	32	47	79
B8 HGVs	30,000	11	17	27	22	11	33

The above resultant trip generation flows have then been distributed onto the local highway network, with light vehicles distributed via Journey To Work [JTW] Census data, and HGVs distributed via attractiveness to the Mainline Trunk Road Networks. These distribution splits are summarised in **Tables 3 & 4** below.

Table 3 – Proposed Lights Distribution (based on JTW Census Data)

Proposed Lights Distribution	
Routes	Percentage
A - Westbound: A572 Chaddock Lane > Manchester Road	42%
B - Westbound: A572 Chaddock Lane > Higher Green Lane > A580 (and M6)	20%
C - Eastbound: A572 Chaddock Lane > A572 Leigh Road (M60 or M61)	13%
D - Eastbound: A572 Chaddock Lane > A580 > A577 Mosley Common Road	9%
E - Eastbound: A572 Chaddock Lane > A580 (M60, M62 or A6)	17%
TOTAL	100%

Table 4 – Proposed HGV Distribution (based on attractiveness to Mainline Trunk Road Networks)

Proposed Lights Distribution	
Routes	Percentage
B - Westbound: A572 Chaddock Lane > Higher Green Lane > A580 (and M6)	70%
E - Eastbound: A572 Chaddock Lane > A580 (M60, M62 or A6)	30%
TOTAL	100%

Using the above Trip Generation figures (shown in **Table 2**) and the above distribution (**Tables 3 & 4**), the proposed development trips will have the following impact (shown below in **Table 5**) upon the surrounding junctions.

Table 5 – Proposed Development Vehicle Trip Impact

Proposed Development Trip Impact		
Junctions	Total 2-way Vehicle Trips – AM Peak	Total 2-way Vehicle Trips – PM Peak
Site Access / A572 Chaddock Lane	67	79
A572 Chaddock Lane / A580	33	37
A577 Mosley Common Road / A580	18	21
Higher Green Lane / A580	13	15

The above results, as shown on the attached the 'Proposed Dev Flows' figure, confirm that the only two junctions required for capacity assessments due to an excess of 30 vehicle trips are the following two junctions:

- Proposed Site Access / A572 Chaddock Lane; and

- A572 Chaddock Lane / A580 East Lancashire Road.

Given the evidence above, can you please confirm that the above two junctions are the only junctions required as part of our capacity assessments?

If you have any queries please do not hesitate to get in touch.

Many thanks

Kind regards

Morning [redacted]

The proposed junctions are fine, but it should be noted that we would expect any junction that experiences 30 or more additional two-way trip to be modelled.

I am having IT problems at the moment, but once they have been sorted I will chase the committed developments up.

Regards,

[redacted]

Morning[redacted],

Thank you for your email and confirmation of the trip rates.

Am I right to assume you are happy with the rest of the proposed scope i.e. junctions to be assessed?

I look forward to receiving the committed development information at your earliest convenience.

Many thanks

Kind regards

Afternoon [redacted],

I spoke to my college regarding the junction of Astley Park Way and Chaddock Lane. The adoption record is correct and this junction is subject to a Section 278 Agreement. However, the developer hasn't requested completion of the certification process for progression and adoption.

I hope to have the list of committed developments tomorrow and forward it onto you. Also, the trip rates seem fine.

Regards,

[redacted]

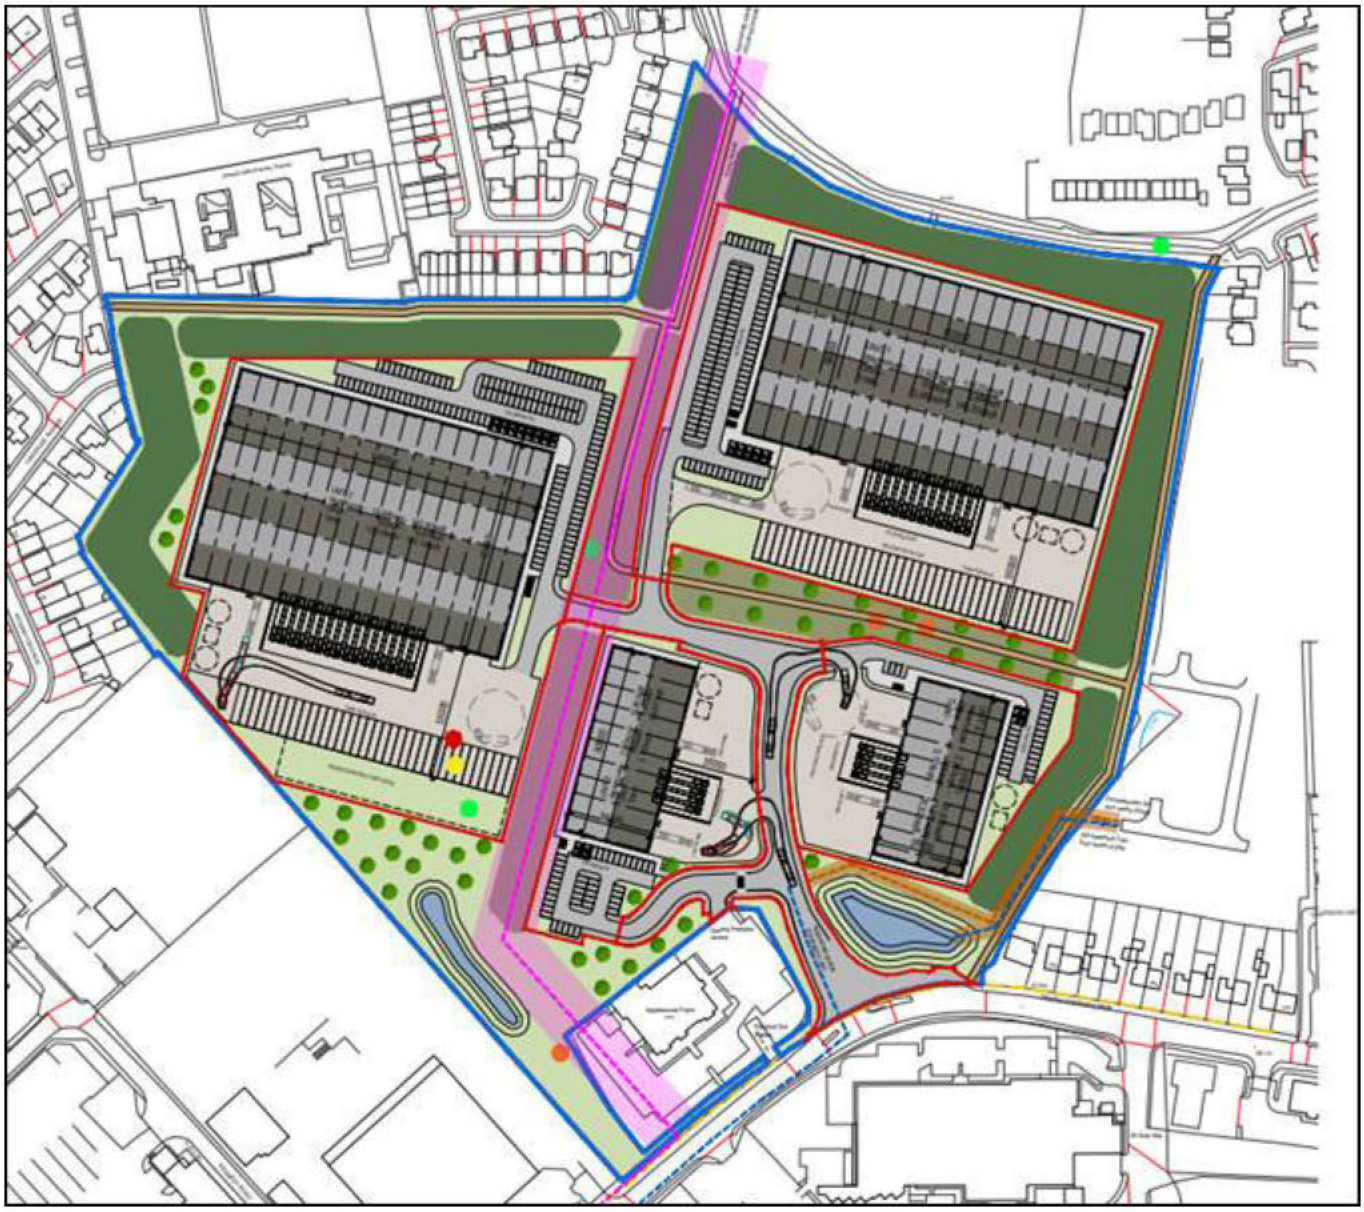
Importance: High

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click



Afternoon [redacted].

I hope you are well.

I am writing to you regarding a proposed employment lead development at Astley Business Park, Wigan.

This email is hoping to scope out a Transport Assessment and Framework Travel Plan for a proposed development of circa 33,000 sqm of B2/B8/ancillary B1 use across a number of units.

The site location and a provisional masterplan is presented below and as per the attached (please note this is subject to change).

The site benefited from a planning approval A/15/81365/OUTMAJ which granted the following:

Outline application for a mixed use development comprising up to 28,000 SQM of employment floor space (use classes B1, B2 and B8), up to 165 dwellings, land for community use, open space, landscaping and association infrastructure (all matters reserved except employment access from Chaddock Lane; residential access from Garrett Hall Road and Garrett Lane)

However its consent for the employment element has now lapsed.

As such the following sets out our envisaged scope of assessment.

Transport Assessment [TA]

- Comment on the background/ history of the site;
- Provide a full description of the local highway network;
- Consider local and national transport-related policy documentation;
- Consider any committed development within the area – **Can you confirm any developments you require us to take account of**;
- Undertake accident analysis on the local highway network;
- Undertake an assessment of the accessibility of the site by sustainable modes, to include an assessment of the bus, rail, cycling and pedestrian facilities surrounding the site;
- Review applicable car parking standards;
- Provide details of the development proposals and undertake a trip generation analysis. Backed on the previous site use and any extant lawfully permitted and proposed land use(s), we will derive the trip generation associated with the site during the weekday morning/evening peak hours;
- To determine the number of trips generated by the proposed use of the site, a trip generation exercise has been undertaken. The Trip Rate Information Computer System [TRICS] has been used to derive the people trip generation for the proposed development. The proposed trip rates are presented in Table 1 below, with the outputs attached for reference.

Table 1 – Proposed Trip Rates

Land Use	Morning Peak 08:00-09:00			Evening Peak 17:00-18:00		
	Arrivals	Departures	Total	Arrivals	Departures	Total
B2 Total Vehicles	0.162	0.042	0.204	0.02	0.161	0.181
B2 HGVs	0.013	0.013	0.026	0.004	0	0.004
B8 Total Vehicles	0.121	0.102	0.223	0.107	0.157	0.264
B8 HGVs	0.036	0.055	0.091	0.072	0.036	0.108

While the development is likely to be a mix of B2/B8 site it is proposed to base the assessment on 100% B8 land use. This approach was considered to be robust as this generates higher vehicle trip rates than B2 land use.

The above trip rates have been applied to the circa 30,000 sqm to determine the potential number of vehicle trips within the peak hours. The resultant trip generation is presented in Table 2.

Table 2 – Proposed Trip Generation

Land Use	Msq	Morning Peak			Evening Peak		
		Arrivals	Departures	Total	Arrivals	Departures	Total
B8 Total Vehicles	30,000	36	31	67	32	47	79
B8 HGVs	30,000	10	27	37	22	11	33

Based on the trips set out above to present a robust assessment the planning application will be supported by junction counts at the following junctions:

- A572 Chaddock Lane / Site Access
- A572 Chaddock Lane / A580 East Lancashire Rd
- A577 Mosley Common Rd / A580 East Lancashire Rd

Should modelling be warranted this would be undertaken in Junctions 9 and LINSIG where appropriate.

Framework Travel Plan [FTP]

- Consider the national and local transport-related policy documentation;
- Undertake an assessment of the accessibility of the site by sustainable modes, to include an assessment of bus, cycling and pedestrian facilities surrounding the site;
- Provide details of the development proposals;
- Identify a range of initiatives for inclusion within the travel plan, to encourage travel by more sustainable modes including car sharing, by public transport, bicycle and on foot, and to reduce the need to travel;
- Provide details of how the travel plan will be managed, outlining the role of the Travel Plan Coordinator and stakeholders;
- Outline the aim, objectives and targets for the travel plan;
- Provide an action plan and marketing strategy to support the implementation of the travel plan at the site; and
- Summarise all of the above within a framework travel plan report.

Based on the above, please could you confirm that the above approach is acceptable?

Many thanks for your assistance.

Kind regards

Places Directorate: Economy, Waste and Infrastructure
Memorandum

To: Development Management	**From:**	[redacted]
		Traffic Group
	Phone/Ext:	
Ref: [redacted]		
	Date:	16th January 2024

Application No: A/23/96226/MAJOR
Proposal: Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works
Location: Land At Astley Park Way Worsley
Grid Reference: E 370899 N 401108

Trip generation and forecasting: The application relates to the proposed development for a B2 / B8 land use development comprising a Gross Floor Area [GFA] of circa 32,825sqm across a number of units, situated at Astley Park Way off Chaddock Lane.

The trip rates have been previously agreed and are acceptable.

It should be noted that growth factors and the following committed developments were used in this TA. The committed developments are:

- A/17/84108/OUTMAJ - Land North Of Garrett Lane, East Of Garrett Hall, West Of Mosley Common Road, And South Of The Guided Busway Tyldesley.
- A/17/83702/OUTMES - Parr Bridge Works, Mosley Common Road, Tyldesley, Manchester M29 8PR.
- A/17/84560/OUTMAJ - Land East Of Leigh Road South/West Of Bee Fold Lane.
- A/20/88849/MAJOR - North Leigh Park Nel Pan Lane Leigh.

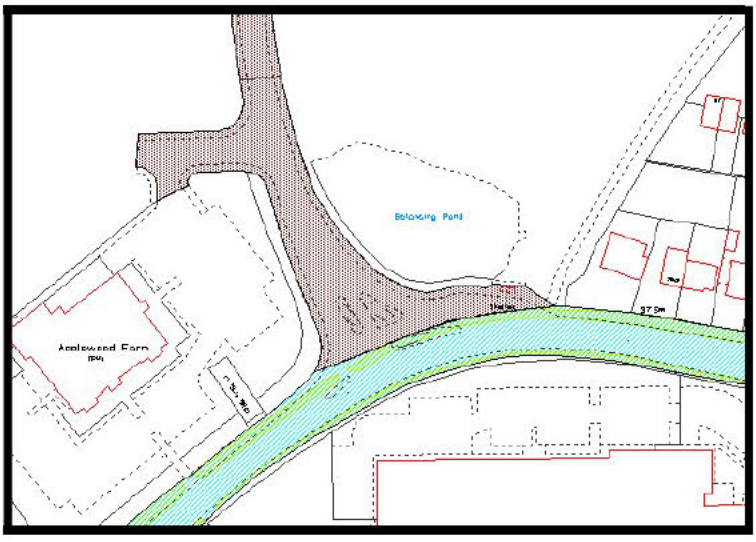
Local junctions / network impact: The following modelling concerns have been identified:

- In terms of trip distribution, it is not clear how each MSOA area has been allocated to a particular route.
- The study area needs to be extended to all junctions on the network experiencing an increase of 30vph or more. All junctions experiencing an increase of 30vph should be modelled.
- The lane widths used in the modelling for both junctions are too high. The modelling should be corrected and resubmitted.

Public transport and sustainable travel: The proposed development site is in a reasonably accessible location and is well located to make use of the existing public transport links and pedestrian / cycle routes.

Road safety: The causes of road traffic accidents are random and multifunctional, with each accident having several different reasons and trying to spot one overall contributing factor may not be possible. It is for this reason that Greater Manchester Police (GMP) will normally attend and record accidents that occur on the borough's highway network, where the accident results in an injury to persons. As a part of this process, they will record the details of the accident; and undertake an accident investigation to try and determine the contributory factors that may have caused the accident. The Council will analyse this data over a 5 year period to see if any trends can be identified. It should be noted that 'damage' only incidents will not appear on the accident database.

Details of damage only accidents are held by insurance companies and because of data protection, the Council cannot access this information. Without a detailed accident investigation being undertaken, any information given to the Council cannot be verified and must be regarded as hearsay.



The Police database was checked for the A572 Chaddock Lane, which included its junctions with Coach Road and the A580 East Lancashire Road. During the last five-year period for which data was available, fourteen accidents were recorded. All accidents were attributed to road user behaviour and two accidents involved vulnerable road users.

The following conclusions can be made regarding the accident data:

- An average of 2.8 accident a year have been made per year in the study area.
- No accidents have occurred at the site access.
- No accident cluster have been identified.
- No accident trends have been identified.

Public rights of way: The PRoW Officer should be consulted.

Adoption record: The drawing below shows the extent of the adopted highway, which is depicted in blue/green:

It should be noted that the existing access is still subject to the certification process for adoption.

Visibility: The proposal uses an existing access and the visibility splays comply with Manual for Streets.

Servicing: Based on Drawing No: 21714-HYD-XX-XX-DR-TP-1003, a large articulated vehicle can enter and leave the site in forward gear.

Layout: The site highways layout is acceptable.

Parking: The basic car park layouts will allow for the free flow of traffic and a vehicle can enter and leave a bay in one manoeuvre. However, there are no pedestrian facilities and there should be a footpath at the rear of the parking bays that connects into building entrances.

Cycle parking facilities will require a roof.

The applicant as offered no evidence that the proposed level of parking provision is suitable for the development site. The site should be self-sufficient in parking terms and not lead to inappropriate parking on the proposed highway network. This would raise concerns for highway safety and congestion.

Proposed mitigation measures: It is recommended that a contribution towards the upgrade and revalidation of MOVA at the junction of A580/Chaddock Lane is requested. TfGM anticipate that this would cost in the region of £15k. This would help to futureproof the development by mitigating any increased delay because of the increased traffic flows and changes in traffic patterns. Also, this would ensure that the network operates as efficiently as possible to ensure that congestion is minimised.

Conclusion on highways matters: No objections in principle, but the modelling concerns are addressed.

Hi [redacted]

If I send the Excel spreadsheet then I assume it'll get captured by your spam filter? I'll try sending the spreadsheet to you again (in a separate email) so you can bounce on to GMEU but if that fails, they'll have to review the PDF version of the Metric tool attached (and they'll have do zoom in on relevant pages to see the details).

Kind regards

Hi [redacted],

GMEU have advised that they cannot access the spreadsheet link as sent below. They have asked if you can email the spreadsheet itself (rather than a link).

Thanks

Subject: FW: A/23/96226/MAJOR - Land At Astley Park Way

Hi [redacted],

Do you need anything further on this one? If not, would you be able to advise on where the financial contribution could be directed? This will be going before Members in June so we need to include an explanation of BNG within our report.

Regards

[redacted]

Subject: RE: A/23/96226/MAJOR - Land At Astley Park Way

Hi [redacted],

Thanks for your email.

You're right, we're not asking for 10% on this application as it was not a requirement at the time of submission. The applicant needs to provide a net gain only.

[redacted]

Subject: RE: A/23/96226/MAJOR - Land At Astley Park Way

Hi [redacted]

For complete understanding, we are not asking for the 10% net gain (17 units) because this was not lawfully required at the time of submission - even though it is now mandatory?

Thanks

Subject: A/23/96226/MAJOR - Land At Astley Park Way

Development of warehousing units (Use Class B2/B8) - including ancillary integral office space (Use Class E g), installation of PV panels to each unit, with associated car parking and service yards, internal access roads, diversion of footpaths 014/145/10, 014/152/10, 014/154/10 and 014/159/10 and associated engineering, infrastructure and landscaping works.

Hi [redacted],

The above application may be coming before Members in March 2024 and there will be a short fall of BNG on site which will require financial contribution for off-site allocation. I have attached the BNG spreadsheet provided by the applicant.

There are still some questions about the exact level of loss on site but we're looking at around 11 units. GMEU haven't suggested a figure yet but [redacted] has asked if we can start looking at where this money could be spent as things are moving fast and we will need to provide some idea to Members as to its allocation.

I usually forget to provide you with something you need so please do let me know if you need anything else!

Regards

[redacted]

Hi [redacted]

Sorry to bother you again with this but [redacted] has asked for your help please.

We have previously identified that the proposed development will result in the loss of 10.95 units which needs to be off site by way of financial contributions. You have helpfully advised that the money could be spent at Bedford Colliery and Silk Street (see attached email). I'm pretty sure this is on top of what is being provided on site given what GMEU has advised.

I previously advised you that the applicant would have to provide net gain only, but [redacted] has confirmed that they should seek to provide a 10% net gain given the adoption of the PfE. The applicant is challenging this but in the interim [redacted] has asked:

If we're collecting money on the basis of spending it on Council land (on the basis the application came in before mandatory BNG and the land doesn't need to be formally registered – because no Council land is in respect of the latter), then between Martin and GMEU, we need to agree an ecological scheme that (with whatever they're putting on site) achieves 10% gain (that the applicant is in agreement with), then ask for a financial amount through a UU to implement such a scheme on Council land (no need to work out credits or units, just a scheme to get 10% and what that'll cost). This will need coordinating with [redacted], GMEU and the applicant – [redacted], in his emails, has identified Council sites, in my mind what can he do on that land to achieve 10% and how much will it cost?

I spoke to [redacted] earlier and she helpfully provided the email below whereby you have confirmed that each replacement unit should cost 20k and what the money will be spent on.

I need something similar for this application please which I use to defend our position to the applicant. I am meeting [redacted] and [redacted] tomorrow afternoon on this point and would welcome your advice beforehand if at all possible.

Thank you.

Subject: BNG - Bedford Colliery

Hi [redacted]

As discussed, I spoke with [redacted] this morning to confirm the policy position and his view is 10% net gain in line with PfE. If there is any scope they can include some on-site provision, this could lessen their off-site contribution but I appreciate time is tight for you.

In terms of off-site contributions to Bedford Collery, in respect of my site, [redacted] had advised the following:

I note that this request came in before statutory requirements but yes, considering the £20-25k estimates floating around for mandatory, I would suggest £20k per unit related to the actual work

needed for off-site mitigation and the management and ongoing monitoring/ maintenance of the interventions.

This was to be directed to Bedford Colliery, and with further breakdown of what specifically it was for full cost recovery, inclusive of management plan, legal and surveying fees, project management, fencing, grassland set up/planting, hay cutting, monitoring grassland quality, and inflation over 30 years.

Hope that helps.

Thanks

1 INTRODUCTION

1.1 BACKGROUND

1.1.1 This report provides an ecological assessment of the proposals to carry out development of a site adjacent to Astley Business Park in Astley, near Wigan in Greater Manchester (hereby referred to as "the site"). The assessment follows a guidance from CIEEM (2018[1]) and complies with recommendations in BS4202[2] and BS8683[3].

Site details

1.1.2 The Site (12.6 ha) is at the address Astley Park Way, Parr Bridge, Wigan, Greater Manchester, England, M28 1FJ, with a central grid reference SD 70827 01215. The wider area comprises of urban development with Bolton to the north, Wigan to the West, agricultural land to the south and Manchester to the east. The Site is bounded to the south by Chaddock Lane and Applewood Farm, a school to the north and residential properties from the east and west (see Figure 1).

1.2 PROPOSALS

1.2.1 The proposals are for the development of up to 32,825 sqm (353,343 sq ft) B2/B8 floorspace (including ancillary integral office space (Use Class E(g)) with associated car parking and service yard; new internal access road; diversion of existing Public Rights of Way; and, associated engineering, infrastructure and landscaping. A proposals layout is in Figure 2 and the landscape scheme in Figure 3 and Figure 4.

1.3 REGULATORY FRAMEWORK

Legislation

1.3.1 This report has been prepared taking relevant statutory instruments into account; including domestic legislation such as Acts of Parliament, and Regulations to comply with European Directives. This is described in full in 6.1, and in summary as follows:

- The Environment Act 2021
- The Conservation of Habitats and Species Regulations 2017 (as amended)
- Wildlife and Countryside Act 1981 (as amended)
- Protection of Badgers Act 1992
- Countryside and Rights of Way (CRoW) Act 2000
- Natural Environment and Rural Communities (NERC) Act 2006
- ODPM Circular 06/2005 Biodiversity and Geological conservation (withdrawn March 2014, but report remains compliant)

Priority Species

1.3.2 As well as species and habitats formerly protected through statute, this assessment will consider 'Habitats and Species of Principal Importance', otherwise referred to as 'Priority Habitats and Species', if present. In accordance with obligations set out in Section 40 of the NERC Act 2006, the planning authority refers to these habitats and species as material considerations, which are defined in a List through Section 41 of the Act.

National Planning Policy Framework (NPPF)

1.3.3 National policy for nature conservation is determined through the NPPF 2012[4] (updated 2021) and with respect to wildlife supersedes Planning Policy Statement 9 (PPS 9). The tools for species protection are still fully present since NPPF policy does not alter statutory legal requirements.

[4] **Ministry of Housing, Communities & Local Government 2012** National Planning Policy Framework (updated July 2021 edition). London. ISBN 978-1-5286-1033-9

Habitats and biodiversity

1.3.4 These are provided for in paras 174 – 182. In particular:

- Protection and enhancement of biodiversity (para 179)
- Local Planning Authority principles (para 180)
- Site protection (para 181)

Biodiversity Net Gain

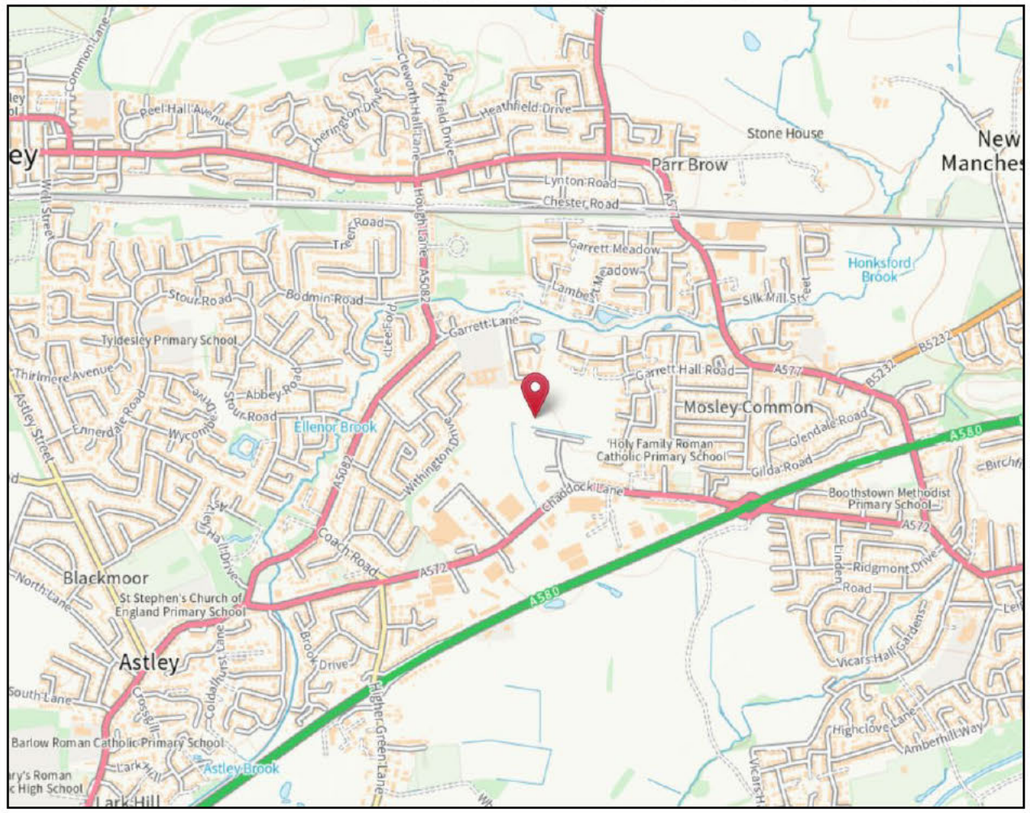
1.3.5 Within Part 6: Nature and Biodiversity of the Environment Act 2021, section 98, entitled "Biodiversity gain as condition of planning permission" states that "Schedule 14 makes provision for biodiversity gain to be a condition of planning permission in England"'. Part 1 of Schedule 14 contains the requirement for biodiversity net gain, as detailed below.

Biodiversity gain objective

1.3.6 The principles of Net Gain are enshrined in the NPPF para 179 (b), "…*identify and pursue opportunities for securing measurable net gains for biodiversity*." The biodiversity gain objective is met in relation to development for which planning permission is granted if the biodiversity value attributable to the development exceeds the pre-development biodiversity value of the onsite habitat by at least the relevant percentage that is specified in local planning policy[5]. DEFRA has produced a Metric tool to measure the biodiversity losses and gains that result from development projects, updated in 2023 to v4.0 (Natural England 2023[6]). Local requirements are discussed in 3.4.

UK Biodiversity Policy

1.3.7 There is a 'Biodiversity Duty' for local authorities set out in the NERC Act 2006 Sections 40 and 41, guiding national policy for priority habitats and species



[5] The Environment Act was passed in 2021 and it requires a 10% net gain from new development, but only once the Sec of State issues secondary legislation to implement that part of the Act.

[6] **Natural England 2023**. Biodiversity metric 4.0: Auditing and accounting for biodiversity – User Guide. Natural England Joint Publication JP039. ISBN: 978-1-7393362-1-9. First published March 2023.

(i.e., the S41 List), and importantly linking these to both the National Biodiversity Action Plan for the UK and local Biodiversity Action Plans (BAPs).

1.3.8 The UK BAP describes the UK's biological resources and commits a detailed plan for the protection of these resources. Although not statutorily binding, nonetheless it provides policy direction at a national, regional and local scale. It currently has 391 Species Action Plans, 45 Habitat Action Plans and 162 Local Biodiversity Action Plans with targeted actions. This list, a result of the most comprehensive analysis ever undertaken in the UK, contains 1149 species and 65 habitats that have been listed as priorities for conservation action.

2 METHODS

2.1 DESKTOP

2.1.1 A desk study was carried out by The Environment Partnership (TEP 2021)[7] in 2021 collecting records from the Greater Manchester Ecology Unit (GMEU) and the results are summarised here. The Area of Search (AoS) was within 2km of the Site. The GMEU also provided records for non-statutory sites (Sites of Importance for Nature Conservation [SINCS]).

2.1.2 The Department of the Environment and Rural Affairs (DEFRA) Map and Geographic Information Centre (MAGIC) website[8] was searched for information on:

- Statutory designated wildlife sites of international importance within 10km of the Site
- Statutory designated wildlife sites of national importance within 5km of the Site
- Statutory designated wildlife sites of local importance within 2km
- Relevant European Protected Species licensing data in a 2km AoS
- Distribution of Priority Habitats in a 2km AoS

2.1.3 Planning policies with respect to the Biodiversity of the Site have been reviewed so that recommendations comply.

2.2 FIELDWORK

Phase I Habitat Survey

2.2.1 An initial site visit was carried out by The Environment Partnership on 29th June 2021. The Ecology Practice verified and expanded upon the Phase I survey on the 1st June 2022. The 2022 survey was carried out by [redacted] BSc, MCIEEM, an experienced botanist and Senior Ecologist. The survey involved identifying and mapping the dominant habitat types following the

[7] **The Environment Partnership 2021** Preliminary Ecological Assessment. Report Ref: 8908.002. August 2021. Consultant report to PLP Investments (North) Ltd.
[8] https://magic.defra.gov.uk/ (website accessed 03/07/23)

Phase I habitat survey methodology recommended by Natural England (JNCC 2010[9]). Dominant plant species were noted (including aliens), as were any uncommon species or species indicative of habitat types, but not all species would have been visible and there was no attempt to compile exhaustive species lists.

2.2.2 During this field survey, attention was paid to habitats and features that may provide opportunities for protected species to be present at other times of year and thus inform the recommendations for further survey where appropriate. For example, the survey included at least 30m from the boundary to ensure badgers will not be affected, employing method as set by Cresswell et al 1990[10].

Invasive plants

2.2.3 On the 9th June 2022 an invasive species survey was carried out as a result of the findings of the Phase I survey. This survey specifically looked at the distribution of giant hogweed, although other species were recorded if present.

Bats

2.2.4 A Ground Level Tree Survey (GLTA) was carried out in 2021 and reported in TEP 2021[7]. This was verified by field investigation in 2022 by licensed bat worker [redacted], following guidance provided by Collins 2016[11].

2.2.5 Bat activity was investigated by use of transects as defined in the guidance provided by Collins 2016[11].

2.2.6 Following the GLTA, trees were climbed using appropriate methods to access and inspect PRFs using a torch and endoscope, according to Andrews 2018[12] as follows:

[9] **Joint Nature Conservation Committee 2010** Handbook for Phase I habitat survey: a technique for environmental audit. JNCC, Peterborough.

[10] **Cresswell, P., Harris, S. and Jefferies, D.J. 1990.** The history, distribution, status and habitat requirements of the badger in Britain. NCC, Peterborough. ISBN 0-86139-651-0.

[11] **Collins, J. (ed.) (2016)** Bat Surveys for Professional Ecologists: Good Practice Guidelines. 3rd Edition. The Bat Conservation Trust, London. ISBN 13978-1-872745-96-1.

[12] **Andrews, H. 2018.** Bat Roosts in Trees: A guide to identification and assessment for tree-care and ecology Professionals, 1st Edition. Pelagic Publishing.

i Teams of surveyors were led by a Natural England Level 2 licenced surveyor with other experienced climbers, using roped access to PRFs.

ii All visits were separated by at least two weeks apart with surveys conducted during the optimal bat activity period of May to August in line with Collins 2016.

iii PRFs could also be additionally identified during this aerial survey to then also be inspected during the aerial survey

iv Each endoscope utilised had motion camera and capture capabilities to record evidence of bats.

v Each tree was surveyed according to GLTA grade. i.e.

a) High roost potential was subject to three individual roped access surveys

b) Moderate roost potential was subject to two individual roped access surveys

c) Low roost potential did not require an endoscope survey and was only required to be soft felled in accordance with Collins 2016.

2.2.7 The aerial technique above is a non-standard method. The method is pragmatic and brings a number of strengths to the data that nocturnal surveys are limited to, particularly in sites with a deep canopy that would limit visibility:

i Nocturnal surveys specified by Collins 2016 are weak in identifying field signs within the features as they cannot be identified during a nocturnal survey.

ii Often nocturnal surveys of trees are limited as a result of tree canopy and clutter leading to low incidence of recording bats and / or specific roost site location during low light conditions.

iii The nocturnal survey method is limited to identification of the species exiting the roost, since if there are other bats flying or a bat leaves/returns to the feature without calling it is likely that it will not be identified.

iv The survey method of nocturnal surveys is also labour intensive in terms of survey particularly with the number of trees on large sites.

v Other strengths of this type of survey include confidence in a negative result for the series of visits to that tree thereby demonstrating where the colony "is not" as well as where "it is".

vi This method also identifies presence of competitors as well as unsuitable features that can be downgraded due to the close inspection.

2.2.8 If aerial surveys were not possible due to limited access to the feature or health and safety issues with climbing the tree, a nocturnal survey was undertaken using the methods as identified by Collins 2016.

Breeding birds

2.2.9 The Site was visited during early May and a second time in early June to make an assessment of breeding birds across the Site, following guidance provided in Gilbert et al 2011[13].

Great Crested Newt

2.2.10 An eDNA survey was carried out in 2021, reported by TEP 2021[7]. Conditions were verified in 2022 during all survey visits. As District Level Licensing was elected as the method of mitigating impacts to GCN, no further survey was necessary (Biggs et al 2014[14]).

Others

2.2.11 Reptiles, otters and water vole were discounted by the 2021 preliminary ecological appraisal as reported in TEP 2021[7]. The various surveys in 2022 confirmed that conditions had not changed, and the habitats continue to be unsuitable to support populations of these species.

[13] **Gilbert, G., Gibbons, D. W. and Evans, J. 2011** Bird Monitoring Methods: a manual of techniques for key UK species. RSPB, Sandy, Bedfordshire, ISBN 13 978-1-907807-22-0.

[14] **Biggs J, Ewald N, Valentini A, Gaboriaud C, Griffiths RA, Foster J, Wilkinson J, Arnett A, Williams P and Dunn F 2014.** Analytical and methodological development for improved surveillance of the Great Crested Newt. Appendix 5. Technical advice note for field and laboratory sampling of great crested newt (*Triturus cristatus*) environmental DNA. Freshwater Habitats Trust, Oxford.

2.3 SURVEY CONSTRAINTS

2.3.1 Other surveyors within the planning team had equipment stolen from the Site and were confronted by members of the public displaying intimidating behaviour. Therefore, the bat static detector was not set out for the second transect survey and the surveyors were accompanied by security to conduct the transects at night.

2.3.2 Further, it was agreed with the GMEU that there would be no requirement for an autumn transect when submitting for planning given the data during spring and summer, while the project was temporarily put on hold (see 6.5).

3 DESKTOP RESULTS

3.1 DESIGNATED SITES

Statutory Sites

3.1.1 There are no statutory designations within 2km of the Site. Within 5km:

i There is one internationally designated site, Manchester Mosses (Figure 5 which is a Special Area of Conservation (SAC) lying c.4km south of the Site. Manchester Mosses Conservation Objectives and Supplementary advice are available from Natural England[15]. In summary the SAC designation is to protect remnant degraded raised bogs still capable of natural regeneration and as such the SAC will not be affected.

ii The Site lies within 5km of Astley and Bedford Mosses Site of Special Scientific Interest (SSSI), which underpins the SAC designation. The SSSI features include its wintering bird assemblage. The SSSI will not be affected by the proposals.

iii There are 3 Local Nature Reserves that are at c.4km from the Site and will therefore not be affected.

iv The Site falls within a Natural England Impact Risk Zone (IRZ) for Manchester Mosses and Astley and Bedford Mosses requiring the LPA to consult NE for all planning applications.

Non-Statutory Sites

3.1.2 There are six non-statutory designated sites within 2km of the Site refer to Figure 6.

3.1.3 All sites lie beyond large urban areas from the site and will therefore not be affected.

[15] http://publications.naturalengland.org.uk/publication/5283870555504640

Table 2: Non-statutory Sites

Name	Features for Designation	Status	Distance
Damhouse Wood	Plantation woodland habitats.	SBI	0.8 km
Ponds North of Cleworth Hall	Pond habitats and their populations of amphibians and aquatic invertebrates.	SBI	1 km
Ponds near New Manchester	Woodland, grassland, and pond habitats and their populations of amphibians.	SBI	1.4 km
Marsh at Lower Green	Swamp, reed beds, open water habitats and amphibians.	SBI	1.7 km
Ponds North of Cleworth	Pond habitats and amphibians	SBI	1.7 km
Brickfield wood	Woodland habitats	SBI	1.9 km

3.2 SPECIES

3.2.1 TEP 2021 reported 557 records of protected and notable species within 2km of the Site. They provide detail, but the key points for assessment are:

i There are numerous records of pipistrelle bat adjacent to the southern Site boundary.

ii There are no records of GCN within contiguous habitat of the Site.

iii There are a number of records of red- and amber-listed breeding birds of conservation concern and priority breeding birds on and adjacent to the Site.

iv There are records of badger, but these are >1km southeast of the Site, beyond main roads.

v There are several records of hedgehog <1km from the Site, again beyond a main road.

3.2.2 A review of EPS licenses awarded up to January 2022 shows that here have been no licenses awarded on or adjacent to the Site, the nearest being a bat licence c.2.5km from the Site. The nearest GCN licence awarded is 2.9km north (refer to Figure 7).

3.3 HABITATS

3.3.1 The data search and DEFRA maps show no notable, or priority habitats are present within or adjacent to the Site. However, priority habitat was found on site during the fieldwork, as detailed in 4.1.

3.4 LOCAL PLANNING POLICY

3.4.1 The planning authority is Wigan Council, who have adopted their Local Plan Core Strategy since September 2013. There is no allocation to the Site and adjacent land for biodiversity purpose, the key policy for biodiversity is CP12 Wildlife and Habitats.

3.4.2 The Policy states:

We will help wildlife to prosper and safeguard important geological features by:

1. *Protecting our Special Area of Conservation at Manchester Mosses (and other internationally designated sites outside of the borough) and European protected species in accordance with legislation.*
2. *Protecting and enhancing our Sites of Special Scientific Interest and Species of Principal Importance in England in accordance with legislation and national planning policy as applicable.*
3. *Protecting our Sites of Biological Importance and regionally important geological sites from development that would adversely affect the integrity of a site, unless there is an overriding public interest, and encouraging active management to maintain and enhance sites.*
4. *Protecting, maintaining and promoting the active management of our Local Nature Reserves.*
5. *Protecting and enhancing regional and local priority habitats and species and other features of value to wildlife ensuring, as far as practicable, that habitats are part of linked networks and not fragmented.*

6. *Requiring reasonable provision to be made for wildlife habitats and features beneficial to geological conservation as part of new development*
7. *Taking account of the impact of climate change in the enhancement of existing and the creation of new wildlife habitats.*
8. *Enabling more people to appreciate, enjoy and learn about wildlife and geo-diversity in the borough, particularly within Greenheart."*

4 FIELDWORK

4.1 PHASE I HABITAT SURVEY (2022)

Site Summary

4.1.1 The Site (c.12.6ha) is dominated by semi-improved grassland, with neutral grassland, species-poor hedgerows, (attenuation) ponds, and scrub. It is surrounded by developed habitat/urbanisation within all directions. The most valuable ecology resource on site is the neutral grassland habitat, which contains upwards of 300 orchids among several other species. The hedgerows on site, while a valuable resource, are all species-poor and non-important (but Priority Habitat). However, the semi-improved grassland is generally of low ecological value and species-poor, dominating over 50% over the area. Historically the Site has been used for agricultural purposes to as recent as 2009 or later.

A Woodland and Scrub

A2.1 Dense scrub

4.1.2 Dense scrub is a dominant habitat feature (totalling c.1.13ha) to the southern and eastern portion of the Site (e.g., TN6), generally characterised by bramble with small shrubs (hawthorn, silver birch etc). A dense stand is present at TN6 which is comprised of alder and goat willow, among other species, below 5m in height. The dense scrub habitats are frequently interspersed with tall ruderal species.

A3.1 Scattered trees

4.1.3 A single group of scattered trees (c.0.02ha) is present on Site along the north-western boundary (TN9). The group comprises of silver birch, beech, poplar and cherry. The trees do not offer any bat roost opportunity.

B Grassland

B6 Poor semi-improved grassland

4.1.4 The Site is dominated by poor semi-improved grassland (totalling c.7.88ha) within three distinct fields to the northern and western areas. The grasslands are generally dominated by Yorkshire fog, red fescue, false oat grass, and perennial ryegrass, although rough meadow-grass, meadow foxtail grass, and soft brome are present. There is a lack of flowering plants throughout, with species typical of agricultural improvement/nutrient input present such as nettle, broadleaved dock, creeping thistle, and cleavers, among others. The sward height was tall, being rank throughout.

B2.2 Semi-improved neutral grassland

4.1.5 Towards the south-eastern portion of the Site is an area of semi-improved grassland (c.1.87ha) (TN1). This grassland is a valuable ecological resource in terms of its botanical value and is a borderline grassland between unimproved and semi-improved. Based on aerial imagery, the habitat was under agricultural management as recent as 2009 (if not more recently), and as such is unlikely to be classified as an unimproved grassland. It is likely that the topsoil was stripped at some point in recent years, producing a nutrient-poor soil which is of benefit to flowering plants. There are in excess of 300 orchids throughout the habitat, dominated by southern marsh orchid, with early marsh orchid, and hybrid *Dactylorhiza* species. There are a range of sedges, including pendulous sedge, hairy sedge, and glaucous sedge, which are often dominant alongside rushes within the habitat mosaic. Flowering plants are dense throughout, dominated by red clover, vetches, and black medick, among others. Species-richness is mixed across the area with an estimated average of 12-15 per m^2.

C Tall herb and fern

C1.1 Continuous bracken

4.1.6 A small strip (c.0.04ha) of continuous bracken is present near the northern boundary, succumbing to bramble scrub.

C3.1 Tall ruderal

4.1.7 Tall ruderal (e.g., TN10) is present throughout the Site (totalling c.0.57ha), generally along hedgerows, field edges and previously disturbed ground. Tall ruderal is dominated by nettle, willowherbs, creeping thistle, docks, common hogweed, cow parsley, among others.

G Open Water

G1 Open water (pond/attenuation)

4.1.8 The pond habitats remain as described in TEP 2021[7] and total c.0.11ha; two waterbodies are present on site (TNs 3 & 4), with one further dry feature (TN2). To the east of the new access road, a waterbody was created in 2021 (TN4). The northern, eastern, and western banks are colonised by semi-improved grassland species with an abundance of Yorkshire fog and meadow foxtail, and occasional red clover, rough meadow-grass, and rushes. The pond was holding water at the time of survey, albeit quite shallow, notably to the eastern end. Some aquatic vegetation is present within the pond, although this is limited in area.

4.1.9 The waterbody to the west of the Site was created between 2009-13 (TN3). Vegetation within the pond includes greater reedmace and pondweed covering c.30% of the pond area. The banks comprise Yorkshire fog, meadow buttercup, sedges, and marsh orchids, amongst other species (as per the neutral grassland description). Scattered willow scrub is abundant, with occasional young silver birch and oak trees of an immature age class.

J Miscellaneous

J1.2 Amenity grassland

4.1.10 A small area of amenity grassland (c.0.02ha) is present to the southern portion of the Site, adjacent to the hardstanding access. The grassland is heavily managed (mown) and limited in species diversity.

J2.2 Species-poor intact hedgerow

4.1.11 A total of seven hedgerows are present across the Site, all of which are native and species-poor. The hedgerows were subject to a Hedgerow Evaluation and Grading System (HEGS) assessment with details of all hedgerows provided in Table 5. None of the hedgerows are classed as 'important', yet they are of ecological value and are each considered a priority habitat. Their distribution throughout the Site is shown in Figure 9.

J4 Bare ground / sealed surface

4.1.12 Bare ground totals c. 0.96ha across the Site. A tarmacadam road extends into the Site from the south. A compacted crushed-stone path is present along the eastern and northern boundaries.

Habitat Conformity to Other categories

International Qualifying Features

4.1.13 N/A.

Priority Habitats

4.1.14 The hedgerows on Site are classed as priority habitat.

Others

4.1.15 All ditches continue to be dry and without wetland vegetation, not representing ditch habitat, consistent with the description in TEP 2021[7].

4.1.16 The Phase I collected evidence of other species of note, as follows:

i A stand of giant hogweed (Schedule 9, Part II, WCA) was identified at TN14, with two plants observed. A survey was carried out of the entire site separate to the Phase I on 9th June 2022, and confirmed these are the only plants present (refer to Figure 10).

ii No evidence of protected or notable species was observed during the survey, although there is suitability for priority species hedgehog to be present.

iii No signs of badger were observed on Site, although the Site remains suitable for their presence.

iv There continues to be no suitability for otters, reptiles or water voles as described in TEP 2021.

Table 3: Target notes and descriptions

TN	Description
1	Semi-improved neutral grassland of 'good' condition. In excess of 30 orchids throughout the area dominated by southern marsh orchids, with early marsh orchids and hybrids. The grassland contains an abundance of sedges and is rich in flowering plants (notably red clover). This habitat is the best ecological resource on site.
2	A depression within the grassland which has previously likely formed a shallow pond. Dry at the time of survey.
3	Well-established pond with greater reedmace and pondweed.
4	Newly created pond with low coverage of aquatic vegetation. Pond drying to the eastern extent.
5	Previously disturbed ground by machinery with bare exposed earth.
6	Dense scrub with low growing trees (below 5m), dominated by alder with much tall ruderal present, notably at the scrub edges.
7	Sycamore tree offering 'moderate' bat roost potential (2021).
8	Ash tree offering 'moderate' bat roost potential (2021).
9	Small group of trees with silver birch, polar, and cherry. Trees are located on and offsite. No bat roost potential observed within trees.
10	Dense area of tall ruderal, dominated by nettle, with creeping thistle, bracken, broadleaved dock, and Yorkshire fog.
11	c.10 southern marsh orchids at scrub edges. A small covering of common reed.
12	Oak tree offering 'moderate' bat roost potential (2021).

TN	Description
13	Sycamore tree preciously graded as 'high' downgraded to 'low' bat roost potential in 2022. A second sycamore nearby graded as 'low' in 2021.
14	Two plants of giant hogweed, a Sch 9 invasive species.

Table 4: Species list

Common name	Latin name
Yorkshire fog	*Holcus lanatus*
Meadow foxtail	*Alopecurus pratensis*
Rough meadow-grass	*Poa trivialis*
Red fescue	*Festuca rubra*
False oat grass	*Arrhenatherum eliatus*
Crested dog's-tail	*Cynosurus cristatus*
Cock's-foot grass	*Dactylis glomerata*
Sweet vernal	*Anthoxanthum odoratum*
Pendulous sedge	*Carex pendula*
Glaucous sedge	*Carex flacca*
Hairy sedge	*Carex hirta*
Sedge species	*Carex sp*
Southern marsh orchid	*Dactylorhiza praetermissa*
Early marsh orchid	*Dactlyorhiza incarnata*
Marsh orchid species	*Dactylorhiza spp*
Black medick	*Medicago lupulina*
Colt'sfoot	*Tussilago farfara*
Compact rush	*Juncus conglomerata*
Soft rush	*Juncus effusus*
Creeping bent	*Agrostis stolonifera*
Soft brome	*Bromus hordeaceus*
Common daisy	*Bellis perennis*
Creeping buttercup	*Ranunculus repens*
Dandelion	*Taraxacum officinale agg.*
Common chickweed	*Stellaria media*
White clover	*Trifolium repens*

Common name	Latin name
Red clover	*Trifolium pratense*
Bush vetch	*Vicia sepium*
Meadow buttercup	*Ranunculus acris*
Marsh thistle	*Cirsium palustre*
Common ragwort	*Jacobaea vulgaris*
Ribwort plantain	*Plantago lanceolata*
Beaked hawk'sbeard	*Crepis vesicaria*
Common sorrel	*Rumex acetosa*
Creeping cinquefoil	*Potentilla simplex*
Cuckooflower	*Cardamine pratensis*
Hairy sedge	*Carex hirta*
Creeping thistle	*Cirsium arvense*
Fleabane	*Pulicaria dysenterica*
Common nettle	*Urtica diocia*
Groundsel	*Senecio vulgaris*
Cleavers	*Galium aparine*
Broadleaved dock	*Rumex obtusifolius*
Curled dock	*Rumex crispus*
Bramble	*Rubus fruticosus agg.*
Goat willow	*Salix capraea*
Elder	*Sambucus nigra*
Hawthorn	*Crataegus monogyna*
Ash	*Fraxinus excelsior*
Silver birch	*Betula pendula*
Osier willow	*Salix viminalis*
Alder	*Alnus glutinosa*
Sycamore	*Acer pseudoplatanus*
Hazel	*Corylus avellana*
Poplar	*Populus spp.*
Cherry species	*Prunus spp*
Beech	*Fagus sylvatica*
Blackthorn	*Prunus spinosa*
English oak	*Quercus robur*
Hedge bindweed	*Calystegia sepium*

Common name	Latin name
Bittersweet	*Solanum dulcamara*
Prickly sow-thistle	*Sonchus asper*
Bugle	*Ajuga reptans*
Fox glove	*Digitalis purpurea*
Dog rose	*Rosa canina*
Giant hogweed	*Heracleum mantegazzianum*
Common hogweed	*Heracleum sphondylium*
Greater reedmace	*Typha latifolia*
Bracken	*Pteridium aquilinum*
Rosebay willowherb	*Chamaenerion angustifolium*
Pale persicaria	*Persicaria lapathifolia*
Common reed	*Phragmites australis*
Field horsetail	*Equisetum arvense*
Cow parsley	*Anthriscus sylvestris*
Herb robert	*Geranium robertianum*
Pondweed species	*Potamogeton spp.*

Table 5: Hedgerow (HR) descriptions and HEGS assessment

HR	Av. Sp / 30m	HEGS score	Important (Y/N)	HR length (m)	Notes / Species
1	3	-3 moderate	N	151	HR along northern boundary, unmanaged with semi-improved grassland to south and hardstanding path to the north. Species: hawthorn, blackthorn, holly, ash
2	1	3 moderate	N	210	Hawthorn dominant. Running north to south in the north of the Site. The hedgerow is unmanaged with semi-improved grassland to either side. Species: hawthorn, elm.
3a	3	-3 moderate	N	400	To the western extent, the HR becomes gappy and is dominated by hawthorn. To the eastern portion, the hedgerow runs partially parallel to HR3b. The hedgerow is unmanaged and mostly surrounded by semi-improved grassland habitat with a short strip of tall ruderal. Two trees of moderate bat roost potential are located within the HR. Species: Hawthorn, elder, sycamore, hazel pedunculate oak, ash.
3b	3	-3 moderate	N	164	HR running parallel to HR3a. Species: Hawthorn, elder, hazel
4	3	3 moderate	N	118	Dominated by hawthorn with other occasional woody species present, largely extending as scrub at the HR base. Species-poor grassland to west, neutral grassland to the east, of greater importance. Species: hawthorn, blackthorn, willow, sycamore, alder, ash, oak.
5	1	4 low	N	50	Species-poor HR dominated by hawthorn. HR connecting to tree group, which extends offsite to the north. Scrub and tall ruderal at base of hedgerow extending to species-poor grassland. Species: hawthorn.
6	1	4 low	N	100	HR along south-eastern boundary. Hawthorn dominant with residential and development to east and hardstanding path to west. HR contains tall ruderal at base. Species: Hawthorn, elder.
7	1	4 low	N	153	Part HR along northern boundary and dominated by hawthorn. Unmanaged with tall ruderal at the base. Residential development to the north. Species: Hawthorn, elder.

4.2 AMPHIBIANS

Great Crested Newt

4.2.1 Great crested newts were recorded in the initial data trawl within 2 km of the Site. There are three waterbodies on site and four waterbodies within a 500m of the Site as identified on Ordnance Survey mapping. Pond P2 was dry in 2021 and continued to be dry in all visits in 2022.

4.2.2 A Habitat Suitability Index assessment and eDNA survey was carried out in 2021. The results of the eDNA survey in 2021 showed one positive result from the six remaining ponds that were tested, as shown here in Table 6.

Table 6: 2021 GCN Assessment

Pond Ref	HSI Category	eDNA Survey
P1	Excellent	Absent
P2	Dry	
P3	Average	Absent
P4	Below Average	Absent
P5	Below Average	Absent
P6	Poor	Present

4.3 BATS

Bat Activity Survey

4.3.1 In accordance with Collins 2016[11] the habitat has been graded as low given the urbanised environment and the low connectivity to the wider area. This is consistent with TEP 2021[7].

4.3.2 Two bat activity surveys were undertaken in the form of walked transects and static detector surveys. The transect surveys were completed on 25th May 2022 and 19th September by two experienced surveyors in suitable conditions with no constraints. It was agreed with the local planning authority that the autumn survey was not required due to the low number of bats recorded during the first two surveys (see 6.5).

4.3.3 A static detector was left in situ for 7 days from the 25th May 2022, located in an area estimated to be the most suitable for bat activity (see Figure 12) Following this survey there were reports of other planning team surveyors having equipment stolen from the Site, therefore the static detector was not set out for the remaining surveys and the surveyors were accompanied by security to conduct the transects at night.

Transect surveys

4.3.4 The survey parameters are detailed in Table 7. The surveys found low evidence of bats within the Site boundary with most bats recorded in the western portion of the Site, associated with Hedgerows 3a and 4. Activity levels and the overall number of bat calls recorded (either commuting or foraging) were similar for both surveys.

4.3.5 Only common pipistrelle and soprano pipistrelle were recorded commuting across the site during the transects with common pipistrelle being the most frequently recorded. Bat activity was closely associated with hedgerows (predominantly H3a and H4) and associated trees. No recordings of bats were obtained within the eastern portion of the Site during either transects. The

transects route and bat activity are shown in more detail in Figure 12 and Figure 13.

Static detector

4.3.6 The static data logger recorded 256 passes, the species recorded again only included common and soprano pipistrelle. Common pipistrelle was recorded the most frequently making up 92.5% of the passes and soprano pipistrelle made up the remaining 7.5%. A breakdown of the calls each night is shown Table 8.

Table 7: Transect survey parameters

Parameter	Survey #1	Survey #2
Date	25/05/22	19/07/22

Ground Level Tree Assessment (2021)

4.3.7 A GLTA was carried out in 2021 reported in TEP 2021 and in 2022 it was verified that conditions had not changed. The results are shown in Table 9.

Table 9: 2021 GLTA results

Tree ID	Species	Feature	BCT Category
T1	Ash	Young to semi-mature, multi-stemmed ash with occasional ivy cover on edge of a ditch. No obvious potential roost features and ivy is unlikely to be a feature.	Negligible
T2	Oak	Semi-mature oak on edge of dry ditch. A north-facing crevice is present at 5m height between two branches while a large cavity is present on a south-facing branch at 4m height.	Moderate
T3	Sycamore	Semi-mature sycamore with cracked bark, which is lifted in places. A cavity is present on the south-facing branch at 3m height.	Moderate
T4	Ash	Young, multi-stemmed ash located to north of hedgerow with branches overhanging into the site. No obvious potential roost features.	Negligible
T5	Ash	Semi-mature multi-stemmed ash present at the end of a hedgerow. A dead branch is present at 1.5 m height facing west, with a cavity at the end but cracks at the top	Negligible

Tree ID	Species	Feature	BCT Category
		suggest this is exposed and allows rainwater in.	
T6	Sycamore	Sycamore tree in hedgerow. A crack is present on the north-west facing branch, which is obscured by foliage.	Low
T7	Sycamore	Semi-mature sycamore in hedgerow with south-facing cavity at 3 m height. A large cavity, where a branch has snapped, is present on the south side, whilst on the west side several small cavities are present along a branch.	High
T8	Oak	Mature tree on edge of area of dense scrub in the south-west of the site. A close inspection of this tree was not possible, but it is of an age and size that could support potential roost features.	Moderate (precautionary)

Bat Endoscope Survey

4.3.8 Further to the GLTA (4.3.7), those trees which were classed as having Moderate or High potential for a bat to roost in a feature on the tree, i.e., a potential roost feature (PRF), were subject to climbing during which each feature was visually inspected, using an endoscope where possible/necessary. The trees are shown on Figure 14. Each tree was assessed twice during the bat active season, at least two weeks apart (Andrews 2018[12]).

4.3.9 As shown in Table 9, no bat roosts or evidence of bats were found within any tree. T7 was downgraded from 'High' to 'Low' upon a closer inspection with the surveyor noting:

"[The] Cavity on [the] South side is 15cm deep with an entrance of 8cm diameter. Downgraded to low. All other features downgraded to negligible after close inspection."

4.3.10 The grading for all other trees remained as per 2021.

4.3.11 Collins 2016[11] states: "*Ideally, the survey data should be from the last season before a planning application is submitted*", meaning this endoscope data can be used for an application up to the end of the 2023 season.

Table 10: Endoscope Survey results

Tree ID	Species	Original Ground based assessment	Original BCT category	1st aerial check 6/5/2022	2nd aerial check 7/6/2022
2	Ash (not oak)	Semi-mature oak on edge of dry ditch. A north-facing crevice is present at 5 m height between two branches while a large cavity is present on a south-facing branch at 4 m height.	Moderate Remains moderate	North facing crevice negligible. South facing cavity has rams horns which have moderate potential for low numbers of individual small bats.	No change to feature. No evidence of bats
3	Sycamore	Semi-mature sycamore with cracked bark, which is lifted in places. A cavity is present on the south-facing branch at 3 m height.	Moderate Remains moderate	Bark features negligible. Cavity on South facing branch has an entrance of 4cm diameter and extends 15cm into branch. Moderate potential for individual bats.	No change to feature. No evidence of bats
7	Sycamore	Semi-mature sycamore in hedgerow with south-facing cavity at 3 m height. A large cavity, where a branch has snapped, is present on the south side, whilst on the west side several small cavities are present along a branch	High Downgraded to low	Cavity on South side is 15cm deep with an entrance of 8cm diameter. Downgraded to low. All other features downgraded to negligible after close inspection.	N/A
8	Oak	Mature tree on edge of area of dense scrub in the south-west of the site. A close inspection of this tree was not possible, but it is of an age and size that could support potential roost features.	Moderate (precautionary) Remains moderate	Hazard beam on lowest branch on South side of tree. Moderate potential for individual small bats. Hollow dead branch at a height of 3m on west side of tree. Cavity 3cm x 20cm moderate potential for small bats.	No change to features. No evidence of bats

4.4 BREEDING BIRDS

4.4.1 Breeding bird surveys were undertaken between May and June 2022, opportunistically recording in a 'look-see' manner in accordance with Gilbert 2011[16]. The results are presented here in Figure 15 and Figure 16, with the species list in Table 11 and Table 12. In summary there are three priority species and two red-list species.

Survey Visit 1

4.4.2 The survey was carried out on 10th May 2022, and recorded an unremarkable bird assemblage comprising of 16 different species. Of these, three are Priority bird species (dunnock, house sparrow and song thrush) and one is red listed by BTO (house sparrow).

4.4.3 There was one singing dunnock and four song thrush showing signs of breeding on site. There were also 11 individual house sparrows recorded, however they were all recorded using the houses located directly offsite.

Table 11: Breeding bird records (visit 1)

Name	Latin	Protection			
		Red list	Priority	WCA 1981	Breeding on site
Black bird	*Turdus merula*				*
Blue tit	*Cyanistes caeruleus*				*

Song thrush	*Turdus philomelos*		*		*
Whitethroat	*Curruca communis*				*
Wood pigeon	*Columba palumbus*				*
Wren	*Troglodytes troglodytes*				*

Survey Visit 2

4.4.4 The second survey was carried out on 9th June 2022. A similar assemblage to visit 1 was recorded, but this second visit also revealed willow warbler within hedgerow 3a and house martin (red list) were foraging within the open grassland of the Site.

5 ASSESSMENT

5.1 DESIGNATED SITES

5.1.1 The Site does not lie within or adjacent to any designated areas. The nearest statutory designation is Manchester Mosses SAC/SSSI c.4km south, which due to distance and scale of the proposals there will be no affect. The proposals will therefore not trigger a Habitats Regulations Assessment.

There are six non-statutory designations all of which are separated from the Site by large urban areas and therefore none will be affected.

5.2 HABITATS & PLANTS

Status

5.2.1 The Site is network by a series of hedgerows which are priority habitats, although none are important from a HEGS perspective.

5.2.2 There is an important area of semi-improved neutral grassland towards the southeast of the Site (TN1 on Figure 8). This grassland is a borderline grassland between unimproved (priority habitat) and semi-improved. The grassland is colonised by a large colony of marsh and hybrid orchid types, and the average species richness is 12-15sp/m^2.

5.2.3 There are two ponds on site. The ponds will be maintained and form an important component of the drainage strategy for the post-construction site.

5.2.4 All habitats across the Site, although not priority, provide an important contribution towards local biodiversity value in the area.

5.2.5 There are two stands of giant hogweed towards the south of the Site at TN14 (refer to Figure 8 and Figure 10).

Unmitigated Impacts

5.2.6 The Site will be cleared, removing all habitat in advance of construction, being replaced by a landscape scheme as shown in Figure 3 and Figure 4. The prime

impacts to habitats are as follows (impacts to individual fauna species are dealt with in separate sections below):

i C.*m of priority habitat hedgerows will be lost the proposals. Animals taking refuge at the base of hedges could be killed or injured, including hedgehog.
ii The proposals will remove an important colony of orchids;
iii C.*m^2 important (but not priority) grassland will be lost to the proposals.

5.2.7 Giant hogweed has been recoded as present. It is listed on Section 14(9), Part II, WCA 1981 which lists plants that are banned from being planted, or otherwise caused to grow in the wild. These rules also apply to specimens of listed invasive alien species, including any live part of the species, such as seeds or cuttings that might grow or reproduce. Giant hogweed in particular represents a significant risk to health and safety and although it is not unlawful to have such a plant on your land it should be removed from Site in the appropriate manner.

Recommendations

5.2.8 A CEMP Biodiversity should be provided, compliant with BS42020[2], containing a Biodiversity Risk Assessment, details of Biodiversity Protection Zones and the use of Heras fencing, details of the role of an Ecological Clerk of Works (ECW) and in particular should include the following:

Hedgerows

5.2.9 The hedgerow removal process should a two-staged operation, with the hedgerow removed down to 30cm and left overnight (no longer), with the final 30cm removed next day.

5.2.10 Hedgerow creation should use native species only. Five species or more should be selected from Table 13 and planted double-staggered with 30cm spacing between plants. The scheme should realise at least a 10% gain in hedgerow units, proven through an appropriate metric calculation.

Grasslands

5.2.11 The neutral grassland should be retained in situ wherever possible, avoiding, and protected from, any impact using Heras fencing. The retained area should be shown on a Biodiversity Protection Zone plan in the CEMP.

5.2.12 Where retention is not possible the turf of the neutral grassland at TN1 (refer to Figure 17) should be lifted and stored separately, to be re-used in the landscape scheme. A turf storage method statement should be provided in advance of the turf being lifted to be approved by the LPA, and should include:

- Location of the stored turves;
- Method of lifting and transport;
- Details of watering
- Details of replacement

Table 13: Native Hedge Species

Common name	Latin name
Hawthorn	*Crataegus monogyna*
Elder	*Sambucus nigra*
Ash	*Fraxinus excelsior*
Dog-rose	*Rosa canina*
Blackthorn	*Prunus spinosa*
Dogwood	*Cornus sanguinea*
Field maple	*Acer campestre*
Hazel	*Corylus avellana*
Holly	*Ilex aquifolium*
Crab apple	*Malus sylvestris*
Spindle	*Euonymus europaeus*

Invasive Species

5.2.13 An invasive species survey of the Site should be carried out prior to any persons entering the land. The survey should identify the location and size of stand of any invasive species found including giant hogweed.

5.2.14 Appropriate advice from an experienced invasive non-native (alien) consultant should be obtained and the plant(s) removed using the appropriate methods prior to commencement on site. Any vehicle entering the Site prior to eradication should have the wheels/equipment washed prior to leaving the Site.

Landscape Scheme

5.2.15 The scheme should include the following:

i All species proposed in the scheme should be native and of local provenance, where possible

ii Wherever possible hedgerows and the neutral grassland at TN1 should be retained. Where this is not possible the grassland turf should be re-used in the scheme as described in 5.2.12.

iii Ponds should be landscaped in a manner that encourages water vole colonisation and provides for any colonising great crested newt in the future (refer to 6.3).

iv Overall, the landscaping scheme should contribute positively to the Biodiversity Net Gain strategy as discussed in 5.8.

5.3 AMPHIBIANS

Status

5.3.1 Common toad was recorded by the data trawl, the closest record being 1.7 km to the north- east of the site, beyond a main road.

5.3.2 Great crested newt have been recorded as present in Pond 6 about 200m east of the Site boundary in an eDNA survey in 2021. There are a further two ponds on Site and three ponds within 500m of the Site boundary all of which returned negative but could be used by GCN.

Legislation & Policy

5.3.3 The more common species of amphibians are partially protected by the WCA 1981, making it an offence to deliberately kill or injure an animal, and are priority species.

5.3.4 Great crested newts (GCN) are highly protected as a European Protected Species, as well as being a Schedule 5 Wildlife and Countryside Act 1981 fully protected amphibian, as such are the subject of protection under the Conservation Regulations 2017 and the WCA 1981, making it unlawful to kill, injure an animal or damage, destroy or obstruct an animal's access to its place of shelter. Licenses can be provided to make offences lawful where appropriate mitigation is provided.

5.3.5 This development has elected to join the District Level Licensing (DLL) scheme to mitigate impacts to GCN from the proposals and thus acquire a licence from Natural England. An IACPC has been provided by Natural England (refer to 6.4).

5.3.6 The local authority policy CP12 provides for protected and priority species.

Unmitigated Impacts

5.3.7 Commoner amphibians could be killed or injured by pond drain-down if carried out during site clearance.

5.3.8 The DLL scheme still requires immediate impacts of killing and injury of GCN to be mitigated through pre-site clearance capture of GCN.

Recommendations

5.3.9 If draining ponds, filter gauze should be placed over the inlet for the final 30cm, and an ECW should be allowed to net the final 30cm and search the muddy substrate before final pond clearance earthworks.

5.3.10 The first stage Conservation Payment as defined on the IACPC should be paid to NE to receive the counter-signed certificate prior to planning determination. (may be required for final validation).

5.3.11 The site should be searched by a suitably qualified ecologist, moving GCN to safety prior to site clearance. This involves:

i Hand-searching searching refugia
ii Destructively searching suitable terrestrial habitat, such as that within 50m of an on-site pond, without the use of any fences or pitfall traps
iii Hand searching the mud and last 30cm of water in ponds that are drained down.

5.4 BADGERS

Status

5.4.1 No evidence of badgers or their setts has been recorded on or within 30m of the Site, but there are records of badgers within the local landscape suggesting they are active in the area.

Legislation & Policy

5.4.2 Badgers occupying setts and their setts (tunnels and chambers where they live) are protected by the Protection of badgers Act 1992.

5.4.3 It is good practice to take account of badgers if they could potentially use a site.

Unmitigated impacts

5.4.4 Badgers may create a new sett within the Site or up to 30m from the Site in the interim between planning determination and commencement of proposals. This is particularly important with hedgerows.

5.4.5 Animals may commute across the site and therefore be subject to adverse impacts from construction.

Recommendations

5.4.6 A badger survey should be carried out within 3 months prior to commencement of proposals, and should evidence be found a method statement should be provided to the LPA for approval prior to works commencing. Further works

may require a licence from Natural England should damage to a sett or disturbance to badgers occupying a sett be anticipated. This mitigation is not required if the works commence before 12th August 2023.

5.4.7 During construction, the Principal Contractor should ensure that appropriate safety measures for badgers must be taken to avoid harm to animals visiting the site after nightfall. They will not be present post-dawn until dusk. Recommendations are for RAMS to include:

i Works should be limited to daylight hours.
ii Any excavations greater than 1.5m in depth and to be left open overnight will have a means of escape for any animals that might fall in (e.g. a plank).
iii Similarly, open-ended pipes are to be covered denying overnight access to any animals that may otherwise become trapped.
iv Any internal or boundary barriers such as fencing should allow badgers freedom of access throughout the development site and should avoid using orange or brightly coloured plastic tape that can alarm badgers. Barriers should at a minimum provide a gap 200mm high at regular intervals, although permanent access under for example post and rail fence is preferred.
v The contractors and sub-contractors must not leave any food on the site, including food wrappers and discarded food items. Security personnel should be instructed not to feed badgers at night.

5.5 BATS

Status

5.5.1 There are no roosts present on Site, or structures that could provide roosting opportunities for bats.

5.5.2 Three trees have ‘Moderate’ potential for bats to roost, trees T2, T3 & T8. Endoscope surveys have shown that there is currently no evidence of bat use in these trees. Two further trees have ‘Low’ potential, T6 & T7, the latter being downgraded from ‘High’.

5.5.3 The bat foraging and commuting habitat has been graded as 'Low', and the subsequent transect surveys showed that the bat assemblage is unremarkable, dominated by a small number of pipistrelle species.

Legislation & Policy

5.5.4 In Britain all bat species and their roosts are legally protected, by both domestic and international legislation. This means it may be a criminal offence if you:

i Deliberately take, injure or kill a wild bat
ii Intentionally or recklessly disturb a bat in its roost or deliberately disturb a group of bats.
iii Damage or destroy a place used by bats for breeding or resting (roosts) (even if bats are not occupying the roost at the time)
iv Possess or advertise/sell/exchange a bat of a species found in the wild in the EU (dead or alive) or any part of a bat.
v Intentionally or recklessly obstruct access to a bat roost.

5.5.5 The local authority policy CP12 (1) provides for protected species.

Unmitigated Impacts

5.5.6 A tree with a potential roost feature could be felled in a manner that may have an adverse effect on a bat.

5.5.7 The bat foraging and commuting habitat has been graded as 'Low', and the subsequent transect surveys showed that the bat assemblage is unremarkable, dominated by a small number of pipistrelle species.

Recommendations

5.5.8 In order to protect bats from adverse effects:

i The trees that have 'Moderate' potential (T2, T3 & T8) should be removed with a licensed bat person present who may elect to undertake another endoscope assessment prior to felling, and these trees should be soft-felled (refer to Figure 14).

ii Trees that are graded 'Low' potential (T6 & T7) should be soft-felled with an ECW present.

iii The survey data is only valid for surveys from the preceding season, so should works be postponed beyond the active season in 2023 bat surveys should be updated.

5.5.9 Post-construction, at least one bat box / feature lost should be provided, of woodcrete-type construction and maintenance-free as defined by Mitchell-Jones 2004[17]:

- There should be a minimum of five boxes to mitigate the five features removed i.e., T2, T3, T6, T7 & T8.
- The boxes should be provided in advance of tree removal.
- Boxes must not be illuminated by the lighting scheme.
- Box provision should be detailed in a Biodiversity Enhancement Plan for the proposals.

5.5.10 The landscape scheme should provide linear features at least the length that is being lost. Native species should be used. These features should be interconnected wherever possible and connect to the wider landscape beyond the Site boundaries. The lighting scheme should leave these features in as dark a place as possible, avoiding direct illumination where health and safety allows.

5.6 BREEDING BIRDS

Status

5.6.1 There are numerous records of priority and red & amber listed breeding birds of Conservation Concern, and more commoner species throughout the Site and within 2km of the Site. The field survey corroborated this recording 20 breeding birds, of which 18 were recorded as likely breeding on site including

[17] **Mitchell-Jones, A. J. 2004** Bat Mitigation Guidelines. English Nature, ISBN 1 85716 781 3. January 2004.

three priority species and also including red-listed house sparrow and house martin.

5.6.2 The habitat on site is largely suitable for breeding birds.

Legislation & Policy[18]

5.6.3 All wild breeding birds are protected by Part 1 of the Wildlife and Countryside Act 1981 from deliberate or reckless damage or destruction. It is unlawful to;

- intentionally kill, injure or take wild birds
- intentionally take, damage or destroy a wild bird's nest while it's being used or built
- intentionally take or destroy a wild bird's egg

5.6.4 For further information, please visit: https://www.gov.uk/guidance/wild-birds-protection-surveys-and-licences

Unmitigated Impacts

5.6.5 Birds could be killed or injured, and their nest or eggs could be damaged or destroyed.

5.6.6 All breeding bird habitat will be lost to the proposals.

Recommendations

5.6.7 Where clearance of vegetation likely to support nesting birds takes place between 1st March and 31st August, a qualified ECW should visit the Site within 48 hours prior to commencement to confirm no breeding birds are present that will be affected by the proposals. Where this involves dense or extensive vegetation, the ECW is unlikely be able to confirm this. Should an ECW be required, the results of the visit should be kept on file to show the authorities should it be required.

[18] There are variations between countries in the UK, but the principle is enshrined here

5.6.8 The extent of works is usually minor compared to available alternative habitat which can be regionally vast, such that the loss of bird breeding habitat is considered to be negligible. Nonetheless, it is good practice to provide opportunities for birds to continue to breed throughout the completed development. One bird box per red or amber and priority species to be affected should be provided per hectare of strategic landscaping. This means that as there are 5 species across c.4 hectares, which totals 20 bird boxes. These 20 boxes should include:

- 5 house sparrow terraces
- 5 house martin boxes (where possible to attach to buildings)
- 5 open-fronted boxes
- 5 front-holed boxes

5.6.9 Box provision should be detailed in a Biodiversity Enhancement Plan for the proposals.

5.7 HEDGEHOG

Status

5.7.1 There are numerous records of hedgehog, although no evidence of their presence has been found, but the habitat is suitable, especially at the base of hedgerows.

Legislation & Policy

5.7.2 Hedgehogs are a priority species which should be taken into account as part of the planning authority's Biodiversity Duty.

Unmitigated Impacts

5.7.3 Construction works could inadvertently kill or injure an animal. Reasonable avoidance measures are provided to avoid potential impacts.

Recommendations

5.7.4 The following methods of working should be carried out to reasonably avoid killing or injuring hedgehogs that may be present on site:

i Works carried out should be informed by survey data not less than 5 breeding seasons in age;

ii If the proposals require burning piles of woody material, prior to the burn move the pile from its original location on the morning of the burn to ensure there are no hedgehogs in its base.

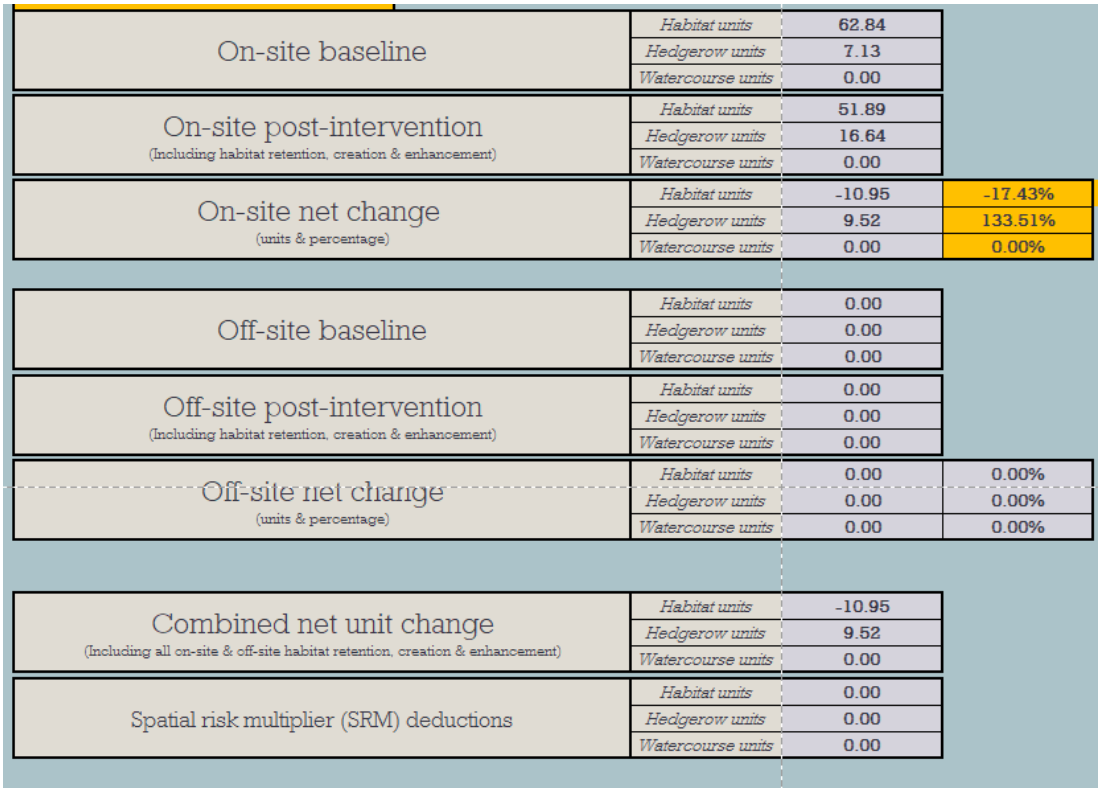
iii Do not leave any food or litter on the site – food attracts hedgehogs to come to your site and some types of litter can be harmful even lethal.

iv Place small holes 13 x 13cm in barriers like walls or fences to let ground dwelling creatures such as hedgehogs pass freely through the development site.

v Make sure trenches and other open features 50cm deep or more have a means of escape for hedgehogs – block open pipes to stop a hedgehog getting in.

vi Provide hedgehog boxes and log piles post construction. Box provision should be detailed in a Biodiversity Enhancement Plan for the proposals.

5.8 BIODIVERSITY NET GAIN



Status

5.8.1 The Biodiversity Metric v4.0 is the latest version to be employed and the results are provided in Box 1 below, provided as a separate excel workbook to provide the full results. The Condition Tables are summarised in 6.6.

5.8.2 The BNG assessment has valued all habitats within the existing baseline scenario and assesses the impact of the proposals by taking into account all habitats to be lost, retained/translocated, and created in the operational phase.

5.8.3 The Metric results in a deficit of -10.95 Habitat Units (-17.43%), +9.52 Hedgerow Units (+133.51%), and 0 River Units.

Box 1: BNG Headline Results

On-site baseline	*Habitat units*	62.84	
	Hedgerow units	7.13	
	Watercourse units	0.00	
On-site post-intervention (Including habitat retention, creation & enhancement)	*Habitat units*	51.89	
	Hedgerow units	16.64	
	Watercourse units	0.00	
On-site net change (units & percentage)	*Habitat units*	-10.95	-17.43%
	Hedgerow units	9.52	133.51%
	Watercourse units	0.00	0.00%
Off-site baseline	*Habitat units*	0.00	
	Hedgerow units	0.00	
	Watercourse units	0.00	
Off-site post-intervention (Including habitat retention, creation & enhancement)	*Habitat units*	0.00	
	Hedgerow units	0.00	
	Watercourse units	0.00	
Off-site net change (units & percentage)	*Habitat units*	0.00	0.00%
	Hedgerow units	0.00	0.00%
	Watercourse units	0.00	0.00%
Combined net unit change (Including all on-site & off-site habitat retention, creation & enhancement)	*Habitat units*	-10.95	
	Hedgerow units	9.52	
	Watercourse units	0.00	
Spatial risk multiplier (SRM) deductions	*Habitat units*	0.00	
	Hedgerow units	0.00	
	Watercourse units	0.00	

Legislation & Policy

5.8.4 The Environment Act 2021 now makes it unlawful for development to result in a net loss, but the percentage gain required has not yet been lawfully defined (10% is referred to as probable).

5.8.5 The NPPF para 180[a] seeks a hierarchical approach to mitigation (avoid, mitigate or compensate).

5.8.6 Local policy does not yet reflect a BNG requirement.

Biodiversity Gain Plan

5.8.7 It is not possible to reach a 10% gain within the Site boundaries as required by the forthcoming Environment Act legislation. In line with NPPF para 180[a], the mitigation hierarchy has been employed:

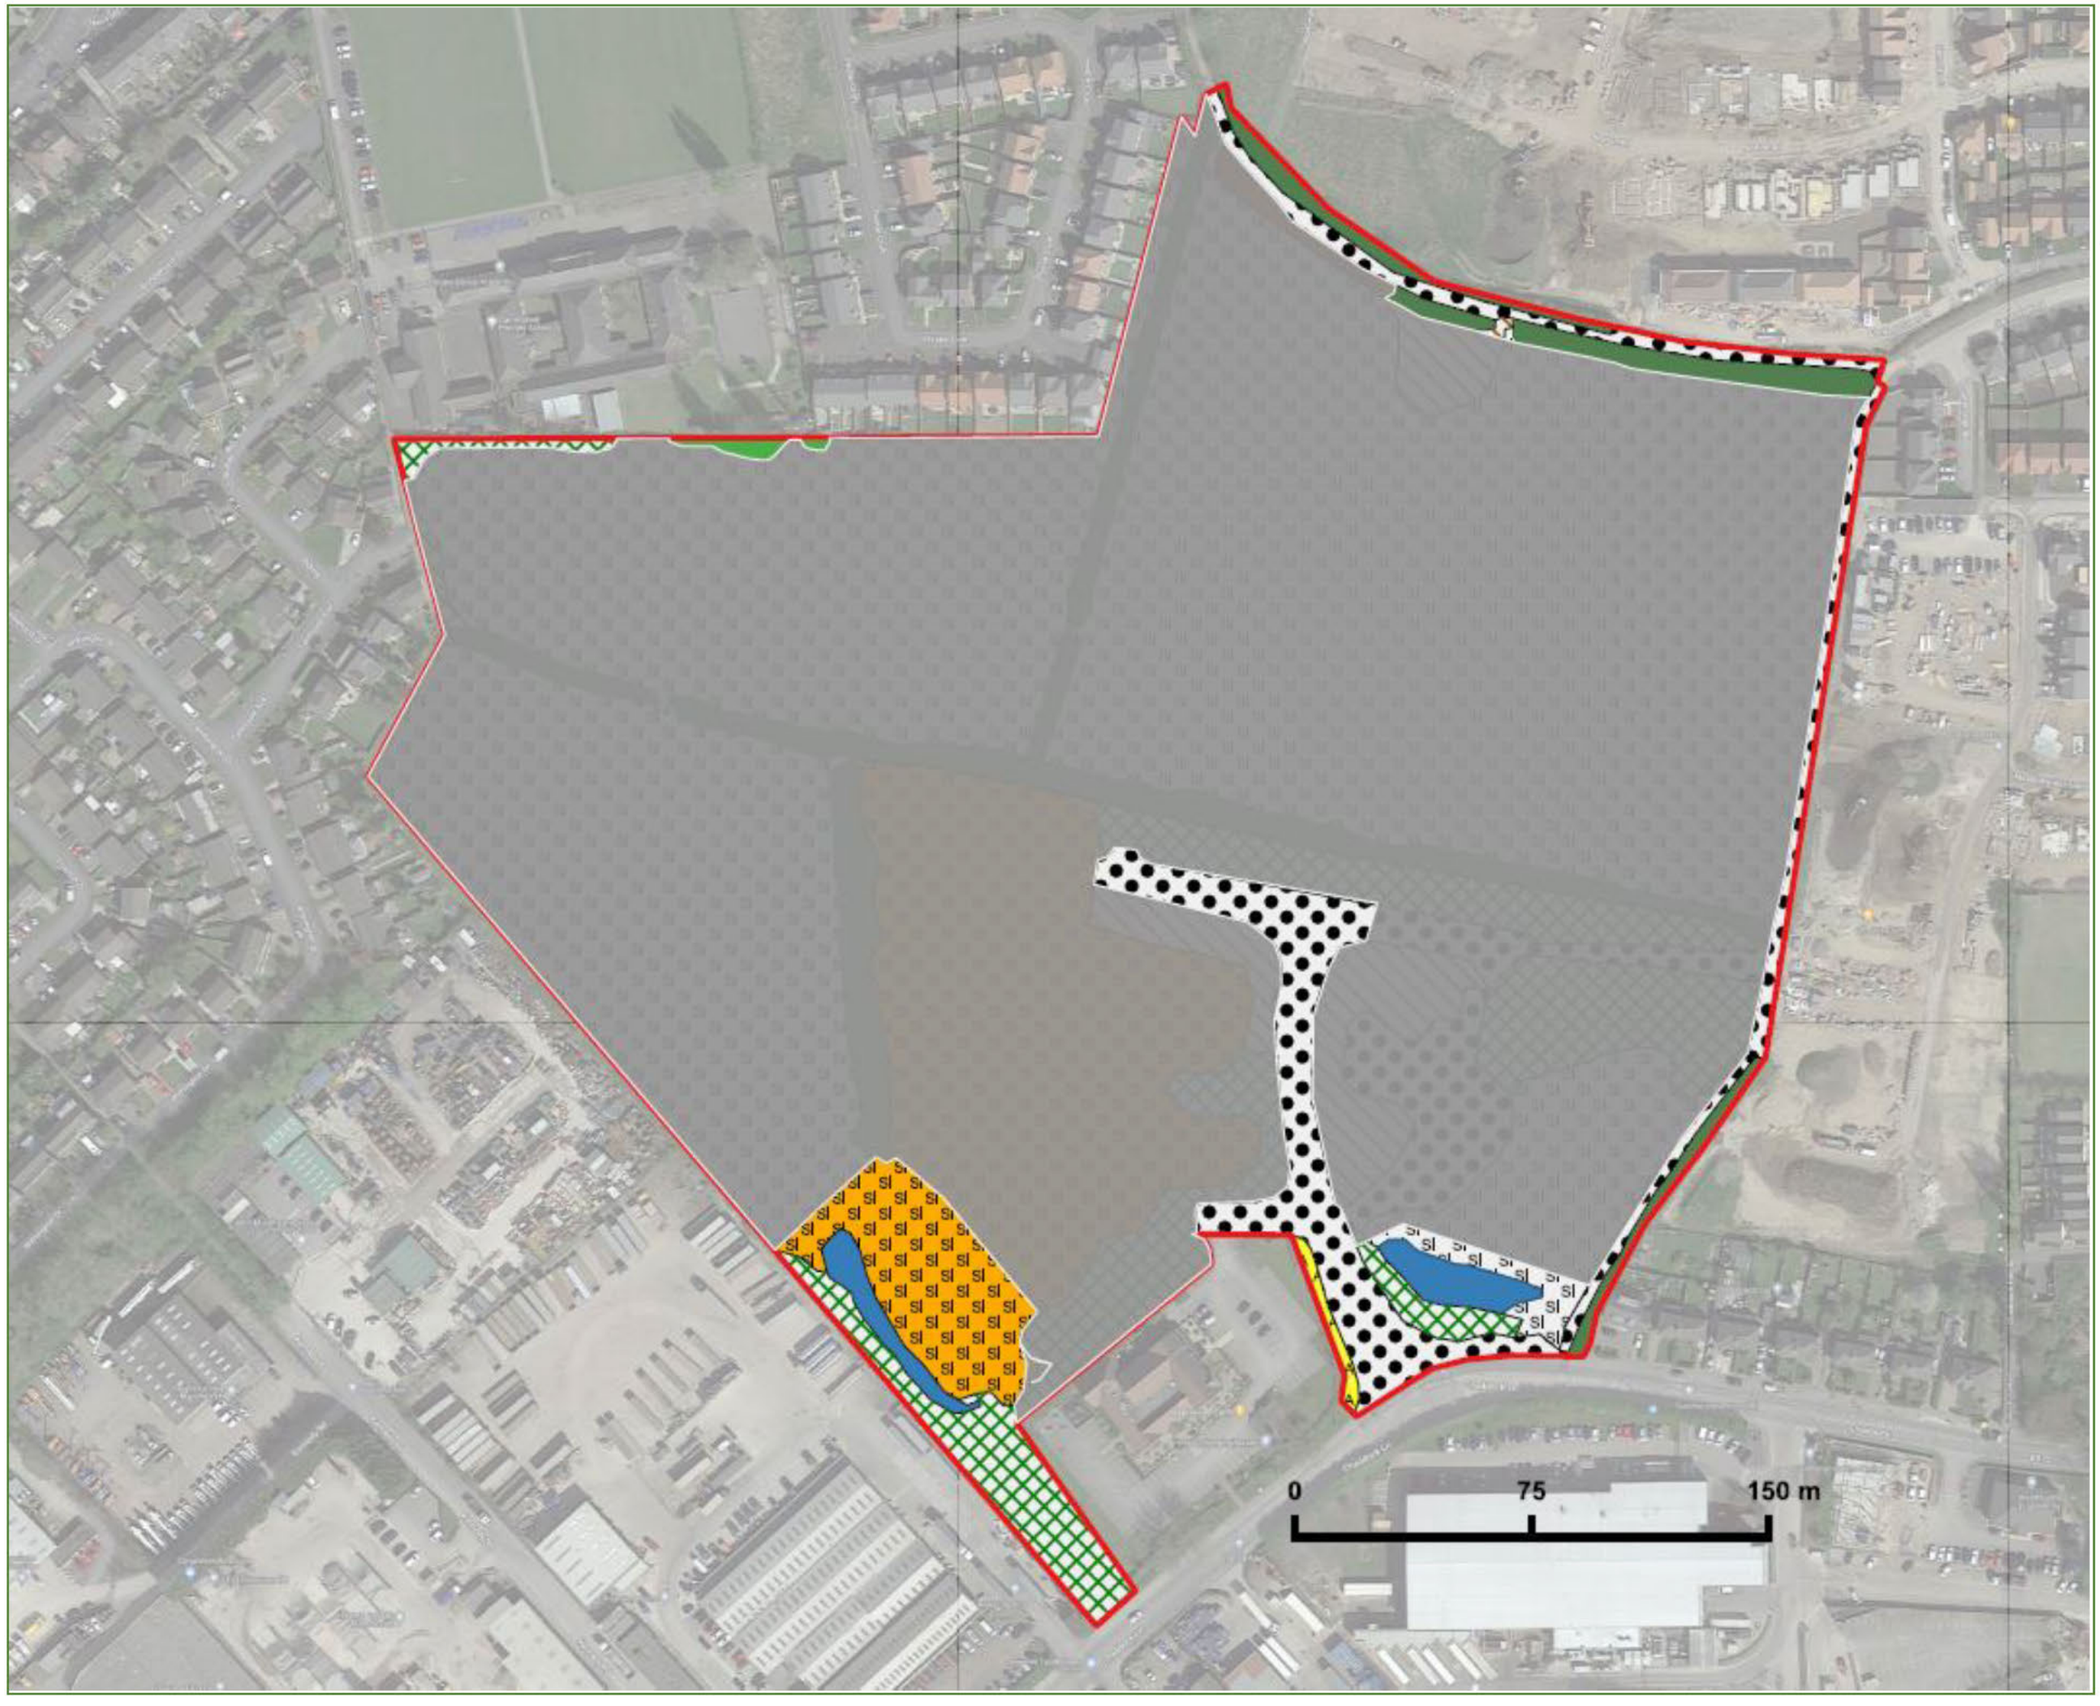
Avoid

5.8.8 A number of existing habitats are being retained on Site, which include (refer to Figure 17):

i Hedgerows H1, H5, H6 & H7.
ii The two existing waterbodies on Site to the southwest and southeast.
iii Grassland surrounding both waterbodies.
iv A small group of trees to the northwest boundary.
v Scrub habitat (0.52ha of 1.13ha in total), namely to the southwest. This habitat can be further enhanced and includes T8.
vi Amenity grassland.
vii Hardstanding (no ecological value).

Mitigate

5.8.9 The following mitigation measures are proposed:



i Translocation of good-quality neutral grassland which totalling c.1.77ha of existing 1.87ha. This habitat is the greatest ecological resource at the Site.
ii The control of invasive giant hogweed.

Compensation

5.8.10 After employing mitigation, the impact still remains as is shown in the Metric results, with a deficit of -10.95 Habitat Units. The options are:

i Habitat within the site boundary should be created or enhanced.
ii Where this is not possible, the impact should be offset by habitat creation or enhancement on land within the Wigan administrative area.
iii As a last resort a financial compensation can be made, via a planning condition. This compensation should target biodiversity within the local area and seek to provide or enhance habitat of at least the broad habitat type to the lost at the Site, normally controlled in the form of a s106 agreement. For this option further liaison with the LPA is recommended.

Figure 17
Retained Habitat

- Site boundary
- Scattered trees
- Dense scrub
- Semi-improved neutral grassland
- Tall ruderal
- Amenity grassland
- Bare ground
- Bracken
- Species-poor hedgerow (Priority Habitat)
- Pond
- Poor semi-improved grassland
- Habitat to be lost to proposals

6 APPENDICES

6.1 APPENDIX I: LEGISLATION

The Environment Act 2021

6.1.1 The Act deals with targets to improve air quality, biodiversity, water, and waste reduction and resource efficiency. Nature and Biodiversity is dealt with directly in Part 6, which is aimed at:

- Strengthened biodiversity duty
- Biodiversity net gain to ensure developments deliver at least 10% increase in biodiversity
- Local Nature Recovery Strategies to support a Nature Recovery Network
- Duty upon Local Authorities to consult on street tree felling
- Strengthen woodland protection enforcement measures
- Conservation Covenants
- Protected Site Strategies and Species Conservation Strategies to support the design and delivery of strategic approaches to deliver better outcomes for nature
- Prohibit larger UK businesses from using commodities associated with wide-scale deforestation
- Requires regulated businesses to establish a system of due diligence for each regulated commodity used in their supply chain, requires regulated businesses to report on their due diligence, introduces a due diligence enforcement system

Conservation of Habitats and Species Regulations 2017 (as amended)

6.1.2 These Regulations consolidate the Conservation (Natural Habitats, &c.) Regulations 1994 and amend the 2010 Regulations, and together they transpose the European Habitats Directive into domestic law. The Regulations provide for the designation and protection of 'European sites' (referred to in this assessment as international sites), the protection of 'European protected

species', and the adaptation of planning and other controls for the protection of such.

6.1.3 Under the Regulations, UK competent authorities have a general duty to have regard to the EC Habitats and Birds Directives. They require competent authorities to consider or review planning permission, applied for or granted, affecting a European site, and, subject to certain exceptions, restrict or revoke permission where the integrity of the site would be adversely affected. Under Regulation 63, where any proposed plan or project is likely to have an effect on a Natural 2000 site or qualifying feature for a site, then the competent authority (normally the local planning authority) will carry out an Appropriate Assessment of those effects, referred to as a Habitats Regulations Assessment (HRA).

Species

6.1.4 The Regulations make it an offence (subject to exceptions) to deliberately capture, kill, disturb, or trade in the animals listed in Schedule 2, or pick, collect, cut, uproot, destroy, or trade in the plants listed in Schedule 4. However, these actions can be made lawful through the granting of licenses by the appropriate authorities. Licenses may be granted for a number of purposes (such as science and education, conservation, preserving public health and safety), but only after the appropriate authority, including the planning authority, is satisfied that there are no satisfactory alternatives and that such actions will have no detrimental effect on wild populations of the species concerned: these three elements form the basis of the three derogations ‘tests’ to be applied to satisfy European legislation.

Wildlife and Countryside Act 1981

6.1.5 The principle statutory instrument that governs nature conservation in England is the Wildlife and Countryside Act 1981 as amended (WCA 1981).

6.1.6 The WCA 1981 consolidates and amends existing national legislation to implement the Convention on the Conservation of European Wildlife and Natural Habitats (Bern Convention) and the Birds Directive in Great Britain. It

is complimented by the Wildlife and Countryside (Service of Notices) Act 1985, which relates to notices served under the 1981 Act, and the Habitats Regulations 2017 (as amended), which implement the Habitats Directive.

6.1.7 Containing four Parts and seventeen Schedules, the Act covers protection of wildlife (birds, and some animals and plants), the countryside, National Parks, and the designation of protected areas, and public rights of way.

6.1.8 Amendments to the Act have been made and there is a statutory quinquennial review of Schedules 5 and 8 (protected wild animals and plant respectively), undertaken by the country agencies and co-ordinated by the Joint Nature Conservation Committee. There have been 6 reviews with the 7th commenced in 2021.

Protection of Badgers Act 1992

6.1.9 There are very few Acts of Parliament that are dedicated to one species with conservation as part of the aim. This Act supplements the WCA 1981 by affording protection to badgers against disturbance and their setts against unlawful damage and destruction. It provides a licensing system to allow works to proceed in a sensitive manner.

Countryside and Rights of Way (CRoW) Act 2000

6.1.10 The CRoW Act 2000 places a duty on Government Departments and the National Assembly for Wales to have regard for the conservation of biodiversity and maintain lists of species and habitats for which conservation steps should be taken or promoted, in accordance with the 1992 Rio Convention on Biological Diversity. The Act makes various amendments to the WCA 1981 including increasing SSSI protection, management and policing.

6.1.11 DEFRA published the first 'list' in 2002 under Section 74 of the CRoW Act 2000, which was identical with the UK BAP list at the time, now superseded by the Natural Environment and Rural Communities Act 2006 Section 41 list (see below).

Natural Environment and Rural Communities (NERC) Act 2006

6.1.12 The NERC Act 2006 makes provision in respect of biodiversity, pesticides harmful to wildlife and the protection of birds, and in respect of invasive non-native species.

6.1.13 Section 40 of the Act lays a duty on authorities to have regard to the purpose of conserving biodiversity in compliance with the UN Biodiversity Convention in 1992. This is otherwise known as the 'Biodiversity Duty' and refers in particular to those Habitats & Species of Principle Importance listed in Section 41 of the Act. Guidance for local authorities on implementing the Biodiversity Duty is provided in DEFRA (2007).

Section 41 List

6.1.14 For the purposes of conserving biodiversity, habitats and species of principle importance are listed through the provisions set out in Section 41 of this Act (replacing Section 74 of the CRoW Act 2000), referred to in this chapter as the Section 41 List. DEFRA 2007 references the UK and local Biodiversity Action Plans (BAPs) (see below) as the source of data for the Section 41 List. This assessment uses the List, as updated by the UK BAP, as a key guide for identification of ecological features to be affected by proposals, and to guide and weigh recommendations and mitigation.

6.1.15 The Section 41 List has been further refined by DEFRA 2007, where seven sectors have been selected where public bodies and other stakeholders can make a significant contribution to biodiversity conservation, through their Biodiversity Duty. Habitats and species relevant to each sector have been identified to help non-conservation professionals consider where the List might apply to them. Of these seven, two are relevant to this assessment i.e. Land Use Planning and Regional & Local Government. The List was last updated in 2010 and referenced here as Natural England 2010.

ODPM Circular 06/2005 Biodiversity and Geological conservation (withdrawn but report remains compliant)

6.1.16 This Circular provides administrative guidance on the application of the law relating to planning and nature conservation as it applies in England. With the onset of the National Planning Policy Framework in March 2012, this remains as the principal source of statutory interpretation of the legislation listed above.

6.1.17 The Circular is presented in four Parts, of which the first three are relevant here. The Circular requires updating since the publication of the National Planning Policy Framework in March 2012 replaced Planning Policy Statements (see below), but should be applied as follows:

Part I: Internationally Designated Sites

- This Part provides guidance on implementation of the Conservation of Species and Habitat Regulations 2010 (updating the Habitat Regulation 1994), in compliance with the Habitats Directive. The principal is maintenance of the Natura 2000 suite of sites. Helpful definition of derogation from the Habitats Directive and the 'three tests' is provided.
- The principal of compensation is included, although this will be subject to strict testing under the 'three tests' system and is unlikely to be effective at an international level.

Part II: Nationally Designated Sites

- This Part focusses on Sites of Special Scientific Interest (SSSI) and provides guidance on interpretation of the Wildlife and Countryside Act 1981 (as amended, inc. the CROW Act 2000).

Part III: Conservation of habitats and species outside designated areas

- Part III pulls together statutory instruments and the route through which their protection is linked to Biodiversity Action Plans in the UK, both nationally and locally.

6.1.18 Section 84 of this Circular states that the habitats and species listed in the S41 List are capable of being a material consideration.

6.1.19 Section 85 refers to the CRoW 2000 Act, Section 74, which has been superseded by the S41 List and requires updating. The importance of the S41 List in principle is set out here.

6.1.20 Section 95 identifies forthcoming DEFRA advice on Local Wildlife Sites. DEFRA 2006 subsequently defines local wildlife sites and their management, linking local wildlife sites to the Conservation of Habitats and Species Regulations 2010 (Regulation 39[3]) where they are referred to as 'Stepping Stones'. This is a key link for local wildlife site protection via the Natural Environment White Paper, and Lawton 2010 , and subsequently informing the England Biodiversity Strategy for 2020 , all of which provide policy guidelines for protection of stepping stones integral to ecological networks, the latter as referred to most recently in the National Planning Policy Framework 2012 (see earlier).

6.2 APPENDIX II: SOFT FELLING METHODS

6.2.1 The felling work will be undertaken during weather conditions suitable for bats to be active, avoiding the main hibernation period, to minimise the risk of significant disturbance;

6.2.2 A supervising ecologist with appropriate licence/experience will be present on site to advise on felling methods and what to do in the event bats are encountered;

6.2.3 Sections of the tree containing features suitable for roosting bats, i.e., thick ivy stems, will be softly lowered to the ground, following which these will be subject to a more detailed inspection by the supervising ecologist to confirm absence of bats;

6.2.4 After felling, the sections of the tree supporting thick ivy stems will be retained in a suitable location overnight allowing bats to disperse, in the unlikely event that any are present but undetectable.

Photograph 17. Sections of the tree containing features suitable for roosting bats will be softly lowered to the ground to be inspected by ECW

6.3 APPENDIX III: POND LANDSCAPING SPECIES MIX

Table 14: Plants for Water voles

Type	Common Name	Latin Name
Reeds	Reed canary grass	*Phalaris arundinacea*
	Common reed[19]	*Phragmites australis*
	Reed sweet grass	*Glyceria maxima*
Grasses	Meadow grasses	*Poa trivalis, P. pratensis*
	Cocksfoot	*Dactylis glomerata*
	Sweet grasses	*Glyceria fluitans, G. notata*
	False oat-grass	*Arrhenatherum elatius*
	Tufted hair-grass	*Oeschampsia caespitosa*
	Sweet vernal-grass	*Anthoxanthum odoratum*
	Yorkshire fog	*Holcus lanatus*
	Creeping soft-grass	*Holcus mollis*
	Creeping bent	*Agrostis stolonifera*
	Timothy	*Phleum pratense*
	Marsh foxtail	*Alopecurus geniculatus*
	Meadow foxtail	*Aopecurus pratensis*
	Purple moor-grass	*Molinia caerulea*
Rushes	Hard rush	*Juncus inflexus*
	Soft rush	*Juncus effusus*
	Conglomerated rush	*Juncus conglomeratus*
	Sharp-flowered rush	*Juncus acutiflorus*
	Jointed rush	*Juncus articulatus*
Sedges	Greater tussock sedge	*Carex paniculata*
	False fox-sedge	*Carex otrubae*
	'Hairy' sedge	*Carex hirta*
	Bottle sedges	*Carex rostrata*
	Bladder sedge	*Carex vesicaria*
	Pendulous sedge	*Carex pendula*
	Black sedge	*Carex nigra*
	Lesser pond-sedge	*Carex acutiformis*

[19] Important to encourage above-ground nesting where burrowing is not possible

Type	Common Name	Latin Name
	Greater pond-sedge	*Carex riparia*
Water plants	Branched bur-reed	*Sparganium erectum*
	Unbranched bur-reed	*Sparganium emersum*
	Arrowhead	*Sagittaria sagittifolia*
	Common water-plantain	*Alisma plantago-aquatica*
	Flowering rush	*Butomus umbellatus*
	Broad-leaved pondweed	*Potamogetum natans*
	Hornwort	*Ceratophyllum demersum*
	Water- milfoil	*Myriophyllum spicatum*
	Yellow flag	*Iris pseudacorus*
	Bogbean	*Menyanthes trifoliata*
	Pond lilies	*Nymphoides peltata, Nuphar lutea, Nymphaea alba*
	Bulrush	*Schoenoplectus lacustris*
	Water crowfoots	*Ranunculus peltatus, R. aquatilis, R. penicillatus, R. fluitans*
	Water dropwort	*Oenanthe aquatica*
Wetland/edge plants	Bistort	*Polygonum amphibium*
	Marsh marigold	*Caltha palustris*
	Celery-leaved buttercup	*Ranunculus sceleratus*
	Lesser spearwort	*Ranunculus flammula*
	Greater spearwort	*Ranunculus lingua*
	Cuckoo flower	*Cardamine pratensis*
	Meadowsweet	*Filipendula ulmaria*
	Water avens	*Geum rivale*
	Marsh cinquefoil	*Potentilla palustris*
	Purple loosestrife	*Lythrum salicaria*
	Fool's watercress	*Apium nodiflorum*
	Angelica	*Angelica sylvestris*
	Marsh bedstraw	*Galium palustre*
	Water forget-me-not	*Myosotis scorpioides*
	Water mint	*Mentha aquatica*
	Brooklime	*Veronica beccabunga*

Type	Common Name	Latin Name
	Marsh valerian	*Valeriana officinalis*
	Marsh sowthistle	*Sonchus palustris*
	Water figwort	*Scrophularia auriculata*
	Gypsywort	*Lycopus europaeus*
Dryland/bank plants	Garlic mustard	*Alliaria petiolata*
	Rosebay willowherb	*Chamerion angustifolium*
	Greater willowherb	*Epilobium hirsutum*
	Cow parsley	*Anthriscus sylvestris*
	Sweet cicely	*Myrrhis odorata*
	Ground elder	*Aegopodium podagraria*
	Common comfrey	*Symphytum officinale*
	Hemp agrimony	*Eupatorium cannibinum*
	Dandelion	*Taraxacum officinale*
Shrubs and trees	Crack willow	*Salix fragilis*
	White willow	*Salix alba*
	Purple willow	*Salix purpurea*
	Bay willow	*Salix. pentandra*
	Ossier	*Salix viminalis*
	Goat willow	*Salix caprea*
	Grey willow	*Salix cinerea*
	Aspen	*Populus tremula*
	Black polar	*Populus nigra*
	Alder	*Alnus glutinosa*
	Hazel	*Corylus avellana*
	Field maple	*Acer campestre*
	Rowan	*Sorbus aucuparia*
	Hawthorn	*Crataegus monogyna*
	Crab apple	*Malus sylvestris*
	Bird cherry	*Prunus padus*
	Buckthorn	*Rhamnus carthartica*
	Elder	*Sambucus nigra*

Table 15: GCN Egg laying plants

Common name	Latin name
Great Willowherb	*Epilobium hirsutum*

Water Forget Me Not	*Myosotis scorpioides*

6.4 APPENDIX IV: NE PROVISIONAL DLL IACPC

The Conservation of Habitats and Species Regulations 2017

Great Crested Newt District Level Licensing Impact Assessment & Conservation Payment Certificate

T. 020 8026 1089
E. gcndll@naturalengland.org.uk

The appropriate authority shall not grant a licence under Regulation 55(9)(b) unless they are satisfied that actions authorised will not be detrimental to the maintenance of the population of the species concerned at a favourable conservation status in their natural range.

This Certificate is provisional once all information required in sections 1, 2, 3 and 4 has been inserted by Natural England and it has been issued to the Applicant. A provisional Certificate shall be given the date inserted by Natural England in section 4. A Certificate remains provisional until:

- **It has been signed and dated by the Applicant in section 6; and**
- **Natural England's administration fee and (if applicable) the 1st Stage Conservation Payment has/have been paid; and**
- **It has been signed and dated on behalf of Natural England in section 8.**

At which point this Certificate shall be complete and effective and shall be given the date on which it is signed by Natural England in section 8.

A provisional Certificate that determines that a 1st Stage Conservation Payment is required will lapse after 6 weeks from the date given in section 4. Lapse date: 28/08/2023

A provisional Certificate that determines that a 1st Stage Conservation Payment is not required will lapse after 3 months from the date given in section 4. Lapse date: N/A

4.2 Applicants must also make a Conservation Payment to Natural England, to allow Natural England to pay for the creation and maintenance of sufficient new great crested newt habitat to compensate for the impacts of the Applicant's proposals for 25 years.

4.3 If the total number of compensation ponds required is 3 or more the Conservation Payment shall be split into two staged payments: a 1st Stage Conservation Payment and a 2nd Stage Conservation Payment.

4.4 An Applicant who is not required to make staged payments will be issued with a VAT-inclusive invoice for the Conservation Payment once it has applied to Natural England for a GCN District Level Licence. That invoice will be payable within 28 days of issue and refundable only in the circumstances set out at clauses 5.8, 5.9 and 5.10, below.

4.5 An Applicant who is required to make a 1st Stage Conservation Payment will be issued with a VAT-inclusive invoice for that payment once it has signed the provisional Impact Assessment and Conservation Payment Certificate at section 6, below, and returned it to Natural England. That invoice will be payable within 28 days of issue and refundable only in the circumstances set out at clauses 5.8, 5.9 and 5.10 below. When an Applicant is required to make a 1st Stage Payment Natural England will not complete the Impact Assessment and Conservation Payment Certificate by signing and dating it at section 8 until that payment has been made.

4.6 An Applicant who has made a 1st Stage Conservation Payment will be issued with a VAT-inclusive invoice for the 2nd Stage Conservation Payment once it has applied to Natural England for a GCN District Level Licence. That invoice will be payable within 28 days of issue and refundable only in the circumstances set out at clauses 5.8, 5.9 and 5.10, below.

4.7 Except for householder home improvement projects or where planning permission has been received following a householder planning application a further non-refundable fee of £690 will be charged at the point of issue of any subsequent licence under reg. 55 of the Conservation of Habitats and Species Regulations 2017, payable within 28 days of issue.

Has the Conservation Payment for the required amount of compensation been calculated in accordance with standard procedure?	Yes ☑ No ☐
If no, please provide details:	N/A

Basis of calculation of Conservation Payment:

4.1 compensatory ponds required at £[redacted] each = £[redacted] plus VAT = total £[redacted].

See 4.2 to 4.6, above

If a 1st Stage Conservation Payment is required, the Conservation Payment shall be split as follows:

1st Stage Conservation Payment: £[redacted] plus VAT = total £[redacted]. See 4.5, above

2nd Stage Conservation Payment: £[redacted] plus VAT = total £[redacted]. See 4.6, above

Plus:

Administration fee for Impact Assessment and Conservation Payment Certificate £[redacted] plus VAT = total £[redacted] See 4.1, above

Fee payable on the issue of a licence £[redacted] (no VAT) See 4.7, above

Date: 21/06/2022 See clause 5.11, below

A breakdown of the Conservation Payment per pond is given at Annex 2.

The Conservation Payment must be made in full before a licence under regulation 55 of the Conservation of Species and Habitats Regulations 2017 may authorise activities that would otherwise breach Regulation 43 of those regulations.

5. Further Important Information

5.1 It is the duty of the Applicant to inform Natural England if the extent of the land affected by the proposed development is not exactly as shown on the Plan attached as Annex 3 to this Certificate or if it alters at any time after the date of this Certificate. An offence may be committed if incorrect information is submitted to Natural England in the course of the licensing process.

5.2 Natural England shall be entitled to terminate this Certificate if information subsequently received causes it to reasonably conclude that the impacts on great created newts, or the required level of compensation, of/for the Applicant's proposals on the Site have been under-stated in this Certificate. Before terminating this Certificate Natural England shall give the Applicant reasonable notice of its intentions and the opportunity to make a written representation against withdrawal.

5.3 This Certificate relates only to the development described in this form and not to any associated or enabling development.

5.4 Natural England's assessment of the total number of ponds to be lost at the Site is informed by the information provided by the Applicant in its Enquiry Form. However, where an Applicant has not provided up to date survey data Natural England determines the number of ponds to be lost at the Site from its own information. In all cases Natural England retains discretion in assessing the number of ponds to be lost as a result of the Applicant's proposals at the Site and its decision shall be conclusive.

5.5 This Certificate is not a licence granted under reg. 55 of the Conservation of Habitats and Species Regulations 2017 (henceforth "the 2017 Regulations") and is not a confirmation or warranty that such a licence will subsequently be granted.[1] Natural England excludes all warranties and representations in so far as the law permits.

5.6 If Natural England subsequently grants a licence to the Applicant under reg. 55 of the 2017 Regulations any such licence will be subject to the conditions therein set out, which may include (but not be limited to) conditions that activities may not be commenced until the Applicant has paid the Conservation Payment in the amount and manner set out herein and that activities may not be commenced until compensatory works have reached a specified stage of completion.

5.7 If Natural England subsequently grants a licence to the Applicant under reg. 55 of the 2017 Regulations Natural England agrees to use and hold Conservation Payment monies payable by and received from the Applicant for the purposes and period of time set out in Annex 2 to this Certificate. Any surpluses properly arising after 25 years from the date of the grant of a licence shall be retained and used by Natural England for the purposes of enhancing the conservation status of great crested newts in England.

5.8 If the Applicant's proposals at the Site are refused planning permission or other essential regulatory consent (including a licence to the Applicant under reg. 55 of the 2017 Regulations) any Conservation Payment(s) made by the Applicant to Natural England pursuant to this Certificate will be repaid in full.

5.9 If following the receipt of planning permission and/or all other essential regulatory consents but prior to the commencement of any works on the Site that could kill or disturb great crested newts or damage or destroy their habitat the Applicant confirms in writing to Natural England that it no longer wishes to proceed with its proposals on the Site any 1st Stage Conservation Payment already made shall be forfeit and any 2nd Stage Conservation Payment already made will be repaid subject to the deduction of such costs as have reasonably been incurred by Natural England or habitat creation contractors on its behalf prior to the receipt by Natural England of such written confirmation. An Applicant who was not required to make staged payments will be repaid any Conservation Payment already made subject to the deduction of such costs as have reasonably been incurred by Natural England or habitat creation contractors on its behalf prior to the receipt by Natural England of such written confirmation. The Applicant acknowledges that Natural England will spend the Conservation Payment in accordance with the provisions of Annex 2 and appreciates that for the purposes of conserving great crested newts it will be reasonable to spend a high proportion of the Conservation Payment within a short period of receiving it.

5.10 If the Applicant only carries out part of the development on the Site and has less impact than that assessed at part 2 of this Certificate it shall be entitled to request Natural England to recalculate the Conservation Payment. Such request shall be in writing and shall contain all the information necessary to allow Natural England to assess the impact of the modified development. If the recalculated Conservation Payment is lower than the Conservation Payment(s) already paid the Applicant shall be entitled to reimbursement of the difference on the following basis: a 1st Stage Payment shall be forfeit; the balance may be repaid from a 2nd Stage Payment subject to the deduction of such costs as have reasonably been incurred by Natural England or habitat creation contractors on its behalf prior to the receipt by Natural England of the request to recalculate; an Applicant who was not required to make staged payments will be repaid the difference subject to the deduction of such costs as have reasonably been incurred

Copyright © Natural England 2020

by Natural England or habitat creation contractors on its behalf prior to the receipt by Natural England of such written request. The Applicant acknowledges that Natural England will spend the Conservation Payment in accordance with the provisions of Annex 2 and appreciates that for the purposes of conserving great crested newts it will be reasonable to spend a high proportion of the Conservation Payment within a short period of receiving it.

5.11 Once signed and dated in section 8, this Certificate shall remain effective for the period of 25 years from the commencement of works on the Site that could kill or disturb great crested newts or damage or destroy their habitat; save that if after two years from the date of this Certificate the Conservation Payment set out at part 4 of this Certificate has not been paid in full Natural England shall be entitled to review and revise the amount of that payment to such sum as at the date of such review is sufficient to pay for the creation and maintenance of sufficient great crested newt habitat to compensate for the impacts of the Applicant's proposals for 25 years. Until signed and dated in section 8 this Certificate is provisional only and if it has been determined that a 1st Stage Conservation Payment is required it will lapse and be of no further effect after 6 weeks from the date given in section 4. If it has been determined that a 1st Stage Conservation Payment is not required this Certificate will lapse and be of no further effect after 3 months from the date given in section 4.

5.12 This Certificate may not be relied on by any person other than the Applicant and may not be assigned to any other person without the prior written consent of Natural England. Natural England's consent will be conditional upon any assignee signing a Certificate in like form to this Certificate, or as appropriate to the circumstances, subject to which consent shall not unreasonably bewithheld.

5.13 Natural England's total liability arising under or in connection with this Certificate, whether in contract, tort (including negligence or breach of statutory duty), misrepresentation, restitution or otherwise shall be limited to the amount of the Conservation Payment paid by the Applicant to Natural England and un-spent as at the date of adjudication of the claim.

5.14 The Applicant's total liability arising under or in connection with this Certificate, whether in contract, tort (including negligence or breach of statutory duty), misrepresentation, restitution or otherwise shall be limited to the amount of the Conservation Payment properly calculable on the basis of the actual development to which this Certificate relates.

5.15 Neither Natural England nor the Applicant shall be liable to the other for any indirect, special or consequential loss or damage or any loss of profits, turnover, business opportunities or damage to goodwill (whether direct or indirect).

5.16 No variation of this Certificate shall be valid unless it is in writing and signed by or on behalf of both parties.

5.17 Nothing in this Certificate shall prejudice, conflict with or affect the exercise by Natural England of its statutory functions (including as statutory consultee), purpose, powers, rights, duties, responsibilities or obligations arising or imposed under any legislative provision enactment, bye-law or regulation whatsoever, nor shall it fetter the exercise of any discretion Natural England mayhave.

5.18 Natural England may terminate this Certificate immediately on notice in writing where, in Natural England's reasonable opinion, compliance with the obligations in this Certificate is likely to conflict with Natural England's statutory functions (including as statutory consultee), purpose, powers, rights, duties, responsibilities or obligations.

5.19 The Applicant acknowledges that Natural England is subject to the requirements of the Freedom of Information Act 2000 and the Environmental Information Regulations 2004 (both as amended) and cannot guarantee confidentiality. The Applicant shall assist and co-operate with Natural England as necessary to comply with these requirements. In responding to a request for information, including information in connection with the subject matter of this Certificate Natural England shall where in its absolute discretion it deems necessary use reasonable endeavours to consult with the Applicant. Notwithstanding this the Applicant acknowledges that Natural England may disclose information without consultation, or following consultation with the Applicant having taken its views into account.

5.20 The Applicant shall ensure that all information produced in connection with the subject matter of this Certificate or relating to this Certificate is retained for disclosure and shall provide all necessary assistance as reasonably requested to enable Natural England to respond to a request for information within the time for compliance and shall permit Natural England to inspect such records as requested from time to time.

5.21 Nothing in this Certificate is intended to, or shall be deemed to, constitute a partnership or joint venture of any kind between Natural England and the Applicant. No party shall have authority to act as agent for, or to bind, the other party in any way.

5.22 The parties do not intend any term of this Certificate to be enforceable by virtue of the Contracts (Rights of Third Parties) Act 1999 by any person that is not a party to it.

Copyright © Natural England 2020

5.23 This Certificate and all disputes or claims arising out of or in connection with the activities of the parties in connection with it shall be governed by and construed in accordance with the law of England.

6. Declarations

This Declaration may only be signed by either:

- A director or senior authorised employee of the corporate Applicant identified at 1 (a), above; **or**
- The person identified at 1 (b), above, as the individual Applicant; **or in either case:**
- A person authorised in writing by the Applicant to complete this Enquiry Form and to make this Declaration. Any such written authorisation must identify the site and development concerned and be irrevocable.

The Applicant declares as follows:

- **All of the information provided by the Applicant to enable Natural England to produce this Certificate is up to date, complete and correct;**
- **All of the information provided by the Applicant in the District Level Great Crested Newt Licence Enquiry Form dated:** 18/05/2022 **is up to date, complete and correct;**
- **The terms and conditions contained within this Certificate are agreed and accepted.**

Hi [redacted]

I agree at this late stage, and given that you have spring and summer data a transect survey now is unlikely to significantly change the results you already have. Do you have the name and address of the site so I can put this on our files?

Kind regards

[redacted]

Subject: RE: Autumn Bat Transect

Hi [redacted]

Thanks for your response. To be clear, I am referring to bat habitat/transect surveys and not

emergence surveys. Under the BCT guidelines 'low' suitability habitat requires a spring, summer and autumn transect survey to assess the use of habitat by commuting and foraging bats. Under autumn, the final month is considered as October. See Table 8.3 for further detail.

Our spring and summer transect surveys have identified small numbers of common bats using the site. Since, the developer has put a hold to the project and I was considered that GMEU may wish to see data from an autumn transect also. My personal opinion is that we have sufficient data and that an autumn/October survey will not change the results in any significant way, however, I am concerned that GMEU may wish to see this data and could potentially object without it.

All of our bat roost assessment surveys were completed during the appropriate times of year, with no constraints.

Please do call me if you wish to discuss further.

Best wishes,

Bottom of Bund Longitudinal Fall.pdf

Hi [redacted]

Please would you be able to provide a little further advice on this one and in particular on the potential run off of surface water from the bunds onto neighbouring residential properties located around it.

You have looked at this one before and we agreed a pre-commencement condition was needed but this particular point came up at Chair's briefing yesterday and I would like to be able to address it at Committee next week.

Below is the response from the applicant's consultant. Do you think this is sufficient?

Thanks

Hi [redacted]

Please see below a short statement provided by the engineers in relation to your drainage query, with a supporting sketch attached:

"It is anticipated that the planting and vegetation on the embankment will absorb majority of the rainwater, therefore surface water runoff will be minimal. In the event of excess surface water runoff, it is highly unlikely that any residual/excess runoff will reach neighbouring gardens as there is a longitudinal fall along the bottom of the embankment which will direct the runoff to flow along the red line boundary naturally."

Regarding the boundary fences, you're interpretation is correct – i.e. all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways.

Kind regards

wsp

Hi [redacted],

Following today's briefing, please could you get your drainage consultant to prepare a short statement and/or plan to cover the following point:

Potential run-off from water from the bunds into neighbouring garden land – a short statement to highlight mitigation measures to off-set that concern. Members will be reminded that the development will be bound by a condition requiring full details of a sustainable drainage system.

The Chair has also raised a query regarding fencing and whether any will be located between the proposed bund and the neighbouring residents properties. Having reviewed the plans, I think I'm right in saying that all fencing is proposed to be located between the proposed buildings and the bunds and the only fencing on the other side would be that belonging to the neighbouring residential properties and/or that alongside the existing bridleways. Can you please confirm that this is correct?

If you could get back to me tomorrow, that would be appreciated.

Regards

H[redacted],

Do you happen to have any site plans where the interface distances with neighbouring residential properties are plotted on the plans, especially those from Units 1 and 2? If so could you send them over?

The impact on local residents will likely come up tomorrow and it would be useful to have a plan to walk the Chair and Vice Chair through.

Apologies for the late request.

Hi[redacted]

Thanks for your various emails. We agree to the conditions as drafted so please proceed with those for the purposes of publishing the Committee report/agenda and please confirm your acknowledgement of my acceptance.

We obviously cannot risk anything preventing the application going to Committee on 11th June, however we do still have concerns with the wording of condition 5 (specifically the ground gas element) and we would like to explore the possibility of agreeing an amendment to this between now and the Committee day itself, with any agreed amendment reported as a Late Item / in a supplementary report/note. Would you / [redacted] be amenable to this? Obviously if no agreement can be reached between now and committee on the condition wording we may ultimately have to live with the condition as drafted and either seek an amendment post-consent or try to deal with

the requirements through condition discharge. Please can you let me know either way?

Kind regards

[redacted]

[redacted] / [redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] A1 [D] A1	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] A1 [D] A1	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious A1, both in the sheet material [A] and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; A1 • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • A1 *Text deleted* A1 • sufficiently strong A1 [B] A1 to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); A1 and to withstand in-service stresses (e.g. settlement if placed below a floor slab); A1 • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. A1 *Text deleted* A1 If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

[A] A1 A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

[B] For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. A1

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours[redacted]'s thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

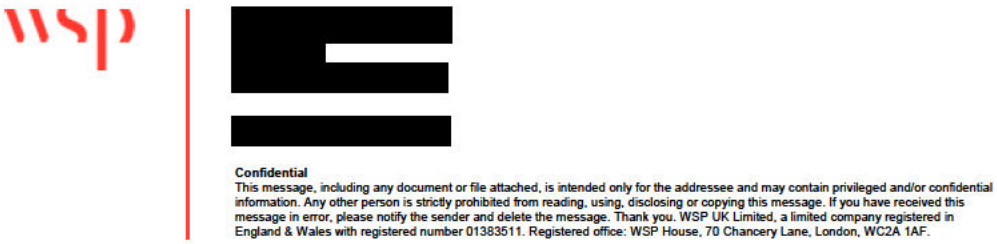
Subject: RE: A/23/96226/MAJOR - Astley Business Park

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).



Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Subject: A/23/96226/MAJOR - Astley Business Park

Hi [redacted],

Firstly, please can you agree to a further extension of time 14th June 2024?

I have attached a draft list of conditions, please can you review and let me have any comments or your agreement on the pre-commencement conditions? Please note that this list is also under review by [redacted] and remains subject to change. Any changes to the pre-commencement condition, or any deletion or addition of any pre-commencement conditions, I'll let you know.

You may be surprised to see a landscaping condition within the draft. This is because I have received some comments from our Urban and Landscape Planner who has recommended the need to have some additional species within the plan and a clear timeframe for implementation given

how important it is in mitigating the scale of the building in respect of neighbouring residential properties. My advice is that this will be a focal point at PC and the safety of a condition may help to ease concerns around the issue of neighbouring amenity. There is also a management and maintenance plan condition; this is needed to ensure that the BNG on site scheme has a 30 year plan around it (and not 10 years as stated in your submitted M&M plan).

Our EP team provided a final response today (attached) and we're satisfied with the extent of acoustic fencing retained.

Hopefully everything else is self-explanatory. Please note that I am on annual leave next week so if you do need clarification on anything, please let me know in the next couple of days.

Regards

Subject: A/23/96226/MAJOR - Land At Astley Park Way, Worsley

Good afternoon [redacted], [redacted]

The above application has attracted a lot of attention locally and a lot of the concerns raised relate to the traffic, highways etc. David Proctor has indicated that a highways contribution would be required so the agent is waiting for the amount to be confirmed so that they can progress the legal agreement.

We need your initial comments as soon as possible please as the applicant is seeking to enter into a PPA, which mean we will have to prioritise our responses etc.

Steven – apologies, I don't think I formally consulted you but could you please accept this email as a consultation request?

Happy to a quick chat through the details of the scheme if that would help.

Thanks

Hi [redacted]

Yes, happy to meet with the transport consultant.

As you say, its in the best interests of the application. Committee will rightly flag the previous application and the proposed junction improvements along the A580. To say that the latest application hasn't even assessed the impact at those junctions will only put doubt in the Cllrs minds.

Kind Regards

[redacted]

Hi [redacted],

Instead of providing the requested information, the agent has challenged the need for it again. I have tried to make the point that its in their best interests to move forward and the information is required to ensure we are in a good position when this comes before Members but…are you okay to meet with them? If so, I'll have a look at our calendars and go back with some dates.

Thanks

Therese

Hi [redacted]

I write further to your email below containing the Transport Policy Team's latest comments. We have reviewed the latest comments and given the technical responses we have provided it is extremely frustrating that we appear to be no closer to resolving highways matters.

As for the suggestion that the responses provided were 'a reiteration of the initial TA', it has come to light that [redacted] (and others at the Council) were copied into the attached email exchange with [redacted] at pre-app stage in which a draft TA and FTP were both submitted, reviewed and commented on by [redacted] – comments which were factored into the submission version TA and FTP. I could have potentially understood there being a difference of opinion between [redacted] and the other highway officers/team had they not been party to the pre-application discussions with [redacted], but the attached email trail quite clearly shows that they were. So, yes, in places we are reiterating points made in the initial TA because those same points were agreed with [redacted] and other highways officers were party to the same initial TA and associated email exchange, yet raised no issues/concerns at the time in terms of assessment years, HGV trip distribution, distribution methodology, traffic flow figures, junction assessments and proposed car parking provision. Had issues been raised at pre-app stage then they could have been resolved well in advance of submission of the application.

I also recall from the last meeting on 15/02/24, in which [redacted] attended, he had suggested that further assessment work for this scheme would be somewhat of an academic exercise given the already substantial committed highway mitigation schemes on the surrounding highway network. We are therefore not clear why the Transport Team are insisting on this further work being undertaken if it is likely to reach the same conclusion as the current TA?

Given the Applicant has entered into a costly PPA, part of which is designed to resolve such issues in a timely manner, we therefore request an **urgent meeting** with you, [redacted], [redacted] and [redacted] / the Transport Team to discuss the latest response and get to the bottom of why exactly this additional assessment work is being requested given the history of highways discussions on this project.

We are also disappointed that the Transport Policy Team is dismissive of the parking justification based on market evidence – the meeting requested above could be used to discuss this matter further and identify potential solutions.

I look forward to hearing of your earliest availability to meet.

Kind regards

[redacted]

Hi [redacted]

The additional information has been assessed by our Transport Policy Team and their comments are below. Unfortunately, it has been identified that the recent submission did not provide the information needed but was more of a reiteration of the initial TA. The following information is required :

1. *Assessment Years – consultant is arguing that a year of app and 5+ year assessment is ok as end user is unknown and this is a consistent approach taken at other local authorities in the NW. The fact that the end user is unknown only strengthens my point. Its going to be a minimum of 3 years before the development is operational. We need to understand the impact growth in traffic will have on the adjacent transport network.*

2. *Committed Developments – fine to exclude Mosley Common, as noted in your email Therese.*

3. *HGV Trip Distribution – Observed count data from June 2022 was used to identify HGV movements. This needs to be explained in greater detail (where in the TA, the split between east and west movements, the locations). The further evidence of HGV movements travelling westbound is a Google image taken from September 2021. This cannot be considered conclusive evidence.*

4. *Distribution Methodology – JTW information taken from 2011 should be used to support a planning application submitted in 2023. Turning count data or another form of relevant information must be used instead.*

5. *Traffic Flow Figures – Response noted, conversion of HGVs to PCUs not accounted for within assessment. As a PCU is equivalent to one standard LGV trip junctions experiencing 30 or more PCU movements should be assessed to accord with the initial response from Network Management.*

6. *Junction Assessments – Must be updated to account for assessment years and potentially updated HGV distribution.*

7. *Proposed Car Parking Provision – with no end supplier identified it is difficult to determine the appropriate level of parking provision. A list of recently consented developments taken from various locations across the north west is not adequate justification. Once operational these sites could have issues with on-street parking for example. There will also be a number of speculatively developed sites with more parking.*

Regards

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

Hi [redacted]

Thank you for your email. Whilst clearly disappointing to have reached this position so very late in the process, we are where we are and are eager to resolve matters as soon as possible. As such, for completeness, the transport consultant has provided technical notes in response to each party's highway comments, as follows:

- 2nd Response to Wigan Council (WC) comments (i.e. [redacted]s comments dated 16 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1003.P02
- 3rd Response to WC comments (i.e. Stephen's comments dated 11 Feb 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1004.P02
- SCC Response (i.e. SCC's comments dated 19 Jan 2024) – Doc ref: 21714-HYD-XX-XX-RP-TP-1005.P01

We have submitted the responses as 3 x separate technical notes as we feel it would be easier for the different parties to review/address, given the number of appendices also included within the individual documents.

In terms of addressing the Mosley Common junction point, Hydrock have included the following paragraph in the '3rd WC response' document which should provide sufficient justification / comfort as to why the junction has not been assessed:

Para 2.3.4 - Notwithstanding the above, Hydrock have reviewed their Traffic Flow Figures (which were previously provided along with the previously submitted TA as part of the application), and identified that the only junction within close proximity of the Mosley common site impacted by the proposed development flows is the A580 / A577 junction. However, as shown in our Traffic Flows figures, the total 2-way vehicle trips (associated with the proposed development) travelling along the A580 to/from the A580 / A577 junction only equates to 19 in the AM peak, and 23 in the PM peak, which is less than the 30+vehicle 2-way trips assessment criteria suggested by WCC. Therefore, this junction was not requested to be assessed. Furthermore, it should also be noted that this junction was also recently upgraded in 2023.

We would hope it isn't necessary given the clarity provided in the various notes/responses but if a meeting is required to resolve any residual matters following review of the above, please can you coordinate as soon as feasibly possible.

Please can you confirm receipt and please can you re-consult the three parties and request their urgent review of the above/attached and confirmation that highways matters are indeed now resolved so that we can move forward to Committee.

Kind regards

[redacted]

To: [redacted]
Subject: A/23/96226/MAJOR Astley Business Park, Wigan

Good afternoon [redacted],

Apologies for the delay in providing an update for you but I can confirm that my highway colleagues have held further discussions earlier this week as planned, and the outcomes of those discussions have been shared with [redacted] and myself.

Taking all matters into account, I remain of the view that the points raised below must be addressed in full before Officers can make a positive recommendation to Members; the only exception to this is the reference made to the Mosley Common application. I accept that this was not a committed development when the application was submitted (nor did the Mosley Common application take this application into account in their transport studies). However, I would advise that providing some

commentary on the combined impacts (now that it is a committed development) may provide some additional comfort to Members.

I appreciate that some of the points below were addressed in the Technical Note received early last week but it would be appreciated if this could be combined with a full response on all other points for publication and re-consultation.

The information is necessary to ensure that Officers can confirm that the proposed development is acceptable in highway terms and confidently relay this to Members. It is important to note that this application has attracted 100+ objections from local residents, a call in from local Councillors and an objection from James Grundy MP. One of the common themes running through all of these is the impact on the local highway network and as such, taking the application before Members at the present time and in advance of all matters raised by [redacted] and Salford Council being addressed, raises a significant possibility that Members could overturn or defer the application.

I appreciate that issues have been raised that were not done so at the pre-application stage and whilst that is regrettable, it is not a reason to move past them without addressing them in full to ensure that when this application is reported to Members, Officers can be confident of our positive recommendation being accepted.

On other matters, I can confirm receipt of the CGIs earlier this week. In addition, I have requested some further guidance from our ecology advisors on a potential financial contribution to achieve net gain off site but would welcome your position on this matter also as previously discussed.

- *Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).*
- *Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.*
- *Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.*
- *Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.*

- *Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)*
- *Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.*
- *Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.*

Hi [redacted]

You'll see from my email chasers to [redacted] (today and yesterday) that unfortunately we have not yet received an update from [redacted] following his meeting with [redacted] on Monday, despite what we had agreed at last week's meeting, which is clearly disappointing as we are no clearer as to what the Council's collective highways position is. Please can you chase internally and provide an urgent update?

It is worth noting the attached email trail between the transport consultants, Hydrock, and [redacted] (which [redacted] was cc'd to – I assume it is the same Steven that has now raised issues). The attached email trail clearly shows that [redacted] and others were provided with the draft TA and Framework Travel Plan prior to submission, comments which were picked up in the submission versions. It is therefore all the more confusing that despite having had sight of a draft TA that new issues have been raised.

I trust you can provide us with an urgent update so that we are clear where we stand.

Kind regards

Morning [redacted]

As per my email of the 27th of September please can you confirm if these are your complete set of comments?

We are looking to finalise our TA/FTP and want to make sure we get everything wrapped up that you require.

Many thanks

Kind regards

Morning [redacted],

Are you able to provide an update please. It is nearly a week since TfGM had the digital models.

If that was the last element they required they must be nearly complete with their review?

Notwithstanding their input are you able to provide us with your comments?

Many thanks

Kind regards

Good afternoon [redacted],

Following our recent discussions with yourself and [redacted] (cc'd into this email), please find attached the pre-application Draft Transport Assessment for the above site. We would be grateful if you could please review and provide any comments.

If you have any queries, please do not hesitate to call, as we are more than happy to run through any queries in detail.

As you are aware this scheme is quite time sensitive, therefore an expediated response would be appreciated.

Additionally, given the size of the document if you can please confirm that you have received the attached.

Many thanks,
[redacted]

Kind regards

From: [redacted]
Sent: 02 February 2024 14:53
To: [redacted]
Subject: A/23/96226/MAJOR - Land At Astley Park Way, Worsley

Follow Up Flag: Follow up
Flag Status: Flagged

Good afternoon [redacted],

The following bullet points reflect the views of the Transport Planning Team Manager. This needs to be considered in line with the previously provided comments by the Highways team and those from Salford Council.

Regards

[redacted]

- Year of application assessment unacceptable. Year of opening assessment (2027) must be undertaken instead plus a future year assessment (2032).
- Committed developments – Mosley Common (1,050 units) recently approved at planning committee and will impact operation of the adjacent highway network.
- Disagree with the proposed trip distribution. Majority of LGV movements turn right onto Chaddock Lane, rather than left. There is then a 50/50 split of HGV movements turning right/left. Given the proximity to SRN, it is anticipated that the majority of HGV movements would turn left onto Chaddock Lane before heading east on the A580.
- Strongly suggest trip distribution is based on turning count data, rather than JTW information from 2011.
- Numbers on trip distribution diagram incorrect. Certain values do not add up (Salford reference the same issue)
- Extant permission includes improvement schemes at A580/A572 and A580/A577 junctions, but this assessment does not even consider impact at these junctions.
- Depending on the split between B2/B8 use at the development there is potential for a requirement of up to approximately 550 spaces. The proposed provision is much lower, and we need to understand why that is the case. There are already issues with on-street parking on the adjacent highway network and any additional pressure needs to be avoided at all costs.

Hi [redacted]

Further to our meeting last week, I'm just wondering if you've had any feedback yet from Wigan's Transport Policy Manager?

Separately, in addition to the BNG spreadsheet provided under separate cover, I attach the unredacted signed (and counter-signed) GCN License agreed with Natural England and as requested by GMEU in their consultation response (attached). Please can you pass this on? We've also commissioned the requested additional bat endoscope survey (requested pre-determination) and should have a supplementary letter/survey to submit to this effect in the next week or so.

Kind regards

[redacted]

Good evening,

The Local Highway Authority consulted TfGM in respect of Application A/23/96226/MAJOR on the 24th November 2023. Please could you advise of the timescale that you would require comments by.

Please note that in order for TfGM to carry out a full review and validate the modelling work, the LINSIG files will need to be supplied.

Kind regards

Hi [redacted]

Would you please be able to review the email below in relation to the need to apply our standard pre-commencement land contamination condition on this application. I don't believe they have submitted anything new since the last time you reviewed it (I hope I would have re-consulted!)but if they have, it will be on Civica.

This one is listed for the June committee so a quick turnaround would be really appreciated. I'm on leave next week but please copy [redacted] as he is reviewing the draft report and conditions.

Thanks

CAUTION External E-Mail: Take extra care before clicking links, attachments and actioning requests. Think Before you Click

[redacted]

Further to my email below and the attached draft conditions mark-up, I provide the technical justification provided by the engineers which we feel is sufficient explanation/justification for the requirement for further ground gas monitoring required by parts 2 of condition 5. Please can you review, pass on to the respective consultee and see if we can agree amendments to these conditions ahead of Committee?

In addition, as noted within the attached, a Phase 2 SI was submitted with the application and we therefore do not feel that further intrusive site investigation is required as currently stated in draft conditions 5 (part 1) and 6(a).

The engineer's response below is in respect of the requirement under condition 5 for further ground gas monitoring.

Engineer's Response:

We recommend removal of the requirements for ground gas monitoring following the coal mine grouting operations, on the basis that adequate ground gas protection measures will be installed underneath all building footprints as part of the development works, prior to occupation.

The ground investigation works carried out for this specific development in 2022 included ground gas monitoring. The conclusion of the investigation report (DCE report ref. 21133J-02) was that Characteristic Situation 2 was appropriate for the site. Given that coal mine grouting works will be undertaken across the site any ground gas flows are expected to reduce. The consequence of this would be that the site's Characteristic Situation value would either remain at 2 or reduce to 1. The Developer will be providing a gas resistant membrane beneath all building footprints that meets the criteria outlined within 'Code of practice for the design of protective measures for methane and carbon dioxide ground gases for new buildings (BS 8485)' that adequately protects for Characteristic Situations or 1, 2 and 3. Hence, the level of protection greatly exceeds the level required and as such no further ground gas monitoring should be needed.

We outline below the building gas protection scores for various Characteristic Situation values and the gas protection score provided by gas resistant membrane in accordance with BS 8485:

Building gas protection scores (from table 4 of BS 8485):

CS	Minimum gas protection score (points)			
	High risk		Medium risk	Low risk
	Type A building	Type B building	Type C building	Type D building
1	0	0	0	0
2	3.5	3.5	2.5	1.5
3	4.5	4	3	2.5

Gas protection measures (from tables 5 and 7 of BS 8485):

The gas protection score for the gas resistant membrane and ground floor slab will be 3.0 (1.0 + 2.0) as determined from tables 5 and 7 from BS 8485, shown below:

Floor and substructure design (see Annex A)	Score [A]
Precast suspended segmental subfloor (i.e. beam and block)	0
Cast in situ ground-bearing floor slab (with only nominal mesh reinforcement)	0.5
Cast in situ monolithic reinforced ground bearing raft or reinforced cast in situ suspended floor slab with minimal penetrations	1 or 1.5 [B]
Basement floor and walls conforming to BS 8102:2009, Grade 2 waterproofing [C] [D]	2
Basement floor and walls conforming to BS 8102:2009, Grade 3 waterproofing [C] [D]	2.5

[A] The scores are conditional on breaches of floor slabs, etc., being effectively sealed.

[B] To achieve a score of 1.5 the raft or suspended slab should be well reinforced to control cracking and have minimal penetrations cast in (see **A.2.2.2**).

Protection element/system	Score	Comments
Gas resistant membrane meeting all of the following criteria: • sufficiently impervious 〈A1〉, both in the sheet material A) and in the sealing of sheets and sealing around sheet penetrations, to prevent any significant passage of methane and/or carbon dioxide through the membrane; 〈A1〉 • sufficiently durable to remain serviceable for the anticipated life of the building and duration of gas emissions; • 〈A1〉 *Text deleted* 〈A1〉 • sufficiently strong 〈A1〉 B) 〈A1〉 to withstand the installation process and following trades until covered (e.g. penetration from steel fibres in fibre reinforced concrete, penetration of reinforcement ties, tearing due to working above it, dropping tools, etc); 〈A1〉 and to withstand in-service stresses (e.g. settlement if placed below a floor slab); 〈A1〉 • capable, after installation, of providing a complete barrier to the entry of the relevant gas; and • verified in accordance with CIRIA C735 [N1].	2	The performance of membranes is heavily dependent on the quality and design of the installation, resistance to damage after installation and integrity of joints. 〈A1〉 *Text deleted* 〈A1〉 If a membrane is installed that does not meet all the criteria in column 1 then the score is zero.

A) 〈A1〉 A membrane with a methane gas transmission rate <40.0 ml/day/m²/atm (average) for sheets and joints (tested in accordance with BS ISO 15105-1:2007 manometric method) is regarded as sufficiently impervious.

B) For example, reinforced LDPE (virgin polymer) membranes having a minimum mass per unit area of 370 g/m² and not significantly less than 0.4 mm thickness between the reinforcement scrim (tested in accordance with Procedure D (2 mm diameter tip) of BS EN ISO 9863-1:2016) installed above floor slabs are considered sufficiently strong to meet the performance criteria (see also **C.3**). Thicker and more robust membranes or an additional membrane protection layer should be installed directly beneath cast-in-situ floor slabs. 〈A1〉

Note that the installed gas membrane is to be verified in accordance with CIRIA C735 prior to occupation. We have no issue with the pre-occupation requirement for a Verification Report to be submitted and approved.

Please call me if you have any queries on the above.

Kind regards

Hi [redacted]

Further to my emails below, please find attached my comments on the draft conditions. I've added the list of plans to condition 1, as requested and made some minor tracked changes to other conditions.

My comments within are self-explanatory and I'd be grateful for yours/[redacted] thoughts/responses – condition 5 is the only real area of concern as the requirement for further gas monitoring is considered not necessary (at least by our technical team) and would delay actual construction work commencing whilst it was carried out. As I mention within, I will provide a technical response/justification explaining why the gas monitoring/further ground investigation part of the condition is not required and hopefully that will facilitate an amendment to the condition.

As below, I will try and provide further clarity on the night-time operations for your Committee report and will send through the more detailed breakdown of construction and operational economic benefits as soon as I have it.

Kind regards

Hi [redacted]

Further to the below, I'm still waiting on some comments at my end on draft conditions but will send our comments back tomorrow as soon as I can (there shouldn't be many but potentially some tweaks requested relating to some of the details of the pre-commencement conditions relating to further site investigation / gas monitoring).

In terms of the construction and operational benefits, my colleagues are doing some number crunching and I will also hopefully (by tomorrow) be able to 'fill in the blanks' of the red text you provided. At a high-level, for information, PLP have confirmed the following:

- Circa up to 500 jobs would typically assumed across this floor area on a speculative basis noting this would be spread across shift patterns so without any impact on the proposed parking provision.
- Build cost of circa £30 million.
- Circa 12 month build programme (entire development intended to be built in one phase).

Regarding the operations/activity during the night time, the feedback I've had at this stage is as follows:

In terms of operations overnight, given the speculative nature of the units it is difficult to be precise albeit all the occupiers usually have their own working practices to reflect day and night time local sensitivities ie keeping noise to a minimum at night etc.

I'll try and get something more detailed to assist with your Committee report on the night time working.

I'll ensure [redacted] is cc'd to any further emails I issue whilst you're away next week.

Kind regards

Hi [redacted]

The extension of time to 14th June 2024 is agreed.

Good news on the EP position on the revised acoustic fencing, thanks for confirming.

I'll come back to you tomorrow on draft planning conditions (thank you) and also your queries in relation to constriction/operational benefits/figures and query from last Friday about night-time working/activities.

Kind regards

Hi [redacted]

Sorry for the delay in my response.

I've reviewed the Technical Note and its more of the same I'm afraid, with lots of references to our previous responses. Please see below comments on the response:

1. Assessment Years – consultant is arguing that a year of app and 5+ year assessment is ok as end user is unknown and this is a consistent approach taken at other local authorities in the NW. The fact that the end user is unknown only strengthens my point. Its going to be a minimum of 3 years before the development is operational. We need to understand the impact growth in traffic will have on the adjacent transport network.

2. Committed Developments – fine to exclude Mosley Common, as noted in your email Therese.

3. HGV Trip Distribution – Observed count data from June 2022 was used to identify HGV movements. This needs to be explained in greater detail (where in the TA, the split between east

and west movements, the locations). The further evidence of HGV movements travelling westbound is a Google image taken from September 2021. This cannot be considered conclusive evidence.

4. Distribution Methodology – JTW information taken from 2011 should be used to support a planning application submitted in 2023. Turning count data or another form of relevant information must be used instead.

5. Traffic Flow Figures – Response noted, conversion of HGVs to PCUs not accounted for within assessment. As a PCU is equivalent to one standard LGV trip junctions experiencing 30 or more PCU movements should be assessed to accord with the initial response from Network Management.

6. Junction Assessments – Must be updated to account for assessment years and potentially updated HGV distribution.

7. Proposed Car Parking Provision – with no end supplier identified it is difficult to determine the appropriate level of parking provision. A list of recently consented developments taken from various locations across the north west is not adequate justification. Once operational these sites could have issues with on-street parking for example. There will also be a number of speculatively developed sites with more parking.

We don't really have any new information, its just a reiteration of the initial TA. We need more before this is considered acceptable.

Kind Regards

Good afternoon [redacted]

The applicant has provided the attached, and commentary below, responses to the issues identified by yourselves and Salford Council. As discussed during our meeting with the applicant/agent a couple of weeks ago, I'm not intending on re-consulting with Salford Council so long as we are satisfied that the issues raised have been addressed.

Kenny – Will you reconsult with TfGM?

Please can you review the attached and let me have your comments as soon as possible?

Thanks

Hi [redacted]

Thank you for your email. Whilst clearly disappointing to have reached this position so very late in the process, we are where we are and are eager to resolve matters as soon as possible. As such, for completeness, the transport consultant has provided technical notes in response to each party's highway comments, as follows:
