

<p>I would like to have:</p> <ol style="list-style-type: none">1. Information on the number of CCTV cameras in your area2. Information on the number of cameras that are faulty or non-operational across your area to date (March 2nd, 2026) and also during the following periods 2024, 2025 and the current 2026 period. This can be broken down into months or years. However, the data is held.3. A percentage and number breakdown on reasons for them not being in use, i.e. vandalised, faulty, outdated equipment etc4. Where there were faulty cameras, I would like details on how long it took for those faults to be fixed. I am looking for data on the date a camera was reported faulty and then a date for when it was fully operational again.5. Details on how often CCTV systems in your area are reviewed, when was the last time the systems were reviewed or audited as a whole to check suitability rather than fault fixing specific cameras.	<p>612</p> <p>2024 - 153 reported issues 2025 – 107 reported issues 2026 – 23 reported issues to date.</p> <p>Reported issues vary from Telemetry, video loss, Power, network / connection issues</p> <p>Typically fault resolution is within 3 days. Unfortunately, there are mitigating circumstances outside our control with power, damage to infrastructure etc. Please refer to table below</p> <p>Our systems are reviewed annually, camera checks are performed daily, and our Central Camera Management system was updated in 2023 where legacy analogue cameras have been replaced with digital / IP. Schemes are regularly audited and assessed for 'Fit for Purpose' and we are annually assessed by the NSI / SCC</p>
