

Please can you provide us the costs for Brown Street Apartments - 01/02/2024 to 10/03/2026 –

1. Cost of Install of EV Equipment

The total cost of installation of electric vehicle charging system at Brown Street apartments was £5,973.
2. Cost of Maintenance / Service Contract / Servicing - and details of all servicing that has taken place

Communal Electric Vehicle Charging Points are tested and inspected every 12 months by our internal electrical test team. The costs for the testing and inspecting are not specifically allocated as these duties fall within the role of Council compliance staff who have a broad remit of responsibility.

The last inspection was carried out 12-02-2026 at which an EICR was issued as Satisfactory and deemed electrically safe for continued use on the inspection date. A copy of the EICR is attached.

The Monta service charges for the chargers at Brown Street are £328 per year.
3. Cost of Electricity consumption for the vehicle charges we have used v's the rate paid.

The electricity costs are 26.5p / kwh. There is also a 4.5% transaction fee which would equal a total of 27.7p kwh. The rate charged on the EV chargers is 50p kWh
4. Details of the Electricity Tariff at Brown Street South Apartments.

The Council does not procure electricity through a domestic tariff. Procurement is via a large-scale framework (YPO) due to the scale of consumption across all Council assets. The Landlord supply of power is via Npower.
