

Request

1. A list of roads or streets where standard refuse or recycling collection vehicles are currently unable, or instructed not, to travel for routine household collections.
2. If time and cost limits allow, provide the same information for commercial waste collections carried out by the council or on its behalf.
3. Where recorded, the reason for each restriction, such as narrow roads, unsafe reversing, weight restrictions or lack of turning space.
4. Where recorded, how collections are instead carried out, such as using a smaller vehicle, crews collecting on foot, or residents using an agreed collection point.
5. Where recorded, the date on which the current access restriction or alternative collection arrangement began.

Response

Full list of streets collected by our smaller rural vehicle for both residual and recycling collections on the attached excel spreadsheet.

No commercial waste collections are undertaken.

We do not record the reason for each restriction.

All the streets on the spreadsheet are collected by a smaller rural RCV 18tonne vehicle.

We don't collate data on when a decision is made to collect on the rural collection, this is investigated and decided by our Area Waste Supervisors.
