Request

1. The Council's policy or guidance, if any, on waste produced by a business that is run from a home and has no other premises: whether that business may put its waste in the household collection, or must arrange a commercial or trade waste collection (from the Council or from another collector); and any condition or limit the Council applies.

Response

1. Wigan Council does not accept waste produced by a business run from a home. Business or trade waste cannot be placed in the household collection, litter bins or taken to a household waste recycling centre. Businesses must arrange a private commercial/trade collection or take their waste to a private waste disposal facility. Businesses must check the waste contractor is registered to transport or accept their waste and keep evidence (known as a waste transfer note) for two years.
