Request

1. Who has the Term Maintenance agreement for highways maintenance?

Response

1. The Council does not have a single external Term Maintenance Agreement covering all highway maintenance activities.

The majority of highway operational activities are delivered in-house by the Council's operational teams, including:

Pothole repairs

- Drainage repairs and maintenance
- Highway and footway resurfacing works
- Street lighting maintenance and installations
- Traffic sign installations and maintenance

Carriageway resurfacing schemes are procured separately through competitive procurement exercises. Contractors are invited to bid for these works through procurement opportunities advertised on The Chest procurement portal.

Accordingly, there is no single contractor that holds a term maintenance agreement for all highways maintenance functions.
