

We need your help!

Project Overview

We're a relatively new group with the aim of increasing biodiversity in Wigan Borough. We work with residents, other groups and the council to improve a variety of spaces by adding plants for pollinators, adding shelter and water for wildlife, removing litter etc. So far we've worked on a number of spaces around Atherton, Beech Hill and Tyldesley. We also have an active social media presence where we share info on gardening for wildlife, offer advice and create articles to help people get started in their own gardens.

What support is needed:

Equipment/resources:

Gardening volunteers for set dates. We often have dates around the borough.

Give it a Grow Wigan

What difference it would make to our project?

We can get a lot more done on gardening days with more hands. With more support, we can work on more areas and achieve a lot more in a session. It also makes the work easier going and more enjoyable to have more people helping out.
