

We need your help!

Project Overview

We're a group working all over the borough to improve urban areas for wildlife.

What support is needed:

We need mulch (bark chipping, soil improver or manure) to put over the veg and flower beds we've been working on. We also could do with some small hand tools for when volunteers join us. And any flowers that are perennials. Any spare stumps for a new stumpery/ woodland style garden we're planning would also be fantastic.

Give it a Grow Wigan

What difference it would make to our project?

It would enable our work to continue this year and help everything we've done so far to grow better.
