Developing Number Knowledge

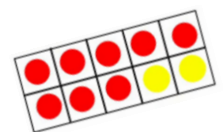

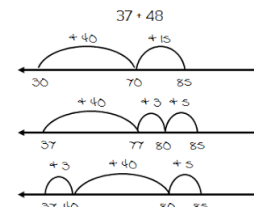

Four professional development training days drawing on extensive programmes of research, curriculum development, and teacher development.

A coherent, up-to-date approach emphasizing computational fluency and the progressive development of students' mathematical sophistication.

Organised in key domains of number instruction, including structuring numbers 1 to 20, knowledge of number words and numerals, conceptual place value, mental computation and written computation methods.

This four-day professional development course takes place over two lots of sessions. It is based around the text '**Developing Number Knowledge**' and delegates will receive a copy along with assessment and teaching resources. It is designed for classroom and intervention teachers, special education teachers and teaching assistants. Targeting upper Key Stage 2 and lower Key Stage 3, giving guidance and support around using Maths Recovery strategies. It will equip teachers with detailed pedagogical knowledge and resources to teaching number. Maths Recovery is a researched based, long established international intervention program that is accredited by NCETM.

The cost is £350 pp. This includes a copy of **Developing Number Knowledge** and assessment and teaching resources.
